AMERICAN BEAUTY

ROSE COLLECTION.

Who has not heard of the American Beauty, the world renowned rose famed in story, poetry and song. The cut flowers being frequently sold during the winter season at \$10.00 to \$25.00 per dozen. What flower lover has not dreamed that some day she would have a "garden of roses" with American Beauties galore. For a long time we have been planning this collection for our customers and growing vast numbers of plants for the immense demand which is sure to come. Read carefully the wonderful list of varieties and notice the low price.

AMERICAN BEAUTY.—The old favorite ever popular variety. Unequaled for large size, beauty and fragrance. They do well grown in the open ground and with slight protection live through the winter in the northern states. Flowers are very double of deep brilliant red shading to a rich crimson carmine. Has the true ever blooming qualities. Strong young plants each 15c, large two-year-old dormant plants 35c each, doz. \$3.50.

WHITE AMERICAN BEAUTY.—A pure ivory white rose of the same form and fully equal in size, beauty and fragrance but easier grown and a much better bloomer. In Germany where it originated it is called *Kaiserin Augusta Victoria* and it is truly a royal variety. It has no rival as a white bedding rose for it grows vigorously, producing a constant succession of crops of flowers. It is a hardy Hybrid Tea variety like the American Beauty and throws up many blooming stems and all of them are surmounted by lovely flowers. The buds are of elegant shape and slowly develop into full open, very double flowers with wide petals of best substance. It is a faultless variety of exquisite fragrance. Each 15c. Large two-year-old plants 30c each.

BLACK BEAUTY.—This magnificent rose which has sometimes been called Black Prince, has a fine large sized flower of a very dark velvety crimson shaded with maroon and black. Fragrant and desirable, each 15c. Large two-year-old plants 35c, doz. \$3.25.

STRIPED BEAUTY.—Comparitively a longer flower than the American Beauty, the buds being shaped more like the La France. Color a beautiful bright pink, shaded with crimson or carmine red. Each 15c. Large two-year-old plants 30c, doz. \$3.00.

MOSS BEAUTY.—If the people only knew how easily these can be grown we would be unable to supply the demand, but it is the popular opinion that moss roses are quite difficult to grow. Every one can succeed with this variety which is a beautiful shining pink color and the buds are very bountifully supplied with Moss. Each 20c, large two-year-old dormant plants 35c, doz. \$3.50.

PINK BEAUTY.—Similar to American Beauty but the flowers are just a trifle flatter and of handsome shining pink color, shaded with carmine, splendid bloomer and very hardy. Each 15c. Large strong two-year-old plants 30c, doz. \$3.00.

SPECIAL! One strong plant each of the above six roses for seventy-five cents. One large two-year-old plant of each for \$1.85 Sent by mail to any town in the United States or Canada.

ABOUT OURSELVES.

The first question which comes to the mind of the prospective buyer about any seed house is "are they reliable?" Almost everyone in Iowa who uses seeds knows the Iowa Seed Company and our **Choice Iowa Seeds** are sown in every neighborhood in the state, but as this catalogue goes to many in all parts of the world who have not dealt with us, a few words about our business may help us to become better acquainted. This business was established in 1870—thirty-seven years ago, and it has grown until now it occupies a prominent place in the seed trade of the country.

The business has been under the same management many years past, the present manager having been connected with the company twenty-nine years. During all this time we have been constantly in close touch with the farmers and gardeners, and know what will prove the most satisfactory in the various localities. Success in the seed trade depends almost entirely on the confidence of the people, and our customers have learned that they can rely implicitly on us.

OUR ESTABLISHMENTS.

This business has now reached such proportions and is so diversified that it is impossible to conduct it all under one roof, and the accompanying illustrations will help you appreciate our efforts in building up one of the most substantial business enterprises in the world to-day.

THE IOWA SEED STORE is so well known in Des Moines that it would be difficult to find even a child in this city of 80,000 inhabitants who does not know its location. It occupies the large building at 613-615 Locust street within three or four blocks of the postoffice, express offices and principal railroad passenger stations. The large store room is full of interest to everyone who has a farm or garden, or who loves flowers. Here are also located the offices and correspondence department. During our busy season we receive 2,000 to 5,000 letters every day, and it requires seventeen typewriters to answer the correspondence. We are always glad to have our customers call and examine our stock and manner of doing business.

31 NEW GREENHOUSES erected during the past four years are devoted exclusively to growing plants for the mail order trade, and they contain a greater variety of plants than any other greenhouse in the west. Hundreds of plant orders are filled daily during the busy season; small plant orders can be mailed direct from the branch postoffice nearby. They are located convenient to the electric car line and fronting on Kingman Boulevard, one of the finest driving streets in the city. Here we devote fully 12 acres to flowers, making the finest display to be found in the west.

THE WAREHOUSE on South Fifth street we have occupied for many years for storage purposes only. Large lots of seeds which come in after harvest, are thoroughly cleaned and then put away in this building and held in readiness for the spring trade.

MAIL ORDER BUILDING.—Our trade has increased so constantly that we purchased the ground at 208-210-212 S. Eighth St. about six blocks from the store, and erected thereon a large building specially arranged for our trade. The railway tracks beside the building give us unexcelled facilities for handling carload lots, and we are centrally located between the various freight depots, so that small shipments can be made promptly. Our machinery is operated by four electric motors, and we claim that our mills for cleaning seeds cannot be surpassed. We can readily fill 2,000 to 4,000 orders per day in this building, and they are handled in such a careful way that errors seldom occur. Most of our employees have been with us many years and appreciate the importance of each order, no matter whether small or large, and no "green hands" handle seeds in bulk.

SEED FARMS.—It requires the seed crop from about 8,600 acres to supply our trade and the farms are widely isolated so as to avoid any danger of mixtures. Some seeds cannot be grown to advantage here, and we contract with practical seed growers in other states and a few in Europe to grow for us. For instance, we pay our growers in Denmark about three times as much for cauliflower seed as it would cost to have it grown in this country, but it is much superior.

1870

1907

Thirtyseven Years Successful Business!

Des Moines, Iowa, January, 1907.

To Our Friends and Patrons:

It is always a pleasure to meet our customers, many of whom visit our store every season, but by far the larger number of them we never see as our trade is so world-wide in extent, and therefore our only way to talk to you is through the medium of this, our annual catalogue. We desire, first of all, to thank you for your liberal patronage in the past which we assure you is most heartily appreciated. The past year may be considered one of the most profitable that the farmers and gardeners have ever had. The crops have, on the whole, been good in all parts of the country and prices much above the average, so that we have every reason to believe that the new year will bring fully its share of blessings. Our seed crops of almost everything have been abundant. They were harvested in excellent condition, are of superior quality and we are prepared to furnish our customers this season with the best seeds that they have ever had, fully realizing that in the past the high quality of our **CHOICE IOWA SEEDS** and our promptness and painstaking care in filling orders have made many friends. It is our highest ambition to merit the title which has so often been applied to us, namely:

"SEEDSMEN TO THE AMERICAN PEOPLE."

What Des Moines People Say:

Voluntary expressions of a few of the leading market gardeners of this city, showing how we stand at home.

I have now been purchasing seeds from you for 30 years and have found them true to name and of good quality. I recommend your seeds to all gardeners.

HENRY ROLLINSON.

I have planted your seeds for 26 years and have found them perfect and true to name. I can always depend on you for quality and purity.

F. SESTIER.

I have planted Iowa Seed Co's seeds for the last 27 years. Have found them true to name and of good quality, and can cheerfully recommend them to any gardener.

DUNCAN ELDER.

By this we mean not only native born Americans, but all residents of this country.

WE GROW OUR OWN SEEDS

either on our own place or have them grown from carefully selected stock seeds, and it requires the entire seed crop from about 8,600 acres to supply our trade. The soil and climate of Iowa are specially adapted to growing and maturing most seed crops, still there are some varieties which will produce better seed in other localities, and we spend a large part of the summer and fall in traveling around among our growers, inspecting the growing crops.

Again thanking you for past favors, respectfully soliciting a continuance of your patronage, and wishing you a happy and prosperous New Year, we remain,

Your friends,

IOWA SEED COMPANY.

M. KURTZWEIL, President.
CHAS. N. PAGE, Treasurer and Manager.

SUGGESTIONS TO CUSTOMERS.

ORDER EARLY.—The best time to order is just as soon as you receive this catalogue, as we can always give your orders more of our personal attention if they come in before the rush of the spring trade. Please use the order sheet as it makes it more convenient for us in filling orders. Terms are invariably cash with order as we keep no book accounts in our mail order department, and the expense of sending goods C. O. D. is quite large. Postage stamps received as cash.

SHIPPING.—There are five express companies and fifteen railroad lines at Des Moines, so that quick shipments can be made to any town in the United States. It is well to remember that express charges are usually much higher on heavy goods, and you should order them sent by fast freight.

CHARGES PREPAID.—All Vegetable and Flower Seeds, Bulbs and Plants, except those noted, are sent prepaid by mail or express by the quickest and most direct routes unless ordered otherwise, and we guarantee their safe arrival. Seeds sold by the peck or bushel, field seeds, potatoes, implements and other heavy goods are sent by freight or express. The terms "by express" and "by freight" mean that goods are shipped at purchaser's expense, not prepaid.

OUR PRICES.—Our constant aim is to make the highest quality the first consideration, and next to put our prices as low as good seed can be sold.

DISCOUNTS.—On all orders for seeds in packets the purchaser may select twenty-five cents worth extra for each one dollar sent us. This refers only to seeds in packets, not in bulk. This discount does not apply to Collections of any kind nor other special offers. Each year we put up thousands of packets of seeds for free distribution among our customers, by adding liberally of them to orders. We will allow you a discount of ten cents per pound on vegetable seeds, such as are listed as prepaid, if you are willing to have them sent by express or freight at your expense.

SMALL ORDERS.—If you only want a single packet, do not hesitate to send for it. We take as much pains to fill small orders promptly and correctly as we do large ones. Orders for Flower Plants and Nursery Stock, however, must amount to at least twenty-five cents.

PLANT ORDERS.—Orders for plants will be filled as early in spring as we consider it safe to send them. If ordered for immediate shipment in severe weather they will be sent at purchaser's risk.

WHAT WE GUARANTEE.—That all money sent us for seed shall reach us if sent by registered letter, P. O. or express money order, or bank draft, made payable to our order. That your order will be filled promptly and well. That goods ordered will reach you safely. Keep a copy of your order. Sometimes persons think they have ordered articles which they have omitted, and blame us for not sending them.

OUR RESPONSIBILITY.—As this book will probably go into the hands of many who are unacquainted with us, this question will naturally arise, and in answer to same we refer you, by permission, to the Century Savings Bank, of this city, to the postmaster, or to any express company.

ABOUT WARRANTING.—We thoroughly test all our seeds and nothing is sent out which we do not believe to be good in every respect. When it is considered how many are the contingencies on which the success of any crop depends, such as sowing too deep or too shallow, too wet or dry soil, unfavorable weather, insects, etc., our customers will readily see that it would be sheer folly for anyone to warrant them to produce a perfect crop, and we want it plainly understood that while we exercise great care to have all seeds pure and reliable, and also true to name, we do not give any warranty, express or implied. If the purchaser does not accept the seeds on these terms and conditions, they are to be returned at once, and the money that has been paid for same will be refunded. No officer, agent or employee of this company is authorized to make any warranty whatsoever. However, we have so much confidence in our seeds that we hereby agree to refill any retail order for vegetable or flower seeds free of charge should they prove otherwise than as we represent them. We know of no responsible seed firm in the world which guarantees seeds any further than this. Compare with other seed catalogues and you will find that we are right.

MARKET GARDENERS and others who buy vegetable seeds in bulk to the amount of \$5.00 or more, are requested to send for our Market Gardeners' Price List. This list for market gardeners is intended only for large buyers, and is exclusively for those who order vegetable seeds alone by weight or measure amounting to \$5.00 or over. Club orders which call for this amount of bulk seeds altogether are entitled to these prices.

PREPAID RAILROAD STATIONS.—Many of our former customers live at Prepaid Railroad Stations where there are no agents. In such cases we must request them to send sufficient money to prepay freight charges on heavy shipments, also in cases where perishable or other goods are ordered to be sent by freight or express to such great distances that cost of transportation will nearly or quite equal the value of goods.

OUR GERMAN FRIENDS will be pleased to notice that we also issue a catalogue in the German language, and we will take pleasure in sending a copy free on request. Tell your German neighbors about it.

Unseren deutschen Freunden diese hiermit zur Nachricht, daß wir auch Samen-Kataloge in deutscher Sprache drucken. Viele unserer Landsleute haben der Mutterprache den Vorzug und verlangen wir diese Kataloge frei an Alle, die darum anfragen. Bitte senden Sie uns die Adressen Ihrer deutschen Nachbarn, damit diese den besten deutschen Katalog in Amerika erhalten.

FOREIGN ORDERS.—Our trade with European countries, Australia, New Zealand, South Africa, the West Indies and other foreign countries, is increasing constantly, and while it is still somewhat expensive and slow to send large shipments by freight, small lots can be sent by mail quite easily. We are willing to prepay the postage on all vegetable and flower seeds offered by the packet or ounce, at the prices named in this catalogue, to Canada, Mexico, all parts of Europe and all countries of the Postal Union. Not more than 12 ounces can be sent in each package.

WE ARE PLEASED TO RECEIVE SAMPLES OF NEW, RARE OR SUPERIOR SEEDS YOU MAY SEND US FOR TRIAL.

VEGETABLE SEEDS

SEED TESTING AND TRIALS.

A CHOICE LIST OF THE BEST NOVELTIES ARE DESCRIBED ON THE COLORED PAGES IN THE CENTER OF THIS BOOK.

Our stock of vegetable seeds we are sure cannot be excelled either in quality or selection by any firm in the country, as we watch our growing crops with great care, taking pains to isolate and keep pure and true to name. Every variety listed is desirable and has our recommendation. The packets are, we believe, as well filled as any reliable seed dealer's in the United States, and in fact a comparison has shown that they contain more seed on the average, than those of any other firm whose packets we have secured. We pay the postage at these prices, except on Beans, Peas and Corn at the peck or bushel rates.

We make it a rule to carefully test all seeds as soon as received from the grower, or as soon as they are brought in from our seed farms. We also carry on extensive trials on our grounds by which we are enabled to offer only those strains of seeds which come up to the standard of purity and excellence, and are of the highest vitality, and the result is that we very rarely have complaints as our Choice Iowa Seeds are sure to please.

ASPARAGUS.

One ounce will sow forty feet of drill.

Asparagus is so easily grown and such a large quantity is produced on a small amount of ground that every garden should contain a bed. A bed ten feet square, requiring 50 plants, will give an abundant supply for any ordinary family. Soak the seed 24 hours in tepid water; sow early in spring, in rows a foot apart; keep clean by frequent weeding and hoeing. Ask for circular giving instructions for growing.

-COLUMBIAN MAMMOTH WHITE.—A new and entirely distinct variety, that produces shoots which are white and stay white as long as fit to use. It is more robust and vigorous in habit and throws up larger shoots and fully as many of them as Conover's Colossal, and requires no earthing up in order to furnish the white shoots so much sought after. Per pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

-PALMETTO.—Stalks frequently measure two inches in diameter, and, even when twelve inches long, are perfectly tender when cooked. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

-CONOVER'S COLOSSAL—The standard variety. Pkt. 5c, oz. 10c, ¼ lb. 15c, lb. 40c.

-ASPARAGUS ROOTS.—We can furnish strong roots of the Conover, Colossal at 25c per dozen; \$1.00 per 100. Columbian Mammoth White 30c per doz. \$1.25 per 100 postpaid. See page 23.

LARGE GREEN ARTICHOKE.
ARTICHOKE.

This vegetable is a great delicacy, highly valued in all parts of Europe, and also one of the most prominent table vegetables in California and other parts of this country. It is a perennial producing the large flower heads, which are the part eaten, the second season and every year thereafter. Sow seed early in hotbeds or boxes in the house, and when weather becomes settled transplant in rows four feet apart and two feet apart in the rows. When started early it sometimes blooms the first year.

LARGE GREEN GLOBE—The best variety for general use; buds large; scales green, very thick and fleshy. Pkt. 10c, oz. 35c, ¼ lb. \$1.00.

ARTICHOKE ROOTS.—These are an entirely different plant from the above and used mainly for stock food. See description in Farm Seed Department. Per lb. 25c, 3 lbs. 60c postpaid. By freight pk. 40c, bu. \$1.25.

BROCCOLI.

One ounce will produce about 3,000 plants.

Growth and habit like the Cauliflower, except that it is more hardy, and the heads are not as compact. It is not desirable for warm or dry countries, but is of special value in the North. Cultivate the same as Cauliflower.

EARLY LARGE WHITE.—The most popular sort. Has medium sized creamy white heads. Pkt. 5c, oz. 35c.

COLUMBIAN MAMMOTH ASPARAGUS.

BRUSSELS SPROUTS.

BRUSSELS SPROUTS.

One ounce will produce about 3,000 plants.

Of the cabbage family, producing numerous heads on the stem, of most delicious quality, as well as cabbage-like head at the top. Use and cultivate the same as winter cabbage.

AMERICAN MAMMOTH.—A new and greatly superior variety of American growth which forms heads ready for picking about three weeks earlier than other varieties. It makes stronger plants and more heads. A profitable crop for market gardeners. Pkt. 5c, oz. 30c, ¼ lb. \$1.00.

ENGLISH.—Pkt. 5c, oz. 15c, ¼ lb. 45c.

BORECOLE or KALE.

One ounce will produce about 3,000 plants.

A hardier vegetable than cabbage; excellent for greens during winter and spring; splendid winter food for poultry. Cultivate like cabbage.

EXTRA CURLED MOSBACK.—Fine crimped leaves, light green, admirable for garnishing. Best cooking. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

DWARF GERMAN GREEN or SIBERIAN.—Popular. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

THOUSAND HEADED.—Grown mainly for forage. See description elsewhere. Pkt. 5c, ¼ lb. 15c, lb. 50c.

EXTRA CURLED MOSBACK KALE.

\$1.00 COLLECTION

33 VARIETIES
BEST GARDEN VEGETABLES.

ALL GOOD DESIRABLE SORTS—SURE TO PLEASE YOU,

Consists of one full-sized packet each of Improved Golden Wax Beans, Old Homestead Pole Beans, Market Gardener's Beet, Henderson's Snowball Cauliflower, Washington Wakefield Cabbage, Shortstem Drumhead Cabbage, Oxheart Carrot, Golden Self-blanching Celery, Early Cory Corn, Country Gentlemen Corn, Perfect White Spine Cucumber, Improved Ground Cherry, American Mammoth Brussels Sprouts, Page's Striped Rice Pop Corn, Continuity Lettuce, Improved Hanson Lettuce, Rocky Ford Musk Melon, Duke Jones Water-Melon, Large Red Wethersfield Onion, Mammoth Prizetaker Onion, Nott's Excelsior Peas, Early Scarlet Globe Radish, White Icicle Radish, Improved Table Guernsey Parsnip, Ruby King Pepper, Early Crookneck Squash, Long Standing Spinach, Mammoth Sandwich Island Salsify, Market Gardener's Parsley, Bond's Early Minnesota Tomato, Matchless Tomato, White Egg Turnip, Purple Top Strap Leaf Turnip, Monarch Ruta Baga, and Vine Peach.

Total 35 full-sized packets sent postpaid for \$1.00; at regular catalogue price they amount to about \$2.00.

NOTICE.—These collections are all put up ready for mailing before our busy season begins and therefore cannot be changed or divided.

IT IS A BARGAIN!

CAN ONE DOLLAR BE BETTER INVESTED?

SET OUT A BED OF ASPARAGUS THIS YEAR AND HAVE IT FRESH DAILY.

BEANS.

Dwarf Bush Varieties.

One quart will sow 100 feet of drill.

Dwarf or bush beans require no support and should be planted in drills an inch and a half deep and drop the beans three inches apart in the drills. Beans are tender annuals and cannot be planted until danger of frost is past. A sandy loam is the best. The half pint packages will be found very desirable for small families. We furnish pints at one-half the quart price. Packages contain about two ounces. Price includes postage except at peck and half peck rates. Deduct 15c from qt. rate if to be shipped by express. All varieties of beans are scarce owing to crop failure in many sections.

ERFURT EARLY PROLIFIC BROAD.—See novelties. Per pkt. 10c, ½ pint 20c, quart 65c.

IMPROVED EARLY VALENTINE.—About ten days earlier than the common Early Valentine. In addition to this it is more robust and vigorous, and produces the true, round, curved pods very abundantly. Unexcelled in quality and uniformity of ripening; nearly the whole crop can be taken at one picking, usually within thirty-five days after planting. Pkt. 5c, ½ pt. 15c, qt. 45c; by express or freight, ½ pk. 85c, pk. \$1.25.

STRINGLESS GREEN POD BUSH.—The only stringless green pod bush bean in cultivation. Consequently it surpasses all others in crisp, tender flavor. The finely shaped, long green pods are absolutely stringless, and are ready to market two weeks earlier than the Valentines. It is of immense value, not only to the market gardener but also to the amateur who seeks a rare quality early for the home table. Pkt. 5c, ½ pt. 15c, qt. 50c; by express, ½ pk. \$1.00, pk. \$1.75.

BURPEE'S BUSH LIMA.—A dwarf or bush form of the true large Lima which is of great value. They are of bush form, growing 18 to 20 inches high, of stout, erect growth, yet branching and vigorous. An immense yielder. Does not always mature dry shelled beans in this latitude but you are sure of a good crop of green ones. Pkt. 5c, ½ pt. 20c, qt. 60c; by express, ½ pk. \$1.10, pk. \$2.00.

IMPROVED VALENTINE.

EARLY MOHAWK.

IMPROVED GOLDEN WAX

—In spite of all the new sorts of beans being introduced every year, our trade calls for more Golden Wax than any other variety. This great popularity is due largely to the fact that the variety we have is a great improvement on the old Golden Wax, having larger pods and being more prolific. This improved stock is one of the handsomest beans we have ever seen, the pods being of dark, rich golden yellow color and of perfect shape. For family or market you make no mistake in planting them. Pkt. 5c, ½ pt. 15c, qt. 50c; by express, ½ pk. \$1.10, pk. \$1.85.

EARLY REFUGEE, or THOUSAND TO ONE.—Most prolific green podded sort, thick and fleshy. Pkt. 5c, ½ pt. 15c, qt. 45c; by express, ½ pk. 85c, pk. \$1.50.

LONG YELLOW SIX WEEKS.—Very early and prolific; long, green, tender, flat pods; matures quickly. Pkt. 5c, ½ pt. 15c, qt. 45c; by express, ½ pk. 75c, pk. \$1.25.

DAVIS WHITE WAX.—A new white, rustless, productive, wax-podded bean; pods flat, very long, white, straight and handsome seeds, clear white; excels all other in hardiness and productiveness. Valuable for market gardeners' and canners' use. Pkt. 5c, ½ pt. 20c, qt. 60c; by express, ½ pk. \$1.10, pk. \$2.00.

HENDERSON'S BUSH LIMA.—Grows in compact bush form, producing enormous crops of delicious Lima beans which can be as easily gathered as the common garden bush bean; is at least two weeks earlier than any of the climbing Limas; produces a continuous crop from the middle of July until frost. Enormously productive. Pkt. 5c, ½ pt. 20c, qt. 60c; by exp. ½ pk. \$1.10, pk. \$2.00.

HENDERSON'S DWARF LIMA.

CHALLENGE BLACK WAX

—Earlier, more productive and of better quality than the old Black Wax. Pods tender, round, fleshy and stringless. Pkt. 5c, ½ pt. 15c, qt. 40c; by express, ½ pk. \$1.10, pk. 1.85.

PROLIFIC TREE, or California Branch.—A valuable variety for field culture. Grows about 20 inches high, has stiff, upright branches and bears immensely, sometimes yielding 45 bu. per acre. The beans closely resemble White Navy. Pkt. 5c, ½ pt. 12c, qt. 35c; by express, ½ pk. 75c, pk. \$1.25.

IMPROVED NAVY, or Boston Pea.—A wonderful improvement over the old-time Navy bean and in every way superior to the Michigan pea bean. This variety makes a very desirable farm crop, especially in the far north. Pkt. 5c, ½ pt. 12c, qt. 35c; by express, ½ pk. 60c, pk. \$1.00, bu. \$3.25.

REMEMBER!
That we prepay the postage at the quart rates.

WARDWELL'S KIDNEY WAX.

—One of the earliest, hardiest and most productive of all wax beans, a week earlier than the Golden Wax, yields one-third more, and almost free from rust and spots. Pkt. 5c, ½ pt. 20c, qt. 60c; by exp. ½ pk. \$1.25, pk. \$2.25.

LARGE WHITE MARROW.—Excellent as a shelled bean. The beans are ivory white and double as large as the Navy. Pkt. 5c, ½ pt. 15c, qt. 45c; by exp. ½ pk. 75c, pk. \$1.25.

CHINESE SAGO BEANS.—A very small variety from China, which is quite a curiosity. See description with novelties. Pkt. 10c, ½ pt. 30c.

THE IMPROVED NAVY BEANS LISTED ABOVE ARE A PROFITABLE CROP FOR FARMERS.

POLE BEANS.

Plant from five to six seeds in each hill, about two inches deep; one quart will plant 100 to 150 hills.

ALL SEASONS.—A novelty. See illustration on back cover, and description on page 101. Pkt. 10c, ½ pt. 25c, qt. 85c.

GOLDEN CARMINE.—See novelties: Pkt. 10c, ½ pt. 20c, qt. 65c.

GOLDEN CLUSTER WAX.—In our tests this has proved to be the best of all wax pole beans. It bears profusely its long golden-yellow pods in clusters of three to six from bottom to top of pole, and continues in bearing from the middle of July till the vines are cut by frost. Pods are seven to eight inches long and three-fourths of an inch in width. Pods are quite flat but fleshy, absolutely stringless, very brittle and delicious. Pkt. 5c, ½ pt. 15c, qt. 50c; by express ½ pk. \$1.25, pk. \$2.25.

OLD HOMESTEAD.—Enormously productive, the pods hanging in great clusters from top to bottom of pole. Entirely stringless; pods are of a silvery green color. Can be grown with corn to good advantage. Pkt. 5c, ½ pt. 15c, qt. 45c; by express, ½ pk. \$1.00, pk. \$1.75.

LAZY WIFE.—The most popular pole bean and we presume it derived its name from its immense productiveness, and from the ease with which they are cooked. The pods, of medium dark-green color, are produced in great abundance, and measure from 4½ to 6 inches in length. The pods retain their rich, tender and stringless qualities until nearly ripe. The white beans make excellent winter shell beans. Pkt. 5c, ½ pt. 20c, qt. 60c; by express ½ pk. \$1.25, pk. \$2.25.

CUT SHORTS.—The old-fashioned corn field bean, so popular and often so difficult to obtain. Pkt. 5c, ½ pt. 15c, qt. 45c; by express, ½ pk. 90c, pk. \$1.60.

KING OF THE GARDEN LIMA.—An improvement on large White Lima, producing a continuous bloom and fruitage to the end of the season. Pods of enormous size. Pkt. 5c, ½ pt. 15c, qt. 50c; express, ½ pk. \$1.00, pk. \$1.75.

SCARLET RUNNER.—Valuable for table use or as an ornamental vine. Pkt. 5c, ½ pt. 20c, qt. 60c; by express, ½ pk. \$1.25, pk. \$2.25.

BEETS.

One ounce sows 50 feet of drill.
Four to six pounds for one acre.

For early, sow as soon as ground can be worked, and about the middle of May for general crop, in drills fifteen inches apart and one and one-half inches deep. As the plants grow, thin to six inches in drills. The young plants make excellent greens. The seed will germinate more freely if soaked in warm water twenty-four hours before sowing; but care should be taken not to plant soaked seed in very dry ground. The soil should be a deep rich loam.

MARKET GARDENERS.—The best and most profitable table variety. See description with novelties. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

EARLY CRIMSON GLOBE.—A very early variety, of spherical form. Skin very smooth and it is as handsome a beet as you can imagine. It is of a rich, deep red color shading to purple. Cooks readily, is very fine grained, and flavor cannot be surpassed. When cooked it is of even, dark color throughout and is attractive when on the table. Of uniform shape and size. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

CROSBY'S IMPROVED EGYPTIAN.—We believe this to be the earliest variety in existence. It is a great improvement on the old Egyptian, being thicker, handsomer and more regular in shape, smooth, with very small tops and small tap root; perfect shape when small, being good for bunching; very popular with Des Moines market gardeners for this purpose. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 70c.

GOLDEN CLUSTER WAX.

MAMMOTH HORTICULTURAL POLE.—Of the highest quality as a shell bean, either green or dry. Pods very large, bright carmine, lightly streaked, very handsome and exceedingly productive. Deserves more general planting. Pkt. 5c, ½ pt. 15c, qt. 50c; by express, ½ pk. \$1.00, pk. \$1.75.

WHITE DUTCH CASE KNIFE.—Yields an immense crop of handsome flat white beans of excellent flavor. Cooks easily. Pkt. 5c, ½ pt. 15c, qt. 45c; by express, ½ pk. \$1.00, pk. \$1.75.

YARD LONG.—Produces pods 18 to 24 inches long. Pkt. 10c.

ARABIAN RUNNER.—Similar to the Scarlet Runner. Flowers white, striped scarlet. Pkt. 5c, ½ pt. 25c, qt. 85c.

EDMUND'S BLOOD TURNIP.—One of the best varieties grown for main crop. The roots are round, very smooth, of good marketable size, and for table use no variety can exceed it in fine quality. The skin is deep blood red; the flesh is also dark red and sweet and tender. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

DEWING'S IMPROVED BLOOD TURNIP.—An improvement on the old Early Blood Turnip. Globe-shape, deep blood-red color, fine flavor, a good keeper for main crop. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

ECLIPSE.—This variety has become exceedingly popular and is one of the best early sorts. It possesses all the qualities requisite in a first-class beet, and is of a uniform, globular shape. The roots are of a bright, glossy red, fine-grained and delicious with none of that earthy flavor so objectionable in many varieties. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

LONG DARK BLOOD.—Our stock of this standard variety is greatly improved, smooth, sweet and tender. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

SWISS CHARD, or Silver Beet.—A distinct vegetable and much superior to the common beet for greens, which are produced soon after planting. Later the leaves grow very large, with broad, flat, beautiful, white wax-like stems and mid-ribs, which may be cooked like asparagus. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

CROSBY'S IMPROVED EGYPTIAN.

REMEMBER THAT WE PREPAY THE POSTAGE ON BEANS AT THE QUART RATE.

• MANGEL & SUGAR BEETS FOR STOCK •

EXTENSIVELY grown in all parts of the country for feeding stock. Sow in April or May in drills three feet apart, and thin to ten inches in the row. If your soil is deep and mellow, try the long varieties; if shallow the round kinds will do better. No crop pays the farmer and stockraiser better than mangels; 1,000 bushels to the acre is an ordinary yield, while, with good culture, 2,339 bushels have been grown to this amount of ground. It costs, counting labor, use of ground and everything, less than \$50 to raise an acre of mangels and gather and store them. This, for an ordinary yield, is a cost of only five cents per bushel. They make the cheapest of foods for all kinds of live stock—horses, cattle, sheep, pigs, chickens, etc. Easily grown, and they help to keep stock in good condition and free from disease. Dairymen claim that a bushel of mangels and a bushel of corn are worth more than two bushels of corn. Full directions for culture and storing mangels, will be sent on application. Use five pounds to an acre. Prices quoted by express are not prepaid.

A MOST VALUABLE ACQUISITION **A NOVELTY OF STERLING MERIT.**

Klein-Wanzleben SUGAR BEET.

GOLDEN TANKARD

CHAMPION YELLOW GLOBE

DIGNITY

COLLECTION OF MANGELS.
One ounce each of the nine varieties of Mangels and Sugar Beets for 40c. ¼ lb. of each \$1.00. 1 lb. of each \$3.00, postpaid, or \$2.40 by express.

MAMMOTH GOLDEN GIANT.—An improvement on the long yellow mangel, being of considerably greater size, more than half above ground and of a more grayish or rather russet yellow. Remarkably even in shape, rather elongated, of vigorous growth; it has a fine neck and a very smooth skin; flesh white, firm and sweet; much liked by cattle. In short a magnificent root, easily lifted from the ground, producing enormous crops. Excellent keepers; yields 40 to 60 tons per acre. Per oz. 5c, ¼ lb. 15c, lb. 40c. By express, not prepaid, 5 lbs. or more @ 25c.

CHAMPION YELLOW GLOBE.—Finest type of Yellow Globe in cultivation. Roots immense size, fine shape, small tap root, neat top. Flesh being very firm and fine grained, renders it an excellent keeping variety. Well adapted to shallow soils. Per oz. 5c, ¼ lb. 15c, lb. 35c. By express, 5 lbs. or more @ 25c.

GOLDEN TANKARD.—Best for dairy farming. Considered indispensable among English dairy farmers; it is stated by them they are able to obtain a higher price for milk when feeding cows on Golden Tankard. Other mangels cut white, circled with yellow, Golden Tankard is a rich, deep yellow throughout. Early, hardy, and a heavy cropper, for on account of its shape the roots can be left standing close in rows. Per oz. 5c, ¼ lb. 15c, lb. 35c. By express, 5 lbs. or more @ 25c.

CRIMSON TANKARD.—A fine new sort like above, but of crimson color. Per oz. 5c, ¼ lb. 15c, lb. 45c. By express 5 lbs. or more @ 30c.

DANISH SUGAR BEET.—An improved strain of the White French Red Top sugar beet which is wonderfully fine for feeding to milch cows and will add greatly to the milk production as well as to its richness. It will yield a heavy crop, and we consider it superior to any variety of mangels for feeding. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c. By express 5 lbs. or more @ 45c.

Last year I grew a Dignity Mangel which weighed 35 lbs., and they were the finest I ever raised.—Mrs. A. Hickman, Mecca, Mo.

L. C. Johnson says that he grew only half an acre of mangels last year and after selling \$26.00 worth to a neighboring dairyman he had sufficient left to feed four cows all winter.

DIGNITY LONG RED.—An improvement on the Mammoth Long Red by careful selection for a number of years. It stands head and shoulders above all other varieties of mangels; unequaled for yielding and feeding qualities. Grows to a very large size, weighing from 20 to 50 lbs. and will yield 50 tons to acre with ordinary good cultivation. Thousands of western farmers have grown our Dignity Mangel and call it the most profitable farm crop they ever tried. If you want large crops of large mangels of good quality, don't fail to try Dignity. Is very uniform, smooth and of good shape. Should be grown on deep, loose soil. Per oz. 5c, ¼ lb. 15c, lb. 35c. By express, not prepaid, 5 lbs. or more @ 25c.

GIANT HALF SUGAR MANGEL.—A new hybrid between Mammoth Red Mangel and Sugar beet; of superior merit. Described with novelties. Per oz. 5c, ¼ lb. 15c, lb. 45c. By express 5 lbs. or more @ 30c.

KLEIN WANZLEBEN Sugar Beet.—This variety is cultivated on a larger scale for the beet sugar factories than any other, as it usually yields 15 to 20 per cent of sugar. Root is of shape shown in our illustration, straight, tapering evenly and somewhat screw shape. Our seed is grown in Germany from beets which were tested as to per cent of sugar before setting out. The heavy per cent of sugar makes it of great value for feeding. Per oz. 5c, ¼ lb. 15c, lb. 35c. By express 5 lbs. or more @ 25c.

LANE'S IMPERIAL SUGAR BEET.—An improvement on the White French Sugar Beet. Recommended as hardier, more productive, yielding 35 to 40 tons to the acre. It is much larger than other varieties and will yield more, but is not as sweet. Preferred by some to mangels for stock feeding. Per oz. 5c, ¼ lb. 15c, lb. 35c. By express 5 lbs. or more @ 25c.

\$10.00 PRIZE
We will pay \$10.00 cash for the heaviest Mangel or Sugar beet grown from our seed this year; report to be sent in by October 15th.

EXTRA EARLY EXPRESS

EARLY JERSEY WAKEFIELD.—Considered by many gardeners the very best first early variety. Of large size for so early a kind and is certainly deserving of its great popularity. Heads hard and solid, and have few outside leaves. Our seed is the highest quality, American grown. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 70c, lb. \$2.25.

IOWA SEED CO.'S SHORT-STEM

DRUMHEAD.—Our improved and selected strain of this popular variety has greatly pleased thousands of our customers during the past ten years, and so greatly has it improved during the time that we have had it that in a large field it is almost impossible to find a head that is not solid and well formed. For sureness in heading, regularity of growth and even, large, solid heads, it far surpasses any other strain of late cabbage which we have seen, ripening evenly with very short stem or stalk, and large thick heads of silky fine quality and of best keeping properties. It is almost all head and always sure to head. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 65c, lb. \$2.00.

PREMIUM FLAT

DUTCH.—This old and well known variety is still the standard winter kind. Its heads are large and solid; also first-class as a keeper. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

ALL SEASONS.—(Vandergaw.)—This most excellent variety is as early as Henderson's Summer and makes considerably larger and harder heads. Excellent to plant late, the thickness of head making it a capital sort for keeping through the winter. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 65c, lb. \$2.00.

IMPROVED DANISH BALLHEAD, or Hollander.—This variety has been selected and perfected for more than fifty years by the Danish gardeners. They prize it so highly that they grow it almost exclusively for winter cabbage, and annually export large quantities to London, Paris and other cities. Heads round, good sized, solid and very fine grained. Has but few outer leaves. A good keeper; tender and crisp, with but little waste heart. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.50.

FILDERKRAUT.—A long pointed headed sort which is quite popular with our German customers. Matures in midseason, heads are very hard. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.75.

PERFECTION DRUMHEAD SAVOY.—The Savoy or curly cabbages are of much finer flavor and quality than the best of other kinds. The heads are large and finely curled; an excellent keeper. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 65c, lb. \$2.00.

LUXEMBERG HARD HEAD.—An excellent variety which is in great favor on the Chicago market. It makes a medium size, very hard head of extraordinary weight. Owing to its remarkable keeping properties it is the best spring seller. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.25.

FOTTLER'S IMPROVED BRUNSWICK.—Excellent for summer and fall use. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

SUREHEAD.—This popular cabbage is rightly named Surehead, and never fails to make a remarkably fine, solid, large head, with few outer leaves. It is a strong, vigorous grower, ripening late. A first class main crop variety. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

MAMMOTH RED ROCK.—A market gardener's strain of unusual size, weight and color. Its handsome appearance, large size, solidity and good quality will make it very desirable to all who like red cabbage. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.50.

CABBAGE

One ounce of seed will produce about 3,000 plants. Set 8,000 to 10,000 plants to the acre of the early sorts and 6,000 of the large, late kinds.

No vegetable is of greater importance than cabbage, and compared with the cost of seed, there is more money in growing cabbage than any other crop. It does not pay, therefore, to take any risk in buying seed. We have had our cabbage seed grown by the same growers for about fifteen years past, and it has proven of uniformly excellent quality. We pride ourselves on having the purest and highest grade of cabbage seed that is offered, or at least it is surpassed by none. The cabbage requires a deep, rich soil and thorough working to insure good, solid, full-sized heads. Sow early sorts in hotbeds in February or March, or in open ground as soon as it can be worked. Later or winter crops in May or June, in shallow drills six inches apart. When the plants are four inches high transplant to richly manured ground, the early kinds two feet apart; the fall and winter varieties three feet apart. Packages contain about 800 seeds. Slug Shot and tobacco dust are used to kill insects and worms.

ZENITH RED.—See Novelties. Pkt. 10c, oz. 35c, $\frac{1}{4}$ lb. \$1.00.

EXTRA EARLY EXPRESS.—The earliest variety in existence and produces rather small heads long before the Jersey Wakefield or other varieties have begun to head up. Heads are solid, have few outside leaves and can therefore be planted very close and yield a large crop. It is a most important variety for the gardener. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.75.

NEW WASHINGTON WAKEFIELD.—This grand variety is a trifle later than the Jersey Wakefield, but produces much larger heads which are of perfect pyramidal shape, very solid and with few outside leaves. Grows remarkably uniform, the heads are of even size and shape. Unequaled for market or family garden. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 85c, lb. \$2.75.

HENDERSON'S EARLY SUMMER.

Ten or twelve days later than the Jersey Wakefield, but much larger in size and will stand on the ground much longer without bursting open. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

HENDERSON'S**SUCCESSION.**

—An excellent variety of large size with a flat head maturing in mid-summer. It can be brought to perfection in the hottest weather or may be used as an autumn or winter crop. The head's average ten or twelve inches in diameter, but are frequently larger. The average weight per head is about twelve pounds. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 80c, lb. \$2.50.

WINNINGSTADT.

Cone-shaped summer sort; when sown late it is good for fall and even winter; a sure header and good keeper. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

BURPEE'S ALL-**HEAD EARLY.**

—At least a week earlier

than any of the various strains of early summer cabbage, and fully one-third larger of perfect shape and the most solid variety on the list. Originated with C. L. Allen, who has grown cabbage seed many years for us, but our competitor, Mr. Burpee, was fortunate in securing the entire stock of it the first year of its introduction, and gave it his name. However, we can most heartily recommend it to our customers. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

NEW SHORT-STEM DRUMHEAD CABBAGE**THE BEST MAIN CROP VARIETY****Cabbage Plants...**

Of our own growing, from best quality of seeds. See p. 22

**ALLHEAD EARLY**

USE THE PLANET, JR., HORSE HOE TO CULTIVATE YOUR CABBAGE CROP.

CAULIFLOWER.

One ounce will produce about 3,000 plants.

HENDERSON'S EARLY SNOWBALL CAULIFLOWER. COLLARDS.

One ounce will produce about 3,000 plants.

Collards are largely used as "greens" in some parts of the country, especially South. They are a form of loose headed cabbage.

GEORGIA.—The most satisfactory for general use. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

CRESS, or Pepper Grass.

One ounce will sow about 16 square feet.

EARLY CURLD—A well-known salad. Sow at intervals all season. Pkt. 5c, oz. 10c, ¼ lb. 25c.

TRUE WATER.—Sow the seeds along the border of running water. Pkt. 5c, oz. 35c.

UPLAND.—See novelties. Pkt. 10c, oz. 40c.

One of the most delicious of vegetables. Any soil that will grow cabbage will grow cauliflower, as their requirements are quite similar. Culture same as cabbage, except that they need a cool and moist atmosphere and should be watered during dry weather. As the flower heads appear, the large leaves should be broken down over them to shield them from the sun and rain.

DANISH GIANT.—A grand new variety, described with novelties. Pkt. 15c, oz. \$2.50.

HENDERSON'S EARLY SNOWBALL.—Throughout the country this is considered not only the earliest of all cauliflowers, but it is more certain to make a head than any other sort. Its dwarf habit and short outer leaves allow it to be planted as close as eighteen to twenty inches apart each way, thus making it especially valuable to market gardeners. Our stock is extra choice and cannot be excelled. It is grown in the locality where this variety originated, by a grower whom we believe to be the best in the world. Per pkt. 15c, ¼ oz. 75c, oz. \$2.50.

EXTRA EARLY DWARF ERFURT.—Valuable for forcing. A very popular variety in Europe and with eastern gardeners. First quality. Pkt. 10c, ¼ oz. 50c, oz. \$1.75.

EARLY PARIS.—Well known small variety which usually proves quite satisfactory. Have made price low this year so that all can try this excellent vegetable. Pkt. 5c, oz. 50c.

LENORMAND'S.—A late variety of large size and of excellent quality. Pkt. 10c, oz. 60c.

CAULIFLOWER PLANTS.—See list of vegetable plants.

DANDELION.

IMPROVED THICK LEAVED.—A greatly improved sort bearing large leaves very early, which make excellent greens. Sow early in the spring in drills 18 inches apart; thin to 5 inches in the rows and cultivate well; they will be fit for cutting the next spring. Pkt. 5c, oz. 35c.

CARROTS.

One ounce will sow 100 feet of drill; 3 or 4 pounds for one acre.

This is an indispensable root for the farm and is deserving of more general cultivation. Well managed, there is no crop pays better, and most farmers would find an acre or so desirable. Carrots form a nutritious, succulent food in the winter for cattle, horses, sheep and pigs. For early crop, sow in spring as soon as the ground can be worked, in drills fifteen inches apart, covering one-half inch; thin plants to three or four inches apart in the row. For field culture rows should be of sufficient distance to admit use of a horse cultivator; sow seed from the middle of April to the first of June. A light sandy loam, deeply tilled, is best, but as carrot seed is slow to germinate, extra precautions should be used to firm the soil after sowing. An average yield is 800 to 1,000 bushels per acre.

EARLY SCARLET HORN.—The favorite extra early variety. Very early. Color orange-scarlet, fine grained and agreeable flavor. Tops small, has a short, stump-shaped root; grows well in shallow soil. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

OXHEART, or Guerande.—We do not hesitate to call this the most valuable variety in existence. It is intermediate between the Half-Long and the Horn varieties, attaining a diameter of 3 to 4 inches at the neck, of beautiful shape and rich orange color. Where other varieties require digging it is easily pulled. It will produce roots as early as any variety and continues of the best quality all season. Fine for hogs and other stock and has yielded 1,200 bu. per acre. Cut tops with scythe and pull roots with potato hooks. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

DANVERS.—Is in form about midway between the Long-Orange and Shorthorn class, growing generally with a stump root. It is of a rich, dark orange color, grows to a large size, is smooth, and the flesh very close texture, with little core. It is a first-class carrot for all soils, and it is claimed that under good cultivation it will yield the greatest weight per acre with the smallest length of root of any grown. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c.

IMPROVED LONG ORANGE.—Desirable for garden or field. Grows to large size, averaging 12 in. in length, and 3 in. in diameter at the top. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c. By express, 5 lbs. or more, at 45c.

LARGE WHITE VOSGES, or IMPROVED SHORT WHITE.—A stock variety which is enormously productive and easy to harvest. Color light green above ground, white below; flesh rich, white, solid and crisp; heavy yielding. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c; by express, 5 lbs. or more, 45c, per lb.

VICTORIA.—Largest carrot grown, heaviest cropping and most nutritious variety in cultivation; roots remarkably fine, of light orange color, symmetrical, excellent quality, possessing high feeding properties; good keeping qualities; heavy cropper on all soils, especially adapted for rich land, grows half as much weight again per acre as ordinary varieties; grows well out of ground and is easily harvested. All who have cattle should raise a quantity of these carrots for feeding milch cows during winter. It increases the flow of milk and imparts to the butter a delicious flavor and a rich golden color. Breeders of fine horses feed carrots to help keep them in perfect health and condition at all times. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c. By express 5 lbs. or more, 50c per pound.

OXHEART CARROT.

DANVERS HALF LONG

IF YOU KEEP A COW DON'T FAIL TO GROW CARROTS, MANGELS AND RUTA BAGAS.

CELERY.

One ounce will produce about 6,000 plants.

This we consider one of the luxuries of the garden. For first crop sow the seed early in hotbeds, or in boxes in the house, in rich, moist soil, covering the seed very lightly. For main crop sow seed in open ground in April or as soon as the soil is in good condition. Seed germinates slowly and if the weather is hot and dry protect with light covering of hay or straw. Stir soil as soon as plants are well up; thin out and transplant so that they stand about an inch apart in the row. If they grow too rapidly, shear the tops off when about 4 or 5 inches high and this will make them more stocky. For main crop set plants out between June 15th and July 15th, in rows three feet apart and the plants six inches apart in the row. Care should be exercised to firm the earth well around plants when setting and they will root better. Keep clear of weeds until about the middle of August, when it will be time to begin earthing up. Draw the soil up against the plants with a hoe as closely as possible, firming it enough to keep plants in an upright position. Later in the season the blanching process must be finished by digging the soil from between the rows and banking it clear to the tops on each side of the row of celery. Much labor is saved by growing the self-blanching varieties, but they do not keep quite so well for winter use. A new book entitled CELERY for PROFIT by T. Greiner sent postpaid for 20cts. It will pay you to have it.

GOLDEN SELF-BLANCHING.—This is by far the most popular variety now on the market. It is of medium earliness, of dwarf, compact habit, with thick, solid, heavily ribbed stalks, which blanch easily to a clear waxen yellow. When grown in rich, moist soil, the stalks are numerous and large with a solid heart of beautiful yellow. Pkt. 5c, oz. 25c, ¼ lb. 90c, lb. \$3.25.

ROSE RIBBED SELF-BLANCHING.—A sport from the Golden Self-Blanching having all its good qualities, but with the additional attraction of beautiful, rose-tinted ribs, making it very handsome. Pkt. 5c, oz. 30c, ¼ lb. 85c, lb. \$3.00.

WHITE PLUME.—Stalks, portions of the inner leaves, and heart naturally white and become fit for use by simply tying it up closely with soft twine. More used than any other variety by market gardeners. Our seed is of the highest quality and sure to please all. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.75.

GIANT PASCAL.—One of the best for fall and winter use. It is a selection from the Golden Self-Blanching, and adds to the general good quality of its parent superior keeping qualities. The stalks are very large, solid, crisp and of a rich, nutty flavor. It blanches very easily and quickly. The heart is golden yellow, very attractive. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

HENDERSON'S HALF DWARF.—Entirely solid, possessing a rich, nutty flavor, while it has much vigor of growth and heavy bunch. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

WINTER QUEEN.—The finest dwarf winter celery. Of a rich green coloring, like the Giant Pascal, it is more readily blanched and ready for use earlier in the fall. The plants make large bunches of extra heavy stalks of even length, making a very handsome appearance; fine flavor, best table quality; keeps until May. Pkt. 5c, oz. 25c, ¼ lb. 85c.

GOLDEN DWARF.—Golden yellow, solid, crisp. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

CELERIAC, or Turnip Rooted.—Grown for the roots. Excellent for salad and flavoring. Very popular among our German customers. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

OLD CELERY SEED.—For flavoring. Oz. 5c, ¼ lb. 15c, lb. 40c.

CELERY PLANTS.—See Vegetable Plants on page 23.

CHICKORY.

One ounce will sow about 15 square feet.

LARGE ROOTED—Used as a substitute for coffee. Cultivate the same as carrots. Take up the roots in the fall, cut in small pieces and put away to dry. When wanted for use it is roasted and ground like coffee. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

CORN SALAD.

One ounce will sow about 20 square feet.

A nice winter salad. Sow in September in drills. Just before cold weather cover with straw or leaves. Per pkt. 5c, oz. 10c, ¼ lb. 30c.

CHUFAS.

CHUFAS, Or Earth Almond.

A nice little ground nut which is greatly liked by the children. In sweetness and flavor they resemble the coconut or almond and are considered very nice put on the table in a fruit dish with candies, and as an after dinner relish. Very prolific, a single one yielding from 200 to 400. The nuts grow under the ground, very near the surface, easily reached by pigs and poultry, and destroyed by them if they have free access. Plant in April, ten inches apart in two and one-half foot rows. Cover them lightly. If seed is very dry, soak them well before planting. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

CURLED CHERVIL.

An ounce will sow 100 feet of drill.

Leaves used in soups and salads. They have a pleasant aromatic taste which is greatly liked. Cultivate like parsley. Pkt. 5c, oz. 15c, ¼ lb. 40c.

CELERIAC OR TURNIP ROOTED CELERY.

ENDIVE.

One ounce will sow about 60 square feet.

Preferred to lettuce by those who have tried it. Should be more largely used. One of the best and most wholesome salads for fall and winter use. Sow seed in April for early use, or in June or July for winter use. When leaves are eight inches long tie them together with string near the top to blanch.

GREEN CURLED.—Has finely cut leaves making a handsome plant. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

GIANT FRINGED.—Also called winter lettuce. This fine new variety is the best of all. It is a strong vigorous grower, making a large, white heart, and the leaves are beautifully curled and of the best quality, very crisp and refreshing. Per pkt. 5c, oz. 20c, ¼ lb. 60c.

March 4. Last year we raised fully \$20.00 worth of Celery from one five-cent package of your Henderson's Half Dwarf, and I never saw finer quality. We still have some of it in the cellar. For five years your seeds have been all right.

MRS. SCOTT ASHER, Trenton, Mo.

GIANT FRINGED ENDIVE.

CELERY FRESH FROM THE GARDEN IS A LUXURY APPRECIATED BY ALL.

SWEET CORN.

One quart will plant 200 hills;
One peck will plant an acre in hills.

Plant as soon as the ground becomes warm in the spring, in hills about three feet apart; five or six grains to the hill, and when up thin them out, allowing three or four of the strongest plants to remain; give thorough cultivation. Our sweet corn is carefully grown and selected, only the choicest, most perfect ears being shelled for seed. It costs us more and is far superior to ordinary stock. Packets contain about two ounces. We pay the postage by the packet, half pint and quart. Deduct ten cents on each quart if to be sent by express; pints at half quart prices. The half pint packages are very desirable for small families.

BY W.A.B. & C.

EARLY SUNRISE.--See novelties. Pkt. 5c, ½ pt. 15c, qt. 50c; by express, ½ pk. 75c, pk. \$1.25.

GOLDEN BANTAM.--See novelties. Pkt. 5c, ½ pt. 15c, qt. 50c.

PHARAOH'S DREAM.--The most productive variety. See illustration and description with novelties. Pkt. 10c, ½ pt. 20c, qt. 50c; by express, ½ pk. 85c, pk. \$1.50.

PEEP OF DAY.--Of Minnesota origin, 5 to 7 days earlier than other early kinds. Ears five inches long, perfect in form, and well filled. The corn is tender and sweet. On our place it matured with Early Sunrise and is similar to it in many respects. You will make no mistake in planting some of it for first early. Pkt. 5c, ½ pt. 15c, qt. 40c. By express, ½ pk. 75c, pk. \$1.25.

EXTRA EARLY CORY.--(White Cob.)--This was for years the most popular variety with market gardeners for first early market until the introduction of Early Sunrise. It is of dwarf growth and yields well; ears are of medium size. Pkt. 5c, ½ pt. 12c, qt. 35c. By express, ½ pk. 60c, pk. \$1.00.

EARLY MINNESOTA.--A standard early variety. The ears are of good size and well flavored. Valuable for either private or market use. Pkt. 5c, ½ pt. 10c, qt. 30c. By express, ½ pk. 50c, pk. 75c.

EXTRA EARLY ADAMS, or Burlington.--This is not a true sweet corn, but produces ears well filled with tender white grains. It is very early and on account of its hardiness and hard, round grain it can be planted much earlier than sweet corn. Pkt. 5c, ½ pt. 10c, qt. 30c. By express, ½ pk. 50c, pk. 90c.

COUNTRY GENTLEMAN.

CHAMPION EARLY.--Without doubt the earliest large corn ever introduced, maturing only a few days later than the small eared sorts and producing large 12-rowed ears 8 to 10 inches long. Pure white kernels with medium white cob, very sweet and tender, usually producing two ears to the stalk. This variety is unsurpassed for market gardening as well as the family garden, owing to its large size and fine appearance. Pkt. 5c, ½ pt. 15c, qt. 35c; by exp. ½ pk. 60c, pk. \$1.00.

COUNTRY GENTLEMAN.--An improvement on the old favorite Shoe Peg Sweet Corn. Our illustration of a single stalk shows its great productiveness; 3 to 5 ears to a stalk. This, coupled with the luscious quality, the general superiority of this new variety will be quickly seen. The cob is small, giving great depth to kernels which are pearly white, and we cannot say too often--surprisingly sweet and tender. Pkt. 5c, ½ pt. 15c, qt. 40c. By express, ½ pk. 75c, pk. \$1.25.

CROSBY'S EARLY.--For medium early use and general crop this is one of the most desirable varieties. Ears are of medium size and the cooking qualities excellent. A good cropper and profitable for family use and as a market sort. Pkt. 5c, ½ pt. 10c, qt. 30c. By express, ½ pk. 50c, pk. 90c.

IMPROVED STOWELL'S EVERGREEN.--For many years Stowell's Evergreen Corn has been the most prominent main crop variety and is more largely planted than any other, being a general favorite with canners and market gardeners for late use. We have been selecting this for a number of years to improve it for family use. The ears are medium to large size and our illustration was made by combining the picture of the lower part of an ear in fit condition for table use with part of an ear of dry seed corn. The grains are deep, exceptionally tender and remain a long time in an edible condition. The dried kernels are shriveled so much that they readily show its unusual sweetness. Pkt. 5c, ½ pt. 10c, qt. 30c. By express, ½ pk. 50c, pk. 75c.

STRIPED EVERGREEN.--A novelty in sweet corn. In size and depth of grain it resembles the Stowell's Evergreen, but each grain is of pearly whiteness distinctly marked with a bright crimson stripe, thus making a very showy and attractive sort. It is very productive and unusually sweet. Pkt. 10c, ½ pt. 20c, qt. 60c.

BLACK MEXICAN.--Although the ripe grain is black, or bluish black, the corn when in condition for the table cooks remarkably white and is surpassed by none in tenderness. This, by many, is considered the most desirable for family use of the second early sorts. Withstands hot, dry weather. Pkt. 5c, ½ pt. 15c; qt. 40c. By express, ½ pk. 75c, pk. \$1.20.

MAMMOTH SUGAR.--This produces the largest ear of any sweet corn, a single ear sometimes weighing 2 or 3 lbs.; sweet and luscious. Pkt. 5c, ½ pt. 12c, qt. 35c. By express, ½ pk. 60c, pk. \$1.00.

EVERGREEN FODDER.--For dairymen. Quart 25c. By express, ½ pk. 35c, pk. 60c, bu. \$1.50.

EARLY FODDER.--Quart 25. By express, ½ pk. 35c, pk. 60c, bu. \$1.75.

POP CORN.

It pays to raise pop corn as a general crop. Demand usually exceeds the supply. Some farmers claim that it is as easily grown as field corn and they receive three or four times the amount per acre for the crop. For main crop the Monarch White Rice will bring the best price per pound, as it is better known. Let the children try a small patch anyway for home use. Ask for prices in quantity.

PAGE'S NEW STRIPED RICE.--Best and most attractive variety of pop corn. Color white; each kernel is striped with bright crimson. Ears of good size; pearly and very productive. Pkt. 5c, ½ pt. 15c, qt. 50c.

QUEEN'S GOLDEN.--Color a peculiar lustrous golden yellow; pops to a rich cream color; very prolific. Pkt. 5c, ½ pt. 12c, qt. 40c.

MAPLEDALE PROLIFIC.--The most productive pop corn, averaging five to twelve good ears to the stalk. Pops to large size; tender. Pkt. 5c, ½ pt. 15c, qt. 50.

MONARCH WHITE RICE.--It is the best white variety. Bears from three to six ears per stalk, and produces fifteen hundred to two thousand pounds per acre. It will pay you to try it. Pkt. 5c, ½ pt. 10c, qt. 30c; by express, ½ pk. 60c, pk. \$1.00.

PAGE'S STRIPED RICE.

IMPROVED STOWELL'S EVERGREEN.

IT PAYS TO PLANT OUR EVERGREEN FODDER CORN FOR DAIRY COWS.

CUCUMBER.

One ounce will plant fifty hills; two pounds will plant an acre.

Cucumbers succeed best in a rich, loamy soil. For first early, sow in hotbeds, in berry boxes, or in small flower pots, six weeks before they can be set out in open ground. When danger of frost is over transplant in hills four feet apart each way. For general crop plant in open ground in May, about twelve seeds in a hill. When danger of bugs is past thin to four strong plants in a hill. For pickling, plant in June, Sprinkle the vines with plaster or air-slacked lime to protect them from the bugs, or use Slug Shot to kill the bugs.

EARLY EXPRESS.—See novelties. Pkt. 10c, oz. 20c, ¼ lb. 60c, lb. \$1.75.

LEMON.—See novelties. Pkt. 10c.

GREEN PROLIFIC.—One of the best pickling varieties; dark green, tender, crisp; very productive; of fine flavor, and good for table use. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

IMPROVED CHICAGO PICKLE.—This variety, which originated with a leading pickle grower near Chicago, is considered the best variety there as it is very prolific, matures early and produces an immense number of desirable shaped pickles. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

BOSTON, or JERSEY PICKLE.—Is used almost exclusively by the market gardeners near Boston for pickling. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

PERFECT WHITE SPINE.—This improved strain is pronounced by good judges superior to all others. Fruit even and good size, straight, well formed and symmetrical. It is of uniform shape, making it unexcelled for pickling. Immensely productive, and keeps solid and crisp a long time. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

EMERALD.—A new variety which possesses that rich, dark green color, which has long been sought for but never before obtained, retaining its color until fully ripe. Its fruits set early and its vigorous vines abound in long, straight, handsome fruits of most desirable qualities. Crop almost a failure. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

IMPROVED BISMARCK.—An excellent variety with very long fruit pointed at both ends, very uniform in shape, size and color, thus making it an excellent sort for marketing. Holds its dark green color well. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

JAPANESE CLIMBING.—Vines are of healthy, vigorous growth, with rich, dark green foliage, and throw out strong, grasping tendrils which enable it to climb trellis, wire netting, brush or any other suitable support. Of large size, cylindrical shape, flesh pure white, skin dark green, turning to brown and netted when ripe; of excellent quality for slicing. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

IMPROVED LONG GREEN.—A standard sort. Vine vigorous and productive, forming fruit fit for the table nearly as early as the shorter sorts; fruit about 12 inches long, firm and crisp. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

CUMBERLAND.—A cross between the Peerless White Spine and Japanese Climbing cucumber. It is a hardy, rapid, vigorous grower and one of the most prolific varieties that we know of. The pickles differ from all other sorts in being thickly set with fine spines over the entire surface except the extreme stem end. They are exceptionally straight and symmetrical, and the flesh is crisp and tender, so that we are safe in calling it the best pickling cucumber on the market. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.40.

WEST INDIA GHERKIN, or BURR.—Makes a handsome pickle of first-class quality. Be sure to try it. Pkt. 5c, oz. 25c, ¼ lb. 80c.

SNAKE.—A remarkable and very interesting curiosity. Cucumbers grow curled up like a snake with the head protruding, and some measure six feet in length. Grown chiefly as a curiosity and for exhibition. In packets only, each 10c.

IMPROVED CHICAGO PICKLE.

EARLY CLUSTER.—Fruits of the slim form desirable for pickling. It is extra prolific, frequently setting in clusters of two and three. These are desirable for small pickles. If the fruits are kept gathered, the vines will continue in bearing. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

NEW ASTRO.—A variety of the highest merit for gardeners, some claiming that they made more money from a crop of these grown early in hotbeds than from any other crop, as they yield a continual daily picking and sell quickly at \$1.00 per dozen. Fruit large, perfect shape, 8 to 12 inches long. They are of the very best quality for slicing, as the flesh is white and crisp and they have very few seeds. Pkt. 10c, oz. \$1.00.

EGG PLANT.

A tender plant which should be started quite early in a hotbed or box in the house which must be kept warm. Transplant late to open ground 2½ feet apart.

IMPROVED NEW YORK.—Our strain of this, the leading market variety, we believe to be unsurpassed. Very large size, skin deep purple, flesh white and of excellent quality. Very productive. Pkt. 5c, oz. 35c, ¼ lb. \$1.20.

EARLY LONG PURPLE.—The earliest variety in existence, being several weeks earlier than the above. Fruit is the same color as the improved New York Purple, but is longer and somewhat smaller. It is fully equal in quality, and what it lacks in size is made up in productiveness. Pkt. 5c, oz. 25c, ¼ lb. 90c.

PEARL WHITE.—Pure creamy white, with slight shading of light green near the stem; good quality. Pkt. 5c, oz. 40c, ¼ lb. \$1.40.

KOHL RABI. *One ounce will produce 2,500 plants.*

If you have never grown Kohl Rabi you should try it this year. It is a most excellent vegetable, intermediate between the cabbage and turnip. Cultivate like cabbage and cook like turnips.

GOLIATH PURPLE.—Of immense size, solid and sweet; keeps well. It will pay to get the best. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.00.

IMPROVED NEW YORK EGG PLANT.

EARLY WHITE VIENNA.—Flesh white and tender. Good market sort of Kohl Rabi. Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. \$1.60.

OKRA, or GUMBO.

One ounce will sow about 80 feet of drill.

Why not try Okra this year? It is extra nice for soups, stews, etc., and also much liked when pickled. Sow at the usual time of tender vegetables in drills 2 inches deep, leaving the plants 2 to 3 feet apart. Pick pods while still tender and slice crosswise before cooking.

WHITE VELVET.—Pods round, smooth and of an attractive white velvety appearance, very tender and of a superior flavor. Plants dwarf and very productive. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

RHUBARB, or PIE PLANT.

One ounce will produce about 100 plants.

Succeeds best in deep, rich soil. Sow in spring in drills, cover one inch. Thin plants to six inches apart. Transplant in autumn or spring to permanent beds three feet apart each way.

IDEAL MAMMOTH.—Largest and best. See Novelties. Pkt. 10c, oz. 25c.

VICTORIA.—The old standard sort. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

VICTORIA RHUBARB ROOTS.—By mail 15c, each, 5 for 50c, \$1.00 per dozen, postpaid.

IDEAL MAMMOTH ROOTS.—Have only a limited supply of this improved variety. Each 25c, doz. \$2.00, postpaid.

GOLIATH KOHL RABI.

WHITE VELVET OKRA.

LETTUCE.

One ounce will sow 100 feet of drill.

Probably no vegetable is more universally used than lettuce, and to be thoroughly appreciated it must be brought to the table fresh and unwilted. The quality of lettuce depends largely upon a rapid and vigorous growth. Sow in hotbed in March and in open ground as early as it can be worked, thinly in drills one foot apart. For a succession sow every three weeks during season. Thin out the plants as they grow.

CONTINUITY.—A novelty of dark brown, nearly black color and excellent quality. See description with novelties. Pkt. 10c, oz. 25c.

MORSE.—Might well be named improved Black Seeded Simpson. Desirable for growing under glass or outdoors. The finest family sorts in existence: Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

ICEBERG LETTUCE.

ICEBERG.—The large, curly leaves covering the heads are a bright, light green, with slight reddish tinge at edges. Center thoroughly blanched. In early spring or hottest days of summer the quality is simply perfect. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.20.

IMMENSITY.—An enormous solid head variety, sometimes 18 in. in diameter, but still tender, crisp and of excellent quality. A very reliable main crop sort. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. 1.75.

DENVER MARKET.—An early variety of Head Lettuce either for forcing or open ground. Large, solid heads, light green color, and is very slow to go to seed. Leaves beautifully marked and blistered, very crisp, tender and of excellent flavor. By these blistered leaves it distinguishes itself from any other kind grown. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 85c.

GRAND RAPIDS.—A forcing variety of superior quality. Strong grower, free from rot, keeps crisp and tender without wilting when exposed for sale longer than any forcing lettuce. Desirable variety for sowing in open ground. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.20.

CALIFORNIA CREAM BUTTER.—A variety of cabbage lettuce, with round, solid head, as shown in the illustration; outside, the heads are of medium green, slightly marked with small brown spots; within, the leaves are of a very rich cream yellow color, rich and buttery to the taste. The heads are of good size, compact, very hard and solid. In California they eat the heart only, with a dressing of olive oil, vinegar, salt and pepper. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

SALAMANDER.—A excellent spring, summer and fall variety, forming good sized heads that stand drouth and heat longer without injury than any other sort; matures early. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 90c.

RELISH or Improved Big Boston.—When visiting the place of one of our seed growers in California, we were greatly pleased with this fine new variety which we do not hesitate to call the best of all for family use. It is one of those rich buttery flavored sorts which after one becomes accustomed to, they always prefer to the crisp leaved varieties. It is the blanched yellow center of the head that is eaten with olive oil, vinegar salt and pepper. A desirable sort. Early and hardy. Pkt. 5c, oz. 15c, ¼ lb. 45c.

IMPROVED HANSON.—For general use both of market gardeners and in the private garden, we are sure that no variety can surpass our improved, carefully selected strain of Hanson Lettuce. It has been so judiciously improved that the heads are so solid that often they do not send up a seed stalk unless cut open with a knife. Heads are very large, green outside and nearly white within, deliciously sweet, crisp and tender, and almost absolutely free from rank or bitter taste. Resists the summer heat exceptionally well. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

EARLY CURLED SIMPSON.—An improved variety of Curled Silesia; large loose heads; fine flavor. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

PRIZE HEAD.—Very tender leaves of dark reddish brown color, variegated with dark green. Heads large and of good flavor. We sell more of this than any other brown leaved variety. Always satisfactory. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 80c.

BLACK SEEDED SIMPSON.—Nearly double the size of ordinary Curled Simpson. Stands the summer well without becoming tough or running to seed quickly. It is by far the most popular variety for greenhouse forcing, making large, handsome heads in a very short time. Gardeners are always pleased with our seed. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 90c.

RUDOLPH'S FAVORITE.—Of large size, crisp and delicate in flavor and very desirable for summer use, as well as for forcing. Forms a fine solid head of beautiful yellow color. Pkt. 5c, oz. 15c, ¼ lb. 40c.

MIXED VARIETIES.—Seeds of about 20 early, medium and late sorts mixed, thus giving lettuce for the table during the entire season, and giving opportunity to try all the leading varieties with but little expense. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

RELISH LETTUCE.

LEEK.

Leeks are quite appetizing when sliced and served as a salad, or they can be cooked and served liked onions. Sow seed thinly in drills early in spring; thin out so as to stand six inches apart in the row. Early in the fall draw earth up about the stems as you would to blanch celery.

LARGE ROUEN.—Largest and most uniform of all. Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. \$1.25

MUSTARD.

A pungent salad, used with cress or for greens. Sow thickly in rows; cut when about two inches high. One ounce will sow about seventy-five feet of drill.

Ostrich Plume.—See novelties. Pkt. 5c, oz. 15c. **Southern Giant Curled.**—Highly esteemed in the south for fall sowing. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 65c. **White English or London.**—Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 40c. **Chinese Golden.**—Leaves very thick, finely curled and of a bright golden yellow color. Pkt. 5c, oz. 10c, ¼ lb. 25c.

LARGE ROUEN LEEK.

MUSK MELON.

One ounce will plant about 80 hills,
two pounds to the acre.

EMERALD GEM MUSK MELON.

of lighter green between the ribs. Flesh very thin; with thin rind and small seed cavity, crystalline appearance, and of rich salmon color. Pkt. 5c, oz. 15c, ¼ lb. 30c, lb. \$1.25.

BAY VIEW.—One of the most prolific melons in cultivation. It has been grown to weigh from 15 to 20 lbs. and from 15 to 18 inches long. Hardy, vigorous and continues a long time in bearing. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

ROCKYFORD.—This new variety, which might be described as an improved Netted Gem, has everywhere been in great demand by the high class hotels and restaurants. Hundreds of carloads of them have been shipped from the little town of Rocky Ford, Colorado, to Chicago, St. Louis, New Orleans, Philadelphia, Newport, Boston, and other cities, driving out the home grown. The melons are of just the right size for table use, slightly oval in shape. The flesh is thick, of a light green color, and a fine juicy, luscious flavor. It is very early, and is wonderfully productive. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

IMPROVED GREEN NUTMEG.—A greatly improved strain of the old Green Nutmeg. Fruit of a medium size, very rich, melting and of exquisite flavor, flesh light green. Very productive. Pkt. 5c oz. 10c ¼ lb. 30c, lb. \$1.00.

NETTED GEM.—A most excellent small melon and very popular with melon growers. It is finely netted and looks nice on the market. Flesh green and particularly rich and juicy, so that it seems to melt in the mouth. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

PAUL ROSE.—We have been greatly pleased with this and considered it one of the finest sorts. It is the result of a cross of the Osage and Netted Gem combining in the sweetness and high flavor of the former with the fine netting and superior shipping qualities of the latter. It is of peculiarly sweet, rich, delicious flavor, and a long keeper. Notwithstanding its thin rind, Paul Rose is a good shipper and fine melon for market purposes. If you are a gardener plant it and catch top of market prices. Pkt. 5c, oz. 10c ¼ lb. 30c, lb. \$1.00.

WINTER PINEAPPLE or SANTA CLAUS.—This is distinct from any other variety. Has almost solid flesh, which is light green, unusually spicy, and having a rich, aromatic pineapple flavor. As it does not ripen on the vines, it should be picked before hard frost and kept in a cool dry cellar, where it will keep for months and when wanted for use place in a warm room to ripen. Pkt. 10c, oz. 25c.

ROCKY FORD MUSK MELONS.

for exhibition purposes. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

BANANA.—Attains a length of from eighteen inches to three feet three inches, and is from two to four inches thick. Flesh very thick, of salmon color. It looks almost like an over-grown banana; smells like one hence its name. Pkt. 10c, oz. 25c.

OSAGE.—One of the best melons on the market for family use and also greatly liked by gardeners. The flesh is salmon color, remarkably sweet and spicy in flavor, extremely thick and delicious to the rind. The seed cavity is very small. It is seldom that one of poor quality is found. The whole crop is very even and extra heavy, owing to the thickness of the meat. Highly prized by those who like an exceedingly sweet and highly flavored melon. It is of medium size, oval, slightly ribbed. The skin is thin, of dark green color and covered more or less with shallow netting. We have taken a great deal of pains to develop the thick, deep, rich colored and fine flavored flesh of this sort, and a careful comparison proves it to be unequalled. All lovers of fine melons should try the Osage. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

MIXED MUSK MELON.—All of the above and a few other kinds grown separately and the seed mixed together. Will produce melons throughout the whole melon season. Per pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

WHAT THE OHIO FARMER SAYS:

The Ohio Farmer, published at Cleveland, O., which we believe has the largest paid circulation of any agricultural weekly in America, and who also publish the Michigan Farmer of Detroit, writes us as follows: "It is with sincere pleasure that we are able to report that in the fifteen years that you have been advertising in our publications, we have not received a single complaint from any one of the many thousands of our readers with whom you have done business. When you consider the great number of chances that there are for slight errors, misunderstandings and that sort of thing in seed business it is certainly a phenomenal record and one of the exceptions in this line of business, as our records show there has not been a single complaint received by us.

I have bought my seeds from you for over 25 years and have no reason to find fault.—O. Burton, Sidney, Iowa.

IMPROVED EARLY HACKENSACK.

—This valuable variety is ready for market fully ten days ahead of the well known Hackensack, which it resembles in size, shape and quality. They are almost equal in size to the old Hackensack, weighing from five to ten pounds each. It is also very productive, averaging from five to six melons on the vine, all which are deeply netted; flesh light green. Pkt. 5c, oz. 10c, ¼ lb. 35c, lb. \$1.20.

MONTREAL MARKET.—This is a very large fruited variety of superior quality. They are nearly round in form, slightly flattened at the ends, with very large, broad, heavy ribs. Dark-green skin, thickly covered with heavy nettings. The flesh is two inches thick, light green, melting and of delicious flavor. This is one of the handsomest varieties to grow

OSAGE MUSK MELON.

WATER MELON.

One ounce is required for forty hills; three pounds will plant an acre.

A light, sandy soil with good exposure to the sun, is the best for watermelons. It should be prepared deep, but receive shallow cultivation. Hoe often and thoroughly. Plant in hills 8 to 10 feet apart each way. Plant 8 to 10 seeds in a hill, and finally, when danger of insects is past, leave but three strong plants. Thousands of melon growers depend on us annually for their seeds and are universally pleased, claiming that nowhere have they ever obtained seeds so pure and reliable. It pays to have the best. Packets contain about 100 seeds.

COLE'S EARLY.—Decidedly the finest early variety for the private garden, but is too brittle for long shipments. It is very early and will mature farther north than most other sorts. Of medium size, very productive, continuing to bear throughout the season. Flesh of bright red color, of granulated, sparkling appearance. In flavor it is lusciously sweet and refreshing. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

PEERLESS, or Ice Cream.—(White Seeded.) Of unquestionable quality, very early, of medium size, thin rind, flesh bright scarlet. Rind is too thin for shipping but it is the great home market melon. Few if any varieties can surpass it in melting delicious quality. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

FORDHOOK EARLY.—A large early sort. From seeds planted May 10th, ripe melons were produced the last of July. The rind is tough, making it valuable for shipping. Color a uniform medium green; flesh red and very sweet. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

IMPROVED TRIUMPH.—Undoubtedly the largest of all melons, having been grown to the extraordinary weight of 149¾ lbs. It is also very productive, as melons aggregating over 800 lbs. have been grown on one vine. Isn't that enough to make the pickaninnies dance, as shown in our picture? Governor Candler states that he "had one of the Triumph Melons weighing 132 lbs., which was sufficient to supply the 43 persons present with all they could eat." It is of dark green color, matures in good season; flesh is dark red, solid and of excellent quality. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

COLE'S EARLY.

GYPSY, Or Georgia Rattlesnake.—A superior early market variety; large, oblong, skin green, mottled and striped. Pkt 5c, oz 10c, ¼ lb 20c, lb. 60c

MONTE CRISTO, or Kleckley's Sweets.

After testing all varieties of melons, we do not hesitate to pronounce this one of the sweetest, juiciest, most delicious melons in existence, and it is especially desirable for the private family. The skin is dark green, faintly striped; flesh bright red and peculiarly rich, crisp and pleasant flavored. It ripens early, is of large size, is a good shipper and a long keeper. Market gardeners will also be pleased with it. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

C. B. Vail the noted melon grower of Muscatine, Iowa, wrote us September 15, "We are sending a sample Triumph Melon to you to-day, weighing 62 lbs. I have shipped several car loads of this variety this year which averages nearly 50 lbs. each."

DIXIE.—A cross between Kolb's Gem and Mountain Sweet, surpassing the former in shipping qualities and fully equaling the latter in fine eating quality and flavor. It is early, has a remarkably thin, tough rind and will keep and ship well. The flesh is bright scarlet and of fine quality. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

KOLB'S GEM.—This variety, on account of its excellent shipping qualities, is extensively grown for that purpose. Grows nearly round, and the color is a dark green with lighter narrow stripes. Very thin and tough rind; flesh bright red and of good flavor. Our seed is choice. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

MOUNTAIN SWEET.—The old standard; which is still quite popular in the north where the large fruited southern varieties do not ripen. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 70c.

BLACK DIAMOND.—A cross between Kolb's Gem and Hoosier King. All that could be said of the Kolb's Gem as to good shipping qualities can be truthfully stated in a higher degree of the Black

Diamond. All the praise of high quality bestowed on the Sweetheart can be repeated of our new melon, but its prominent point of merit is its large size and productiveness. Its color is a rich dark green, almost black. Shape roundish to bluntly oval. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

McIVER'S WONDERFUL SUGAR.—This is becoming the most famous melon for sweetness and high quality. The fruits are long and of large size, averaging about 35 lbs. each. It is considered one of the handsomest melons ever sent out, being rather light colored, irregularly striped and mottled with dark green. The rind is rather thin but tough, so that it is a good shipper. Flesh is delicate light red, entirely stringless and the most tender, juicy and luscious that can be imagined. The vine is a strong, vigorous grower, very prolific and withstands the extremes of weather, either wet or dry. Enthusiastic melon growers unite in pronouncing this the finest quality of any melon grown. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

SWEETHEART.—Early, large, handsome, heavy, good shipper, long keeper, bright color and of good quality. Its vines are vigorous and productive, ripening the fruit early. The fruit is large, oval, very heavy, uniformly mottled light green and dark green; rind thin, but firm. The flesh is bright red, firm, solid but very tender, melting and sweet. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

DUKE JONES.—This magnificent large melon has a dark green rind, slightly striped, flesh bright red, very juicy and delicious. It matures medium early, is very prolific and much larger than Kolb's Gem. A carload of 800 melons averaging 43 pounds each, were gathered from ½ of an acre. One grower writes that they produced ripe melons in 65 days from the time of planting.

Every one who has a place to grow melons should try this

new, splendid variety. It has been grown to immense size, and even the largest specimens hold their good flavor. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

BLUE GEM, or Iceberg.—This remarkable new melon is one of the finest ever brought out and by some has been called Blue Kolb Gem, but it is of infinitely better quality than the old Kolb Gem. Averages a better size, and with less culls. It is of dark bluish green color, bright red flesh and black seeds. Has rough rind, keeps longer and the quality is superior to most other varieties. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 70c.

MIXED.—25 varieties of the finest watermelons, the largest, earliest, sweetest; grown separately and seed carefully mixed by us. Pkt. 5c, oz. 10, ¼ lb. 25c, lb. 75c.

CITRON MELON.

Very nice for preserving and are largely used for this purpose.

- APPLE PIE.**—Best flavored of all. See novelties. Pkt. 10c.
- COLORADO PRESERVING.**—Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.
- RED SEEDED CITRON.**—Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

McIVER'S WONDERFUL SUGAR MELON.

Good onion seed is of the utmost importance as they are one of the most important crops grown, both in market and family gardens and there is no other vegetable where the quality of the seed exerts a greater influence upon the crop than onions. There is more money in onions grown from seed than almost any other crop. Fully realizing this, we have for many years made a specialty of onion seed which is all grown from choice, selected bulbs, critically examined before being set out for seed. In vitality it is very strong, being carefully tested, and we are sure that **OUR ONION SEED CANNOT BE EXCELLED** in purity, vitality or high quality. Large onions can easily be grown the first year from the seed by obtaining our American grown new crop onion seed. The crop was short this year and prices may advance. In comparing our prices with others, remember that we **pay the postage**. Deduct ten cents per pound if to be sent by express. Ask for prices in large lots. Packets contain about 1,000 seeds.

LARGE RED WETHERSFIELD.—The standard sort throughout the west, as they are the most hardy, and immense crop can be raised when more tender sorts are not profitable. Growers who prefer the red varieties will find this magnificent strain, far surpassing the ordinary Red Wethersfield in size, productiveness and keeping qualities. Of the finest form, skin deep purplish red, flesh purplish white, finer grained than many of the red sorts. Our seed of this variety is extra select and cannot be excelled. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.75.

YELLOW GLOBE DANVERS.—A very handsome, round or globe shaped variety of large size, with thin, yellow skin, white flesh, fine grained, mild, very firm and the best of keepers. It ripens early, sells readily at the highest prices in our markets. This is one of the best cropping varieties in existence, has yielded 1,000 bushels per acre, and one of our customers states that his crop averaged over 800 bushels per acre for 9 years. Pkt. 5c, oz. 20c, ¼ lb. 70c, lb. \$2.50.

EXTRA EARLY BARLETTA.—This is a distinct new variety; the very earliest onion in cultivation. It is fully two weeks earlier than the Early White Queen, which heretofore has been the earliest variety on the market. They are of pure paper-white color, very mild and delicate in flavor, 1½ inches in diameter, and ¼ of an inch in thickness. For table use and pickling it is most valuable. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.60.

ALLIED VEGETABLES.

If you like the onion flavor why not try some of the other vegetables of the same class; for some purposes they are superior. Notice Chives and Garlic on page 23 and Leek on page 11.

NEW AMERICAN CROP ONION SEED

LARGE WHITE GLOBE.—The handsomest market variety in existence, making beautiful, clean, pure, silvery white bulbs of large, even size, globe shape, mild and pleasant flavor, and outsells every other variety. It is comparatively a good keeper and undoubtedly the best white sort. Pkt. 5c, oz. 30c, ¼ lb. \$1.00, lb. \$3.50.

GOLDEN GLOBE.—An improvement on the Yellow Globe and it is the handsomest and best keeping sort that we know of. The bulbs are of uniform size and perfect shape. We consider it the handsomest, most prolific, best keeping and easiest selling, making it the most desirable variety of all. Pkt. 10c, oz. 25c, ¼ lb. 90c, lb. \$3.25.

CULTURE.—One ounce will sow about 100 feet of drill; 4 pounds will sow one acre. The soil for onions should be a rich loam thoroughly enriched with well-rotted manure and pulverized before sowing the seed. It should be as free from weeds and grass as possible. As early as the ground can be worked in the spring, sow the seed in drills 14 inches apart, covering one-half inch. Commence hoeing as soon as the rows can be seen; skim the ground over the surface; avoid stirring deeply, and work the soil away from the bulbs. At second hoeing weed carefully and thoroughly by hand. For pickles or sets the seed should be sown very thickly and in broad drills, about fifty pounds to the acre for sets, and 15 to 20 pounds for pickling. For sowing onion seed and cultivating the crop, it will pay you to purchase a good drill and hand cultivator. See description elsewhere. Lang's Hand Weeder, price 30c, postpaid, is the best hand weeder made. Try it. New Onion Culture Book, 50c.

EXTRA EARLY RED.—Matures very early. Of medium size, flat, shape, deep red in color; very closed grained, solid and heavy. This will often form bulbs in cold and mucky soils where other varieties fail. It is recommended particularly for the north and northwest where the seasons are short and cool. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.75.

WHITE PORTUGAL OR SILVER SKIN.—The standard white variety for general culture. The bulbs grow to good size, ripening early and quite evenly. It is a good keeper. The flesh is very mild and sweet, the thin skin a clear, silvery white, of very handsome appearance. The best onion for pickling. Pkt. 5c, oz. 25c, ¼ lb. 80c, lb. \$2.75.

SOUTHPORT RED GLOBE.—This is a very handsome variety and is deserving of general cultivation. It is medium early (none of the perfectly globed-shaped onions are as early as the flat varieties), grows to a large size, skin deep red, flesh fine grained, mild and tender. Pkt. 5c, oz. 20c, ¼ lb. 70c, lb. \$2.50.

WHITE BERMUDA.—A favorite in the south. Pkt. 5c, oz. 25c, ¼ lb. 80c, lb. \$2.75.

AUSTRALIAN BROWN.—A new medium sized, wonderfully hard and solid variety of onion, and one which is quite attractive for the market, both in form and color. They are extremely early in ripening, and produce a crop of fine bulbs which are very uniform in size. Color is a peculiarly clear amber brown, quite distinct from any other variety. In keeping qualities it exceeds any other variety that we know of. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.85.

SPECIAL PRICES.

As prices named above are subject to change, we request persons desiring to purchase a large quantity to write for Special Quotations.

Big Onions.

For table use large onions are much preferable to small ones and they will also bring a better price on the market. The five varieties listed on this page are of immense size, splendid quality and yield wonderfully large crops. While they do not keep quite as well as some other kinds, still they are usually good till Jan. or Feb.

THE Five Giants.

One Packet Each of
Mammoth Prizetaker,
White Prizewinner,
Copper King,
Giant Vesuvius and
Silver King.

FOR ONLY 25 CENTS.

With each of these "Five Giant" collections we will send a circular giving full directions for "Growing Big Onions."

MAMMOTH PRIZETAKER.—(See cut No. 1.) This is without doubt the largest, handsomest, finest flavored, and in every way the best variety of yellow onion in the world. It is admittedly the largest of all varieties, having been grown to the enormous weight of over six pounds, and it is withal a handsome fine-flavored sort. Of a clear, bright straw color, and uniform, perfect globe shape. Produces enormous crops, one report being over 1,200 bushels per acre, and they bring an extra price, being sold on the market as fancy onions. Keeps wonderfully well. Our seed is unexcelled, and is in great favor with our customers in all parts of the United States. They ripen up hard and firm, and present the handsomest possible appearance in market, while the pure, white flesh is fine grained, mild and delicate in flavor. To grow the largest size, sow seed early in hotbeds and transplant to open ground as soon as weather is favorable. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00; 4 lbs., not prepaid, \$8.50.

COPPER KING or MAMMOTH POMPEII.—(No. 2.)—Have been grown to the enormous weight of five pounds and six ounces, and notwithstanding their large size they retain their shape and fine quality. To obtain an idea how large this really is, just weigh the largest onion you can obtain and compare weights, or weigh out five pounds and six ounces of common onions and imagine them all in one. Copper color, flesh pure white, fine grained and mild. Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. \$1.75.

MAMMOTH SILVER KING.—(No. 3.)—This giant sort is the largest of all white onions, no other white variety approaching its mammoth size. It is of attractive form, flattened, but thick through, as shown in the illustration. Single bulbs often attain weights of from 2½ to 4 lbs. each. The skin is a beautiful silvery white; the flesh a snowy white; so sweet and tender is the flesh that it can be eaten raw like an apple. Matures early and is of uniformly large size and perfect form, and consequently will bring a large price in market. Pkt. 5c, oz. 15c, ¼ lb. 50, lb. \$1.75.

GIANT VESUVIUS.—(No. 4.)—This grand new mammoth variety is a foreign sort. It is well shown by our illustration. In rich soil, under good cultivation, they grow to an immense size the first year. They are of a handsome, globe shape, somewhat elongated, veritable beauties, and will attract attention anywhere. Color almost blood red, flesh nearly white, quality most excellent; much more tender and mild than the American sorts. Pkt. 10c, oz. 20c, ¼ lb. 70c, lb. \$2.25.

MAMMOTH WHITE PRIZE WINNER.—In magnificent shape and enormous size, the White Prize Winner is the exact counterpart of the Mammoth Yellow Prizetaker, which has become so popular in the last few years, differing only in its handsome, silvery white skin. Hundreds of market gardeners and onion growers have tried it, and say that no other white onion equals it. One enthusiastic grower says: "I raised a White Prize Winner measuring 17 inches in circumference and weighing over 4 pounds, which astonished my neighbors and took first prize at our county fair." Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. \$2.50.

We offer a **\$10.00** FOR THE LARGEST ONION grown this year from seed purchased direct from us. The mammoth varieties we list on this page may compete. Reports must be in by October 15th. The prize last year was won by Joseph Meyer, Emery County, Utah.

BOTTOM ONION SETS

POTATO ONION SETS

Onion Sets.

Indispensable for early onions for bunching as in a very few weeks they are ready for the table. While it is cheaper to grow onions from seed, still it is considerable work to keep them weeded, and many of our customers who have only a small garden, prefer to grow them from the sets, and gardeners plant sets for the early market. Our stock is carefully grown and very nice. Price by pt. and qt. include postage deduct 15c per qt. if by express. Price by the pk. or bu. is subject to market variation, and shipped at buyer's expense. Top sets are sold at 28 lbs. per bu. Other kinds 32 lbs. per bu. or stroke measure on all small lots. If you want a large lot write for prices.

YELLOW BOTTOM SETS.—Like the White, except color. More used than any other kind. Pt. 15c, qt. 30c; not prepaid, pk. 90c, bu. \$3.00.

RED BOTTOM SETS.—Like above, except that they are of dark red color. Very hardy. Pt. 15c, qt. 30c; not prepaid, pk. 90c, bu. \$3.00.

WHITE MULTIPLIER ONION SETS.—Pure silvery white; frequently producing as many as twenty bulbs in a single cluster; excellent quality; very early. Pt. 20c, qt. 40c; not prepaid, pk. \$1.35, bu. \$4.50.

RED TOP or BUTTON SETS.—Still largely called for in some sections. Pt. 20c, qt. 30c; not prepaid, pk. \$1.00, bu. \$3.50.

WHITE BOTTOM SETS.—White onion sets grown from seed are the most popular and best for early use and large onions. Pt. 20c, qt. 30c, postpaid; not prepaid, pk. 90c, bu. \$3.25.

POTATO or MULTIPLIER ONION SETS.—Early cropper; matures quickly; mild flavor. Pt. 20c, qt. 35c; not prepaid, pk. \$1.10, bu. \$3.75.

PERENNIAL or WINTER SETS.—Also called Egyptian or Tree onions. Usually set in the fall; produce the earliest spring onions without winter protection. Pt. 20c, qt. 35c; not prepaid, pk. 75c, bu. \$2.50.

JOHN SHAW, OF FAIRPORT, KAN., SAYS: "I grew some Onions from your seed weighing four pounds each."

PEAS.

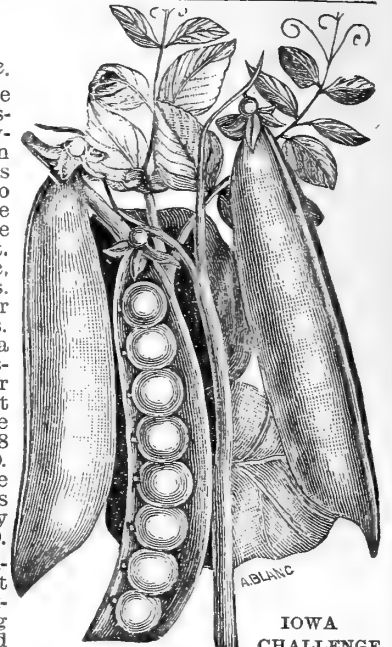

One qt. will plant about 100 feet of drill; 2 to 3 bushels per acre.

Peas mature quickest in light, dry soil, not too rich. May be sown as early as the ground can be worked, and for a succession every two weeks up to July, or what is better, select several kinds which will form a succession in maturing. Sow in drills 2 to 4 feet apart, according to varieties, and 3 to 4 inches deep for general crop, although the first earlies will come to maturity sooner if only covered 1½ inches. Wrinkled sorts are marked*. They should be sown thicker in the row than the smooth varieties; they are more liable to rot if the ground is wet. Prices include postage. Pints at one-half the quart rates. 15c. per qt. discount if sent by exp. Packets contain about 2 ounces.

IOWA CHALLENGE.—An extra early variety of superior merit which is a favorite with Des Moines market gardeners. We can in confidence say that after a trial of nearly all extra early varieties offered to the trade we have not found one possessing more merit, hence its name. For the market gardener it has no superior. It is not only extra early and prolific, but it is of good flavor. All the good qualities of the Extra Early are most nearly brought to perfection in the Challenge. Vines 18 inches. Pkt. 5c, ½ pt. 15c, qt. 40c. By exp. ½ pk. 90c, pk. \$1.50.

***PREMIUM GEM.**—Height 1 foot; early and prolific; a type of and an improvement on the McLean's Little Gem. Pods long and of dark green color. The most popular sort for family use. Pkt. 5c, ½ pt. 12c, qt. 40c. By express, ½ pk. 90c, pk. \$1.50.

***GRADUS, or Prosperity.**—One of the finest peas for family use. This remarkable pea is not only large and of the best quality but it is nearly or quite as early as the small round, extra early sorts. **Gradus** is a wrinkled pea with vine growing about 30 inches high. The pods are of a bright green color, and measure 4 inches or more in length, as large as Telephone, and equally well filled with luscious

***AMERICAN WONDER.**—The most popular extra early variety for the family garden. Being very sweet it cannot be planted quite as early as smooth sorts as it will not stand as much cold, wet weather but it is far superior to the extra early, smooth sorts in flavor and table qualities. Of dwarf and robust habit, growing about 10 inches high, it produces a profusion of good-sized, well-filled pods fairly packed with the finest flavored peas. Pkt. 5c, ½ pt. 15c, qt. 45c. By exp. ½ pk. \$1.00, pk. \$1.75.

ALASKA.—Height 2 feet, pods rather small, dark green color, well filled; the earliest pea known, being two days earlier than the First and Best, and ninety per cent of the pods can be gathered at the first picking. Pkt. 5c, ½ pt. 12c, qt. 40c. By express, ½ pk. 65c, pk. \$1.10.

FIRST AND BEST.—A standard first early variety popular with gardeners in all parts of the country. The crop is short this year. Pkt. 5c, ½ pt. 12c, qt. 40c. By express, ½ pk. 60c, pk. \$1.00.

DWARF CHAMPION.

good quality. Pkt. 5c, ½ pt. 12c, qt. 40c. By express, ½ pk. 65c, pk. \$1.10.

***ABUNDANCE.**—A standard medium early sort. Large and productive. Pkt. 5c, ½ pt. 15c, qt. 45c. By express, ½ pk. 85c, pk. \$1.50.

***NOTT'S EXCELSIOR.**—A superb new variety, and we are sure our customers will welcome it as an ideal family garden pea. It is fully as sweet and delicious as the American Wonder and grows one-half taller. Pods are larger and it is far more productive than the Premium Gem, and it is within a day or 2 as early as the first early smooth peas. Mr. Geo. Buchanan writes: "I found these peas a very distinct, pure sort, with many marked excellencies over the American Wonder, Premium, Gem, Advance, etc. The peas were ready for table use within forty-three days from planting." Quality very superior. Pkt. 5c, ½ pt. 15c, qt. 50c. By express, ½ pk. 1.00, pk. \$1.75.

NOTT'S EXCELSIOR

***TELEPHONE.**—Immensely productive, of the finest quality and excellent sugary flavor; vines very strong, the pods are of large size, with six or seven large delicious peas; height 4 feet. Pkt. 5c, ½ pt. 15c, qt. 50c. By express, ½ pk. 90c, pk. \$1.50.

***EVERBEARING.**—Height 2 feet; late to very late; hardy, vigorous, enormous cropper, pods and peas of large size and

good quality. Pkt. 5c, ½ pt. 12c, qt. 40c. By express, ½ pk. 65c, pk. \$1.10.

***IMPROVED STRATAGEM.**—Late variety for family or market use. Half dwarf, vigorous, branching habit, and under favorable conditions an enormous cropper. Pods long and filled with seven to nine large peas of extra fine quality. Pkt. 5c, ½ pt. 15c, qt. 50c. By express, ½ pk. \$1.00, pk. \$1.75.

MAMMOTH LUSCIOUS SUGAR.—This new sugar pea bears pods much larger than any other variety, often six or seven inches long and an inch and one-half broad. They should not be shelled, but the peas and pods eaten together, as they contain so much sugar, starch and gluten; are very nutritious for family use. Pkt. 5c, ½ pt. 20c, qt. 60c. By exp. ½ pk. \$1.25, pk. \$2.25.

***CHAMPION OF ENGLAND.**—One of the richest, best flavored peas grown. Pkt. 5c, ½ pt. 12c, qt. 35c; exp. ½ pk. 60c, pk. \$1.00.

DWARF WHITE MARROW.—An improvement on the old Large White Marrowfat. Pkt. 5c, ½ pt. 10c, qt. 35c. By express, ½ pk. 55c, pk. 90c.

FIELD PEAS.—See list of Miscellaneous Field Seeds.

PARSNIPS.

One ounce will sow 200 feet of drill; 5 lbs. will sow an acre in drills.

Sow early in spring in good rich soil, which has been plowed deep, in drills 15 inches apart, covering half an inch. Thin to five or six inches apart in rows. They are improved by frost.

IMPROVED TABLE GUERNSEY.—A greatly improved and wonderfully fine strain of the Guernsey Hollow Crown Parsnip. The roots do not grow as long as the Hollow Crown, but are of greater diameter and more easily gathered. A very heavy cropper; the roots are smooth, with a deep hollow crown and a small top. The flesh is fine grained, sweet and of excellent quality; cooks evenly all the way through to the center which is as fine, soft and even quality as outside portions. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 60c.

HOLLOW CROWN or LONG SUGAR.—The old standard. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 40c.

PARSLEY.

One ounce will sow 150 feet of drill.

Sow very early thinly in drills one foot apart and half an inch deep. Soak seed in warm water a few hours before sowing. For winter use protect in a glass frame or light cellar.

MARKET GARDENER'S—An extra choice

GUERNSEY PARSNIP.

stock with dark green beautifully curled mossy leaves, very ornamental in its growth and very productive. Valuable for either garnishing or flavoring. Earlier than other varieties and what is more important it retains its dark green color late in the fall and continues to produce well throughout the winter when transferred to the greenhouse. Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. \$1.25.

CHAMPION MOSS CURLED.—A very select stock, beautifully crimped and curled. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 65c.

HAMBURG.—Turnip rooted variety, used for flavoring soups, etc. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

MARKET GARDENER'S PARSLEY.

PEPPER.

One ounce will produce about 1,800 plants.

Sow seed in hot bed early in spring; transplant to open ground when the weather is favorable, in warm, mellow soil, in rows 18 inches apart. Seeds germinate slowly, and require considerable heat.

CHINESE GIANT.—Double the size of Ruby King of thick blocky form, brilliant scarlet color, ripens comparatively early for so large a variety and is productive. Per pkt. 10c, oz. 50c, ¼ lb. \$1.50.

KALEIDOSCOPE.—A very ornamental new variety. The small fruit changes from cream color to canary, then deepens to orange, then turns into pink until it becomes a deep shining scarlet. Pkt. 10c, oz. 35c.

RUBY KING.—Very large size, 4½ to 6 inches long by 3½ to 4 inches thick. When ripe they are of a beautiful bright ruby red color and are always remarkably mild and pleasant to the taste. Produces large, handsome fruits. Pkt. 5c, oz. 20c, ¼ lb. 65c.

MAMMOTH GOLDEN QUEEN.—Average a third larger than Ruby King. Eight to ten inches long. Bright waxy, golden yellow, and mild flavor. Pkt. 5c, oz. 25c, ¼ lb. 80c.

JAPANESE FANCY.—A very ornamental variety bearing little heart-shaped fruits of various colors, purple, white, yellow, orange and red all on the same bush. Pkt. 10c.

CORAL GEM BOUQUET.—This new red hot pepper is the finest of the smallest sized varieties. Excellent for pepper sauce. Pkt. 10c, oz. 50c.

RED CHILI.—Small, very hot. Used for pepper sauce. Pkt. 5c, oz. 20c, ¼ lb. 60c.

LARGE BELL, or Bull Nose.—An early standard sort. Pkt. 5c, oz. 15c, ¼ lb. 50c.

SWEET MOUNTAIN, or Mammoth.—Similar to the above, but milder. Pkt. 5c, oz. 20c, ¼ lb. 65c.

RED CAYENNE.—Pkt. 5c, oz. 25c, ¼ lb. 90c.

RUBY KING PEPPER.

PUMPKIN.

One ounce will plant 25 hills; 4 pounds will plant one acre.

The best, most enterprising and most prosperous farmers put in a crop of pumpkins every year. They can be grown separately or with a corn or potato crop and do not seem to interfere in the least. They are valuable for feeding to stock, and what is a fair without pumpkins, or a Thanksgiving dinner without pumpkin pie. Planted with corn, two pounds will plant one acre.

NEW ATLAS.—See Novelties. Pkt. 10c.

YANKEE PIE.—This is the noted New England Pie or Small Sugar Pumpkin. Same shape and color as the Connecticut Field but smaller, very sweet, fine grained and one of the best varieties for table use. Pleases everyone for making pies. Early. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

WHITE CUSHAW, or Jonathan.—Attractive and sells better than the old green striped sort. A large bottle-shaped variety. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

LARGE CHEESE or Improved Kentucky Field.—Large flat fruits; creamy buff skin. Thick flesh; usually called Sweet Pumpkin. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c.

JAPANESE PIE.—This is similar in size and form to the well known Cushaw, but the skin is deep green, with darker stripes, turning to yellow as fruit ripens; earlier than any other pumpkin; seeds marked with curious indentations. Flesh very thick, a rich salmon color, dry and sweet, making rich pies without eggs. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50

KING OF MAMMOTHS PUMPKIN.

KING OF MAMMOTHS.—The largest variety of true pumpkins. The flesh and skin are of a bright golden yellow, fine grained and of good quality. We know of one specimen that reached the enormous weight of 245 pounds. One customer writes us that he grew one that weighed 158 pounds, and on the same vine had five other pumpkins from 90 to 104 pounds each in weight—over 640 pounds grown from one seed. Farmers and gardeners, just think of that kind of a crop! Will it not pay to grow the King of Mammoths and exhibit them at your county fair? Our seed is from select specimens. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

TRY THE COLLECTION OF
Mammoth Pumpkins
ONE PACKET EACH
New Atlas, Mammoth Tours
King of Mammoths,
And Mammoth Etampes.
ONLY 20 CENTS

A PRIZE OF \$10.00 will be paid for the largest pumpkin grown from our seed this year, the report to be sent in not later than October 15. Full directions for growing large specimens sent with each collection. The prize last year was won by Abel Steele, Ferguson, Ontario. Weight 232 lbs.

MAMMOTH TOURS.—Also called Mammoth Whale Grows to an immense size, sometimes three feet in length and to a weight of 100 to 200 lbs. Flesh of a salmon color. Seed of a peculiar shape. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

BIG TOM.—A greatly improved strain of the common Yankee or Connecticut Field Pumpkin which has been selected up for many years to secure the most uniform type. Per pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 60c.

CALHOUN or THANKSGIVING PIE.—A great improvement on the Large Cheese. Color creamy brown, flesh deep salmon yellow, fine grained; seed cavity is very small. Rind thin. When cooked it is very yellow and makes pies of a rich color, sweet and of the finest quality. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

CONNECTICUT FIELD.—The common field or cow pumpkin. If you have any live stock to feed it will pay you to put in a few acres of these. Per oz. 5c, ¼ lb. 15c, lb. by mail 40c. By express or freight, 10 lbs. \$2.50, bushel of 25 lbs. \$5.00.

RADISH.

One ounce will sow one hundred feet of drill; Eight to ten pounds will sow one acre in drills.

Radish seed should be sown in light, rich soil as early as the ground can be worked, and for a succession, at intervals of two weeks, until midsummer. Radishes must be grown quickly and have plenty of room or they will invariably be tough and pithy. Sow in drills one foot apart and thin to two or three inches apart as soon as the rough leaves appear. Most of our radish seed was grown in France, "the natural home of radishes" and we think it cannot be surpassed.

EARLY SCARLET GLOBE.

MODEL WHITE BOX—Of most handsome shape, very early and has but few leaves, thus making it of special value for growing in hotbeds or boxes, and one-third more radishes can be grown in the same space than with most other sorts. Of clear white color, solid, juicy, and unsurpassed in flavor. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

ROSY GEM—A handsome globe shaped variety of rosy scarlet, shading to white at tip. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

EARLY SCARLET TURNIP—A small round, red, turnip-shaped radish, of quick growth. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

SCARLET GEM—An extremely early variety which has matured before the table in seventeen to twenty days from the time of sowing the seed and is fully grown in less than four weeks. It is of a perfect globe shape, and of a bright rich scarlet color, tipped with white. An excellent variety for forcing. Per pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

WOOD'S EARLY FRAME—Smaller and considerably earlier than the Scarlet Gem, which it very much resembles. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

GINCINNATI MARKET—An excellent long radish of glossy brilliant scarlet color, having small top. The best of the radish for forcing. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

FRENCH BREAKFAST—Of a medium size, olive-shaped, with small top, of quick growth; beautiful scarlet color shading to white. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

SCARLET GEM RADISH.

MODEL WHITE BOX.

GOLDEN DRESDEN—A little beauty, with golden brown skin, white flesh, crisp, juicy and of finest flavor. One of the quickest growing sorts, tops small, admitting of close planting. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 90c.

EARLY LONG SCARLET SHORT TOP—An old standard variety; quick growth, long slender roots. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

CHINA ROSE WINTER—Bright rose colored, winter variety. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

CALIFORNIA MAMMOTH WHITE—Grown extensively by Chinese in California; 8 to 12 inches long, two to three inches thick; white, solid and of good quality. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 80c.

LONG BLACK SPANISH—A large, black skinned radish, with firm white flesh of pungent flavor. A good keeper, lasting till spring. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

IOWA SEED CO'S RADISH MIXTURE—A superb mixture of all kinds of radishes, early, medium, fall, winter, Chinese, etc. Sow a row of it and it will furnish you delicious radishes throughout the year. The early and medium ones as they mature and are pulled, make room for the larger growth of the fall and winter varieties. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

NON PLUS ULTRA.

NON PLUS ULTRA—Of deep scarlet color. Of fine quality and of very quick growth. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 65c.

ROUND SCARLET CHINA, or China Globe—A handsome new variety of medium size, bright scarlet color and globe shape; grows rapidly; flesh is pure white, crisp, brittle, and most agreeable flavor. When sown late make an excellent winter sort and keep well. Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. \$1.25.

IMPROVED CHARTIER—Roots are long and cylindrical, scarlet rose above, shading into pure waxy white at the tip. Flesh is white, crisp and mild flavored. Stands hot weather well. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

WHITE LADY FINGER—Large, white, crisp variety, about as long as Long Scarlet, similar shape. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

VALL SEASONS, or Celestial—A summer and fall sort, keeping quite well also for winter use. Large ivory white roots of fine quality. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

WHITE STRASBURG—Of a handsome, oblong, tapering shape, both skin and flesh are pure white. The flesh is firm, brittle and tender and retains its crispness even if old and large. Excellent for summer use. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

ICICLE—A splendid long variety of almost transparent whiteness. Produces nice roots in 22 days from date of sowing, and it continues in prime condition for a long period, so that in one sowing of seed nice, crisp radishes may be had from spring until midsummer. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

ICICLE.

SALSIFY

or Vegetable Oyster.

One ounce will sow 50 feet of drill,
8 pounds to the acre.

Why don't you grow salsify? We are certain if you grow it one year you would never be without it. It is one of the most delicious and nutritious of vegetables, and should be more generally cultivated for use in winter, when the supply of really good vegetables is so limited. It has the true oyster flavor, and makes a delicious and inexpensive substitute for them in soup, etc. Cultivate like parsnips.

MAMMOTH SANDWICH ISLAND—Average fully double the size of the old Long White. Roots are white, smooth and, notwithstanding their enormous size, are of superior quality. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.20.

WISCONSIN GOLDEN.—A distinct and valuable new sort. The roots are large, smooth and have a decided yellow cast which gives it its name. They cut smooth and even throughout, unusually brittle and never stringy. When prepared for the table they are very rich, tender and delicious in flavor. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$1.60.

WISCONSIN GOLDEN SALSIFY.

SQUASH.

One ounce early varieties will plant about forty hills;
one ounce late varieties will plant about twenty hills;
3 to 4 pounds to the acre.

Plant about the middle of spring in hills, the early sorts four to six feet apart; the late varieties eight to twelve. Thin to three plants in the hill. The soil cannot be too rich. Use Slug Shot to kill the bugs.

EARLY PROLIFIC MARROW.

TRUE HUBBARD.—This old variety has for years stood the test of all rivals, and is the most popular winter squash grown; hard, green shell; flesh bright orange yellow, fine grained, very dry, sweet and of rich flavor; keeps in perfect condition throughout the winter. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

WARTY HUBBARD.—A new strain of the Hubbard. The wartiness indicates a very hard shell, which is one of the very best features of a long keeping squash. It also denotes extra choice quality—the harder and more warty the shell of a Hubbard, the more delicate and sweet the flesh; the flesh, however, is not so thick as the old Hubbard. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 85c.

BLUE HUBBARD, or Marblehead.—A splendid winter variety. Shell light blue; flesh similar to the Hubbard in quality. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 90c

GOLDEN HUBBARD, also called Red Hubbard.—This is a counterpart of the old Green Hubbard, except in color, which is a bright, deep orange yellow, much richer in color than Hubbard, fine grained, cooks very dry, and is of excellent flavor. Its keeping qualities are fully equal to, while in productiveness it far excels the green variety. This is a squash that every market gardener should plant, for it is a "seller." Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

COLLECTION OF HUBBARDS.

One packet each of the four varieties of the Hubbard squash, for only 15c.

ENGLISH VEGETABLE MARROW.—A favorite English sort. Fruit varies in size from 9 to 18 inches in length. Skin greenish yellow, flesh white, soft and rich flavor. Plant 8 feet apart. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

TRUE HUBBARD.

SPINACH.

One ounce will sow about 50 feet of drill; 10 pounds to the acre.

The finest "greens" of any plant in cultivation. For summer sow early in spring in deep, rich soil, in drills one foot apart; cover one inch; sow at intervals of two weeks throughout the season. For very early spring use sow the first of September; protect by covering with straw.

VICTORIA—This new variety is distinguished for its exceedingly dark black-green color, and also for its very long standing qualities, being from two to three weeks later than the ordinary varieties. The leaves are thick and spread out flat upon the ground. It is excellent for spring sowing, but not sufficiently hardy to withstand the winter in this locality. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 35c. By express, 5 lbs. or more @ 25c.

LONG STANDING.—Standard with gardeners; leaves thick, fleshy and crumpled, round, large and of a dark green color; slow to run to seed. Pkt. 5c, oz. 10c, ¼ lb. 15c, lb. 35c. By express, 5 lbs. or more @ 20c.

BLOOMSDALE.—A Savoy-leaved curled variety. Very highly valued, especially in the South. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 40c.

NEW ZEALAND.—Very useful to supply the place of the ordinary spinach during the very hottest months of the year, or in dry, arid localities. A few plants will supply a family with this delicious vegetable from July to October. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

VICTORIA SPINACH.

Thin to three plants in the hill.

NAPLES GIANT.—Described and illustrated with novelties. Pkt. 10c, oz. 30c.

GOLDEN BUSH.—An improvement on the old Yellow Bush Scallop or Patty Pan. The earliest of all. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c

WHITE BUSH SCALLOPED.—Similar to the Golden Bush. Color creamy white; an excellent variety for the family garden for early use. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

EARLY BUSH CROOKNECK.—Splendid sort, early, productive, very fine quality. With all the new varieties recently brought out, many claim that there is no summer squash superior to this. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

PERFECT GEM.—Is a strong grower, as many as twenty-four squashes having been produced on a single vine. The squashes are from four to six inches in diameter; of a creamy white, with thin, smooth shell, slightly ribbed. The flesh when cooked is dry, sweet and rich in flavor. It is a splendid keeper. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

EARLY PROLIFIC MARROW.—Early and productive, the two most important features for the market gardener, while its attractive color—brilliant orange red—good cooking and keeping qualities, make it popular with the consumer. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

NEW HESTER.—This extra choice new variety, which we introduced, is of the same shape as the Sibley but the color is of a pinkish yellow, slightly striped at the point with light green. They are early and can be used as a summer squash, but is superior to the Hubbard for winter. When stewed or steamed they are dryer than when baked and make delicious pies. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

MAMMOTH CHILL.—The "Jumbo" of the squash family. The form is round, flattened at both stem and blossom end. The outer color is a rich orange yellow; skin is quite smooth with wide fissures. Flesh very thick and of a yellow color. Keep well and are profitable to grow for stock feeding. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

SIBLEY, or Pike's Peak.—We consider this one of the very best winter varieties. It has the reputation of being the only variety surpassing the Hubbard in quality. Has large oval fruits tapering at the blossom end. Shell hard, dark olive green color. Flesh light orange color of the very best quality. Vines strong and productive. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

TOMATO.

One ounce will produce about 2,500 plants.

Sow early in hotbeds or seed boxes and when plants have four leaves transplant to four or five inches apart. Give plenty of air and endeavor to secure a vigorous growth. When all danger of frost is past transplant to the open ground, four to six feet apart each way. Well manured, light sandy soil is best, but it must be remembered that a surplus of manure stimulates leaf growth to the detriment of the fruit. Through long years of selection we have now a stock of tomato seed which is far superior to that of most other dealers. Our packets contain from 500 to 1,000 seeds.

JUNE PINK.—See illustration and description on back cover of catalogue and be sure and try it this year. Pkt. 15c.

MAJESTIC.—The largest and best of all. See description with novelties. Pkt. 10c, oz. 75c.

SPARKS' EARLIANA.—Probably no early tomato introduced in many years has attracted so much attention and has so large a sale as Sparks' Earliana. This valuable new variety originated with George C. Sparks of New Jersey. It is not only extremely early, but is remarkable for its large size, handsome shape, and beautiful bright red color. Its solidity and fine qualities are fully equal to many of the best late sorts. Extra early tomatoes are one of the most profitable crops for the market gardener, as well as specially desirable in the home garden. You will make no mistake in planting Sparks' Earliana. Pkt. 10c, oz. 30c, ¼ lb. \$1.00, lb. \$3.25.

GOLDEN NUGGET.—Described with novelties. Pkt. 10c, oz. 50c.

BOND'S EARLY MINNESOTA.—Before the introduction of Sparks' Earliana this was considered the earliest of all. Vines vigorous and when quite small begin producing fruits which are of fair size, of good shape, smooth, dark red color. Thos. H. Brinton, who grows about 100 varieties of tomatoes, has originated several of our best sorts, writes: *Early Minnesota is the best early tomato we have tried.* Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.25.

JAPANESE CLIMBING.—See novelties. Pkt. 15c.

MATCHLESS.—Well worthy of its name, for in beauty, color and symmetry of form it is indeed without a peer. The vines are of strong, vigorous growth, well set with fruit, which is entirely free from core, of the finest flavor, very rich cardinal red color, and not liable to crack from wet weather, of large size, and the size of the fruit is maintained throughout the season. Solid, of fine quality and keeps well. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.50.

LIVINGSTON'S BEAUTY.

—Originated with the late Mr. A. W. Livingston, of Franklin Co., Ohio, and is one of the best ever introduced. Its size, beauty, shape, color, flavor, durability and productiveness make it desirable to growers. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00

FAVORITE.—Vine medium size, with large green leaves, having numerous clusters of three to seven tomatoes of a rich, dark red color, of oval outline, very smooth, flesh firm. A nice canning variety. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.75.

ACME.—Specially valuable for early market use. Plants are of strong, vigorous growth and very productive; fruit of medium size, round; color a glossy red, with purplish tinge. It ripens all over and through at the same time. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.75.

PERFECTION.—Large, round, smooth, handsome red fruit of the highest quality. It proves very satisfactory for forcing under glass. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.75.

DWARF CHAMPION.—Its habit of growth is peculiar, for not only is it dwarf and compact, but the stem being thick, stiff and short jointed, it is almost self-supporting when laden with fruit. In productiveness it is unsurpassed. It is also very early. The fruit is of a purplish pink color; always smooth and symmetrical and the flesh solid and of fine quality.

MATCHLESS TOMATO.

YELLOW PEAR.—A favorite with all who know them. Fruit is pear shaped and of a handsome deep yellow color; flesh yellow, solid and fine flavored. Highly esteemed as a table delicacy raw, but more used for preserving or to make "tomato figs;" also excellent pickled. Pkt. 5c, oz. 30c, ¼ lb. 90c.

Can almost be called a tree tomato. The best variety to grow for plants for sale as they are so stocky. Seed very scarce this year. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.50.

PONDEROSA.—Very large, inclined to be irregular in shape, but of fine quality. Purplish red. Pkt. 5c, oz. 30c, ¼ lb. \$1.00.

CRIMSON CURRANT.—A most charming little fruit, hardly more than a half inch in diameter, of bright crimson color; borne in long clusters containing 20 to 60 tomatoes. Excellent for eating from the hand or preserved. Pkt. 10c, oz. 60c.

MIXED TOMATOES.—For the advantage of some of our customers who would like to try all kinds, we have prepared this mixture of the varieties named above and several others, which we think will please all. Pkt. 5c, oz. 25c, ¼ lb. 75c.

STRAWBERRY, OR HUSK TOMATO.—Also called Ground Cherry. Plants of spreading growth and immensely productive. The small yellow fruits are each enclosed in a husk and of delicious flavor either raw or preserved. Pkt. 5c, oz. 40c.

TOMATO PLANTS.—Much time may be saved by buying plants and you will find them listed on page 23.

SPARKS' EARLIANA.

STONE.—One of the best of all the standard sorts. The color is a desirable bright red. The fruit is of large size, perfectly smooth and of best table quality in every respect. It is a famous main crop tomato in many sections, both North and South, and is much used for canning. Productive and the fruit bears shipment well. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$1.75.

CRIMSON CUSHION.—The best climbing variety. Persons who have only a small garden will appreciate this variety which can be grown on trellises and in this way three or four times as much fruit can be grown on the same space. It grows from 7 to 10 feet high, if desired, but as most of the fruit is borne three or four feet from the ground, well out of the reach of the chickens, it is just as well to trim off the tips. Fruit is of unsurpassed quality, extremely large. An excellent sort for slicing or canning. Pkt. 5c, oz. 30c, ¼ lb. \$1.00, lb. \$3.50.

IMPROVED TROPHY.—The first of the modern improved kinds. Our Improved Trophy is vigorous and productive; its large, solid, smooth, fine-flavored fruit will satisfy the most exacting. Also much liked for canning. Pkt. 5c, oz. 20c, ¼ lb. 65c, lb. \$2.00.

GOLDEN QUEEN.—Best of the large yellow varieties. Fruit smooth and of the finest flavor, ripens up evenly and a handsome sort. Pkt. 5c, oz. 25c, ¼ lb. 80c.

DWARF CHAMPION.

YELLOW PEAR TOMATO.

YOUR GARDEN SHOULD CONTAIN MAJESTIC, EARLIANA AND GOLDEN NUGGET TOMATOES.

LOW

TURNIP.

One ounce will sow 150 feet of drill; two pounds will sow an acre.

For early, sow in April in drills half an inch deep and twelve inches apart; thin to 6 inches apart in the drill. For main crop sow broadcast in July and August, and just before a shower if possible.

EXTRA EARLY PURPLE TOP MILAN.—One of the earliest sorts in cultivation. The bulb is very flat, of medium size, quite smooth, with a bright purple top; leaves few, short, and of light color; growing very compact and making exceedingly small strap-leaved top. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

EARLY WHITE MILAN.—Much like the above, but it is pure white all over, instead of having purple top. Quite popular with gardeners. Pkt. 5c, oz. 10c, ¼ lb. 25, lb. 85c.

EARLY SNOWBALL.—A globe-shaped, white-skinned turnip, which is exceedingly productive. The flesh is very fine grained, firm and of delicate flavor. It is one of the best keeping of the white fleshed sorts, very early, and particularly adapted for family or market use. Pkt. 5c, oz. 10c, ¼ lb. 20, lb. 60c.

WHITE EGG.—A quick growing egg-shaped, perfectly smooth, pure white variety with small top and rough leaves. The flesh is very sweet, firm and mild, never having any rank strong taste. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

GOLDEN BALL, or Orange Jelly.—A very beautiful and bright yellow turnip of medium size and of universally sweet and delicious flavor. It is hardy and one of the best of keepers. Flesh extremely firm and solid. Brings a good price on the market. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

PURPLE TOP STRAP LEAVED.—The standard for this part of the country for late planting, and we sell immense quantities of it every year. It is one of the best table and stock varieties on the market being fine grained and of mild flavor. It is of good size, flat shape pure white below with purplish red top. A good cropper and excellent keeper. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 45c, 5 lbs. or more not prepaid, @ 30c.

PURPLE TOP GLOBE.—Similar to Strap Leaved except shape. The largest yielder of any turnip on the list. Desirable for table use or stock. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c, 5 lbs. or more, not prepaid, 35c per lb.

SCARLET KASHMYR.—This new, extra early, bright scarlet turnip has a striking resemblance to a large radish. The flesh is white and crisp. Matures almost as quickly as the earliest radish, and when cooked is of unsurpassed quality. A good keeper, and with its beautiful scarlet color, early maturity and fine quality, it is entitled to a place among garden favorites. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

MIXED TURNIPS.—All the table varieties of turnips mixed in equal proportions. Desirable for family use. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

RUTA BAGA.

Largely grown in the northern states and Canada for stock feeding, and for this purpose they are superior to turnips. Sow not later than June in drills two feet apart and thin out to eight inches in the row.

MONARCH.—This grand, new and distinct form of the ruta baga is, we believe, by far the most productive of all. Of tankard shape, with very small neck, skin dark red above ground and yellow below, flesh rich yellow, fine grained and good quality. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c, 5 lbs. or more, not prepaid, @ 35c.

IMPROVED AMERICAN.—Very solid, fine quality, good shape; smooth skin, small neck; keeps well. This is a choice strain of the very best quality for table use or stock feeding. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 45c, 5 lbs. or more, not prepaid, @ 30c.

WHITE SWEET GERMAN.—Large size, oval form and very solid; flesh pure white and sweet. The best keeping variety. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c, 5 lbs. or more, not prepaid, @ 35c.

CARTER'S IMPROVED HARDY SWEDE.—Large size, excellent quality, and immense yielder. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 40c, 5 lbs. or more, not prepaid, @ 25c.

ONE COW If you have even one cow, it will pay you to grow some RUTA BAGAS, MANGELS, CARROTS, AND PUMPKINS.

PEANUTS.

Peanuts can be grown in Iowa, and everyone should plant at least a few, for the children, **RED CROSS.**—This very desirable variety is easy as the earliest, the most hardy, very prolific and of the best quality. Boys, here is a chance for you. Think of growing peanuts in your own garden and having plenty of them to eat. Shell the nuts carefully so as to not break the inside skin, and plant as soon as the ground becomes warm, from two to three feet apart each way, four or five to the hill, covering two inches. The soil should be deep, and mellow. They produce 25 to 70 bushels to the acre and are as easily cultivated as corn. Price per large package 10c, lb. 40c post paid. By express 5 lbs. or more @ 25c per lb.

SPANISH.—A very early variety, but the pods are small. Per package 10c, lb. 50c.

TOBACCO.

One ounce will sow about 25 square feet and produce plants for one acre.

This is a paying crop and will do well in this state. The following varieties have been thoroughly tested in this climate. Early in the spring burn a brush pile on the ground to be used for seed bed. Then thoroughly pulverize the soil, digging and mixing in the ashes. Sow seeds very shallow. When plants are six inches high transplant into rows 4 feet apart.

TOBACCO.

MAMMOTH MUSCATELLE.—Originated in the private gardens of the Shah of Persia. Very early, leaves long, small ribbed and of the finest possible texture. Pkt. 5c, oz. 35c, ¼ lb. 85c.

BIG HAVANA.—The most popular of all. Heavy cropper, fine texture, delightful flavor, earliest cigar variety to mature and ripen. Pkt. 5c, oz. 30c, ¼ lb. 85c.

CONNECTICUT SEED LEAF.—Well adapted to this climate, and largely grown in some sections for cigar wrappers. Pkt. 5c, oz. 20c, ¼ lb. 65c.

RED CROSS PEANUTS.

A NICE LAWN ADDS GREATLY TO THE VALUE OF ANY PLACE—SOW LAWN GRASS SEED.

**VINE PEACH.**

A splendid novelty introduced by us. The vine on which they are borne is somewhat similar to the muskmelon vine, and requires the same cultivation. The fruit is about the size of a large peach, oval shaped, and of a bright orange yellow color, somewhat russeted. For sweet pickles, pies or preserving they are superior. Recipes for preparing for the table will be sent with each order. In the west or northwest where fruit is scarce, they are becoming popular, as they are easy cultivated.

wonderfully prolific, and can be used in every way in which you would use a peach, except that they are not usually liked raw. Pkt. 5c, oz. 25c.

ORNAMENTAL POMEGRANATE.

An ornamental little fruit which a century ago was commonly grown in the garden, but is now rarely seen. Grows on a pretty vine; fruit is round, yellow, irregularly striped with orange, red or mahogany; fragrant, a single specimen will sweetly perfume a room many days. Pkt. 10c

GROUND CHERRY.

IMPROVED YELLOW.—Another year adds only to the popularity of this little fruit which we introduced, and it is now listed in the catalogues of the leading seedsmen of the country to whom we supply seed. It is a great improvement on the Wild Ground Cherry. They grow well on almost any dry soil; are easier raised than the tomato, and are prolific bearers, and oh! what luscious fruit. For sauce or pies they are excellent. They are delicious as preserves and when dried in sugar are much better than raisins for cakes and puddings, and they will keep, in the shuck, if kept in a cool place, nearly all winter. No one, after raising them once, will ever make a garden again without devoting a portion to the Ground Cherry. Directions for preserving sent with each packet. Pkt. 5c, ½ oz. 25c, oz. 40c.

GIANT SCARLET.—Also called Chinese Lantern Plant. A very popular novelty and has proven quite satisfactory in some sections. Pkt. 10c.

GARDEN LEMON.

Introduced by us and has been highly praised. Fruit is of the shape shown in our engraving, is somewhat smaller than Vine Peach, which it resembles in growth, but has thinner flesh, and is decidedly more acid thus dispensing with the sliced lemons which are so important in putting up the Vine Peach. Directions for cooking with each packet. Pkt. 5c, oz. 25c.

NASTURTIUM.

These furnish tender seed-pods which make delicious pickles. For this purpose we send the Tall or Climbing Mixture. Pkt. 5c, oz. 10c, ¼ lb. 25c.

GOURDS.

Cultivate as cucumbers, or may be trained over lattice work, fences, etc.

JAPANESE NEST EGG.—Grows almost uniformly to the size, color and shape of a hen's egg. The shells are hard and make the very best of nest eggs, as they do not crack. The largest ones, when sawed in two, make excellent pots for starting tomato, strawberry and other plants. Pkt. 5c, oz. 20c

DIPPER.—Makes a lighter and more convenient dipper than can be bought. Dippers of various sizes of a capacity of from a pint to a quart and a half can be had from a few vines. Pkt. 5c, oz. 15c.

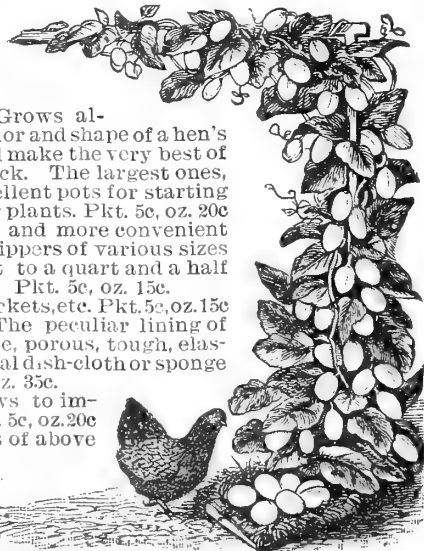

SUGAR TROUGH.—For buckets, etc. Pkt. 5c, oz. 15c

LUFFA or Dish Cloth.—The peculiar lining of this fruit, which is sponge-like, porous, tough, elastic and durable, make a natural dish-cloth or sponge. Start seed early. Pkt. 10c, oz. 35c.

HERCULES CLUB.—Grows to immense size—4 to 6 ft. long. Pkt. 5c, oz. 20c

MIXED UTILITY.—Seeds of above mixed. Pkt. 5c, oz. 25c.

ORNAMENTAL MIXED.—A mixture of the odd shaped and fancy colored sorts. Pkt. 5c, oz. 30c.

**CURIOUS VEGETABLES.**

ORNAMENTAL MICE.—The vegetable curiosity which has attracted so much attention. It is a native of Central Africa, having a small, neat growing vine and bears numerous oval fruits, clear green in color, which are always completely covered with long, light green spines or hairs. Nice for pickling. Pkt. 10c.

CATERPILLARS.—Prostrate creeping plants with small yellow flowers changing into "Vegetable Caterpillars." They are grown as curiosities, and sometimes are put into salads and pickles. Pkt. 10c.

SNAILS.—Another singular variety having most oddly twisted seed pods resembling snails. Pkt. 10c.

COTTON.—Grown mainly as a curiosity in the north. Start the seed early in the house and transplant to the field as soon as warm weather arrives. It makes an ornamental plant in the flower bed and has showy, large flowers followed by the ball of pure white cotton which interests everyone. Pkt. 5c, oz. 15c.

ALPINE STRAWBERRIES.—Sown early, they will produce bearing plants the first year. They are grown in large quantities in Europe, where they are ever bearing, producing all summer. Pkt. 10c.

MARTYNIA.—Also called "Devil's Claw" and "Unicorn Plant." A large, ornamental plant, bearing beautiful flowers which are succeeded by large seed-pods which when young are fine for pickling. Pkt. 5c, oz. 30c.

MOUGRI.—A vegetable from the Island of Java. Pods resemble radish but are sometimes 2 to 3 feet long and are eaten raw or cooked. Taste like water cress. Pkt. 10c.

EGYPTIAN LENTILS.—Largely used in oriental countries as a principal article of diet. It was from these that the dish of pottage was made for which Esau sold his birthright to Jacob in Bible times, and many will be interested in them for that reason. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

CHINESE TEA.—We are sure that many of our customers will be glad to grow this as a curiosity if nothing else. The plant is of a shrubby nature, with beautiful shiny foliage and fragrant blooms, requiring the same treatment as any tender shrub. Can be kept growing in pots through the winter. About 10,000 pounds of tea per year is grown by one man in South Carolina. Pkt. 10c.

COTTON.

HERBS.

In making up your assortment of seeds for the year don't neglect to order a few varieties of herbs. The chief point is to harvest them properly, which should be done on a dry day when not quite in full bloom then dried quickly and packed closely, and entirely excluded from the air. Those marked with an asterisk (*) are perennial.

ANISE.—Seeds have an agreeable, aromatic taste. Pkt. 5c, oz. 10c.

BALM.—For making balm tea. Pkt. 5c, oz. 25c.

BASIL, SWEET.—For flavoring soups, stews, etc. Pkt. 5c, oz. 15c.

BORAGE.—Leaves used for flavoring. Pkt. 5c, oz. 15c.

***CARAWAY.**—Seeds are used for flavoring bread, etc. Pkt. 5c, oz. 10c.

***CATNIP or Catmint.**—For seasoning. Pkt. 5c, oz. 30c.

CORIANDER.—Seeds are used in confectionery. Pkt. 5c, oz. 10c, ¼ lb. 25c.

CASTOR OIL PLANT.—Seeds are pressed out to obtain oil. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

***CHAMOMILE.**—Largely used for medicinal purposes. Pkt. 10c, oz. \$1.50.

***DANDELION.**—Grown for greens; also for medicine. Pkt. 5c, oz. 35c.

DILL.—Seeds are used for dill pickles. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c

***FENNEL, SWEET.**—Leaves used in sauces. Pkt. 5c, oz. 10c.

***HOREHOUND.**—For seasoning and cough remedy. Pkt. 5c, oz. 20c.

***HYSSOP.**—Used for asthma and catarrh. Pkt. 5c, oz. 20c.

***LAVENDER.**—Used largely as a perfume. Pkt. 5c, oz. 25c.

***MARJORAM, SWEET.**—For seasoning. Pkt. 5c, oz. 15c.

***ROSEMARY.**—Aromatic leaves used for seasoning. Pkt. 5c, oz. 25c.

***RUE.**—For medicinal purposes; good for fowls. Pkt. 5c, oz. 15c.

SAFFRON.—Dried flowers used for coloring. Pkt. 5c, oz. 15c.

***SAGE.**—Much used for dressing. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.40.

SUMMER SAVORY.—Used for flavoring. Pkt. 5c, oz. 10c, ¼ lb. 30c.

SWEET WOODRUFF.—A sweet-scented herb; forms the principal ingredient of the famous German Maitrank. Pkt. 5c, oz. 60c.

***TANSY.**—Cultivated for its medicinal properties. Pkt. 5c, oz. 40c.

***THYME.**—Leaves and young shoots used for seasoning. Pkt. 5c, oz. 20c.

***WORMWOOD.**—Used medicinally and for poultry. Pkt. 5c, oz. 20c.

MIXED VARIETIES.—A mixture of all the above. A nice garden assortment. Pkt. 5c, oz. 15c, ¼ lb. 45c.

GARDEN PLANTS AND ROOTS.

Every garden should contain an assortment of these hardy plants and a few square feet will supply the family. Many persons now believe that if these well known old remedies were kept and used more in families in place of so many drugs and patent medicines it would be better for the health of the people. Orders for these plants must amount to at least 25 cents. We pay the postage.

ARTEMESIA, or Brotan.—A hardy plant sometimes called "Old Man." The leaves have a pleasant odor and bitter taste. Use similar to wormwood. Each 15c, 3 for 40c

BALSAM MINT.—Has a soft, agreeable fragrance and is used for perfume; also used for flavoring soups, salads, etc. Each 15c, 3 for 40c.

CALAMUS.—(*Acorus*).—Also called "Sweet Flag." Leaves have an aromatic odor and roots a pungent taste. Grows in wet soil or beside ponds, but can be grown in dry places also. Each 15c, doz. \$1.50.

CHIVES.

CHIVES.—Perfectly hardy little perennials of the onion tribe, and are grown entirely for their tops, which are used wherever the flavor of onion is required. Plant in small clumps in any common garden soil and they will grow readily. The tops appear very early in spring and can be shorn throughout the season. In New England it is considered indispensable for use in omelets. Roots per bunch 15c, 3 for 35c, doz. \$1.10.

MONARDIA DIDIMA.—Also called Scarlet Bergamot and Oswego Tea. Each 10c, 3 for 25c, dozen 75c.

CATNIP or Catmint.—Used largely for infants. Each 10c, 3 for 25c, doz. 75c

PEPPERMINT.—All children know and like the flavor of peppermint. It has high medicinal value. Each 10c, 3 for 25c, dozen 75c.

GENUINE PENNYROYAL.—Warm, pungent, of somewhat aromatic taste; used for medicinal purposes. Each 15c, 3 for 40c, dozen 125c.

ROSEMARY.—Used for perfume, also for flavoring meats, stews, etc., and for garnishing. Each 10c, 3 for 25c, doz. 75c.

HOLT'S MAMMOTH SAGE.—Great improvement on common sage. Plants are very strong growing, first season attaining one foot in height, and so spreading that a single plant covers space 3 ft. in diameter; leaves borne well above soil; very large and of unusual substance, strong in flavor and of superior quality. A single plant of Holt's Mammoth will yield more than a dozen of the common; hardy. Each 10c, 3 for 25c, doz. 75c.

VARIEGATED MAMMOTH SAGE.—Beautifully variegated dark green and pure white color which makes it a very ornamental plant; equal to Holt's in productiveness and flavor; new and scarce. Each 15c, 3 for 35c

SPEARMINT.—This is commonly called Mint and thousands of dollars worth of it is sold annually in New York, Boston and other cities for flavoring salads, garnishing meats, mint julip, etc. Each 10c, 3 for 25c, doz. 75c.

TANSY.—Used largely for its tonic, stomachic and other medicinal qualities. Each 10c, 3 for 25c, doz. 75c.

TARRAGON.—The true tarragon is appreciated thoroughly by all who know it, for the use of its aromatic leaves in seasoning salads, soups, pickles etc, and also for tarragon vinegar. Each 15c, 3 for 40c, doz. \$1.25.

GOLDEN VARIEGATED THYME.—A handsome and attractive variety, used for sauces and flavoring. Each 10c, 3 for 25c.

SILVER THYME.—Variegated white and green. Each 10c, 3 for 25c.

HOP ROOTS—English Cluster.—The best and most prolific variety; for making yeast, etc. Each 15c, 3 for 35c, doz. \$1.00.

COLLECTION

One plant each of any ten Herb and Mint Plants on this page

FOR ONLY \$1.00 POSTPAID.

GARLIC.

A species of onions propagated by offsets; used for flavoring soups, stews and other dishes. We furnish sets at 40c per lb., postpaid; by express 30c per lb.; 10 lbs. for \$2.50.

HORSE RADISH.

Grow it in your own garden and grate it freshly. Plant the sets small end down in rows two feet apart and about eighteen inches apart in the row. They will do better in rich, loose soil set slanting and covered two inches. Nice sets 15c per doz. 75c per 100 postpaid; or 60c per 100 by express.

RHUBARB ROOTS.

Plant in spring or fall, setting the plants three feet apart each way.

VICTORIA.—The standard for general use. Each 15c, 5 for 50c, doz. \$1.00

IDEAL MAMMOTH.—The largest and best variety. See description with novelties. Strong roots 25c each; doz. \$2.00.

HOLT'S MAMMOTH SAGE.—(Average size leaf.)

ASPARAGUS ROOTS.

It pays to have a small bed of asparagus so as to gather it fresh from your garden, and when once set, a bed will last many years. Our roots are strong and healthy. We recommend the one year old roots as more desirable than the two-year-old for general planting, as well as cheaper. Ask for circular giving directions for planting.

CONOVER'S COLOSSAL.—25c per dozen; \$1.00 per 100 postpaid. By express or freight, at purchaser's expense per 100 60c; 1,000 for \$4.00.

COLUMBIAN MAMMOTH WHITE.—(See description on page 2) 30c per doz.; \$1.25 per 100 postpaid. By express per 100 75c, 1,000 for \$5.00.

Two-year-old roots of either variety 50c per dozen; \$1.60 per 100 postpaid. By express or freight \$1.00 per 100; \$6.00 per 1,000.

MUSHROOMS.

The ease and certainty with which a crop of mushrooms can be grown to perfection in any ordinary house cellar, woodshed or barn, and the astonishing success of so many who have taken up this new industry both for profit and their own use, induces us to call especial attention to the subject. The great luxury of mushrooms can be enjoyed by all at a trifling expenditure of money, time and labor. We recommend our English mushroom spawn as generally the better both for the market garden and the private planter. Directions for culture sent on application.

IMPROVED ENGLISH SPAWN—This is grown by special culture from large, perfect heads and then pressed into bricks weighing 1½ lbs. each. Per brick 40c postpaid. By express or freight, 5 lbs. 65c, 10 lbs. \$1.00. Book on Mushroom Culture 10 cents.

MUSHROOMS.

VEGETABLE PLANTS.

Well grown and lightly packed to carry a long distance. They can be shipped fresh, well packed at the beds, on a day's notice.

Plants quoted "by mail" are sent at our expense; "by express" at the purchaser's. No charge either for packing or boxes. Plants from either hotbed or cold frame are ready during April or May; outdoor grown during June and until the middle of July. We sell 500 at the 1,000 rate.

CABBAGE PLANTS.—EARLY VARIETIES—Ready April 10th.—Extra Early Express, Jersey Wakefield and Washington Wakefield. By mail 25 for 25c, 100 for 75c; by express, 100 for 50c, 1,000 for \$1.00.

CABBAGE PLANTS.—LATE VARIETIES.—Ready May 15th.—Surehead, Premium Flat Dutch and Shortstem Drumhead. By mail, 100 for 65c; by express, 100 for 40c, 1,000 for \$2.50.

CAULIFLOWER PLANTS.—Ready April 15th.—Henderson's Snowball. By mail, doz. 25c; 100 \$1.25; by express, 100 \$1.00; 1,000 \$7.00.

CELERY PLANTS.—Ready May 1st.—White Plume and Golden Self-Blanching. By mail, doz. 20c, 100 75c; by express, 100 60c, 1,000 for \$4.00. After June 15th field grown plants \$2.75 per 1,000.

EGG PLANTS.—Ready May 1st.—New York Improved. By mail, doz. 25c, 100 \$1.25; by express, 100 for \$1.00.

LETTUCE PLANTS.—Black Seeded Simpson and Improved Hanson. Per doz. 20c, 100 for 75c postpaid. By express per 100, 50c.

PEPPER PLANTS.—Ready May 1st.—Ruby King, Large Bell, and Red Chili. By mail, doz. 25c, 100 \$1.00; by express, 100 for 75c.

TOMATO PLANTS.—Ready May 1st.—Strong, transplanted plants. Dwarf Champion, Bond's Minnesota, Beauty and Matchless. By mail, doz. 25c, 100 \$1.00; by express 100 75c, 1,000 \$6.00. Not transplanted, 50c per 100, \$3.50 per 1,000.

GROUND CHERRY.—Ready May 15th.—Improved Yellow. By mail, doz. 25c, 100 \$1.25; by express \$1.00 per 100.

SWEET POTATO PLANTS.—Ready May 1st.—Plants strong, vigorous, well rooted and hardy. We can furnish either the Yellow Nansmond or Early Yellow Jersey. Write if you want a large lot. Prices vary. By mail, 100 for 50c; by express, 100 for 30c, 1,000 \$2.50.

VINELESS SWEET POTATO PLANTS—A novelty of great merit; is of dwarf bush-like growth. The tubers are yellow, of medium to large size, and lie compactly in the hill. When cooked, of best possible quality. 75c per 100 postpaid; by express, 75c per 100, \$6.00 per 1,000.

FARM SEED DEPARTMENT.

AS THE FARM CROP is more important to the general welfare of the country than any other, so the Farm Seed Department should have the pre-eminence in seed catalogues. Realizing the vast importance of this branch of our business, we devote our careful attention to the growth and selection of the best farm seeds of all sorts. Our seed grain is grown especially for seed in the section best suited to its development and perfect maturity, is all carefully selected, thoroughly cleaned, of the best quality and we sell at reasonable prices.

WE TAKE PRIDE in our large and increasing trade in this branch of our business. With our new and convenient buildings and improved machinery for cleaning, which is as perfect as any in the United States, we are enabled to clean seeds perfectly far better than those commonly sold.

High Grade Seed Grain.—It costs more to grow a crop for seed purposes than the ordinary farmer can understand. It requires extra choice stock seed, special preparation of the land, special cultivation, great care in harvesting, cleaning, testing, preparing for shipment, bags, etc., etc., so that we are obliged to ask a considerable advance over market prices, but any intelligent farmer will agree with us that such pedigreed seed is well worth to him the price we ask.—**It always pays to grow the best.**

PRICES named in this department are subject to important market changes. Quotations are net and are not subject to premium or discount which is offered on other seeds. Clover and grass seeds are constantly varying in value, and we issue a price list daily during the busy season. Please write for quotations, sending list of requirements, when in need. Orders sent us will be given benefit of lowest prices on day order is received. Will take pleasure in mailing samples and quoting inside prices at any time on large orders.

SHIPPING—In this department everything that is quoted by the packet or pound is sent by mail postpaid; all large quantities unless noted, are sent by express or freight at the expense of the purchaser. Prices named include bags (except on clover and grass seeds) and delivering to depot here.

NOTICE—While we exercise great care to have all seeds pure and reliable, we give no warranty expressed or implied. However, if the seeds are not satisfactory on receipt and examination, they are to be returned to us at once and we will refund the money.

OUR EXPERIMENTAL GROUNDS.—We are continually experimenting with farm seeds on our trial grounds by having plats of each variety of grain and grass seed sown or planted, which enables us to determine their relative values. This enables us to better answer the inquiries of our customers regarding crops suitable to their requirements.

It cost less than 30 cents an acre to use our carefully selected SEED CORN.

SEED CORN

Do you deem it wise to risk doubtful corn when GOOD SEED is so cheap.

THIS is our great speciality. We claim to be headquarters for seed corn in the United States, and are pleased to say that we are in a better position than ever before to furnish the choicest seed from the best thoroughbred varieties of corn. We had no early frosts in this section of the country and the crops were all thoroughly matured and in excellent condition for seed purposes before frost could damage them. We are confident that we can furnish the best quality and the best varieties obtainable. Send list of your wants and let us quote prices.

Thirty - Six Years

ago when we began in the seed business, farmers would not buy seed corn. Every man saved his own seed, and it was considered a folly to buy seed corn. In 1881 we introduced a new variety and those venturesome enough to try it were greatly pleased. But still the sale was very limited. In 1892 we originated and introduced the Iowa Gold Mine which sprang at once into prominence, as it was, and is yet, the deepest grained and smallest cobbled variety ever brought out.

Since that time we have introduced Iowa Silver Mine, Early Longfellow Dent, Improved Early Mastodon, Lenoche's Homestead, Star Leaming, New Century Wonder, Profit, Farmer's Reliance, and Golden West which have all become very popular and are everywhere the best of their class.

WHERE WE HANDLE OUR SEED CORN.

Thoroughbred Seed Corn.

We are proud to say that the Iowa Seed Store is now recognized as headquarters for thoroughbred seed corn and on account of their superiority, the varieties which we have originated or introduced are now listed by the most prominent seedsmen in America, Europe, and Australia, who handle this grain, and are the best everywhere. The value of the average corn crop can be fully doubled by planting our improved varieties. Don't be satisfied with a second grade, even if you can save five or ten cents per acre in cost of seed (one bushel plants eight acres) but send your order direct to the Iowa Seed Company for thoroughbred seed corn, and get the best.

WE ARE BREEDERS of seed corn, growing it here in central Iowa, the best section for corn in the great corn belt of the United States. We have several seed corn specialists; who select the stock seed for our crops. Each ear is critically examined in all its points with the greatest of care and only such ears as are strong and vigorous in vitality and true to the ideal of each variety are used. These ears must be uniform in shape and color, with straight rows, the tips being well filled with large grains, which denote vigor and strength, the kernels being uniform in color, depth, width, shape and such other characteristics as are most desirable and indicate well bred corn. This stock seed is then placed in the hands of careful growers who, for many years past, have made a specialty of growing seed corn exclusively for us, and who therefore know just how to handle the crops to secure the best results. Our rule is to have each variety grown at least ninety rods from any other variety in order to prevent its becoming mixed. The greatest care is used in preparing and having the soil in the best of condition and in the cultivation of the crop. After the crop is well matured it is gathered into well ventilated seed corn buildings, remaining there till thoroughly cured, and is then shipped

from the various farms to our special seed corn house at Altoona or our warehouse in Des Moines, where it is sorted and prepared for seed. This sorting is done by men who have been trained for the work. Each ear is taken in hand and critically examined, and if found true to type of that variety in color, shape, depth of grain, color of cob, and other characteristics, it is then tipped, butted, and reserved for seed purposes. The corn is then shelled and run through two cleaning mills which not only wind it thoroughly but also grade and screen it both ways taking out any small, inferior, or large kernels which might be in it, thus leaving it very uniform in size. It is then tested by taking several lots of one hundred kernels each from different bags or bins, just as the corn runs in the bulk, which is the only way to get a true average test. The utmost care is used through the whole process of handling and preparing it for seed. Corn thus prepared cannot be sold at a price that ordinary seed corn is sold for, but we know that it is worth more to any farmer.

YOU RUN NO RISK in buying seed corn from us because if it is not satisfactory on arrival, it may be returned immediately and we will refund your money.

OUR SEED CORN PROVES THIS STATEMENT.

IDEAL EARS OF CORN.

Our cut illustrates an ideal shape for ears of corn. Notice depth of grain and how well it is filled out over both the tip and butt ends. Grain is wedge shape and still without space between kernels at germ end.

Our old customers know that for more than twenty years we have been preaching the gospel of **Improved Seed Corn** until finally, during the past four or five years the farmers have begun to really wake up to the real importance of the subject. Corn schools are being conducted in many of the states; corn growing is being talked of at all the Farmer's Institutes, and agricultural papers which a few years ago devoted practically all their space to wheat, potatoes, hogs and cattle are finding that there is really more to say about corn than they ever supposed. Competent judges say that the Iowa Seed Company has added **Millions of Dollars** to the value of the crops in every one of the leading corn growing states by introducing such valuable sorts as Iowa Gold Mine, Iowa Silver Mine, Farmer's Reliance, Profit, etc. Our varieties have proved the best and most satisfactory everywhere, and now when we say that we have a new variety, the Golden West, which combines all their best characteristics in a main crop variety, we know that farmers everywhere will want it.

THE BIG FOUR Undoubtedly the best and most profitable four varieties of corn for practical, money making farmers are the:—

New Golden West,

Farmer's Reliance,

Iowa Silver Mine,

Iowa Gold Mine.

There may be other sorts of special value for exhibiting at fairs or corn shows but the successful farmers want the most bushels of shelled corn to the acre, the highest feeding value and the kinds most sure to mature, their crops even during the most unfavorable, trying season and the above varieties can be depended on every year.

TWO WAYS.—Every corn grower who strives to increase his corn crop has two ways to do it. He can increase the yield per acre, or he can put in more acres. The farmer who wants more corn will do well to study the first method before he decides on the latter. Good seed is the first essential to a bigger yield of better corn, therefore plant the Iowa Seed Company's improved varieties and add 20 to 50 per cent to your crop. Be sure to read the descriptions of these varieties on the following pages and place your order early if you want choice seed corn this year.

**OUR NEW
SEED CORN HOUSE.**

We are sure that every farmer would be interested in the new building which we have erected this year at Altoona Iowa, especially for handling seed corn, and we want to extend a most cordial invitation to all of our customers and to everyone who grows corn, to come and see it. It is located on our farm near the town of Altoona, eleven miles east of Des Moines, on the C. R. I. & P. R. R. There is also an inter-urban car leaves Des Moines every hour which goes almost to the door of this building. In the past we have been doing most of the sorting and shelling of seed corn in our two large warehouse buildings in Des Moines, but this new building will give us better facilities and enable us to handle and store it in better shape than ever before.

The outside walls are made up almost entirely of doors which can be lifted for ventilation and are in fact kept open all the time except during very cold or stormy weather. The interior arrangements consists mainly of very narrow high cribs with ventilators running through the entire length of them and narrow passage ways between the cribs. There is a very extensive system of steam pipes underneath, throughout the building, which are used as needed for drying the corn and also to keep out moisture during foggy weather and protect from freezing.

**AN
INVITATION**

We have about 800 acres of corn being grown for us for seed purposes near Altoona and when it is brought in at husking time it is not shoveled, but is handled by conveyers throughout, from the time that it is dumped by special machinery from the wagons and conveyed to the sorting hoppers where it is carefully handled and all inferior ears discarded. It is thence conveyed on to the drying cribs where it remains until February when it is again resorted by seed corn experts, shelled and graded. We have special machinery for tipping and butting and all our seed corn is graded so that it can be planted with the edge dropping corn planters.

We have visited most of the large seed corn growers in the country and this building is, we believe, better arranged for handling and caring for seed corn than any other in the United States. Remember that our latch string is out and you will find us "at home" six days in the week, and if you come in the summer you will doubtless find much of interest to you on our experiment farm and trial grounds of 40 acres located near this building.

"Last spring I planted 25 acres of your Golden West Corn and am well satisfied with it. It yielded 80 bushels per acre, which was as much again as my other corn yielded, or that of my neighbors."—*Will Scoville, Polk county, Iowa.*

"I was very much pleased with your Golden West Corn last year."—*John J. Martin, Graceham.*

THE STANDARD OF PERFECTION.

In properly judging any variety of corn it is necessary to have some standard as to size, shape and general characteristics. This does not mean the largest size ear, but simply a good average size. An ear which is very much larger than the standard would be disqualified. The standards which we have adopted on these four varieties are stated below. Compare them with any sample ear which you may have there and it will help you to appreciate these varieties

GOLDEN WEST.—Standard length 10 inches, circumference 7½ inches, color, golden yellow, shape cylindrical, corn nearly firm on cob, grain slightly rough, medium wedge shape, long, 18 to 20 rows, narrow space between kernels, butt rounded, tip capped over, shank medium size, cob deep red and 90 per cent of corn to cob.

FARMER'S RELIANCE.—Standard length, 8½ inches, circumference, 6¾ inches, shape of ear slightly tapering. Grain firm on cob, a deep yellow color, nearly smooth, medium wedge shape, and medium length, 16 to 18 rows with narrow space between, butts rounded, tips capped over. Small red cob, with eighty-eight per cent of corn to cob.

IOWA SILVER MINE.—Standard length, 9¼ inches, circumference, 7½ inches, shape cylindrical, medium firm on cob, color pure white, grain rough, medium wedge shape, long, 16 to 20 rows, narrow space between kernels, butts rounded, tips capped, cob small and white, 90 per cent of corn to cob. Shank of medium size.

IOWA GOLD MINE.—Standard length of ear 8½ inches, circumference, 7½ inches, grain medium firm on the cob, rich golden yellow color rough, narrow wedge shape and very long, 16 to 20 rows, with medium space between, butts rounded, tips capped, cob is small, deep red in color, 91 per cent of corn to cob.

A Practical Corn Manual

This small book was prepared in order to assist farmers to form a more correct idea of the most desirable ears of corn for general purposes in whatever latitude they may be located. It is, in fact, a **Corn Judging Manual**, worth dollars to any farmer, but we ask only 10 cents per copy for it. Sent free on request to anyone ordering one bushel or more of seed corn from us.

GOLDEN WEST.

The past ten years have brought out many new varieties of corn which we have tested on our farm but none were perfect in every respect. The one which nearest approached perfection was the Golden West, which is a new variety originated in eastern Iowa by one of most practical seed corn specialists in the United States. We have watched it during the five very trying years just past, and are now satisfied that it is the

Best Yellow Corn Ever Offered.

For years past we have been searching for a variety of corn which had the characteristics of the Iowa Gold Mine as to depth of grain and color, but which produced a larger ear and would yield a better crop. We have also been at work trying to produce such a variety on our own place, but it is difficult to breed it up in such a way that it will hold these valuable characteristics. The **New Golden West comes the nearest to our ideal** and is far superior to any yellow corn now on the market. The stalk and manner of earing greatly resemble the Iowa Silver Mine, the ears averaging fully as large or larger and the grain is more solid on the cob.

Description: Golden West is one of the most vigorous growing varieties that we know of. Stalk is of medium height and very thick at the ground, short jointed with broad leaves which help mature the large crop of corn it produces. It is the **deepest rooted corn that we know of** and therefore not easily injured by hard wind storms nor are the roots so near the surface as to be broken off and the vitality of the plant sapped and weakened in cultivating the crop. The ears have usually eighteen to twenty rows. There are many ears which measure eleven inches in length and weigh one and one-half pounds, containing from twelve to fifteen hundred grains to the ear. The kernels are of such shape that they wedge in tightly and make a solid ear not only at the cap but down near the point or germ end (see cut of ear section.) This is a characteristic which is overlooked by many corn breeders, thus causing ears of ordinary varieties, which appear solid, to be of light weight. The ear is solid, nearly uniform in size throughout its entire length, but gradually tapering off to a blunt oval tip, cob comparatively small and of such nature that it dries out rapidly, thus insuring a well matured crop, even during unfavorable seasons.

It matures in about one hundred days, thus making it a safe corn to plant, and we claim that it will yield a **larger crop than any other yellow corn in existence.**

The breeder of this corn has been working on essential principles for many years, and instead of simply crossing two good varieties, he has made his cross from several varieties and selected so as to combine the best characteristics of each with an ideal in his mind towards which he was working. Instead of having simply surface roots like other northern varieties, he has bred to obtain a deep rooted sort which would obtain its nutriment from the subsoil as well as having plenty of surface roots. In this way he has secured a better leaf structure for the plant which enables it to stand long seasons of drought, hot weather and strong winds. By working with his first cross to obtain plants with unusual heavy leafage and roots, he has been enabled to build this new variety on a foundation of perfect health and vigor. It is sure to become the leading corn for this latitude and will rapidly win the confidence of all corn growers. Per bushel \$2.00, 2 bu. or more @ \$1.85, 10 bu. \$17.50.

Vast Treasures

Of Iowa soil, rain and sunshine are being annually wasted by trifling with varieties of corn not capable of utilizing them. Don't plant the old worn out sorts any longer, begin right, this year, by buying Golden West. It is a new variety of wonderful leafage and vigor of growth and is sure to become the leading corn for this latitude and rapidly win the confidence of all corn growers. Thousands of farmers made money by buying our Iowa Gold Mine and Iowa Silver Mine corn when they were first introduced and selling the seed to their neighbors, the following season. It will pay you to follow this plan and send in your order early as the supply is limited. Remember that a bushel plants seven or eight acres; therefore it will cost you only about 30 cents per acre for the seed.

PRICE—Pkt. 5 cents; pound 25 cts; three pounds 60 cts; seven pounds (will plant on 7 acres) \$1.10, charges prepaid to any part of the United States.

By freight ½ peck 40 cts; peck 65 cts; bushel \$2.00; 2 bushels or more @ \$1.85; 10 bushels or more @ 1.75.

What the Farmers Say:

I have grown your Golden West corn two seasons and it is all right. This year I planted 40 acres of it and it is true to type and looks just like the picture in your catalogue. The ears are filled out at tip end just as your cut shows.—Geo. T. Randolph Scott county, Iowa.

Your Golden West is by far the best corn ever grown in this locality, and fully equal in yield to the Iowa Silver Mine. Part of my land was flooded this year and badly washed by the river, but owing to the Golden West being so deeply rooted it stood up very much better than either of the other varieties which I grew or any other sorts in this locality. It yielded a grand crop of good, sound corn in spite of unfavorable season.—G. W. Pfeifer.

I have just finished gathering my Golden West, and one field grown on sloping land yielded 103 bushels per acre and another field which was on low, level ground and damaged considerably by overflow, yielded over 80 bushels per acre.—Wm. Day, Dallas county, Iowa.

In reference to the Golden West Seed Corn which I purchased of you this year will say the season has been very unfavorable but I can recommend the corn as in every way better than any I ever raised. Am sorry I planted my corn so thick. As usual I made allowance for some not to grow, but I was mistaken. I believe ever kernel grew. The quality is unsurpassed.—Daniel Marlan, Carroll county, Iowa.

We planted ½ bushel of Golden West and it has done fine and is now (Sept. 15th) out of danger from frost, sound and bright, and we are pleased with it. Also planted a bushel of the Gold Mine Seed Corn and it has also done well and is sound. Both varieties are excellent. The garden seeds we purchased of you gave entire satisfaction.—A. Van Sperren, Jasper county, Iowa.

I planted the Golden West Corn purchased of you May 11th, and it was out of danger from frost September 8th. I am very well pleased with it and think it will come up to all your claim for it. Although we have had a very wet season to raise corn, still the seed purchased of you was far ahead of that purchased of one of your competitors.—C. A. Bonar, Adams county, Iowa.

Money in Grass

If you raise cattle, horses, hogs or sheep, there is money in providing proper pasture for them. Instead of sowing simply Clover and Timothy this year, better try grasses which are of special value for special soils.

Notice our Pasture Mixtures on Page 40.

Exact size of standard ear.
GOLDEN WEST.

PRIZE WINNER
EVERYWHERE

IOWA SILVER MINE

215 BUSHELS
PER ACRE.

The most marvelous variety of corn ever offered, and one which will surprise everyone who plants it. Thousands of farmers have tried it and doubled their crops and also made money rapidly by selling seed to their less enterprising neighbors. It is revolutionizing the corn growing industry of the country. Just think of this wonderful yield—215 bushels per acre with ordinary culture. We don't blame some practical farmers for looking incredulous when this is mentioned; we did not believe it ourselves until we had measured the ground and proved conclusively that the report was correct. The seed corn trade is our great specialty, and we claim to be seed corn experts, and in the spring of 1895, when we first saw this corn, we purchased the entire stock for \$1,000.00 cash. The originator is not growing or selling seed corn now and you must buy from us if you want pure, true to name seed. Just think of it! The average corn crop of the United States is only 28 bushels per acre, and there was more than seven times this amount of Iowa Silver Mine grown on one acre. Would you like to grow this kind of a crop? Plant Iowa Silver Mine Corn—plant your whole farm to it.

DESCRIPTION—Stalk grows to a height of about seven or eight feet, and sets the ears about three and one-half to four feet from the ground, just the right height for easy picking. One peculiarity which will be noticed in going over the fields is that there are no barren stalks; every one has an ear, many stalks have two or three good ears, and the originator says that has been characteristic every year that he has grown it. The type is very even. Ears measuring from **Ten to Twelve inches in length**, and weighing one and one-half pounds are often found. The ears are very uniform in size and shape, with sixteen to twenty straight rows (usually eighteen rows) of deep, pure white kernels, set on small, white cob, and the ears are well filled out over the tips. It is early maturing in ninety-five days. The cob dries out rapidly, so that it is ready for market **earlier than any other white field corn** in existence. Seventy pounds in the ear will make sixty-two pounds shelled. It is adapted to a wider range of soil and climate than any corn ever offered. From Minnesota to Florida, from Massachusetts to California, it will yield a paying crop where other varieties are grown at a loss. It is in every way a distinct type of corn, hardy, and a wonderful resister of drouth.

ITS PRIZE RECORD—Everywhere the Iowa Silver Mine captures the prizes over all other varieties. At one fair ten of the largest ears took first prize, ten of the smaller ears took second prize. Afterwards the same ten large ears took sweepstakes over all other varieties, both white and yellow, making a total of **\$95.00 in prizes taken at one fair by twenty ears** of the Iowa Silver Mine Corn. It captured the big prize offered by us in 1896, for the largest crop, against all other kinds of any color, yielding 215 bushels. At the Illinois State Fair it took first premium for the best bushel of corn, any color or sort; first for best white corn in the state, and **grand sweepstakes for the best corn** of any color, competition open to the world. In 1899 the Illinois State Agricultural Society offered three large prizes of the largest corn crop grown on one acre, and the Iowa Silver Mine captured all three of them with crops of

196, 176 AND 154 BUSHELS PER ACRE.

No other corn of any color can compare with it for productiveness.

Read the **Astonishing Record** of our own prize contest. It produced 215 bushels per acre in Scott county, Iowa; 211 bushels per acre in Indiana; 201 bushels per acre in Arkansas; 178 bushels per acre in Illinois; 145 bushels per acre in Nebraska; 144 bushels per acre in Ohio; 137 bushels per acre in Texas.

NOW FOR 1907.—To every one who orders Iowa Silver Mine Seed Corn from us we will send free full information as to how 215 bushels of corn were grown on one acre. Be progressive; adopt new methods and use good seed. Figure out what your profit would be if your crop were that large. It will pay you to plant your entire field with this variety. Get your neighbors to order with you.

WE ARE THE ORIGINAL INTRODUCERS

And if you want pure Iowa Silver Mine Corn it must be purchased from us. We have proof that other dealers are copying our descriptions and selling common white corn as Iowa Silver Mine. The cost of pure seed is about 25 cents per acre. One bushel per acre added to your crop will pay for it, and you can't afford to use doubtful seed.

PRICE: For high grade extra select seed corn *Postpaid or by Express Prepaid:* Per pkt. 5c, lb. 25c, 3 lbs. 60c, 7 lbs. (will plant an acre) \$1.00. *By Freight or Express, purchaser paying charges:* Per pk. 60c, bush. \$1.60, 2 bush, or more, at \$1.50, 10 ush. or more at \$1.40. Ask for special price in quantity.

READ WHAT THE PEOPLE SAY.

The seeds purchased from you produced the **finest yields ever seen** in our country. The **Iowa Silver Mine** Corn yielded 188 bushels to the acre.—W. A. Johnson, Miss. Co., Ark.

"I don't think a better quality of corn can be found than the **Iowa Silver Mine**, and it yielded 114 bushels per acre for me this year." S. S. Troxel, Benton Co. Ia.

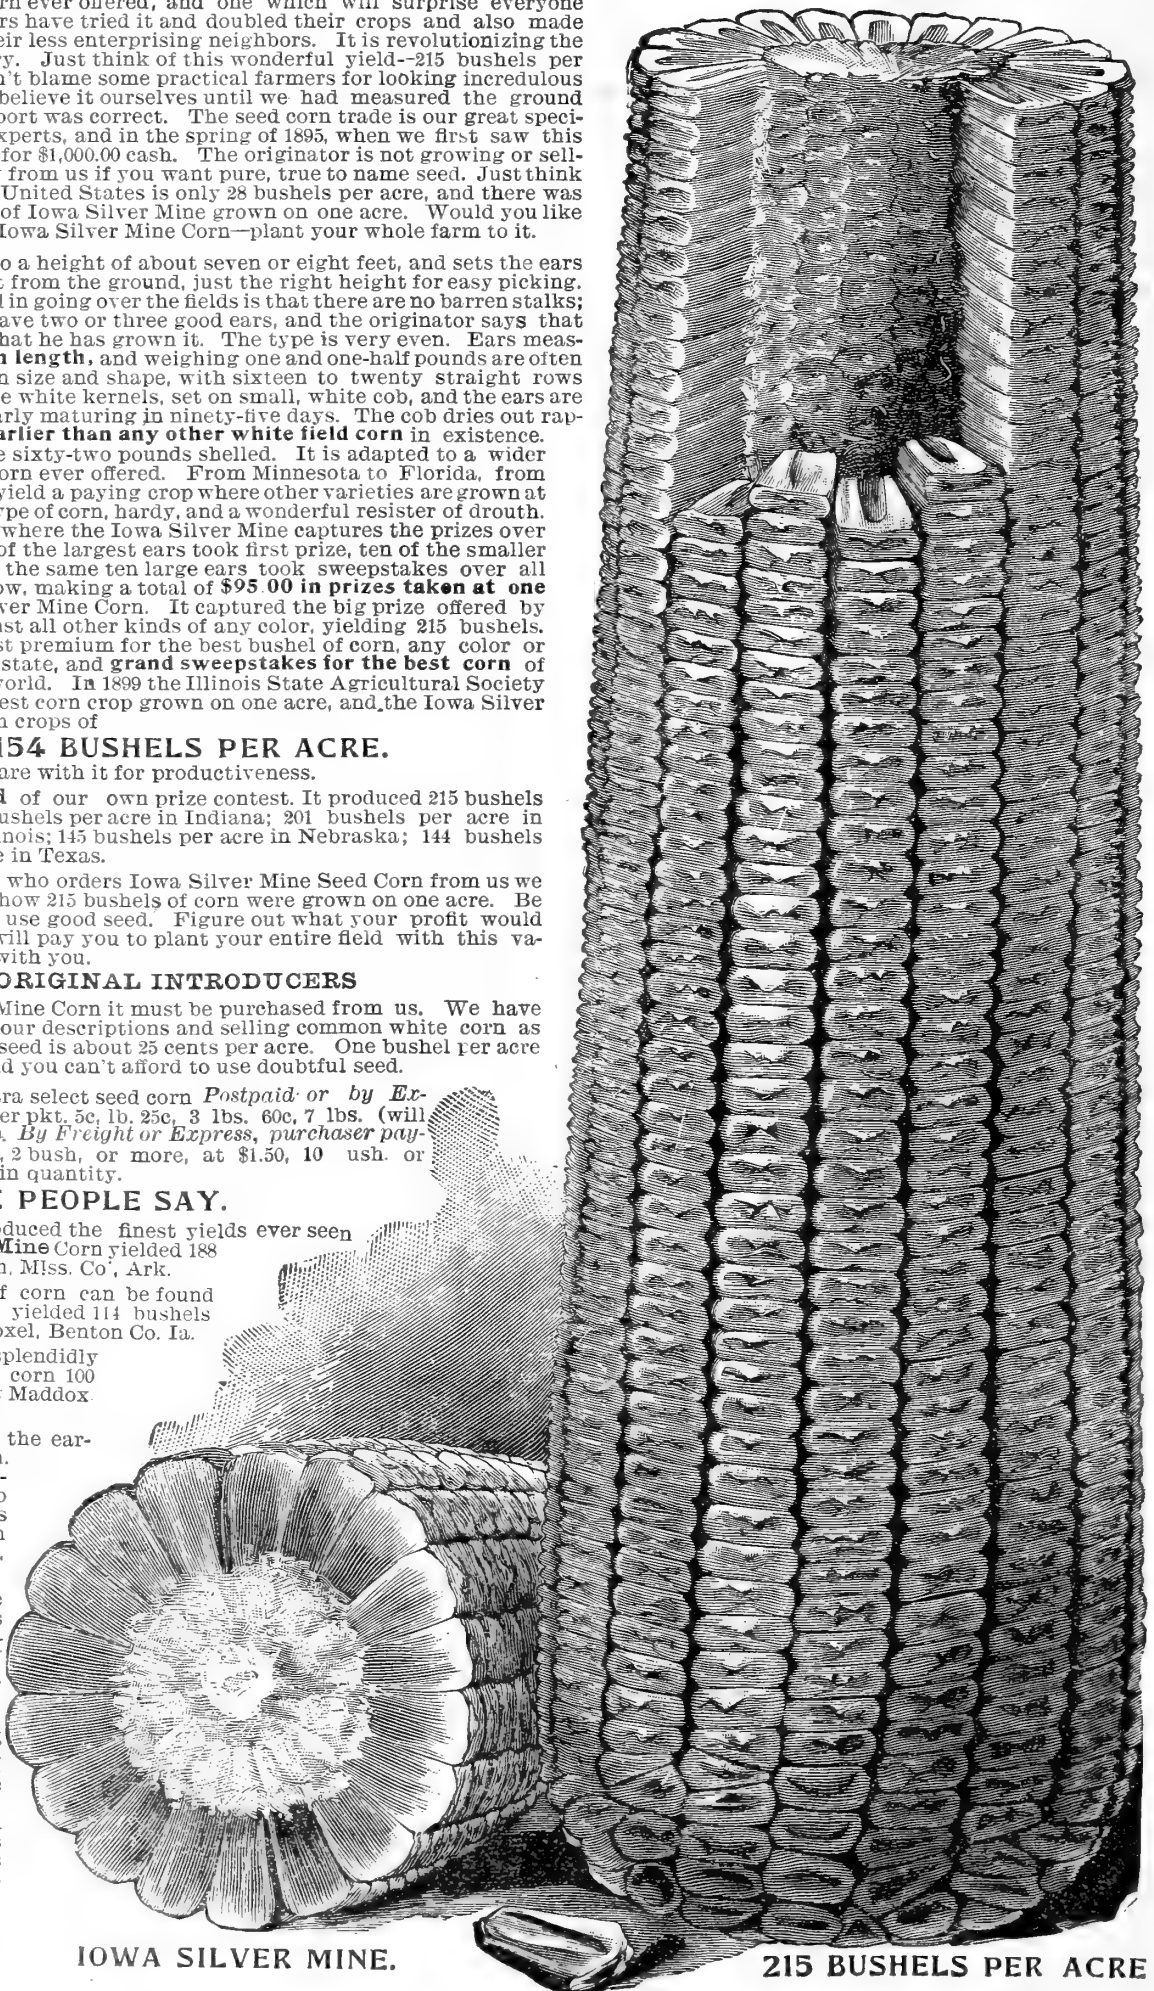

"Your **Silver Mine** Corn grew splendidly and ripened sufficiently to make seed corn 100 miles north of St. Paul."—Francis Maddox, Crow Wing County, Minn.

"Your **Iowa Silver Mine** Corn is the earliest white corn I have ever seen. Ears of good size and in many instances producing two good ears to the stalk. It is seldom that one sees anything bred up to such perfection as this new corn."—W. O. Ruddick, Lee County, Iowa.

"I am especially pleased with the **Iowa Silver Mine** Corn and it is worth five times as much as the Mastodon which I have been growing."—Jacob Siemens, Reno County, Kan.

231 BU. PER ACRE.

Sept. 25, 1905. — "Am very well pleased with your **Iowa Silver Mine** and **Golden West** Corn. I planted the **Silver Mine** on a piece of land, a little less than one acre. The other day I husked 12 shocks and got 42 bushels of good corn. At this rate I will harvest about 231 bushels of corn per acre."—Geo. Hearry, Morgan County, Mo.

IOWA SILVER MINE.

215 BUSHELS PER ACRE

IOWA GOLD MINE CORN.

MOST POPULAR VARIETY OF YELLOW CORN IN THE WORLD.

Everyone who has tried it is enthusiastic in the praise of this splendid variety which we introduced in 1892. Iowa is not called a gold mining state, but in this grand variety the farmers of this country will find a **veritable mine of wealth**. It has received the most cordial endorsement as the best and most profitable variety ever grown. It is early, ripening a few days later than Pride of the North. Ears are not large, but of good size and symmetrical; color a bright golden yellow, as handsome as a twenty dollar gold coin just from the mint; **grain is very deep, cob small**, and therefore dries out very quickly. **Seventy pounds of ear corn makes 62 to 63 pounds of shelled corn**, and in hauling to market it weighs out five bushels more to the wagon load than common varieties in the same size wagon. We have shelled selected ears of this variety which produced **64 pounds of shelled corn and only 6 pounds of cobs to the bushel**. This is an **unparalleled record**. It cannot be equaled by any other corn in the world. Thousands of our customers say that they consider it the *ne plus ultra* in corn; that it would be impossible to attain any nearer perfection. It matures perfectly, even in southern Minnesota. We can most confidently recommend it as the acme of perfection, and stake our reputation on its pleasing everyone who tries it. One carload lot of 400 bushels of Iowa Gold Mine corn was carefully weighed, and after shelling it was reweighed and there was just 456 bushels. Just think of it—a **gain of 14 bushels to the 100**. Remember if you want pure Iowa Gold Mine Corn you must purchase it direct from us. If you purchase from your local dealer insist on seeing that our label is on every bag, plainly marked **IOWA SEED COMPANY**. It will pay you to change your seed, and don't fail to at least see a sample of Iowa Gold Mine before buying elsewhere. Pkt. 5c, lb. 25c, 3 lbs. 60c, postpaid; by freight, pk. 60c, bushel \$1.60, 2 bushels or © \$1.50, 10 bushels for \$14.00.

WHAT PRACTICAL FARMERS SAY:

The **Iowa Gold Mine Corn** yields three times as much as any other variety. Think it is the best I have ever seen.—*C. H. Shearer, McHenry county, Illinois.*

Have just harvested the **Iowa Gold Mine** and it is a grand corn. Our farmer is enthusiastic over it. The type and color are perfect.—*J. H. Beagley, Ford county, Ill.*

The **Iowa Gold Mine Corn** is the very best I ever saw and it is well adapted to this climate.—*S. F. Reynolds, Dane county, Wis.*

I bought some **Iowa Gold Mine Corn** of you and it is the best corn I ever used in my life.—*Ernest Bolko, Monroe county, N. Y.*

I bought of you several bushels of **Iowa Gold Mine Corn** that have proven very satisfactory.—*Harry D. Burgess, Green county, Ill.*

I grew 480 bushels of your **Iowa Gold Mine Corn** on four acres last year. An average of 120 bushels to the acre.—*W. W. Preston, Warren county, Iowa.*

Your **Iowa Gold Mine Corn** was early, stood the drouth remarkably well and produced 500 bushels of good sound corn. My neighbors, with as good or better conditions, either failed entirely or had only soft corn. I never made a more profitable investment in my life.—*F. H. Furneaux, Arapahoe county, Colo.*

Ten bushels of **Iowa Gold Mine Corn** purchased from you made a good stand and vigorous growth and has matured two weeks ahead of any other. We are now husking it and it far exceeds our expectations, the yield being decidedly larger than any other corn and is the brightest yellow color I ever saw.—*O. E. Shoneman, Montgomery county, Ia.*

I am glad I planted all my field with your seed corn this year. The **Iowa Gold Mine** surprises everyone here by its deep grain and small cob, and it shells out about six pounds to the bushel more than other sorts.—*John W. Ernst, Floyd county, Iowa.*

The **Iowa Gold Mine Corn** proved very satisfactory. It eared better than any other variety I have ever seen. The ears are better filled with deep grains of golden yellow corn, and I can say that it is more than it is claimed to be.—*D. A. Rose, Washington county, Iowa.*

"Enclosed please find my seed order for this spring. Last spring I purchased some **Iowa Gold Mine Corn** of you, which did exceedingly well here. I took three premiums on it at three different county fairs."—*Dr. A. N. Wilbur, Adams county, Ohio.*

LENOCHER'S HOMESTEAD.

For those who desire a first-class variety of red corn this is the one we would recommend above all others. It is one of the best varieties for feeding purposes, not being hard enough to prevent stock from eating it easily and masticating it thoroughly. It is well known in Iowa for having won the **Iowa Homestead** prize of \$100, yielding 345 bushels on three acres with ordinary culture. It was also awarded a diploma at the World's Fair. It originated with Mr. G. F. Lenoche, one of the most practical corn growers and stock feeders in the state, and was named and introduced by the Iowa Seed Company. Its color varies from light red to a very dark red, almost black, but most of the ears are dark red with light colored cap; grain deep and hackled; ear somewhat above the average, small cob which dries out rapidly so that it is not apt to be caught by frost. We believe it to be a safe corn to plant. It makes excellent corn for feeding, although its color is sometimes objectionable for marketing. Our stock has been carefully selected for seed purposes. Packet 5c, pound 25c, three pounds 60c; by freight, peck 60c, bushel \$1.75, two bushels or more @ \$1.60, ten bushels for \$15.00.

Your Lenoche's Homestead Corn is out of sight. My neighbors bought all I could spare for seed purposes, and I had hard work to keep seed enough for my own use.—*Frank Degnan, Seneca county, Illinois.*

Your Lenoche's Homestead Corn is the best hog corn I ever fed. It is the earliest variety in this part of the country.—*John Abarle, Doniphan county, Kansas.*

LENOCHER'S HOMESTEAD.

IF YOU NEED A LARGE AMOUNT OF SEED CORN BE SURE TO WRITE FOR SPECIAL QUOTATIONS.

FARMERS' RELIANCE CORN.

A GRAND NOVELTY in field corn, introduced by the Iowa Seed Company, and it is by far the earliest dent corn in existence, and also the largest eared early corn. It is earlier than Pride of the North and a much better cropper. This new variety of corn in the result of a scientific hybridization made fifteen years ago by a practical seed corn grower, and this has been followed by careful selection each year since, the object being to obtain the earliest corn in the world. The corn is of a very strong, vigorous character, growing more rapidly than any other variety from the day it is planted. Its quick growth really surprises one with the speed with which it hurries on to make ears. The stalks usually have from nine to eleven blades, while most ordinary corn has thirteen blades. The leaves are quite broad, of a dark, emerald green, healthy color. This corn has been planted as late as June 26th and yielded a splendid crop, earlier than Pride of the North, which was planted at the same time. We claim that it will mature any year in eighty to eighty-five days. The ears are much larger than Pride of the North, not as rough or hackled, thus making it easier to handle, and the yield is 25 to 35 per cent more than Pride of the North, under the same conditions. An average bushel of seventy pounds will make sixty pounds of shelled corn. It has for years been selected from stalks which set the ears three feet or less from the ground and this has a tendency to make it earlier. Fully 40 per cent of the stalks produce two good ears. It is the farmer's reliance every year. The originator has taken the first prize for early yellow corn at every fair at which it has been exhibited. Don't fail to plant at least a small quantity and thus obtain your seed for another season. Per lb. 25c, 3 lbs, 60c, post-paid; by freight or exp., pk. 50c, bush. \$1.60, 2 bush. or more @ \$1.50, 10 bush *or \$14.00.

Your Farmers' Reliance corn has proved very fine and I am much pleased with it.—W. A. Whitmer, Clinton County, Iowa.

The Farmers' Reliance corn purchased from you has made a splendid yield.—Herman Hunt, Iowa.

Last year I purchased some of your Farmers' Reliance Corn and was very much pleased with the splendid crop, as it yielded 400 bushels of ears from three acres of ground. Your corn is all that you recommend it to be.—Mrs. Harriet Brown, Ashtabula, County, Ohio.

Your Farmers' Reliance is the earliest corn I have ever seen or grown, maturing in 80 days, being ten days to two weeks earlier than Pride of the North and yields double as much per acre.—H. H. Connell, Poweshiek County, Iowa.

EARLY LONGFELLOW DENT.

There is no telling when we will have a short season and early killing frost in the fall, and in such a case farmers who have their fields planted with an early maturing variety are truly fortunate. The trouble with most extra early sorts, however, is that they are too small and "nubby," but this new variety is of unusual length, our illustration showing an ear 15 inches long, but the average is about 12 inches. Its peculiar shape, which is different from any other sort, suggests the name. It matures fully as early as Pride of the North, is double the size and yields a far larger crop, which is ripe and hard before there is a thought of frost, thus making a variety that it will pay to "tie to." Stalks are of medium height, strong and not easily blown down. Grain is not as deep as some of our other varieties, but it is the corn of corns for selling on the market, as a wagon load of it is as pretty as a picture. We recommend it highly to customers in Northern Iowa, Minnesota, the Dakotas and other northern states, feeling sure that it will please everyone. Order early, as there is sure to be a great demand. Per pkt. 5c, lb. 25c 3 lbs. 60c postpaid. By freight per pk. 60c, bush \$1.60; 2 bush or more @ \$1.50; 10 bushels for \$14.00.

"I planted the Longfellow Dent Corn May 5th on good bottom land. I had a good stand and it was out of danger from frost Sept. 1st. I just now measured an ear 13 1/4 inches long with sixteen rows. Many are 12 inches, few less than 11 inches long. A good business corn. As president of the first Corn Club organized in Iowa and a life-long corn grower, I venture the opinion that this long eared corn is for the farmer a better

and more satisfactory type than any of the show corns."—W. P. Dawson, Cherokee County, Iowa.

I have transacted business with you to the extent of hundreds of dollars and I have found your business method, courteous and straightforward; careful in representations and honest in your dealings. Please send 4 bushels of Golden West seed corn.—D. E. Schoonover, Montgomery, Co., Ia.

HICKORY KING.

A white field corn which has the largest grains with the smallest cob of any white corn ever introduced. So large are the grains and so extremely small is the cob that on an ear broken in half a single grain will almost cover the cob section completely. It is of strong, vigorous growth and yields splendid crops on light soil, and is a desirable variety where the season is long enough to mature it, but we do recommend it north of Southern Iowa, although it produced a good crop last year forty miles north of Des Moines. This variety matures in about one hundred and thirty-five days. Per pkt. 5c lb. 25c, 3 lbs. 60c, postpaid; by frt., pk. 65c. bu. \$2.00 2 bu. or more @ \$1.85, 10 bu. for \$17.50.

IOWA YELLOW DENT.

We always advise farmers to select the best named varieties in buying seed corn, and believe it pays them in the long run. This year, however, there are thousands of farmers in need of seed corn, and their main object is to secure at a low price a nice grade of good yellow corn which is well matured, thoroughly tested, of strong vitality, and will produce a good crop of sound corn. While this corn is not equal to our best named varieties, still we believe you will find it superior to nine-tenths of the corn offered by other dealers. At our price it will cost you only about 15 cents per acre to plant your fields with this variety and it will pay you well to order sufficient for your planting. Pk. 50c, bu. \$1.25, 2 bus. or more @ \$1.15, 10 bus. for \$10.00.

IMPROVED WORLD'S FAIR. An Improved Strain of Reid's Yellow Dent.

We claim to be seed corn specialists and we annually supply more farmers with seed corn than any dealer in the world. Prominent farmers and agricultural writers have assured us that with the new varieties which we have introduced we are rapidly nearing perfection in the corn plant. We cannot wholly agree with them, and we do not intend to stop our efforts in this direction, but farmers will find the Improved World's Fair which we are offering this season to be a long step in advance towards the aim to which we are striving. It was bred by selection from Reid's Yellow Dent and is a great improvement over it. It is distinguished by the grain being deeper, rough on the surface and not so hard, the latter fact making it a more desirable variety for feeding purposes. It is a very strong growing variety, maturing a large handsome ear in about 110 days. Few varieties have outyielded it in experiments. A heavy cropper and for uniformity of grain, the shape and filling out of butts and tips, and compactness, there is no other variety that is nearer perfection. No variety of yellow corn has been used so much for exhibition purposes, nor won more prizes for shape of ear. Any farmer who wishes to compete for premiums will find this a winner. It was the prize winner of both diploma and medal at the great World's Fair exhibition in Chicago, but since has been greatly improved. It is of excellent quality, being solid, heavy and of very strong vitality. The grain is so tight on the cob that in the process of drying sometimes rows will be forced out. This cut of the World's Fair Corn represents about the standard ear, which is as follows: Shape of ear nearly cylindrical; length 10 inches; circumference 7 1/4 inches. The kernel is firm, upright and medium yellow in color, long wedge shape and slightly rough, 18 to 20 rows which are in pairs. Butt deeply rounded, compressed, regular rows clear to tip, shank small, cob red and of medium size, 88 per cent of corn to cob. The beauty and uniformity of the ears in shape, color and completeness, is sure to please all corn growers. Pkt. 5c, lb. 25c; 3 lbs. 60c, postpaid. By freight or express, pk. 60c, bu. \$1.60, 2 bu. or more at \$1.50, 10 bush. for \$14.00.

Dec. 2.—I have just finished gathering my World's Fair Corn and find it to be the most solid corn I ever raised in spite of the unfavorable season. The ears are exceptionally well filled out at both ends and it yielded a good crop.—*W. J. Day, Dallas county, Iowa.*

IMPROVED WORLD'S FAIR.

LEGAL TENDER CORN.

LEGAL TENDER.

This is now one of the most prominent late varieties of yellow dent corn in the country. It is the result of about ten years selection by a seed corn specialist in Iowa, and has taken first premium at many state and county fairs. The corn is productive and of uniform pure yellow color, ear very large and long and a deep grain on a small cob, while the stalk does not grow too large. The introducer says: "Our ideal ear is an ear two-thirds as large around as it is long, containing sixteen to 20 rows, and small shank. The kernels are deep, the cob is small at the butt and the ear holds its bigness towards the point, until near tapering off. It should be capped over and the kernels should hold their bigness towards the point, and the butt run out straight and not crinkle. It matures in about 115 days, but we do not recommend it for the extreme northern portion of this state. Our stock of this is extra select, grown from the originator's stock seed, but improved in earliness by being grown in a more northern latitude. Pkt. 5c, lb. 25c, 3 lbs. 60c; by freight per pk. 50c, bu. \$1.50, 2 bu. or more @ \$1.40, 10 bu. for \$12.50.

"Your Legal Tender Corn took first premium for the best yellow corn at the Cass County fair. It was very fine.—*F. B. Van Orman, Cass County, Iowa.*
The crop of Legal Tender Corn grown from seed received of you last spring is the best crop I ever grew. It has matured well and I am very much pleased with it.—*J. L. Walker, Polk County, Iowa.*

REID'S YELLOW DENT.

During the past five or six years this variety has come rapidly to the front and now occupies a prominent position in all lists. It is of handsome shape and color and largely grown for exhibiting at fairs, corn shows, and is used in many corn schools as a standard for judging. Our stock from the choicest selected ears and we are sure it would please most particular. Pkt. 5c, lb. 25c, 3 lbs. 60c postpaid. By freight, per pk. 50c, bu. \$1.50, 2 bu. or more @ \$1.40, 10 bu. for \$12.50.

Giant Cuzco Corn:

A strange and curious corn from Peru, with kernels of truly mammoth size, as shown in our illustration, each one being as large as 4 to 10 kernels of ordinary field corn. It will cause wonder and astonishment in everyone who sees it. It is quite late in maturing and therefore should be started early in pots in the house. In transplanting be careful not to disturb the roots. Our cut shows an ordinary kernel of corn besides the Cuzco. It is a great novelty and attracted much attention at the Corn Shows. Sold only in packets of 10 cents.

GIANT CUZCO CORN.

REPORTS WANTED: We are always glad to have our customers report results of their tests of our novelties.

IMPROVED EARLY MASTODON.

IMPROVED EARLY MASTODON.

For about 18 years past Clark's Early Mastodon corn has been a prominent variety, owing to its productiveness and large sized ear. In the celebrated *American Agriculturist's* corn contest in 1889, Early Mastodon outyielded every other yellow corn in America. Mr. Alfred Rose, of New York state raising 213 bushels of shelled corn to the acre. It was, however, rather late, and was frequently caught and greatly injured by early frost. For ten years past, however, one of our most careful, painstaking seed growers in central Iowa has been selecting it to obtain the earliest maturity possible and still retain its large sized ear and great productiveness. His success has been remarkable, and we now have an improved variety with mammoth ear, much smaller cob and deep grain. The butt of the ear is not so disproportionately large, it dries out quickly and ripens easily in 110 days, while it requires 130 days for the old variety. Ears are quite even in size and four of them weighing 6½ pounds took first prize at fair. Farmers who delight in a handsome, large eared variety, will be pleased with the Mastodon, and when the crop is harvested no one can fail to be delighted with the yield. The corn has a strong, rapid, vigorous growth, and is also desirable for fodder purposes. Pkt. 5c, lb. 25c; 3 lbs. 60c, postpaid; by freight, pk. 60c; bu. \$1.75; 2 bush. or more @ \$1.60.

"I planted the Mastodon Corn received from you on May 26th, it grew 10 to 12 ft. high, biggest ears I ever saw.—I. C. Tapley, Floyd county, Iowa.

"The seventy acres of corn we planted with seed from your firm is the best field corn in this county. It runs from two to three ears on each stalk."—D. M. McKinley, Kane county, Ills.

PROFIT CORN.

PRIDE OF THE NORTH.

This variety originated with A. L. Goddard, of Kossuth county, Iowa, about 20 years ago, and sprang at once into prominence as the earliest of all yellow dent corns. The ears are 7 to 8 inches long with small cob and kernel; seventy pounds of ears will make sixty pounds of shelled corn; color bright orange and very uniform. Will ripen in ninety days and matures in this latitude when planted in June. Good soil is capable of producing four or five good stalks to the hill and many stalks have two ears each. This will enable one to get as large a crop of corn as with a large eared variety and much more fodder. Pk. 60c, bu. \$1.75; two bu. or more @ \$1.60, 10 bus. for \$15.00.

WHAT CUSTOMERS SAY:

I was very much pleased with your Profit Corn this season, as it gave an exceedingly large yield. Your New Century Wonder Corn is also the finest quality of solid corn I ever raised.—F. M. Furniss, McLean county.

Your Irish Victor Oats did finely here and yielded 112 bushels per acre on my place and weighed 40 pounds per measured bushel. I received the gold medal on them at the great Lewis & Clark Exposition.—J. P. Lowell, La Plata county, Colorado.

"I have planted Iowa Seed Co's. seeds for the last 26 years. Have found them true to name and of good quality, and can cheerfully recommend them."—Duncan Elder, Polk County, Iowa.

PROFIT CORN.

A very profitable corn for any farmer who has live stock to feed. We introduced this grand new variety and it has given excellent satisfaction everywhere. It originated from a carefully prepared cross of two well known sorts on the farm of a seed grower in Madison county, Iowa, which is the county that produced our world-famous Iowa Gold Mine. For nearly twenty years this corn has been bred up until now it is claimed to be the heaviest and most solid ear of any variety in existence, and of good size. **It ain't a handsome corn, but it's got money in it.** The color of the surface of the ear is variegated from light sulphur to reddish orange, being agreeably diversified, making it particularly striking in appearance. With some this might be an objection if they desired to sell it in the ear, but when shelled it looks quite uniform in color as the variation is simply in color of the cap or top of grain. The purpose of the originator was to fix a type of field corn for profit, superior to any in cultivation, and profit in corn growing, as we understand it, means the largest crop of Shelled Corn (not cobs) maturing in a reasonably short time, and of the best quality. Ears of large size, grain is very deep, cob small and dries out rapidly, thus making it a sure cropper. The corn is so solid on the cob that the kernels appear as if driven in and it shells out immensely. Will produce a larger crop on poor soil than any variety we know of and with good culture will astonish everybody. It is the corn to plant and we want all our customers to try it. Order early as our stock is limited. Pkt. 5c, lb. 25c, 3 lbs. 60c, postpaid. By freight, pk. 60c, bu. \$1.75, 2 bu. or more @ \$1.60, 10 bu. for \$15.00.

I was much pleased with your Profit Corn this season, as it gave an exceedingly large yield.—J. H. Luddington, Ashtabula county, Ohio.

The Profit Corn I received of you last spring has the right name. It is the best corn for stock. It grows large and is solid and also contains a greater proportion of fat than any of our corn in this country. The Iowa Gold Mine Corn I received of you is beautiful in color shape and size.—B. J. Clarida, Williamson county, Ill.

NEW CENTURY WONDER.

A wonderful variety from South America, different in many respects from other sorts: Instead of growing like ordinary corn, one stalk to each kernel planted, it stools like winter wheat, producing ten to twenty stalks from each seed. There are frequently three to seven ears to the stalk, being eight to ten inches long, and of the most clear, snow white color. It is of excellent quality when used on the table like sweet corn, and when dry and ground makes the cleanest, finest, whitest meal you ever saw. It is an improvement on Brazilian flour corn being acclimated by growing for eight or ten years in the north. The *Iowa State Register* in its farm department says: "This wonderful corn, which

was grown about four miles northwest of Des Moines, grows ten to twelve feet high, produces three to seven ears on a stalk and ten to twenty stalks to the hill from one seed planted. The ears are about 9 inches long and it yielded seventy-five bushels on half an acre. It makes the finest of stock food when cut for fodder and produces many times as much as ordinary corn." Plant early as it requires the whole season to mature in this latitude. Pkt. 10c, ¼ lb. 15c, lb. 40c, 3 lbs. (will plant one acre) \$1.00, postpaid. By freight, ½ pk. 65c, pk. \$1.00, bu. \$3.00.

"I bought half a bushel Silver Mine Corn of you in 1902 and it yielded 100 bushels to the acre, and last spring I saved enough seed out of it to plant 115 acres of it. I think it is the best corn of this part of the state."—E. Jansen, Cass county, Ia.

PRIDE OF THE NORTH.

IF YOU NEED A LARGE AMOUNT OF SEED CORN ASK FOR SAMPLE AND PRICES.

STAR LEAMING.

The Leaming Corn, which originated with Mr. Leaming, of Ohio, was always a good variety, but it had some serious faults for culture in this state, and we refrained from giving it our endorsement. A few years ago we found an extra fine lot in the hands of an enterprising Iowa farmer, who had been selecting it for many years. We were greatly pleased with it, but we were not willing to offer it to our customers without still further selection. We now have a corn which is a great improvement on the Leaming, but it retains all the valuable characteristics of that variety, so that instead of giving it a new name we call it Star Leaming to distinguish it from other strains. The ears are large and handsome, with deep large grain of rich deep orange color, on a medium to small cob. It grows to medium height, setting the ears about four feet from the ground, husks easily, and the corn is snug on the cob, thus making a very solid, heavy feeding ear. Surface is quite smooth for dent corn. It is very productive, and it is the ideal variety for selling in the ear. We sold many thousands of bushels of this variety last season, and expect to exceed the record this spring. Don't plant common corn when you can obtain this grand variety so cheap. Pkt. 5c, lb. 25c, 3 lbs. 60c, postpaid; by freight, pk. 50c, bu. \$1.50, 2 bu. or more @ \$1.35, 10 bu. for \$12.50.

STAR LEAMING.

seen. Some stalks bear as many as 20 ears. Per pkt. 10c. Specimen ear for 40 cents, postpaid.

SANFORD'S EARLY WHITE FLINT.

This standard variety is considered the best flint corn on the market. The ears are of unusual length, 12 to 15 inches, and handsome shape, flinty white color. Plants of sturdy, vigorous growth; the leaves are very broad and succulent, and it is therefore of great value for fodder and ensilage, as well as for a grain crop. The stalks usually bear 2 or 3 long ears. You will be pleased with it if you like flint corn. Pkt. 5c, lb. 25c, 3 lbs. 60c, postpaid. By freight, pk. 65c, bu. \$2.00, 2 bu. or more @ \$1.85, 10 bu. for \$17.50.

SANFORD'S EARLY WHITE FLINT.

ed to every section of the country, although it does not ripen here, usually it which is just the right state to cut. Makes an excellent grain crop in Missouri and throughout the south. Ears 8 1/2 to 10 inches long, 16 rows, kernels deep and broad, and pure white on a red cob. Quite popular with dairy farmers. Per pkt. 5c, lb. 25c, 3 lbs. 60c, postpaid; by freight, per pk. 60c, bu. \$1.60, 2 bu. or more @ \$1.50, 10 bu. for \$14.00.

GIANT RED COB ENSILAGE.

Beyond doubt the best fodder corn, either to feed green right from the field, to put up for the silo, or to cure and stack away. It is a pure white corn, cropping as high as 45 tons of fodder per acre. It is sweet, tender and juicy, and furnishes more nourishment than any other variety; has short joints and therefore an abundance of leaves, and grows to a fair height, but not over-large and coarse-stalked as some varieties. It is adapted to every section of the country, although it does not ripen here, usually it matures enough to come in full milk.

PRIMITIVE OR HUSK CORN.

It is from this wild variety that all of our cultivated sorts have sprung. The ears are of fair size and each individual kernel or grain is covered with a husk and all is enclosed in an outer husk like common corn. In some of the wild and uncultivated parts of Mexico, the Primitive or natural corn can still be found growing wild. It is quite curious and valuable for exhibition purposes, and attracts great attention wherever it is seen. Some stalks bear as many as 20 ears. Per pkt. 10c. Specimen ear for 40 cents, postpaid.

PRIMITIVE OR HUSK CORN.

IMPROVED EARLY YELLOW FLINT.

An eight rowed yellow flint variety with ears from 10 to 15 inches long, 1 1/2 to 2 1/2 inches in diameter and are well filled out to the extreme end of the cob. The cob is small and the kernel large and broad, ripens in 75 to 85 days. This corn is well adapted to the northwest and is said to produce 200 bushels of ears to the acre in Massachusetts. Has given excellent results in Minnesota and other northern states. Excellent for ensilage and is often used here for replanting. Pkt. 5c, lb. 25c, 3 lbs. 60c, postpaid; by freight, pk. 65c, bu. \$2.00, 2 bu. or more @ \$1.85, 10 bu. \$17.50.

EVERGREEN SWEET FODDER CORN.

The past two years seed sweet corn has been so scarce and high in price that we did not urge our customers to plant it, but last year we grew a splendid crop, both in quality and quantity, and are therefore enabled to offer it at a very low price. We consider it one of the most valuable fodder plants in existence, and stock farmers should all devote some land to it. The stalks are sweet, juicy, rich, tender and very nutritious. On strong soil it will grow ten to twelve feet high and produce almost an incredible amount of fodder, which, when well cured is equal to hay, besides being cheaper. It is claimed by dairy farmers that this fodder will increase the milk and cream production greatly and keep the animals in the best condition. It has the further merit of being so sweet and palatable that cattle eat every part of the stalk and leaves. As a green fodder for cutting in the summer, one acre is worth eight acres of ordinary pasture. Of high value also for the hogs, and an excellent plant to plow under for soiling. Sow thickly in drills, or broadcast at rate of 2 bu. per acre, Pk. 60c, bu. (measured) \$1.50, 2 bu. or more @ \$1.35.

EARLY FODDER SWEET CORN.

Will make feed much earlier than the above and is very nice to feed when in roasting ear. Not as large a yielder. Pk. 60c, bu. \$1.75, 2 bu. or more @ \$1.50. Ask for price in quantity.

CANARY.

TENERIFFE CANARY GRASS.

A very productive grass from the Canary Islands which succeeds in all parts of America, from Florida to Manitoba, and makes a grand crop of hay and seed even in sections where millet proves a failure. It has been tested for several years past in a small way in various parts of the country and has proven to be a good pasture grass and has yielded an immense crop of good hay. It has also proven highly profitable to grow for the seed, yielding about 1,000 to 1,400 pounds per acre, and the straw or hay, after the seed has been threshed out, retains much of its nutritive value, being considered better than millet, and is relished by the cattle. Sow early in spring about 25 lbs. per acre. Price, large pkt. 10c, lb. 35c, 3 lbs. for 90c, postpaid. By freight, 10 lbs. \$1.50, 25 lbs. \$3.00, per bushel (50 lbs.) \$5.50.

EVERGREEN SWEET FODDER CORN.

USE THE HAND CORN PLANTER FOR SMALL FIELDS OR REPLANTING. PRICE \$1.50.

Seed Wheat.

No crop is more important and profitable than a good wheat. If farmers would pay more attention to having the proper soil conditions, securing the right kind of seed and getting it in properly, they would find it as profitable a farm crop as can be raised. A great many have grown our improved varieties the past few years and have received yields of from 30 to 50 bushels per acre. The following varieties we are confident are the best and most profitable to grow.

EARLY JAVA WHEAT.—For four or five years past this has given far better satisfaction in central Iowa than any other variety and wherever introduced it is driving all other sorts out. The farmers are delighted with it. It is a new variety of spring wheat, about ten days earlier than Velvet Chaff or other standard sorts, and thus escapes the extreme hot weather so injurious to small grain. It is usually ready for harvest as early as winter wheat, and therefore desirable to sow on land where winter wheat has partially failed. A good crop can this way be secured from fields which would otherwise be unprofitable and the wheat would be all right for milling purposes, but would not do for seed. Yields in

MACARONI WHEAT.

this locality ordinarily about 35 bu. per acre. Per lb. 25c; 3 lbs. 60c, postpaid; by freight, pk. 75c; bu. \$1.50, 2 bu. or more @ \$1.40, 10 bu. for \$12.50.

HAYNES' PEDIGREE WHEAT.—We cannot too highly recommend this grand new variety of spring wheat and we are sure it will please everyone who tries it. It was originated by Mr. L. H. Haynes, who spent eight years in selecting and improving it in his garden, each year choosing all the largest and best heads and discarding all the balance. This continued selection has had the effect of improving it in vigor, size of head, and quality. The heads are very large, well filled out, the kernel is hard, the plant stools greatly, and under ordinarily favorable conditions will yield 40 to 50 bushels per acre. It is an improvement on Blue Stem Wheat and fully five days earlier in maturing. We most highly recommend this variety to customers everywhere in the wheat growing belt. Not only in the northwest where wheat is the main crop, but everywhere and under all conditions has this Pedigree Blue Stem Wheat proved itself superior to other varieties, outyielding them all. Lb. 25c, 3 lbs. 60c, postpaid; by freight, pk. 65c, bu. \$1.65, 2 bu. or more @ \$1.50, 10 bu. for \$13.50.

"I was very much pleased with Haynes' Pedigree Blue Stem Wheat last year. The weather was very unfavorable for small grain, but it yielded nearly double the crop that my other wheat did, and of much better quality."—G. Rubes, Dickinson county, Iowa.

VELVET CHAFF OR BLUE STEM WHEAT.—This is now the standard variety for growing in Iowa. It is now the main crop in the northwestern states and the great milling kings use it for their highest grade flour. Per lb. 25c, 3 lbs. 60c, postpaid; by freight, pk. 50c, bu. \$1.35, 2 bu. or more @ \$1.25, 10 bu. for \$11.00.

MACARONI WHEAT.—This wheat has proved to be a great money maker to the farmers of Minnesota, Montana and the Dakotas, about 150,000 acres being sown to it by Dakota farmers alone last year and they report yields 80 per cent greater than other varieties of wheat. One farmer reported 49 bu. per acre. Few people have any idea of the immense quantity of macaroni used in this country and, until recently, it has all been imported. It requires a special kind of wheat to make it—the best being known botanically as *Triticum Polonicum*. It is a very heavy yielding variety and does especially well in the semi-arid plains. It seems to be always a sure crop and will mature in a shorter season than any other wheat and is therefore desirable for Minnesota, Dakota, Manitoba and the northwest. It does well on good soil, but the yield is larger and quality better when grown on poor land. The grains are very hard and glossy, often translucent, yellowish white in color, occasionally inclining to reddish, and rather large. In the field Macaroni Wheat is often mistaken for barley, as it resembles this very much. It grows rather tall and the leaves are broad and smooth, and have a peculiar whitish color. The heads are compactly formed and are bearded. This wheat is hardy and not attacked by smut or rust and is a sure crop. Sow seed early in the spring, about 1½ bu. per acre. Don't fail to try it. Per lb. 30c, 3 lbs. 75c, postpaid; by freight, ½ pk 40c, pk. 65c, bu. \$1.50, 2 bu. or more @ \$1.35, 10 bu. for \$12.00.

Mr. Zavitz, of Ontario, writes us that he has grown macaroni wheat for eight years past and the average yield has been 39 bushels per acre.

IDEAL BARLEY.

DEFIANCE WINTER WHEAT.—(Improved Turkish Red)—Introduced by the Iowa Seed Co. and we claim for this new wheat that it is unequaled in hardiness, stooing qualities, productiveness, rust proof qualities, strength of straw, quality of grain, quality of flour and the best in all respects of any wheat ever offered.

It has a record of over 59 bushels per acre, and many crops are reported of 35 to 45 bushels. Flour is equal to the world-famed Hungarian product. Everyone is delighted with it. Ask for price in the fall. Price for shipment now by mail, per lb. 25c, 3 lbs. 60c; by freight, pk. 50c, bu. \$1.50, 2 bu. or more @ \$1.25.

IDEAL WHITE HULLESS BARLEY.

Is an ideal that pleases all who try it. The heads are large and well filled with big plump kernels which are hullless and of great value for feeding. Those who have grown it say that it produces a very much larger crop than any other. It weighs 60 to 65 pounds to the measured bushel, while ordinary barley weighs only 48 pounds. The straw is very stiff and strong. It is the handsomest, most productive and best variety that we know of. The kernels shell out without the hulls and are the prettiest and handsomest white berry, plump and oval in shape, that has ever been grown. It is not a malting barley, but can be used for feeding only, and as a fattening feed for hogs it has no equal. Is a vigorous grower and can be sown after all the other grain is sown, and it will mature before wheat or oats will. Per lb. 25c, 3 lbs. 60c, postpaid. By freight, pk. 65c, bu. (48 lbs.) \$2.00, 2 bu. or more @ \$1.85.

SUCCESS BEARDLESS BARLEY.

Earliest barley known. The straw is about the height of common barley, but better, and will stand up on any land; on good land will produce 80 bushels per acre. Sow as early as you can; frost does not hurt it. Many farmers will not grow barley on account of the long, harsh beards which are so disagreeable in threshing, although it is a profitable crop. This is beardless and as easy to grow and handle as oats. It has hulls like the Mansury or any other old variety, and is a heavy cropper, yielding from 50 to 75 bushels per acre, and the quality is excellent, both for malting and for feeding hogs. Per lb. 25c, 3 lbs. 60c. By freight, pk. 50c, bu. \$1.15, 2 bu. or more @ \$1.00, 10 bu. for \$9.00.

MANDSCHEURI BARLEY.

An improvement on the Mansury which has heretofore been the most popular bearded sort. It is an early six-rowed variety, very strong, strawed and stools well, bearing large, well-filled heads of plump-berried grain. Lb. 25c, 3 lbs. 60c, postpaid. By freight, pk. 45c, bu. \$1.25, 2 bu. or more @ \$1.15, 10 bu. for \$11.00.

SEED OATS.

A change of seed oats is even more important than a change of seed potatoes, and it will pay you to renew your seed oats this year by sowing some of our improved varieties and thus greatly increase your yield. Any variety, except where noted, at 25c per lb; 3 lbs. 60c by mail postpaid.

IRISH VICTOR.—Introduced by the Iowa Seed Company. A grand variety and the most productive ever brought out. It is probably known to but few farmers that almost all of the new varieties of oats originated in either Scotland, Northern Ireland or New Zealand, and it is to these countries we are obliged to look for improved sorts. The Irish Victor brought over from Ireland 7 years ago, has proved superior to all other sorts grown in the same section in vigor of growth, stiffness of straw, and productiveness. The straw is very stiff, holding the heavy head up well. It is fully as early as the Lincoln and yields more than that very productive variety. The grains are large, plump and heavy. Plant grows to medium height, of vigorous growth, stools cut exceptionally well, is free from rust and yields an immense crop. It is a close, round headed variety not as much sprangled as some sorts but still not a side head. Better put in a field of them this year and not only secure a larger crop than you have been in the habit of growing, but be prepared to supply your neighbors with seed at a good price. They will all want it. Pk. 40c, bu. \$1.20, 2 bu. or more @ \$1.00, 10 bu. or more @ 90c, bags included.

The Irish Victor are the best and most productive oats I have ever raised. They have stiff straw and stand up better than any other sort.—*J. J. Doonon, Poweshiek Co., Iowa.*

KHERSON.—A very heavy yielding variety but they are usually so yellow or dark colored that they do not sell well on the market. Pk. 35c, bu. \$1.00, 2 bu. or more @ 90c, 10 bu. for \$8.00.

LINCOLN.—One of the very best and most popular varieties. Frequently yielding over 100 bushels per acre. What we claim for the Lincoln Oats is that it is a heavy yielder, is comparatively early, has proved itself to be entirely rust proof, and stands up exceptionally well. On account of its soft nib, heavy meat, and thin hull it is unsurpassed for feeding and making into oatmeal. Per pk. 35c, bu. 90c, 2 bu. or more @ 80c, 10 bu. or more @ 70c.

The Lincoln Oats went about 25 percent more per acre than other white oats on same kind of ground. I sowed them just as I did the others.—*C. F. Herrick, Buchanan county, Iowa.*

EARLY CHAMPION.—This grand new variety which was introduced in 1898, has given excellent satisfaction to our customers and it gave the largest yield per acre of any variety in the test at the Iowa Agricultural College, and is highly recommended by them. This variety has comparatively short straw, matures a week to ten days earlier than other kinds, largely escaping the liability to rust. Its greatest value lies in its adaptability as a nurse crop to sow with grass seed, as it does not stool as freely as some other sorts. Will not lodge on rich land. Henry Wallace, editor of *Wallace's Farmer*, says: "I would rather risk growing grass seed with them than with any other variety I know of." Pk. 30c, bu. 75c, 2 bu. or more @ 65c, 10 bu. or more @ 60c.

SILVER MINE.—A popular variety in some sections; has the reputation of yielding immense crops of 100 to 160 bu. per acre. The grain is usually large, plump and heavy, but has a reasonably thin hull. It is quite a hardy, vigorous variety and has greatly pleased our customers. It stands up well and has shown little tendency to rust. Our seed was grown from headquarters stock and is nice. Pk. 30c, bu. 75c, 2 bu. or more @ 65c, 10 bu. or more @ 60c.

WINTER TURE.—This valuable grain has for several years been growing in favor and use in many parts of the south and has proven valuable, both for the grain and for winter grazing. The oats may be sown any time from August until October. We have also sown these oats in the spring and they have done well. Pk. 60c, bu. \$1.50, 2 bu. or more @ 1.35.

BLACK TARTARIAN.—While attending the Royal Agricultural Show in Cardiff, Wales, we saw a fine lot of English grown Black Tartarian Oats on exhibition there, and arranged for a stock, which is of superior quality. This is the most hardy and most productive variety of oats that we know of; 442 grains have been grown on a single straw. It stools freely and grain is short and plump, of best possible quality. The English farmer, Mr. Bennett, says: "I sowed nine bushels on three acres of land last year and they yielded 365 bushels; this is equal to about 122 bushels per acre." Per pk. 75c, bush. \$2.25, 2 bush. or more @ \$2.10, 10 bush. or more @ \$2.00.

SPRING RYE.

This is quite different from the winter rye and is highly valued wherever known. It is not only more productive but the grain is of finer quality and it can be successfully grown in any latitude. The straw is of special value as it stands six or eight feet high, being better than that of winter rye and producing nearly four times as much straw as oats. Produces 30 to 40 bu. of grain to the acre. As it does not stool like winter rye, not less than two bushels to the acre should be sown. Pkt. 5c, lb. 25c, 3 lbs. 60c, postpaid. By freight, pk. 60c, bu. \$1.50, 2 bu. or more @ \$1.40.

MONSTER WINTER RYE.

We consider Winter Rye one of the most important of all farm crops. In the first place it is a sure crop—failures being almost unknown. Every farmer should have at least a few acres of it. It is usually sown in the fall and as it grows very vigorously, will furnish pasture till late in the fall and also early in spring before other grasses have made a growth. So it is of great value to dairy farmers. If sown early in the spring it makes an early and abundant pasture, but makes no grain crop. Our Monster Rye is of extra quality. We are sure it will please you, no matter whether you want it for pasture or grain crop. Pk. 50c, bu. \$1.15, 2 bu. or more @ \$1.00.

JAPANESE BUCKWHEAT.

A week earlier than Silver Hull and yields more. Flour is equal to any other buckwheat, while it is more productive than any other.

and succeeds well far north. The straw is heavier and it branches more; it does not need to be sown as thickly as other kinds. Lb. 25c, 3 lbs. 60c. By freight, pk. 50c, bu. (52 lbs.) \$1.50, 2 bu. @ \$1.35, 10 bu. for \$12.50

SILVER HULL BUCKWHEAT.

Very good, popular variety. Grain is of light gray color, rounder than the common variety, has a thinner husk, earlier and yields more. Lb. 25c, 3 lbs. 60c. By freight, pk. 50c, bu. \$1.50, 2 bu. or more @ \$1.35; 10 bu. for \$12.50.

NEW HULLLESS BUCKWHEAT.

A wonderful novelty, growing exactly like buckwheat, but the grain has no hull on and looks exactly like the grains of rye. It is a desirable novelty which we believe will pay farmers to try. Pkt. 10c, lb. 40c; 3 lbs. \$1.00, postpaid. By freight, 1/2 pk. 65c, pk. \$1.15, bu. \$3.50.

EARLY AMBER CANE.

Dairy farmers say that the Early Amber Cane is the most valuable fodder plant in existence for their use. Notwithstanding its great adaptability as a food for livestock, it is only quite recently that the real value of sorghum (or sugar cane) has attracted general attention. Its great merit is now beginning to be appreciated. It is of the very best quality, being sweet, tender, nutritious and greedily eaten by cattle, horses and hogs. Dairy men find that the cows will give more and richer milk from its use and it is claimed that as high as ten tons of green fodder have been grown per acre. Sow 100 lbs. per acre for best results. It is a profitable crop also to grow for seed which is excellent for feeding poultry, and is very frequently ground and substituted for buckwheat flour. Price subject to market change. Per lb. 20c, 3 lbs. 50c. By freight, 10 lbs. 50c, 25 lbs. 85c, 100 lbs. \$2.00, 500 lbs. or more @ \$1.75.

KENNE'S IMPROVED AMBER CANE.

An improved variety which will make the very finest grade of beautiful amber syrup of delicious flavor and many persons will prefer it for table use to either maple syrup or honey. It is said that over 250 gallons have been produced per acre, and when boiled down making over 3200 lbs. of sugar. Why not supply your own table in this way, as it is as easily grown as a crop of corn and succeeds well in all parts of the United States from Minnesota to Texas. It requires only 5 lbs. of seed per acre. Per lb. 25c, 3 lbs. 65c. By freight, 10 lbs. \$1.00, 25 lbs. \$2.00, 50 lbs. \$3.50, 100 lbs. \$6.00.

KAFFIR CORN.

This is a most excellent fodder plant, yielding two crops of fodder during a season. It grows from five to six feet high, making a straight, upright growth. The stem or stalk bears numerous wide leaves. The stalks keep green and are brittle and juicy making excellent fodder either green or dried. The seed crop is also heavy, sometimes yielding sixty bushels to the acre. Both grain and fodder are excellent. The stalk remains tender to full maturity of the seed. There is no failure about it as it possesses the quality that all the tribe possess, of going without rain without any loss of capacity to yield. The grain that is like wheat. Cultivated the same as our common Indian corn, requiring five pounds of seed per acre. For fodder sow one-half to one bushel, either broadcast or in drills. Pkt. 5c, lb. 20c, 3 lbs. 50c. By freight, pk. 40c, bu. (50 lb.) \$1.00, 2 bu. or more @ 90c.

KAFFIR CORN.

EARLY AMBER CANE.

TEOSINTE.

A fodder plant grown largely in some parts of the country. Somewhat resembles corn in its general appearance, but the leaves are much longer and broader and the stalks contain sweeter sap. In its perfection it produces a great number of shoots growing as much as 12 feet high, very thickly covered with leaves. Eighty-five stalks have been grown from one seed, attaining a height of eleven feet. Horses and cattle eat it as freely as young sugar corn. Plant as soon as ground becomes warm at usual corn planting time, in hills, three to four feet apart each way, two seeds to the hill. We advise all those interested to give it at least a trial so as to be ready to plant larger quantities hereafter. Teosinte is one of the heaviest yielding forage plants known, having yielded 50 tons of fodder to the acre. Large pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 80c, 3 lbs. (sufficient for one acre) \$2.00, by mail prepaid.

SERADELLA.

When traveling in Germany we found that Seradella was the most profitable of all fodder plants grown there and almost everybody grows it for hay. It is specially adapted to light, poor or sandy soil, being equal to red clover in nutritive qualities and yields a larger crop. It is one of the best drouth-resisting plants known and does well on high land as well as low. Cattle are very fond of it as hay, green fodder or for pasturing. It is not a perennial, but can be cut twice and will produce good pasture balance of year. Sow early in spring alone or with wheat or other grain. Pkt. 5c, lb. 30c, 3 lbs. 80c, postpaid. By freight 10 lbs. or more @ 10c, per lb. Bu. of 45 lbs. (will sow 3 acres) \$3.75.

SEED FLAX.

It will pay you to sow nice, pure high grade flax seed. It is one of the most profitable crops, especially on new land. Price subject to market changes. Pk. 65c, bu. \$1.85 10 bu. or more @ \$1.75.

GRAINS OF SPELTZ.

SPELTZ—A Valuable New Grain From Russia.

This most wonderful new grain was first introduced in this country by the Iowa Seed Co., and has proved of great value, and is now listed by almost all of the leading seedsmen. It is botanically known as *Triticum Spelta* or *Emmer*, and is supposed to be the grain grown in Egypt in the time of Moses. It is mentioned several times in Bible. For centuries past it has been grown in a limited way in Eastern Russia near the Caspian Sea, its value not being known to the civilized world. Is of high value for feeding and will make a fair grade of flour similar to rye. Will grow well and produce immense crops on poor soil, and dry weather appears to have no effect on it; will make a good crop with almost any condition of soil climate. It makes excellent pasture and good hay if cut at proper season. Yields 70 to 100 bushels of grain to the acre besides several tons of straw for feeding. The grain is much richer than corn for feeding and of superior quality for fattening hogs, cattle, sheep, poultry, etc. May be sown in the spring or fall, 50 to 75 lbs. per acre. Per lb. 25c, 3 lbs. 60c, postpaid. By freight, pk. 50c, bu. (40 lbs.) 90c; 2 bu. or more @ 85c; 10 bu. or more @ 80c.

PENCILARIA.

This wonderful fodder plant has proved a great boon to farmers, especially in dry sections of the country where they have been delighted with it. It does not do so well during wet seasons being particularly a dry, hot weather plant. It is an improvement on the *Pencilaria Spicata* (Pearl Millet) being much better adapted to growing in the north and producing a good crop where Pearl Millet is a failure. The seed is very small, and when it first comes up it looks like grass, but very soon changes its appearance so that it more nearly resembles corn, growing very rapidly and having broad, succulent leaves. It stools out wonderfully, our customers reporting as high as 75 stalks grown from one seed. Sow in May or June in drills 24 to 36 inches apart, using 2 lbs. seed per acre or broadcast cast 15 lbs. per acre. Per pkt. 5c, ¼ lb. 15c, lb. 35c, 3 lbs. \$1.00 postpaid. By express per lb. 25c, 5 lbs. \$1.00, 25 lbs. \$3.75, 100 lbs. \$13.50.

PENCILARIA.

FODDER AND FORAGE ARE A PROFITABLE PART OF THE FARM PRODUCTS.

DWARF ESSEX RAPE.

This is beyond all question the most popular and profitable of all forage plants, and everywhere it is giving the best satisfaction. It is easily grown anywhere and stands unsurpassed as a forage plant for hogs, cattle or sheep. They eat it greedily and seem to prefer it to any other pasture during the summer and till late in the fall or early winter. It can be sown early in the season to provide early pasture for sheep and swine, or sow in small grain a week or so before cutting to provide pasture after harvest, or sow on the stubble, but it is usually sown in June, July or August with corn or potatoes or on well prepared land alone for summer and fall pasture. Makes a wonderfully productive pasture for sheep, hogs and cattle, and they gain flesh so rapidly that they soon "weigh like lead." While it is the ideal food for sheep still it is of equal value for hogs and cattle as they are very fond of it. It is extremely cheap and very prolific, having yielded twenty tons of fodder per acre. In the east it is usually sown in drills, two or three pounds per acre, and cultivated, but in western states it is almost invariably sown broadcast, four or five pounds per acre and grows so rapidly that weeds are quickly smothered. The United States department of agriculture claims that it adds greatly to the fertility of the soil for the following grain crop. A Nebraska farmer says that he sowed only 3 lbs. per acre on a four and one-half acre field, and five weeks after sowing he turned eighty head of hogs and forty pigs into the field and they pastured there constantly until October. The plants grew so rapidly that at no time could he tell where the hogs had been twenty feet away from the gate. Crop was very short and price is somewhat higher this year. The quality of our seed however is unsurpassed. Per pkt. 5c, lb. 30c, 3 lbs. 75c, postpaid. By freight, 5 lbs. 50c, 10 lbs. 90c, 25 lbs. \$1.85, 100 lbs. \$6.75. Write for circular on growing rape.

FIELD PEAS.

For northern states there is no crop of greater value than field peas, and none is more neglected, which can only be attributed to a lack of knowledge as to its merits as a fodder plant, being very rich in the elements that improve the muscle, bone and nervous system. Sow as early as ground can be worked using two bushels peas and two bushels oats per acre.

SCOTCH BEAUTY PEAS.—Best blue field peas. Will yield an immense crop of superior quality. Per peck 60c; bushel \$2.00; two bushels or more @ \$1.80.

WHITE CANADA PEAS.—More used than any other. Per peck 60c; bushel \$2.00; two bushels or more @ \$1.80.

WHIP-POOR-WILL COW PEAS.—The most highly valued plant in the south for fodder and reclaiming old or worn out land as it is a leguminous plant of special merit as a fertilizer. The vines when fed green make the best fodder and are very nourishing. The whip-poor-will is the most popular sort and yields a good crop of both fodder and peas. When ripened the ground peas make the best cattle fattener. Pkt. 5c, lb. 25c, 3 lbs. 60c, by freight, pk. 85c, bu. \$2.40; 2 bu. or more @ \$2.25.

NEW ERA COW PEAS.—Similar to above but much earlier and therefore more desirable for growing in the north. Pkt. 5c, lb. 25c, 3 lbs. 60c; by freight, pk. 90c, bu. \$2.50, 2 bu. or more @ \$2.40.

IDAHO COFFEE PEAS.—A new substitute for coffee, not at all resembling the German Coffee Berry. It is a native of Idaho, and has been grown largely in Colorado and elsewhere, producing immense crops at a low cost one plant sometimes bearing as many as one thousand pods. When roasted and ground it has the flavor of coffee. Pkt. 5c, ¼ lb. 15c, lb. 40c, 3 lbs. \$1.00

THOUSAND HEADED KALE.

THOUSAND HEADED KALE.

Will yield a much heavier crop than Dwarf Essex Rape and is now considered much superior to the rape in some sections. The seed can be sown early in April or any time thereafter till midsummer. It grows to a height of 3 to 4 feet, and is so covered with small whorls of leaves that the name of Thousand Headed Kale was given it. Sow broadcast 3 lbs. per acre, or in rows 18 inches apart, using 1 lb. per acre. Pkt. 5c, ¼ lb. 15c, lb. 50c, postpaid; 5 lbs. or more by express @ 25c

EARLY SOJA BEANS.

Also called Soy Beans or Coffee Berry—During recent years this variety has been largely sold under the name German Coffee at extremely high prices, but we prefer to offer it under its correct name. The berries ripen in about three to four months from the time of planting and produce a crop of 20 to 40 bushels to the acre. When roasted and ground it closely resembles coffee and tastes similar. Some mix half and half with coffee when using and claim it is superior. Its great value to the farmer lies in the fact that when ground it makes one of the most valuable crops for feeding stock and adds very greatly to the milk production. The ordinary soja beans are too late to mature here, but this variety ripens in all the northern states. Plant in drills two or three feet apart and one foot between plants. Per packet 5c, lb. 30c, 3 lbs. 75c, postpaid. By freight, peck \$1.00, bushel (50 lbs.) \$3.65.

IMPROVED PROLIFIC TREE BEANS.

Also called California Wonder. Undoubtedly the most prolific bean grown, and it will yield a larger crop under ordinary circumstances than any variety that we have ever seen. On our own farm it yielded a crop of forty-one bushels per acre. The beans are pure white, of small size, greatly resembling the "Navy." Per packet 5c, ½ pint 12c, quart 35c; by freight, peck \$1.25, bushel \$4.00.

IMPROVED NAVY, or BOSTON PEA BEANS.

A wonderful improvement over the old-time Navy Bean and in every way superior to the Michigan pea bean. This variety makes a very desirable farm crop, especially in the far north. Per packet 5c, ½ pint 12c, quart 35c, postpaid; by freight, peck \$1.00, bushel \$3.25; 2 bu. or more \$3.00.

BROOMCORN.

DWARF EMERALD.—This new variety which we introduced is the result of a cross between Dwarf Evergreen and California Golden. Stalk is short, brush long, straight and of handsome green color, almost all of it being suitable for hurl. Per lb. 30c, 3 lbs. 75c; by freight, 10 lbs. \$1.50, 25 lbs. \$3.00, 100 lbs. \$9.00.

CALIFORNIA GOLDEN.—Carefully selected and improved so that the brush is straight and long, a very large proportion of it being suitable for hurl. Of fine quality, light green color, turning to light yellow when allowed to become too ripe. Per lb. 25c, 3 lbs. 65c; by freight, 10 lbs. 60c, 25 lbs. \$1.25, 100 lbs. \$4.00.

EVERGREEN.—Largely grown in western states. Brush noted for fine quality, good length and handsome appearance. Per lb. 25c, 3 lbs. 65c, by freight, 10 lbs. 65c, 25 lbs. \$1.40, 100 lbs. \$4.50.

DWARF.—Popular in some sections; matures late. Per lb. 25c, 3 lbs. 65c; by freight, 10 lbs. 75c, 25 lbs. \$1.50, 100 lbs. \$5.00.

MAMMOTH WHITE ARTICHOKE.

An improvement on the Jerusalem Artichokes. The greatest Hog food known. These are attracting much attention owing to their great fattening properties, great productiveness (over 1000 bu. having been grown on one acre), and easy culture. They need not be dug in the fall; hogs should be turned on them, and will help themselves by rooting for them. One acre will keep 20 or 30 head of hogs in excellent condition from October until April except when ground is frozen solid. Plant in April or May, 3 to 5 bu. per acre. Lb. 25c, 3 lbs. 60c, postpaid. By freight or express, pk. 40c, bu. \$1.25, 5 bu. or more @ \$1.00.

ARTICHOQUES.

UPLAND RICE.

An early variety which can be grown on any ordinary land without irrigation, although it prefers a moist situation, and has matured in Illinois. Its growth is similar to wheat. Sow early in drills 2 feet apart, and drop the seeds one inch apart in drills, covering about 1½ inches, one peck per acre. It stools out very heavily. Price per pkt. 5c, ¼ lb. 15c, lb. 40c, 3 lbs. \$1.00 postpaid. By express or freight, ½ pk. 65c, pk. (11 lbs.) \$1.00, bu. \$3.75.

MAMMOTH RUSSIAN SUNFLOWER.

Largest sunflower. This is one of best paying crops that can be raised. Seeds are the best of food for poultry and is much cheaper than corn. Stalks make good fire wood. Large pkt. 5c, lb. 20c, 3 lbs. 55c; by freight, 10 lbs. 75c, bu. of 25 lbs. \$1.50.

CLOVER SEED.

We are pleased to say that the quality of our Iowa grown Red Clover seed was unusually fine during the past season, and while the crop was not large, still we have been shipping in carload lots to Ohio and other eastern states where they want a superior quality.

For many years we have made this a specialty, and now have our electrical machinery for cleaning so perfect that we claim that our grades average better than those of most other markets, and believe that they cannot fail to please the most particular. The Nebraska Experiment Station tested clover seed from the leading seed firms of the country, and our seed stood the highest for purity of any west of Pennsylvania, and, with one exception, the highest of any of the United States.

PRICES—On clover and grass seeds are changing almost daily, so that we are unable to quote prices which will be invariable. *Don't fail to write for prices before buying.* We issue a price list each week from January to June. If you are in a hurry for the seed you can order it and we will send seed to full value of money sent on day order is received. The following are the prices we are selling at on the date this catalogue goes to press. We prepay postage at the 1 and 3 pound rate; larger quantities shipped at purchaser's expense. Trial packets of any variety at 5 cents each. Grain bags at 20 cents each extra.

MEDIUM RED CLOVER.—This is the most important of all clovers and the standard everywhere for hay and pasture. It is known as Common Red or June Clover in many sections. Our Iowa grown clover seed has become widely known for its purity, strong vitality, hardiness, vigorous and healthy growth, and stooling qualities, so that now we receive many orders annually from the most distant parts of the U. S. It has been tested by the Agricultural Experiment Stations in various parts of the country and ranks among the highest everywhere. Well posted farmers are beginning to appreciate the difference between it and ordinary stock. It pays to have the best. Sow 15 lbs. per acre. Per lb. 30c, 3 lbs. 85c, postpaid. Per pk. \$2.25; bu. (60 lbs.) \$8.50. Bags extra 20 cents each.

MEDIUM RED CLOVER.—Second Grade.—Ask for sample. Per bu. \$7.50.

MAMMOTH RED CLOVER.—Also called Sapling or Pea Vine Clover. This greatly resembles the Medium Red, but is of much taller and more vigorous growth. Nothing equals it for hog pasture as it will produce an enormous yield and is of the highest feeding quality. It gives quick results, making an unequaled crop and is

ALFALFA, or Lucerne Clover.—Very popular in many portions of the country. Under proper management it will yield from ten to twelve tons to the acre. All classes of stock are exceedingly fond of it. The roots are so long and grow so deep, frost cannot heave or throw them out in winter. One sowing will stand for twenty years, and instead of impoverishing the soil, enriches it. Grows on the thinnest sandy soil and thrives in greatest drouth. Sow broadcast about 25 lbs. to the acre. Per lb. 35c, 3 lb. 90c, postpaid. By freight, per pk. \$2.60; bu. (60 lbs.) \$9.50.

WHITE DUTCH CLOVER.—Desirable in pasture mixtures. Also used largely for lawns. It is the most hardy of any variety of clover, is of a creeping habit, desirable for sowing on terraces and sloping grounds. Seed is very small and it requires only 7 lbs. to sow an acre. Price for our choice quality per lb. 35c, 3 lbs. \$1.00, postpaid; by freight, per pk. \$2.90; bu. (60 lbs.) \$10.75.

SANFOIN CLOVER, also called Esparcette Clover.—An excellent but comparatively little known variety of special value for growing on light, dry, sandy or limestone soils. It is a good fodder plant. Usually sown with oats or barley, using 30 or 40 pounds of seed to an acre. Per lb. 35c; 3 lbs. 90c, postpaid; by freight, pk. \$1.60; bushel, (45 pounds) \$5.50.

SWEET CLOVER.—(*Melilotis Alba* or *Bokhara*.)—A tall shrubby plant, bearing innumerable small white flowers and very valuable for bees, and is sown largely along the roadsides by bee keepers. Both leaves and flowers have a delightful fragrance. Sow 10 lbs. per acre. Per lb. 40c, 3 lbs. \$1.10; by freight, 5 lbs. or more @ 25c.

CRIMSON CLOVER, also called Giant Incarnate.—This is an annual variety. The yield in fodder is immense, and after cutting, it at once commences to grow and continues until severe freezing weather and makes good hay. Sow in April or May 20 pounds of seed per acre. The only objection to it is that it winter kills in this latitude. Desirable as a soiling crop. Per pound 30c, 3 pounds 80c; by freight, peck. \$1.90, bushel \$7.00

ALFALFA CLOVER.

usually considered a permanent pasture grass. If your soil is poor and needs enriching there is no fertilizer as cheap and good as sowing Mammoth clover and plowing the crop under. It is the clover for poor soils. Sow 15 pounds per acre. Per lb. 35c, 3 lbs. 90 cents, postpaid; by freight, peck \$2.35; bu. (60 lbs.) \$8.75.

TURKESTAN ALFALFA.—This new variety was sent out by the Department of Agriculture five years ago and has given excellent satisfaction. More hardy than the ordinary variety, having stood a temperature of 45 degrees below zero when ground was bare. Makes large top growth, also fine root growth. Pkt. 5c, lb. 35c, 3 lbs. \$1.00, postpaid. By freight, pk. \$2.85, bu. \$10.50

ALSIKE CLOVER.—Unequaled for hay and we cannot too strongly recommend it to our customers. It is hardy, even in northern Minnesota, and is the only variety which will produce a good crop and not kill out in low wetland. The hay is finer and better than any other, therefore of special value for sowing with timothy. Height 18 to 24 inches and has round pink or flesh colored heads. Seed is small and requires only 8 pounds per acre or half that quantity if sown with timothy. Per lb. 30c; 3 lbs. 85c; by freight, peck \$2.30; bushel \$8.50.

The Alsike Clover I got from you 2 years ago made an immense crop of hay. Much of it measured over 5 feet and we found some stalks that measured over 6 feet. It was very fine in straw and made the finest hay I ever fed to my cattle. I now order more of it.

J. M. HERSHEY, Palmyra, Mo.

JAPAN CLOVER.—Grows freely on poor soil. Not a true clover. Per lb. 60c, 3 lbs. \$1.50, postpaid; 5 lbs. or more, by freight, @ 40c.

Mr. Davidson, of Ottawa county, Kansas, says that his Alfalfa Clover produced four crops of hay—8 tons, value \$4.00 per ton in the country, or \$32.00; also a yield of 11 bu. of seed worth \$8 per bu. or \$88, making a total of \$120 per acre in 1 season, or 3 times the value of the land. How would that kind of a crop suit you? Better try Alfalfa this year.

SAND VETCH.

MILLETS.

There is nothing like millet for sowing to cover up shortage in your hay crops. It can be sown up to the middle or end of July and makes a valuable catch crop. Grain bags 20 cents each extra.

JAPANESE MILLET.—(*Panicum crus-galli*.)—A distinct new variety which has been called by one seedsmen the "Billion Dollar Grass." Especially valuable for the northern states. It yields an enormous crop of forage, which is greatly relished by stock. When cured it makes an excellent hay. Sow the seed broadcast at the rate of 15 lbs. to the acre, or in drills 12 to 18 inches apart, using 10 to 12 lbs. per acre. Per lb. 30c, 3 lbs. 75c, postpaid. By freight, per bu. (50 lbs.) \$2.25.

GERMAN or GOLDEN MILLET.—Matures about two weeks later than common millet. It grows from 4 to 5 feet high, yielding an abundance of leaves; heads closely condensed; spikes very numerous; seeds round, golden yellow in rough sheaths. Sow one bushel to the acre. Per lb. 20c, 3 lbs. 50c, postpaid. By freight, bushel (50 lbs.) \$1.00. Second grade, northern grown, not as pure or clean. Bushel 80c.

COMMON MILLET.—Best quality. Preferred by some to German. By freight, per bu. (50 lbs.) \$1.00.

HUNGARIAN.—Popular in some sections. By freight, per bushel (50 lbs.) \$1.25.

SIBERIAN MILLET.—This is frequently called Red German Millet, as it greatly resembles German Millet in manner of growth and productiveness. It is much earlier, however, and seed is of a mixed red and yellow color. Pound 20c, 3 pounds 50 cents. By freight, bushel (50 lbs.) \$1.00.

MANITOBA MILLET.—Also called *Hog or Broomcorn Millet*. Best millet for withstanding drouth. About two weeks earlier than German. Per lb. 20c, 3 lbs. 50c. By freight, bu. (50 lbs.) \$1.50.

PEARL MILLET.—Entirely different from ordinary millet; an immense fodder yielder, of tall growth, highly recommended by the U. S. Department of Agriculture for the south. Pkt. 5c, lb. 25c, 3 lbs. 70c. By freight, 10 lbs. (for one acre) \$1.25, 25 lbs. \$2.25, 100 lbs. \$7.50.

SAND VETCH or WINTER VETCH.

A comparatively new forage plant which has proved of highest value, and is highly recommended by the U. S. Agricultural Department. Though it succeeds and produces good crops on poor sandy soils, it is more vigorous on good land and grows to a height of 4 to 5 feet. It is perfectly hardy throughout the United States, remaining green all winter. Every dairyman and stock breeder in the United States should have a field of it and if you try it once you will never be a season without it. It is exceedingly nutritious, much more so than clover, is eaten with relish, and may be fed with safety to all kinds of stock. It is the earliest crop for cutting, and a full crop may be taken off the land in time for planting spring crops. Sow ½ bushel per acre in spring or fall. Pkt. 5c, lb. 30c, 3 lbs. 75c, postpaid. By freight, pk. \$1.60, bu. (60 lbs.) \$5.75, 2 bu. or more @ \$5.50.

TRY OUR DAIRY FARMER'S GRASS MIXTURE DESCRIBED ON PAGE 40.

**BROMUS
INERMIS**

MEADOW FESCUE.

SHEEP'S FESCUE.

ORCHARD GRASS.

GRASS SEEDS.

We are the largest dealers in this line in Iowa and our trade has been built up by handling only the best grades of new recleaned seeds. Grass seeds are sold on a very close margin of profit and the prices named are what we are selling the seed for at the time this catalogue goes to press and are subject to changes of market. Should you desire a quantity of anything in this line, be sure you write us for special prices, naming the amount needed. At the pound rate we prepay postage. Larger quantities by freight or express at purchaser's expense. Grain bags 20c each.

MEADOW FESCUE, or English Blue Grass.—Succeeds well in almost all soils, from high, dry land to moist, standing the summer heat excellently. It is valuable as a pasture grass, being one of the earliest in the spring and latest in the fall. It is very nutritious. Lb. 30c, 3 lbs. 75c, postpaid, by freight bu. (14 lbs.) \$1.75, 5 bu. or more @ \$1.60.

BROMUS INERMIS.—The most valuable new grass which has been introduced into this country during the past twenty-five years, and is has everywhere, from Canada to Texas, given the best of satisfaction. It will produce a wonderful crop of hay on land which is too poor for clover or timothy, and it resists intense cold, and also the most hot, dry weather. Forms a quick and dense sod and is a permanent grass. Grows 18 to 36 inches in height and can be cut two or three times per year. Should be sown early in the spring using 20 to 25 lbs. per acre if sown alone, or if with alfalfa use 12 lbs. with 8 lbs. alfalfa. Per lb. 30c, 3 lbs. 75c, postpaid. By freight; per bu. (14 lbs.) \$2.00, 5 bu. or more @ \$1.75.

KY. BLUE GRASS.

the stock. Per lb. 35c, 3 lbs. 85c. By freight, bushel (14 lbs.) \$2.00; 5 bu. or more @ \$1.75.

CREeping BENT GRASS.—Of special value for pasture and low ground. Starts early, deep rooted and a valued sort for holding sloping ground or terraces together. Sow 15 lbs. per acre. Lb. 35c, 3 lbs. \$1.00, postpaid. By freight, bu. (14 lbs.) \$2.50; 5 bu. or more @ \$2.30.

RED TOP.—A very hardy native perennial grass, succeeding best on moist land. It remains green for the greater part of the year. In the east it is one of their principal sorts, but it is not so highly valued here. Fancy cleaned seed. Per lb. 30c, 3 lbs. 75c, postpaid. By freight, per bu. (14 lbs.) \$1.50, 5 bu. or more @ \$1.40.

PRIME RED TOP.—(Or chaff seed.) Per bu. 90c, 5 bu. or more @ 75c.

WATER, or Floating Meadow Grass.—For wet soils, marshes and lands which occasionally overflow. Per lb. 40c, 3 lbs. \$1.10, postpaid. By freight, per bu. (14 lbs.) \$4.75, 5 bu. or more @ \$4.50.

RED FESCUE.—For meadows or pastures on dry, hard or sandy soils. It is very hardy, a true perennial, growing about 1 to 2½ feet high. Per lb. 35c, 3 lbs. \$1.00, postpaid. By freight, per bu. (14 lbs.) \$2.25; 5 bu. or more @ \$2.00.

SHEEP'S FESCUE.—Suited to light, sandy soil, and dry uplands or hillsides. It is deep rooted, and not affected by extreme drouth. Sheep are especially fond of it. Sow 14 lbs. per acre. Per lb. 35c, 3 lbs. \$1.00, postpaid; by freight, per bu. (14 lbs.) \$1.50, 5 bu. or more @ \$1.40.

ORCHARD GRASS.—A valuable grass for pasture or hay land, and on account of its earliness very valuable for permanent pastures. It furnishes the first green bite in the spring and the last in the fall, and is quick to recover from close cropping, and even thrives better the more it is cropped. It is well suited to shady places, such as orchards and groves. Sow 14 lbs. per acre. Per lb. 35c, 3 lbs. \$1.00 postpaid; by freight, per bu. (14 lbs.) \$2.20, 5 bu. or more @ \$2.00.

PERENNIAL RYE GRASS.—(Or English Rye Grass.)—A nutritious permanent grass for meadows and pasture, or for mixing with other grasses for lawn. It is also well adapted for permanent meadows and yields large quantities of very nutritious hay. Sow 20 lbs. per acre. Per lb. 30c, 3 lbs. 75c, postpaid; by freight, per bu. (14 lbs.) \$1.25, 5 bu. or more @ \$1.10.

ITALIAN RYE GRASS.—An annual variety which will give a large crop the first year. Sow 20 lbs. per acre. Per lb. 30c, 3 lbs. 75c, postpaid; by freight, per bu. (14 lbs.) \$1.40, 5 bu. or more @ \$1.25.

TIMOTHY.—Best suited to moist, rich, strong and loamy soils, where it grows to perfection, but does not succeed well on dry sandy soil. We are located in the best section of the country for growing timothy seed, and more of it is grown in Iowa than in any part of the world. Our seed is extra nice. Sow 11 lbs. per acre. Per lb. 20c, 3 lbs. 50c, postpaid; by freight, per bu. (45 lbs.) \$1.65; bags 15c each extra. Ask for price in quantity.

WATER FESCUE.—A perennial grass with long creeping roots, which is desirable for sowing on low, wet ground, in shallow ponds, besides lakes, rivers, etc. Per lb. 40c, 3 lbs. 1.10, postpaid; by freight, per bu. (14 lbs.) \$4.50, 5 bu. or more @ \$4.25.

CRESTED DOGSTAIL.—For permanent pastures; especially on high land and hard, dry soils and hills. Is very hardy, and but little affected by extreme drouth or cold weather. Per lb. 50c, 3 lbs. \$1.35, postpaid; by freight, per bu. (14 lbs.) \$3.75, 5 bu. or more @ \$3.50.

WOOD MEADOW GRASS.—It is invaluable for wooded pasture or shaded ground, and should be included in all mixtures for permanent pastures, especially in shady places. Sow 20 pounds per acre. Per lb. 50c, 3 lbs. \$1.25, postpaid; by freight, per bu. (14 lbs.) \$5.00, 5 bu. or more @ \$4.75.

MEADOW SOFT GRASS.—Although not of high feeding value, it is very valuable for low, soft, spongy places, where other grasses don't succeed. It is very productive, a hardy perennial, 18 to 20 inches high. Per lb. 35c, 3 lbs. \$1.00, postpaid; by freight, per bu. (14 lbs.) \$2.50, 5 bu. or more @ \$2.25.

BERMUDA GRASS.—The most valuable grass for the southern states, as it withstands heat and drouth wonderfully well. It is valuable for hay and pasture and unsurpassed for lawns in the south, as it runs over the ground, forming a dense turf. Sow 8 lbs. per acre. Lb. \$1.10, 3 lbs. \$2.75, prepaid, 5 lbs. not prepaid, @ 60c per lb.

HARD FESCUE.—Is emphatically a grass for dry lands, doing well on sandy and shallow silicious soils. It is exceedingly hardy and withstands extremes of heat, cold and drouth. Per lb. 35c, 3 lbs. \$1.00, postpaid; by freight, per bu. (14 lbs.) \$1.50, 5 bu. or more @ \$1.35.

Permanent Grasses

Most of our western farmers have not yet learned that a pasture or meadow of mixed grasses is far superior to clover and timothy alone. All authorities agree that for both pasture and hay, best results are obtained from the use of grass seed in mixture. The reasons are that: First: A number of species will insure a much denser growth than the same number of seeds of one or two species, and prove less exhausting to the soil, since they live to a large extent on different constituents. Second: Seasons that affect some grasses adversely are favorable to other sorts. So that with mixtures a failure is practically impossible, provided of course, the seed is good. We take great pains in selecting grass seed, in order to secure the highest germination, and our mixtures are based on a full appreciation of the requirements of the different soils for which they are intended. We have made a study of this subject and have grass specialists in our employ and can furnish the seed of the best varieties of grasses mixed in proper proportions for any soil or climate. Please read carefully the descriptions, of the various kinds of grasses, and remarks below on sowing grass seeds, and don't be content to follow the old way your father and grandfather did, but adopt new methods sow improved varieties and double your crop.

WHEN AND HOW TO SOW GRASS SEED.

The most rapid way of obtaining a grass crop is to sow the seed early in the spring by itself, without any grain, or nurse crop, as the young grass plants are in no way protected by the grain, and when this is cut the young clover and grass are very tender. The cutting of the so-called nurse crop suddenly exposes the young grass at the hottest time of the year, and there is danger of its being burned out, while when the grass is sown by itself the young plants are hardened and more able to withstand the hot and dry sun. However, some farmers will want to sow seed oats with the grass seed, and we wish to call their attention to our Early Champion Oats as being especially adapted for a nurse crop on account of its not stooling so heavily as other varieties. To obtain best results use only a moderate quantity of oats to sow with grass seeds.

After the ground is carefully prepared, the seed is sown broadcast, which can be nicely and evenly done and very quickly with the little hand seeders which we advertise. As seed is small it should not be covered very deep, the natural covering which may take place after a shower of rain is sometimes sufficient. However, it is best and more certain to lightly harrow it in. The pressure of a common farm roller on clover and grass seed covers the same slightly, and is one of the best means to assure the quick and even germination of the seed.

PERMANENT MEADOW MIXTURES.

Will make the best quality hay as the mixture contains such grasses as produce a heavy growth and mature together. We send out the No. 1 mixture when not otherwise ordered, as it is adapted to medium or average soils. Sow about 20 lbs. per acre, or for a top seeding about half the amount.

NO. 1. FOR MEDIUM SOILS.—Contains Meadow Fescue, Perennial Rye Grass, Italian Rye, Orchard Grass, Tall Meadow Cat, Timothy, Red Clover, Alsike, Sweet Vernal, etc.

NO. 2. FOR HIGH, DRY LAND, LIGHT OR GRAVELLY SOILS.—Contains Sheep's Fescue, Alfalfa, Hard Fescue, Perennial Rye Grass, Meadow Fescue, Timothy, Kentucky Blue Grass, Sweet Vernal, etc.

NO. 3. FOR HIGH, DRY LAND, HEAVY OR CLAY SOILS.—Contains much the same as above with the addition of Orchard Grass, Crested Dogtail and Bromus.

NO. 4. FOR MOIST AND RICH SOIL, OR LAND SUBJECT TO OVERFLOW.—Contains Water Meadow Grass, Meadow Foxtail, Perennial Rye Grass, Meadow Fescue, Red Top, Meadow Soft Grass, Alsike Clover, etc.

NO. 5. FOR TOP SEEDING SWAMPS MARSHES, ETC.—(Sow 10 lbs. per acre.) Contains much the same as above, in different proportions.

PRICES Any of the above Permanent Meadow Mixtures, per lb. 30c, 3 lbs. 75c, by mail; by frt., 20 lbs. \$2.50 50 lbs. \$5.25, 100 lbs. \$10.

PERMANENT PASTURE MIXTURES.

Selected with a view to having a succession of grasses coming on constantly from earliest spring through the dry summer weather, and through the fall. It is permanent and keeps improving year after year. Sow about twenty pounds per acre, or for top seeding, half the amount.

NO. 6 FOR MEDIUM SOILS.—Contains Kentucky Blue Grass, Meadow Fescue, Perennial Rye Grass, Orchard Grass, Tall Meadow Oat Grass, Hard Fescue, Alsike clover, White Clover, Timothy, Red Clover, etc.

NO. 7. FOR HIGH, DRY, GRAVELLY SOILS.—Contains Sheeps Fescue, Hard Fescue, Creeping Bent, Bromus Inermis, Crested Dogtail, Meadow Fescue, Timothy, Kentucky Blue Grass, White Clover, etc.

NO. 8. FOR HIGH, DRY, HEAVY OR CLAY SOILS.—Contain much the same as above, mixed in different proportions, with the addition of Alfalfa and Orchard Grass.

NO. 9. FOR MOIST AND VERY RICH SOILS.—Contains Perennial Rye Grass, Water Meadow Grass, Water Fescue, Meadow Foxtail, Orchard Grass, Meadow Soft Grass, Tall Meadow Oat Grass, Alsike, etc.

NO. 10. FOR ORCHARDS, WOOD PASTURES AND SHADY PLACES.—Contains Wood Meadow Grass, Orchard Grass, Kentucky Blue Grass, English Blue Grass, Meadow Foxtail, Sweet Vernal, Red Clover, Alsike, etc.

PRICES Any of above Permanent Pasture Mixtures per lb. 30c 3 lbs' 75c, by mail. By frt. 20 lbs. \$2.50, 50 lbs. \$5.25 100 lbs. \$10.00.

OUR SPECIAL GRASS MIXTURE

FOR HAY AND PERMANENT PASTURES.

OUR MEADOW MIXTURE COMPARED WITH ORDINARY GRASS CROP.

DAIRY FARMERS' GRASS MIXTURE.

Dairy farmers particularly desire to take a crop of hay off the meadow and have the aftergrowth for pasture, and where the natural grasses are carefully selected with this object in view, this can be successfully done. This mixture is composed of tall, quick-growing grasses for mowing, after which the dwarf-growing varieties will cover the ground and furnish grazing until late in the fall. Consists of the best varieties of clover and grass seed, as Red Clover, Alsike, Orchard Grass, Rye Grass, Tall Meadow Oat, Meadow Foxtail, English Blue Grass, Kentucky Blue Grass, etc. It is a special mixture which will please everyone. Sow 20 lbs. per acre on ordinary soils. Per lb. 30c, 3 lbs. 75c postpaid. By freight, 20 lbs. \$2.50, 50 lbs. \$5.25, 100 lbs. \$10.00.

SHEEP PASTURE MIXTURE.

Everyone who keeps sheep should sow this mixture. It will grow well on high, dry, poor soil, and also on good ground; is drought resisting, and endures close cropping. Contains Sheep's Fescue, Hard Fescue, Red Fescue, Creeping Bent, Crested Dogtail, Bromus Inermis, Meadow Fescue, White Clover, etc. Sow 25 lbs. per acre. Per lb. 30c, 3 lbs. 75c, postpaid. By freight 25 lbs. \$3.00, 50 lbs. \$5.25, 100 lbs. \$10.25.

QUICK RESULT PASTURE.

Not permanent, but when sown early will give a full crop of hay and good pasture until late in the fall. Desirable for both cattle and hogs. Contains Italian Rye Grass, English Rye Grass, Meadow Fescue, Timothy, Crimson Clover, Mammoth Red Clover, Tall Meadow Oat Grass, etc. Sow 15 lbs. per acre. Per lb. 30c, 3 lbs. 75c, postpaid. By freight 15 lbs. \$1.75, 50 lbs. \$5.00, 100 lbs. \$9.50.

PERMANENT HOG PASTURE.

Ready to use the first year and many years thereafter. Will fatten the hogs quickly and keep them in good health. Much superior to a corn diet for them and helps keep hog cholera and similar diseases away. Contains Perennial Rye Grass, Orchard Grass, Italian Rye Grass, Clover, Timothy, Red Top, etc. On any ordinary soil sow 15 lbs. per acre. Per lb. 30c, 3 lbs. 75c, postpaid. By freight 15 lbs. \$1.85, 50 lbs. \$5.50, 100 lbs. \$10.50.

LARGE ORDERS If you desire to purchase a large lot of seed of any kind be sure to send list and let us quote special prices. Our orders range from 5 cents upward, but we are not afraid of big orders. Our largest retail order was for \$1,370.00 worth of seeds. another customer's purchases amounted to \$1,487.33 during the season, but it was divided up into several orders. Both were perfectly satisfied. W. P. Turner, of Pennsylvania, who bought seeds of us to the amount of \$1,397.54, wrote us in the fall: *All the seed has given perfect satisfaction.*

We are prepared to select and make up special mixtures of Grasses for all particular purposes, adapted to all soils and climates. When in need, please write us, describing peculiarities of ground.

THE BEST, not only in Iowa, but everywhere. W. B. Robinett, of Lockwood, Kentucky, says: "The grass seed received from you is the finest I ever saw. I like it much better than any I ever bought before, and am well pleased in every respect."

Your Hog Pasture Mixture made a good stand and I was satisfied with the results.—George Wendel.

The clover and grass seed purchased from you grew splendidly and yielded well.—Fred Winter, Hubbard, Iowa.

The seeds you sent us are indeed more than you claim for them. The timothy is fresh and clean; clover seed the cleanest I ever saw tested under a microscope. Please accept my thanks for honorable treatment.—John Mitman, Dodge county, Neb.

All the seeds purchased of you have given good satisfaction. In particular your clover grass mixture No. 10 has given good results. I shall seed down more ground with this mixture next spring.—John U. Hunziker, H——, Neb.

AN EXPERIENCED AGROSTOLOGIST WILL PREPARE SPECIAL MIXTURES FOR SPECIAL SOILS AND PURPOSES.

Des Moines, Iowa, Feb. 1.—During the past summer thousands of persons have admired the beautiful velvety green lawns at our city parks, 489 acres, and we are pleased to say that they were produced by sowing grass seeds furnished by the Iowa Seed Company of this city.—E. J. FAIRALL, Sec'y Board of Park Commissioners.

LAWN GRASS SEED.

*"Thank God for grass! No other glory vies
With the refreshing glory of the grass;
Not e'en the blue of the o'er bending skies,
Nor fading splendors when daylight dies,
Can this sweet smile of living green surpass."*

A nice velvety lawn adds more to the beauty of a place than any other adornment, and even the humblest home may be made attractive with such surroundings, while without a good lawn even the finest flowering plants and elegantly arranged beds seem insignificant. How important it is then to plan for the best lawn obtainable. Do not spend money in sodding a lawn, for it is expensive and seldom satisfactory. When sod is cut from the roadside or some out of the way pasture, it is poor in quality and full of weeds, and when unevenly laid produces a rough surface which disfigures the lawn. It costs much less to sow the seed and the lawn is far better. Ask for circular "How to Make a Lawn."

EVERGREEN MIXED LAWN GRASS SEED.—This is a mixture of the best varieties of grass seeds suited for growing together in the central and northern states, and will make a beautiful, soft, velvety lawn as handsome green as an emerald and is formed of grasses which keep green from early spring all through the hot dry summer weather, until late in the fall. It comes up quickly (in about two weeks after seed is sown) and after once up it soon spreads to cover the ground and is ready for the lawn mower in six to eight weeks. It is permanent, maintaining its beauty for a life-time although it is a good plan to give any lawn a top seeding once every two or three years. This mixture is made by ourselves from new crop, re-cleaned pure seeds of the best varieties, well suited, for even and permanent growth, as good as money can buy. It cannot be excelled for producing a rich velvety lawn of beautiful dark green color. Price per qt. (will sow 300 square feet) 25c; 4 qts. 85c, postpaid. By freight, per bu. (15 lbs.) \$2.75; 50 lbs. \$8.00; 100 lbs. \$15.00.

**Make Your Place
LOOK LIKE HOME
this year by fixing
up a good lawn.**

TERRACE LAWN MIXTURE.—It is sometimes difficult to get a good sod on sloping ground, terraces, side hills or embankments. This is a mixture of such grasses as have strong spreading roots, making a close turf, which heavy rains cannot wash out easily. Qt. 35c; 3 qts. 90c, postpaid. By frt. per bu. (15 lbs.) \$3.60.

CENTRAL PARK LAWN GRASS.—A very fine mixture for lawns, but is of special value for parks and around country homes where it is not convenient to mow the lawn frequently. It contains some fragrant grasses which give out a delightful odor when growing or when cut. It is the grass for country homes, parks and large estates and for this purpose sow about 50 lbs. per acre. Qt. 20c, 4 qts. 75c, postpaid. By freight bu. (15 lbs.), \$2.50; 100 lbs. \$14.00.

SHADY PLACE LAWN MIXTURE.—This mixture is a combination of fine dwarf growing, evergreen varieties of grass which grow naturally in the woods or in shaded spots. They are mixed in proper proportions to make a fine lawn under shade trees. Sow seed thickly, 1 quart to 150 square feet. Qt. 35c; 3 qts. \$1.00, postpaid. By freight, bu. (15 lbs.) \$4.00.

GOLF LINK MIXTURE.—This is a mixture of various sorts of fine grasses which when liberally sown will produce a fine green sward. They grow vigorously when cut closely, form a firm mass of interlocking roots, and also differ in their seasons of maturity, so that a succession of fresh growths is secured from earliest spring to the latest fall. Qt. 30c; 3 qts. 75c, postpaid. By freight, bu. (15 lbs.) \$3.00.

PUTTING-GREEN MIXTURE.—A mixture of extra fine grasses that will make a close, firm, green and lasting turf, improves the more it is tramped. Qt. 50c; 3 qts. \$1.25, postpaid. By freight, bu. (15 lbs.) \$4.00.

SWEET VERNAL.—A very fragrant grass and everyone should sow a little of it in mixture with other kinds, as it exhales a pleasant aroma when lawn is cut. Per lb. 35c, 3 lbs. 85c, postpaid.

KENTUCKY BLUE GRASS.—Our stock of this is the best grade of fancy cleaned new crop tested seed. The crop this year was very short and prices may advance before spring. Lb. 35c, 3 lbs. \$1.00, prepaid. By freight, bu. (14 lbs.) \$2.50.

WHITE CLOVER.—The well known common white clover is very hardy and its dwarf growth makes it desirable for lawn mixtures. Its close, dense turf and creeping habit make it desirable for terraces and sloping ground. Seed is very small and it requires but little in mixtures. Lb. 35c, 3 lbs. \$1.00, postpaid. By freight, peck \$2.90, bushel (60 lbs.) \$10.75.

SOUTHLAND LAWN MIXTURE.—In the southern states there is frequently trouble to secure a lawn. This mixture is made of Southern Blue Grass, Bermuda Grass and other varieties adapted to a hot, sunny climate. Together they make a nice bright lawn the year around. Qt. 40c, 3 qts. \$1.10, postpaid.

LAWN FLOWERS.

LAWN FLOWER MIXTURE.—Nothing looks more beautiful than a variety of pretty little dwarf growing flowers blooming on the lawn and we have therefore prepared this mixture which we believe will be just what is desired. It consists of low growing, quick blooming flowers very desirable for sowing with Lawn Grass Seed in the spring. They come up quickly, afford shelter for grass seed and will bloom by time the grass requires cutting the first time. Also desirable for sowing on an old lawn very early in the season. Price per ounce package only 25c.

BEAUTIFY THE HOME PLACE:

"Leave the World More Beautiful Than You Found It."

The charm of any home place is the lawn, trees and shrubbery. The finest, most expensive mansion looks dreary and like a forsaken castle if the grounds surrounding it are not properly planned and cared for, while, with a comparatively small expenditure of time and money for lawn and shrubbery, it might be made surpassingly beautiful. If you do not employ a landscape architect let us suggest that you at least take time to carefully plan your place. Do not try to plan it all in ten minutes; if you employed a landscape architect you would expect him to take time sufficient to consider well where each tree, shrub and vine should be located.

The lawn should be the basis of all arrangements in the nature picture which you are preparing. The best lawns are made by sowing seed. Select for the borders at least, hardy shrubs and plants which will be permanent. Our list of these is quite complete. See plant department.

Last spring we purchased from you a quantity of mixed lawn grass seed for use on the College campus. The results were very satisfactory to us. Our lawn was very attractive throughout the entire year.
C. C. REARICK, President Highland Park College.

Roots of grass showing need of fertilizer.

EXTRA EARLY OHIO. (Grown in Red River Valley.)

EARLY WHITE TRIUMPH.—For some sections this has proved to be the earliest and best of all varieties. In shape it resembles the Bliss Triumph, but is of better color, yielding a large crop of fair sized, nice shaped tubers. Has won prizes at the Iowa State Fair and elsewhere. Pk. 85c, bu. \$2.50.

BLISS TRIUMPH.—Most desirable variety for the south and is there considered the earliest potato in existence, equaled only by our new Early White Triumph. A handsome round variety which matures before the Extra Early Ohio, and is wonderfully productive. The tubers are not large, but are of a nice medium size for early use, round as a ball, and a beautiful red color. For several years it has been the most popular variety in the southern states, and hundreds of carloads are shipped to the northern markets and bring fancy prices. Not so desirable for main crop or northern growing. Per pk. 60c, bu. \$1.75, 5 bu. or more @ \$1.50.

WHITE SOUTHERN QUEEN.—These are the large "Yams" which are so popular in the south. Even the seed potatoes are monster size often weighing several pounds each. Peck 75c, bu. \$2.00, bbl. \$4.25.

Lee Hudler, the well known gardener of Audubon Co., Iowa, says: "I consider the Early White Ohio the finest early potato I have ever grown."

EARLY OHIO.—Grown in Iowa. Our stock is as nice as any which can be obtained, we think, and is desirable both for early and main crop. Pk. 50c, bu. \$1.50, 5 bus. or more @ \$1.25.

ROSE OF THE NORTH.—An improvement on the old Early Rose which has been grown on the virgin soil of the far north. It is very early being only a trifle later than the Early Ohio and much larger. Is smooth and of handsome rose color. Quality superb, either baked or boiled and yields immensely. Keeps sound and fresh well into the spring. Peck 60c, bu. \$1.75, 2 bu. or more @ \$1.50.

Your seeds always give good results. The seed potatoes last year exceeded all expectations and gave an enormous yield of fine, large sized potatoes, some weighing 22 ounces each.—J. J. Lemon, Tacoma, Wash.

CARMAN NO. 3.—This handsome main crop potato is of a large size yielding immense crops of uniform size and shape. It is of perfect form, almost every potato being of same size and shape, and averaging nearly one pound each in weight, in good seasons. It has but few eyes and they are shallow, the skin and flesh are extremely white and its cooking qualities are very fine. It is a remarkably handsome potato, enormously prolific, and will please all potato growers. Keeps well. Pk. 50c, bu. \$1.50, 5 or more, \$1.25.

CARMAN NO. 3.

The potatoes you shipped me are the nicest I have ever seen in size, smoothness and purity.—Geo. M. Graf, Orlean, Illinois.

SEED POTATOES.

"The Proof of the Potato is in the Eating."

With no other seed is the importance of change more essential than with potatoes, and by using our northern grown seed you are assured of **early maturity, increased yield and vigorous growth.** The following varieties, are we think, the best and most satisfactory sorts for growing in Iowa and other states of the same latitude. Most of our seed potatoes are grown in Minnesota or the Dakotas and are of superior quality. Order as early as possible and we will ship as soon as weather permits. Prices are subject to important market changes. Ask for quotations on large lots.

POUND PRICES.—All varieties 25c per lb, 3 lbs 60c, postpaid.

Read T. B. Terry's new book, "A B C of Potato Culture." Price 40c, postpaid.

EXTRA EARLY OHIO.—Fancy Northern Grown Stock.—For several years past we have been having these grown in the noted Red River valley, about 400 miles north of Des Moines, and careful tests have proved them to be fully ten days earlier than the Iowa grown stock. This is a great advantage to the gardener, and puts this variety at the head—the most popular of all. They are all of good, average size, strictly pure, smooth and free from scab or rot, and outyield other early sorts. It is an especial favorite with marketmen, and the most profitable potato they can grow. The sprout is very strong and the vines grow erect, making it easy to cultivate, and on account of its early maturity you can get the highest market prices. They will keep firm till late in the spring. This variety is frequently sold under name, Extra Early Six Weeks. This is our specialty in standard varieties. Also desirable for late planting as they keep well for winter and spring use. Pk. 60c, bu. \$1.75, 5 bus. or more @ \$1.50.

EARLY WHITE OHIO.—There is a great demand now in many markets for a white potato, and even the good old standard Early Ohio has to suffer because of the color of its skin. Here we have, however, a genuine Early Ohio identical with the old variety in every way except in the improved color. It is of quick, vigorous growth, making many tubers which are compact in the hill, and has produced a crop of **2,500 bushels on five acres** in this state. Per peck, 65c, bushel \$2.00, 5 bushels or more @ \$1.75.

RURAL NEW YORKER NO. 2.—One of the largest yielding varieties in existence. Large and unusually smooth, with few and shallow eyes, skin white as is also the flesh, which is of superior quality. Medium late and the best drouth resister. There is no other potato of more handsome appearance than the Rural New Yorker. Although it is a large yielder it grows but few and small vines. It is very hardy and will stand the heaviest manuring without getting scabby or spotted. For this reason it is one of the most desirable varieties for farmers and potato growers near large cities to grow for main crop for market. Under ordinary circumstances they will yield from 300 to 400 bushels per acre and by heavy manuring this yield can be almost doubled. Pk. 50c, bu. \$1.50, 5 bu. or more @ \$1.25.

POTATO KNIFE.—Concave and curved. Each 35c, postpaid.

HYBRIDIZED POTATO SEED.—Potato seed from the flower boll (the true seed). It is from such seed that the choice new varieties of potatoes are originated. The result is interesting, and often very profitable, as you are just as apt to obtain a choice new variety as an experienced potato specialist. Packet 10c, 3 for 25c.

SEED SWEET POTATOES.

Our stock is grown, stored and handled especially for seed purposes and cannot fail to please all. Prices subject to market changes. We usually ship about April 12th to 20th. Circular telling how to grow sweet potato plants free. See page 23 for price of plants.

EARLY YELLOW JERSEY.—An improvement on the Yellow Nansemond. In spite of the many so called new varieties

all which we have tested, Early Jersey holds the first place. The earliest and most productive: of large, short, chunky shape and of the very best quality. It will probably always remain the most popular market sort. Peck 50c, bushel \$1.50, barrel \$3.25. Ask for price in quantity.

NEW GOLD COIN VINELESS.—A novelty of great merit which has become very popular. Instead of having long running vines it is of a dwarf bush-like growth, tubers yellow, medium to large size, quite productive. Peck 75c, bushel \$2.25, barrel \$5.00.

RED JERSEY.—Similar in shape to our Early Yellow Jersey, but dark red color. The quality is excellent. Peck 75c, bushel \$2.00, barrel \$4.50.

Any of the above varieties by mail, postpaid, at 35c per lb.; 3 lbs. \$1.00. Ask for price in quantity.

Novelties and Specialties.

FOR 1907.

"What have you that is especially new and desirable this year?" is the first question asked us by many of our patrons, and the following pages on colored paper contain much which is of great value. Some of them are novelties and others are sorts of rather recent introduction, but of such superior qualities that we call special attention to them by giving them a place here. Each is faithfully described from careful observation. All are worthy and recommended by us. Aside from these, many desirable novelties will be found listed in various parts of the catalogue, as well as the standard sorts everyone wants for stand-bys. Notice the collection of novelties offered on back cover of this catalogue.

Pharaoh's Dream Sweet Corn.

"And Pharaoh slept and dreamed * * and behold seven ears of corn came up, upon one stalk, rank and good."—*Genesis 41:5*,

The most productive and one of the finest varieties of sweet corn ever sent out. This new variety was bred by one of the best seed corn specialists in the country and does not come from an accidental sport, but was gradually worked up from a cross made of two well known varieties and selected for a number of years, until it has attained its high value. Its peculiar manner of growth and earing are well shown by the accompanying illustration, and owing to the fact that it so frequently produces seven ears to the stalk it has been aptly named "Pharaoh's Dream." Stalks which we have on exhibition in our store have attracted a great deal of attention and favorable comment. The corn begins earing almost from the bottom and produces quite long ear stalks from each leaf joint. Ears are of large size, but still not overgrown, just right for table use and would be taken for Stowell's Evergreen in almost any market. It is of superior quality, well bred and will please the most particular. Corn is pure white, tender and of rich, delicate flavor remaining a long time in an edible condition. Instead of ears maturing all at once, they form in succession and therefore make a constant supply throughout the season. Ear stalks are so long that it might well be called a branching variety and it looks tree-like when growing. It is the greatest novelty in sweet corn that has ever been sent out. You should not fail to plant it this year. Produces better when only one or two grains are planted in a hill. Pkt. 10c, ½ pt. 20c, qt. 50c, postpaid. By freight ½ pk. 85c, pk. \$1.50.

October 10, 1906.—"I thought it might interest you to know that the Pharaoh's Dream corn captured the first prize at fair held here in September. John Loftus, Kaslo, British Columbia.

Majestic Tomato.

The largest, handsomest and finest quality tomato ever sent out and one which all are pleased with. When we first secured this grand new sort we knew that it was of exceptional merit and superior in size and flavor to anything on the market, but were astonished at the reports received from our customers. Thousands of letters arrived in the fall speaking of it in highest terms of praise. It is undoubtedly the largest fruited of any variety ever sent out, and the fruit is so solid that it weighs more than its size would indicate. Unlike many so-called large varieties which produce a few large fruits and a great multitude of small ones, this variety is almost uniformly large. The first fruit matured is somewhat rough, but later on they are smooth and of handsome shape; of a rosy red color, ripening evenly all over, way up to the stem. When cut it is a rich coral red color, its core blending into delicate shell-rose tints. Fruit is unusually solid, having very small seed cells which are few in number and near the surface. The flesh is tender, fine grained and rich, yet of mild, delicate flavor, being of the sub-acid class. The skin is thin yet tough, and not liable to crack on the vines or in handling, making it a good shipping variety. Plant is of vigorous growth from start to finish, producing fruit nearly as early as the small extra early sorts.

Last year we offered \$100.00 in cash prizes and there was a strog competition from all parts of the country and a very large number of reports of specimens grown which weighed 3 to 7 lbs. each, the largest specimens were, of course, grown by special culture, allowing only one or two fruits to ripen on the plant. In this way the whole strength of the vine goes to the fruit and the size is increased greatly. There were also many reports of 120 lbs. to 160 lbs. of tomatoes grown on one plant. Just think what an advantage there would be on an acre of such tomatoes! Don't fail to plant it this year. Pkt. 10c, oz. 75c.

Zenith Red Cabbage.

An exceptionally choice novelty from Holland which we are sure will prove very satisfactory. It is a medium early sort, of medium size, and handsome dark red color making it by far the most attractive of all the red sorts. It is very solid, with small ribs and thin leaves, which lie very close together, making it exceptionally solid. Many persons prefer the red cabbages, considering them of finer flavor, but it has been difficult to secure a strain which was desirable in all respects, but the Zenith seems to be ideal and will please the most particular. If you have never grown red cabbage plant at least a packet of the Zenith this spring. Pkt. 10c, oz. 35c, ¼ lb. \$1.00.

New Hester Squash.

This extra choice new variety, which we introduced, may be called a yellow Sibley squash, as it is a strain of that well-known variety which was selected and improved by Mr. Wm. Hester for many years. It is of the same shape as the parent variety, but the color is of a pinkish yellow, slightly striped at the point with light green. They are early and quality is excellent even when fruit is quite small, so that they can be used as an early summer squash. From then until mid-winter they are superior to the Hubbard. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

Cluster of Majestic Tomatoes grown on one stem
by A. F. Horner, Topeka, Kansas.

Golden Bantam Sweet Corn.

This handsome new variety is undoubtedly one of the most delicious of all and generally believed to be the richest in flavor. It is an extremely early sort, of hardy, vigorous growth, so that it can be planted quite early. The stalks grow only about four feet high but bear two or three good ears five or six inches long and of handsome golden yellow color. In flavor it is quite distinct from the white sorts and some have called it sweet as honey. We advise every one to give it a trial. Pkt. 5c, ½ pt. 15c, qt. 50c.

Golden Globe Beet.

A choice European sort fully equal, and by many considered superior, to the red varieties in sweetness and flavor, but both the skin and flesh are of bright yellow color. When cut up in dish with the red beets they make a handsome contrast. They mature early and are so sweet and nice that they should become popular. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

Golden Carmine Pole Beans.

A week to ten days earlier than the Horticultural robust grower, producing a crop of large stringless pods of bright golden yellow color when very young. As pods approach full size they are mottled and streaked with crimson. Pkt. 10c, ½ pt. 20c, qt. 65c, postpaid.

ZENITH RED CABBAGE.

BURRELL GEM MUSK MELON.

Burrell Gem Musk Melon. NOVELTY OF 1907.

This most delicious new variety originated on the grounds of D. V. Burrell the noted grower of the well known Rocky Ford Melon and it is a great improvement on that variety, being of the same size and shape but having flesh of a rich golden color. It is of most rich delicious flavor seeming to almost melt in the mouth and still so solid as to be a most desirable shipping sort. The seed cavity is very small. The melons average about six inches long, four and a half inches in diameter and weigh 2 1/4 lbs. each. Trial shipments of these melons were sent from Colorado to markets in Chicago, St. Louis, New York and elsewhere and brought 50 per cent to 300 per cent more than the best Rocky Fords. This is sufficient to insure its being popular with market gardeners who have a "particular" trade as well as private gardeners who want melons for their own use which are of exceptional choice quality. This is the first year that Mr. Burrell has sold any seed and it is a novelty of such superior quality that we hope our customers will all give it a trial. Per pkt. 10c, oz. 40c, 1/4 lb. \$1.40, lb. \$5.00.

ARE THEY PRODUCTIVE

Last season Mr. Burrell grew 12 acres of Burrell Gems for the market and sold \$6,000.00 worth of melons or \$500 per acre.

Market Gardeners' Beet.

This is undoubtedly one of the best varieties ever introduced, and it receives much praise from our customers each year. As will be noted by engraving, it is very symmetrical, with small tap root and but few fibrous roots. Unusually small tops. Although on some soils the Egyptian can be marketed a few days before the Market Gardeners, still within a week it will be found larger than the Egyptian, while it continues to grow until late in the fall, attaining a large size, and making a good eating and selling beet for the winter. One sowing only is necessary to produce early beets for market and main crop for winter use, which is not the case with any other variety. Color, deep blood red; fine grain and unsurpassed in quality. Summing it all up we find in it the best beet for early market, the best beet for winter use. Owing to the small tops permitting them to be grown close together, and the peculiar shape of the bulb, it is the most profitable beet for the market gardener and for family gardens. Pkt. 5c, oz. 10c, 1/4 lb. 25c; lb. 75c.

Danish Giant Cauliflower.

For many years past Henderson's Snowball Cauliflower has been the most popular of all varieties, but now a new sort has become a strong competitor for the first place. It originated in the same locality in Denmark which produced the Snowball. The heads are extra large in size, pure white and help to protect the head. It is about ten days later than the Snowball, but has proven much more desirable for growing in the open ground and does well dry seasons when other varieties show failure, keeping plump and fresh during the hottest, driest weather. One grower whom we believe to be the largest grower of cauliflower in the country (his crop amounting to ninety acres), tested the Danish Giant and has placed his entire order for this variety for the coming season. Our seed is obtained direct from the best cauliflower growers in Denmark, the home of the cauliflower, and our customers will be especially pleased with it. Per pkt. of 100 seeds 15c, per oz. \$2.50.

DANISH GIANT CAULIFLOWER.

Early Sunrise Sweet Corn.

This splendid new variety which we introduced originated with a market gardener in the western part of this state and for eight years he has been selecting it to an ideal size and the earliest maturing. In this way he finally obtained this variety which is distinct from all others. Ears about 6 inches long, well filled out at end, and husk covering so completely and being so tight as to prevent working of worms which are so bad in Cory. Grains fairly deep and set in straight rows on small white cob; very uniform and handsome. Quite productive and of as good flavor as any corn we ever tasted. Don't fail to try it. Market gardeners will find Early Sunrise a most profitable and satisfactory variety. Pkt. 5c, 1/2 pint 15c, qt. 50c, postpaid. By freight, 1/2 pk. 75c, pk. \$1.25.

The Maine State Bulletin, No. 27, states that the Early Sunrise was as early as any variety in their long list and much larger and better than Cory; in quality equal to most of the later varieties and the most prolific of all. They say it is worthy of special mention. Try it this year.

EARLY SUNRISE SWEET CORN.

MARKET GARDENERS SHOULD SEND FOR A COPY OF OUR WHOLESALE GARDENERS' PRICE LIST.

NEW TRIUMPH RADISH.

New Atlas Pumpkin.

What do you think of a pumpkin weighing 300 pounds? It is not an impossibility, as that weight has been exceeded in this variety, which is an improvement on the Mammoth Chili. Our seed is the result of years of selection, and was saved only from the largest sized, perfect shaped specimens, which will be sure to produce enormous fruits if properly grown. It is just the thing for exhibition at fairs. Flesh is a rich yellow, very thick, and excellent quality, nutritious and profitable to grow for stock feeding. Keeps well. Pkt. 10c, oz. 25c.

A Prize of \$10.00

Will be paid for the Largest Pumpkin

grown from our seed this year, the report to be sent in by October 15th. Full directions for growing large specimens sent with each packet.

From one seed of the Atlas Pumpkin received from you I grew one vine which produced four pumpkins. The largest weight 175 lbs., second 168 lbs., third 138 lbs., fourth 96 lbs., or 577 lbs. in all.

Hardy Hughes, Myrtle Creek, Oregon.

Naples Giant Squash.

We have been much pleased with this new mammoth variety which was first brought to this country from Italy last spring and everyone who visited our seed farms was delighted with it. The vines grow to prodigious length and are well loaded with large squashes 2½ to 5 feet long and solid throughout except a small cavity at one end. Our photograph shows the daughter of the president of the Iowa Seed Co. holding the two sections of one of the squashes which had been cut in two. The specimens sometimes weigh 100 lbs. each and are fairly fine grained and of good quality. Per pkt. 10c, oz. 30c.

NAPLES GIANT SQUASH.

Crimson Giant Forcing Radish.

The most profitable variety for market gardeners, and may well be considered the most valuable new variety which has been sent out for many years past. It is a rapid growing sort, developing roots of beautiful deep crimson color, perfect shape and more than double the size of any other forcing variety. The old standard sorts, such as Non Plus Ultra and Scarlet Globe, usually measure from two to three inches in circumference at time of marketing, while the Crimson Giant forms roots six to seven inches in circumference without getting pithy or hollow, and they retain their firmness and tenderness of flesh. Per pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

Triumph Radish.

A beautiful and valuable new variety of radish which is a decided novelty. It is of the shape shown in our illustration, round, with white skin striped bright scarlet, being decidedly ornamental when placed on the table. It is very early, has very small top, thus adapting it to cultivation in hotbeds. The flesh is white, crisp, tender and as good flavor as any radish grown. It being a sport, some of the roots are always of solid color, not variegated, but they are always of fine quality regardless of color. Per pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

ERFURT BROAD BEANS.

Erfurt Early Prolific Broad Beans.

For many years past we have had inquiries from our customers who formerly lived in England, for the English Broad Beans, but we did not handle them, as the leading variety, Broad Windsor, does not succeed well in this country, owing to its lateness and liability to be affected by unfavorable weather. When traveling through England we found that they had a greatly improved variety which was very much earlier, more prolific and resisted drouth and rust better than any other kind and we therefore secured a supply of them. The Broad Windsor usually has three or four beans in each pod, while this new variety has from five to nine beans of large size and delicate flavor. The plant is of robust, upright growth, entirely different from any of the ordinary varieties of beans. Pods measuring 10 to 12 inches in length are not uncommon and they are broad and of handsome appearance. They are more hardy than most varieties of beans and may be planted earlier in the season. Plant in rows about two feet apart, and six inches apart in the row, covering 1½ to 2 inches deep. The top of the stalk should be nipped off as soon as the plants begin to flower, as this induces earliness. Pkt. 10c; ½ pt. 20c; qt. 65c, postpaid. By freight, ½ pk. 85c; pk. \$1.50.

Golden Nugget Tomato.

SPECIAL PRIZE STOCK.

When at the Royal Agricultural Show in England, our attention was especially attracted by this grand new variety. The fruits are of the most beautiful golden yellow color, round as a ball and about as large as a walnut. Flavor is exceptionally fine, and it is a most desirable variety for eating from the hand or as a dessert

NEW ATLAS PUMPKIN.

fruit. They are a new sort, however, in England, and we were able to obtain only a small quantity of seed. We have grown them now both on our farm and at our trial grounds, and were more than pleased with the result. The plants were loaded down with one hundred and fifty to two hundred of the most beautiful rich golden yellow fruits that you can imagine and the flavor is delicious. Don't fail to try them this season if you want something extra fine. Per pkt. 20c. SPECIAL PRIZE COMPETITORS' PACKET of 25 seeds 10c

\$25.00 In Prizes.

How many tomatoes will one plant of the Golden Nugget produce? We believe that if a careful record were kept everyone would be surprised at the result. To induce our customers to keep a record we offer a first prize of \$15.00 and second prize of \$10.00 to the persons growing the largest number of fruits from one plant. Everyone may compete who purchases from us this year either a regular packet at 20c or a special "prize winners" packet of 25 seeds for 10c. Report must be sent us by October 20, 1907.

GOLDEN NUGGET TOMATO.

EARLY EXPRESS CUCUMBER.

Ideal Mammoth Rhubarb.

The Rhubarb (or pie plant) is a vegetable which it is difficult to improve and it takes many years to fully establish a new variety. About 25 years ago Dr. Kennicott, of Illinois, in growing roots for seed, found one which was so far superior to, and different from all others, that he saved it carefully, and the root has been divided and propagated from year to year until finally we purchased the stock. Like all other highly improved sorts it seeds sparingly and comes more nearly true to name when grown from seed than most other sorts. The stalks are as large, if not larger, than the Victoria, and are produced in much greater abundance. Pkt. 10c, oz. 25c. Strong roots 25c each, doz. \$2.00.

H. A. Terry, of Crescent, Iowa, writes us: "I pulled six stalks from one plant of the Ideal Rhubarb which weighed with the leaves cut off, 11 pounds."

APPLE
PIE
MELON

Apple Pie Melon.

This is a novelty which will be appreciated in many sections of the country and especially so during seasons when apples are scarce or high in price. The vine and fruit are quite similar to a water melon and they are easily grown on any good soil. Each vine produces from five to fifteen fruits, and one of the

large size melons will make as many pies as half a bushel of apples. We have estimated carefully in our field that one vine would produce an average of about 300 pounds. The flesh is white, solid throughout and of excellent quality for making pies, sauce, preserves, etc., and it resembles apples in flavor. They keep nice and fresh all winter, so that they can be used at any time and any surplus you may have can be fed to the live stock. In fact it would pay to grow them for this purpose alone as they can be kept and fed fresh all winter. Sold this year in packets only. Pkt. 10c, 3 pkts. for 25c.

European-African Musk Melon.

Many Varieties Mixed.

We grow large quantities of melon seed, and when in Europe recently we tried to make arrangements to supply the dealers there, but they would not purchase as they liked their native varieties better. Personally we do not think that they equal the American sorts, but some of our customers may think differently, and we would like to have you compare them. We secured seed from various parts of Europe and Africa and offer them in one grand mixture, which includes many curious sorts, one of which is shown in our cut. Per pkt. 10c.

Yard Long Beans.

A great curiosity, and withal a bean of excellent quality. It is a climbing variety of strong, vigorous growth and belongs to the Dolichos family. Pods usually being 12 to 24 inches, but frequently 30 inches and sometimes 36 inches in length. An excellent table vegetable, the pods being tender and of a rich asparagus flavor. Quite desirable to grow for exhibiting at fairs and makes an ornamental climber for arbors or trelliss. Seed quite scarce this year. Per pkt. 10c.

AFRICAN MELON.

growing them on our place last summer and they yielded wonderfully well, so we take pleasure in offering them to our customers. It will make a new dish for your table and a fresh vegetable ready at any time of the year. Pkt. 10c; ½ pt. 30c.

African Horned Cucumber.

A remarkably curious novelty which is not only an excellent fruit for table use or pickling but is a highly ornamental climbing vine of most luxuriant growth and fine for trellis or screen. The fruit averages when mature about 4 in. long by 2½ in diameter, and is covered with strong protruding points or horns. Shading from dark green to orange. Pkt. 10c.

Chinese Sago Beans.

When traveling in California we spent considerable time on a 600 acre farm which was devoted to growing standard vegetable and flower seeds and novelties from all parts of the world. We noticed here that the kind of food called *Loukdaw*, which seemed to be the most relished by the farm workmen, was a small, round, green bean, smaller than a kernel of popcorn or about the size of sago. To prepare it for the table it was soaked in water for several days, changing water frequently until it began growing and the sprout was about half an inch long. When boiled they then make a nice, fresh dish for the table. In this way fresh vegetables can be had in the winter. We tried

Continuity Lettuce.

In this grand new variety we have one of the most distinct and desirable sorts now on the market. The outside leaves are of a very dark brown color tinged with purple, while the inside of the head is a fine creamy white, tender, crisp and well flavored, making it in all respects a very desirable sort. It is especially recommended for holding on through hot and dry weather, such as we had in 1901, and remaining crisp and brittle at all times. We most highly recommend it and firmly believe that it will please one and all who give it a trial. Per pkt. 10c, oz. 25c, ¼ lb. 75.

Immensity Lettuce.

A gigantic lettuce, with an enormous, solid head and it is also of the finest quality, even the outer leaves being tender. It has a crispness of texture and sweetness of flavor that will make it popular. Per pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$1.75.

NEW CONTINUITY LETTUCE.

CHINESE SAGO BEAN.

NOTICE THE ILLUSTRATION VEGETABLE NOVELTIES ON BACK COVER OF THIS BOOK.

Japanese Climbing Tomato.

A great novelty. Beyond comparison the tallest growing variety that we know of growing 10 to 12 feet high and bearing fruit way to the tip. The fruits are of a nice medium size of fine shape, solid, smooth and of a beautiful shining crimson color. They are produced in great clusters and the plant is very productive and a continuous bearer. One plant properly trained on a trellis will produce more fruit than a dozen ordinary tomato plants. The fruits contain few seeds and are of a superior flavor. If the seed is started early in the house they will begin fruiting in July and one or two well developed plants will produce enough fruit for a small family the entire season, and every owner of a garden, no matter how small should not fail to grow this wonderful tomato. Per packet of about 100 seeds 15c.

White Winter Onion.

A variety of special value to the market gardener but it should also be sown in the family garden. The seed is usually sown about September 1st and the plants live over winter and are fine for early spring bunching for market. The seed should be sown very thick, about 40 lbs. to 50 lbs. per acre, and will yield a wonderfully large and profitable crop. In very cold sections it is best to cover the ground with corn stalks or straw during the coldest weather. Better order some when sending for your other seeds this spring. Pkt. 5c, oz. 20c, ¼ lb. 65c, lb. \$2.25.

Davis Perfect Cucumber.

This very desirable new sort which we are now offering for the first time, originated with one of the largest market gardeners near Grand Rapids, Mich., and last year was sent out in an experimental way only, to gardeners in all parts of the country and has surprised and pleased everyone. It is a sure money-maker for those engaged in growing cucumbers under glass "for profit" as well as for truck gardeners who grow their crop out of doors. Everyone who saw the crop this year says they never saw anything to equal it. In color, a dark, glossy green; shape, slim and symmetrical, with an average length of ten to twelve inches. They never grow pussy and hold their color until nearly ripe when they turn white without a sign of a yellow streak on them. The quality is fine, as the seeds are very soft when the cucumber is fit for table use, is very tender and brittle and of exceptionally good flavor. Another strong point of merit is its splendid shipping qualities. It seems to hold its color and brittleness long after being cut. On account of its being such a strong grower it is able to resist the cucumber disease which works destruction among so many of the best forcing varieties. It is as early as the earliest strain of White Spine and it out-yields by far other standard sorts. Pkt. 10c, oz. 20c, ¼ lb. 75c, lb. \$2.00.

Delicious Squash.

On our place this has proved to be a most desirable new winter variety. Color of the skin is green, with an occasional blue specimen; about the same size as the Hubbard weighing 5 to 10 lbs. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00, postpaid.

JAPANESE CLIMBING TOMATO.

BURBANK'S NOVELTIES.

For several years the magazines and papers have been filled with accounts of the marvelous productions of Luther Burbank, the "Wizard of Horticulture," who has performed such wonders in the plant world. For many years we have been in correspondence with Mr. Burbank and have helped him introduce quite a number of his novelties. This year we offer some of the most prominent sorts grouped together on this page and we are sure our customers will be glad to test them on their own grounds. Our stock of most of the following was grown by Mr. Burbank personally.

BURBANK'S CRIMSON ESCHSCHOLTZIA.—This choice novelty is one of Mr. Burbank's great achievements, being the result of nine years' careful selection from a chance sport in a bed of yellow Eschscholtzias, California's state flower. This new flower is of a bright handsome crimson. It is one of the most easily grown plants producing a profusion of flowers. Pkt. 15c.

SANTA ROSA POPPIES.—A great improvement made by Mr. Burbank on the Shirley poppy, having unusually large flowers of remarkably clear colors, including new striped, salmon and blush shades. Many varieties mixed. Pkt. 10c.

AUSTRALIAN STAR FLOWER.—(*Cephalopterum Drummondii*).—An improved strain. This surpassingly unique and beautiful plant grows readily from seed in any ordinary garden soil, preferring a rather sandy one. Blooms early in the season and continues in bloom for a long time. The fragrant flowers are of a peculiarly pleasing rosy crimson shade, sometimes approaching pure white, are produced in large graceful clusters which, when cut, will retain their form and color in perfection permanently. Sow early in the open ground, or may be started early in the house and transplanted. Pkt. 10c.

MECONOPSIS CALIFORNICA.—A rare California flower, sometimes known as "Wind Poppy." It is of slender, graceful growth, about two feet high, easily grown from seed and producing flowers of what is called "burnt orange" color. Pkt. 25c.

HUNNEMANNIA.—A beautiful plant sometimes called "Bush Eschscholtzia." The flowers are cup-shaped and about three inches in diameter. Color clear, bright yellow, having a satiny sheen over the surface. Pkt. 10c.

MR. LUTHER BURBANK.

BURBANK'S SHASTA DAISY.—One of the most marvelous productions in the flower line that has ever been brought to the notice of floriculturists. It can be grown out of doors by anybody where it is not cold enough to kill oak trees. It is perennial, blooming better and more abundantly each season. The flowers are extremely large and graceful, averaging about four inches in diameter with three or more rows of petals of the purest glistening whiteness, and are borne on single, stiff, wire stems, nearly two feet in length. It originated with Luther Burbank. Seed per pkt. 10c. Strong plants 15c each, \$1.50 dozen.

BURBANK CANNA.—While not a novelty now as we have had it for quite a number of years, still we consider it one of the largest flowered and best yellow cannas ever introduced. Strong roots. Each 15c, dozen \$1.20.

WHITE BLACKBERRY.—This novelty of Mr. Burbank's may be considered an anomaly in nature. It is a true blackberry, but the fruit is of clear translucent white of good size, sweet and pleasant flavor. Produces more fruit if planted near other varieties. Should be protected by mulching in winter. Each 35c dozen \$2.50.

ASCLEPIAS CURASSAVICA.—A peculiar appearing plant about two feet high and producing heads of scarlet flowers. Pkt. 15c.

BURBANK'S NUDICAULE POPPY.—A greatly improved strain of the so-called "Iceland Poppy," having very large flowers. Many colors mixed. Pkt. 10c.

POHAI BERRY.—A novelty which came originally from the Hawaiian Islands, but it is sometimes called the "South African Cape Gooseberry." The showy plants somewhat resemble the Ground Cherry, but produce fruit about three times as large of pale yellow color and superior flavor. Yields abundantly. Pkt. 15c.

BURBANK'S PRESERVING TOMATO.—The plants are of dwarf stocky growth, with dark green potato-leaf foliage. The small round scarlet tomatoes, borne in clusters, measure only three-quarters of an inch in diameter; of an unusually rich sweet flavor. Pkt. 10c.

SHASTA DAISY.

FLORAL NOVELTIES.

All flower lovers will want to try some of these "Gems of the Floral Kingdom" this year as our list contains many varieties which are specially desirable and of surpassing beauty. Most of them are very easily grown and we are sure that they will give satisfaction. Why not plan to have the most attractive flower garden in your vicinity this year.

KALEIDOSCOPE NASTURTIUM.

Everyone likes Nasturtiums and who can help it as it is during the hottest, driest weather that they look the brightest and most cheerful. Their bright green leaves and fresh beautiful flowers are truly charming. The Kaleidoscope is we are convinced the finest of all Nasturtiums owing to the immense number and great variety of flowers produced. A single plant will often have in bloom on it at one time a dozen or more apparently distinct varieties and colors, thus giving it a most charming appearance. Some of the flowers are of clear color and various shades of yellow, orange, red, pink and creamy white, while others are variously blotched, splashed, striped or bordered with rich contrasting shades. This gives the plant a decidedly unique appearance. The plants are of strong vigorous trailing or climbing growth and can be grown on the ground or trained up on a trellis by tying to the frame work or wires. They are specially suitable for growing over stumps, rockery or low fences and if well grown they will produce an immense number of flowers. If plants are started early in the house and set out as soon as the ground becomes warm the number of flowers produced during the season will be truly marvelous. The oftener that the flowers are picked the more will be produced. Every flower lover should try it. Pkt 10c, oz. 30c.

\$25.00
IN PRIZES.

In order to induce our customers to give this variety special care and keep count of the number of flowers produced we offer a first prize of \$15.00 and second prize of \$10.00 cash to persons growing the largest number of flowers from one plant of the Kaleidoscope Nasturtium this season. Report to be sent to us by October 20th.

WE GROW
OUR OWN
SEEDS.

MISS ALICE ROOSEVELT ASTER.

A most charming new variety from England, named in honor of our president's daughter. It belongs to the Victoria class and is of a pale, creamy yellow, or primrose tint, changing to a beautiful rosy pink. It is a continuous bloomer, and shows several shades and colors at all times on the same plant, thus making a showy novelty. Pkt. 10c.

AMERICAN GIANT PANSY.

A prominent pansy specialist has put in years of careful, painstaking labor in hybridizing and selecting a strain of pansies which would be superior to anything in existence, and as a consequence we have this extraordinarily fine variety which is of such strong, robust, luxuriant growth and produces such magnificent immense sized flowers that it might almost be said to be a superior race of pansies. They comprise practically all shades, colors and markings known in pansies, including the Giant Bugnots, Cassier's, and the best of the large flowered sort from France, Germany, England, Holland and other countries. Also a strain of the curled and ruffled pansies which appear double. We are sure our American Giant Pansies cannot fail to delight ever flower lover. Per pkt. of 125 seeds 25c.

NEW RAINBOW PANSIES.

The best novelty in pansies and certainly the most charming variety ever sent out. We have given it the name of New Rainbow, and consider it very appropriate owing to its beautiful iridescent colors. Our illustration shows three of the leading types of this mixture by which you will see the varied styles of variegation, but no illustration can do justice to its superior beauty. There is an almost endless variety of colors comprising all shades of the rainbow—blue, purple, crimson, brown, yellow, pink, red, white and black, beautifully marked, striped, veined, margined and blotched; the colors are more beautiful than any painter could depict. In a good sized bed you can readily find one hundred different varieties, but not a poor one or an inferior one. The flowers are of large size and perfect in form, nearly circular and most of them have a rich, velvety appearance; they will astonish and delight "pansy fanciers." Packet of 100 seeds 25c; large, strong plants of Rainbow Pansy, 50c a dozen postpaid.

20 ACRES IN FLOWERS.

Call and see them when in Des Moines.

at all times with lovely Cosmos-like blossoms, of perfect shape and wide spreading petals. Rich, deep yellow, with black center. A very beautiful grower. Pkt. 5c.

LEMON QUEEN MARIGOLD.

A charming new variety producing large bell shaped flowers of clear lemon or canary yellow color making them closely resemble large double yellow Dahlias only produced more abundantly on longer stems. They begin blooming early and bear continuously throughout the season. Pkt. 10c

NICOTIANA SANDERAE HYBRIDS.

A grand novelty and one which will delight all flower lovers. The old Nicotiana Affinis has always been a favorite on account of its pure white flowers and delightful fragrance and the Sanderæ is much like it except that it is of a beautiful rosy carmine color and blooms more freely. These new hybrids have also the various shades of purple, pink, red, salmon, violet and white. Grows about two feet high, branches freely and is fairly loaded with flowers which are open all day instead of being a night bloomer like some other sorts. Sow seeds early in the house and transplant in May to the open ground. Mixed colors, pkt. 15c.

BABY SUNFLOWER.

A dwarf branching Sunflower (*Helianthus Perkeo*), growing less than two feet high, loaded at

GLORIA, OR BUTTONHOLE ASTER.

GIANT FANCY FLOWERED PETUNIA.

A grand new strain and unquestionably the finest selection of petunia in existence as it is of incomparable beauty, size and luxuriance. Many of the flowers are exquisitely ruffled or fringed on the edges, and are of enormous dimensions (4 to 5 inches across,) but their great merit lies in the unlimited varieties of colors, markings, veinings, blotchings and stripings; in the most grotesque and beautiful combinations; with deep throats of charming yellow, white, black, green or maroon, running off into intricate veins, If you like beautiful petunias be sure to include this variety in your order. Produces very little seed and therefore will always be high in price. Worth about double its weight in gold. Pkt. 25c.

CLITORIA TERNATEA.

A beautiful perennial plant which is suitable for pots or the garden, and which blooms freely the first season from seed; blossoms shaped like Sweet Peas and of a dark, rich indigo blue with a white center. Pkt. 10c.

INTERNATIONAL NOVELTIES MIXED.

A mixture of floral novelties from various parts of the world, which includes many sorts not generally grown in this country. See description on page 68. Pkt. 10c, 3 for 25c.

NEW DOUBLE CALLIOPSIS.

The old-fashioned single Calliopsis was always one of the most showy flowers for bedding, and the colors are so brilliant that the popular name "Bright Eyes" was given them. What will you say now to having a new double Calliopsis? Grow quickly from seed, blooming in a few weeks after seed is sown, and if flowers are removed as they begin to fade, the plants will be loaded with bloom throughout the summer and fall. It is of brightest golden yellow distinctly marked with rich brown. Pkt. 10c.

GOLD AND SILVER FLOWER.

GLORA OR BUTTONHOLE ASTER.

One of the prettiest little plants for bedding that we know of. They grow to a height of 10 inches, are very branching and free blooming. As many as 40 flowers have been counted on some plants. The flowers are about 2½ inches in diameter, and pure white with a brilliant scarlet margin. Pkt. 10c.

ELECTRIC LIGHT PLANT.

Near the entrance to Greenwood Park of this city there was a large bed of flowers which attracted universal attention. It bloomed constantly throughout the season. They were called "Electric Light Plants," though they are evidently some improved variety of Cleome. We secured the seed which these plants produced and last summer grew a fine crop of it on our farm. It is a sturdy, bushy plant growing to a height of about 4 feet and covered constantly with large spikes of flowers, 6 to 9 inches long, which are pure white at base and ranging from rose to a bright red at apex. Grows readily from seed which should be planted in open ground early in spring. It makes one of the most showy, ornamental plants imaginable for clumps and massing. Don't fail to try it as it is very fine. The seed pods of this attractive novelty, which are separate from the flower heads add to the distinctive features. Pkt. 10c.

CLIANTHUS DAMPIERI.

One of the most gorgeous flowers in existence and of the few that show a clear, glossy, jet black color. The trailing plants grow 1 to 2 feet high and bear in clusters 5 or 6 most beautiful red flowers. Pkt. (10 seeds) 10c.

Giant Fancy Petunia.

round, ball-like form on all sides or grown in continuous rows. Very desirable to use as a hedge plant. Pkt. 10c.

GOLD AND SILVER FLOWER.

A great novelty from New South Wales botanically known as *Polycaltna*. The plants have long narrow leaves while the flowers somewhat resemble small quilled asters, about 1½ inches in diameter or just the size of a silver dollar. The plant is literally covered with these flowers, our cut being a very poor illustration of the bush. Flowers are silvery white, while center petals are yellow, giving the appearance of a five dollar gold piece laid in the center of a silver dollar, which at a few feet distant is quite striking and has given the plant its name. It is intensely double; blooms freely and is decidedly ornamental, not only in beds, but also for cut flowers. This is not all however, as they are everlasting and look as pretty when dry as fresh. Pkt. 10c.

CHRISTMAS PEPPER.

For several years we have made a specialty of this Pepper at our greenhouses where we have grown several thousand in a season. They are ready for the market in October and November, lasting until Christmas, and the plants have sold like the proverbial "hot cakes." The plants grow about 12 to 15 inches high and are covered with bright, showy little fruits. Of the easiest culture. We sell the plants at Christmas time at 50cts. to \$1.00 each. Small plants in the spring 10c each. Seeds per pkt. 10c.

ELECTRIC LIGHT PLANT.

BIRD OF PARADISE FLOWER

This plant properly known as *Poinciana Gilletii*, may be considered one of the wonders of nature, as it is of curious and strange form. Flowers are 2½ ins. in diameter and produced in large trusses, of a rich golden yellow, the attractive part being the large pistils, which are of crimson color and spread out in fan shape. It started early will produce a profusion of blooms the first year. Per pkt. of 10 seeds 10c.

STOKESIA CYANEA.

A beautiful native plant sometimes known as Cornflower Aster; blooms from July to October; blossoms look like Centaurea and are of a beautiful lavender blue color. Pkt. 15c.

MEXICAN BURNING BUSH.

This we consider one of the most ornamental border or hedge plants which has ever been brought out and it is sure to attract great attention. It is known botanically as *Kochia Scoparia*. It grows quickly from seed sown in the open ground. The plants are always of the rounded or globe-like form shown in our illustration. The plants branch freely, and the stems are clothed with slender light green leaves. Early in the fall the ends of the shoots are thickly set with small, bright scarlet flowers, the bushy plants resembling balls of fire. The plants are equally showy planted singly to show the

MEXICAN BURNING BUSH.

MAMMOTH HELIOTROPE.

Everyone likes Heliotrope as it is one of the handsomest and most fragrant of all flowers. Desirable for growing in pots in the house the year around but far better bloomers when bedded out in the summer. This wonderful new strain produces immense heads or panicles of bloom in a very short time from seed and flowers abundantly in the garden all summer or will bloom the year around in pots, while the colors range from indigo-black through all shades of blue to almost pure white, and some with red tints. Pkt. (about 100 seeds) 10c. Plants 15c each, \$1.25 per dozen.

PENTSTEMON GLOXINOIDES.

We have always thought highly of the Pentstemon but when we saw this variety growing near Hartz mountains in Germany we were delighted and purchased the stock at once. It is a hardy perennial and if sown early will bloom the first year. Of graceful growth, with many spikes of Gloxinia-like flowers 2 inches across; of crimson, white, rose, purple, etc., beautifully edged and marked; blooms from June to October. Give rich soil and good culture. Pkt. 10c.

EVERBLOOMING ANNUAL HOLLYHOCKS.

The Hollyhock has always been one of the most showy of garden flowers and very desirable for massing, borders and backgrounds, the one objection to it being that it was a biennial and did not bloom to perfection until the second year. This fine new variety may be started in the house in March or April, set out in May and comes into bloom in July, and will continue in flower until killing frosts in the fall. Or seed may be sown in the open ground in May and will bloom in Aug. Plants are of vigorous growth from 5 to 8 feet high, according to the soil, and the stalks are fairly loaded with large flowers, sometimes 5 inches across. These flowers are of a great variety of colors, crimson, canary, yellow, pink, white, maroon, black, scarlet, etc., some of them beautifully veined and marked, double, semi-double and single. They will surely please everyone. Pkt. 15c.

NEW MAMMOTH FLOWERING HELIOTROPE

CENTAUREA IMPERIALIS.

A grand improvement on the old favorite Sweet Sultan, producing long stemmed blossoms 3 to 4 inches across, of graceful, airy effect, and most deliciously fragrant. The colors are varied from glistening white through shades of red, blues, lilac, royal-purple, etc. For bouquets, vases, or as corsage flowers they are of exceptional value. If cut scarcely opened they will last for ten days in water. The plants are of the easiest culture, flowering freely in the garden the first summer from seed sown in the spring. They are of strong, bushy form 2 to 3 feet high. Pkt. 10c.

SWEET SCENTED MAYFLOWER VERBENA

This is of the same trailing habit as the Arbutus or Mayflower, its branches creeping over the ground and hugging it closely. Its blossoms are of the same shape and about the same size. Has lovely pink and white color, making its flowers resemble the arbutus and has the same fragrance. Pkt. 10c.

COMMELINA SELLOWINA.

A lovely perpetual flowering "Wandering Jew," suitable for the garden in summer or for pots all the year. The flowers look like blue butterflies; blooms in a short time from seed and is a beautiful and showy flower which is sure to prove satisfactory. Pkt. 10c.

ARCTOTIS GRANDIS.

One of the finest floral novelties of the season. It is a remarkably handsome annual which forms much-branched bushes 2 to 3 feet high, the foliage is soft and downy and of a whitish color; its flowers, borne on long stems rising well above the foliage, are large and showy; the ray florets pure white on the upper surface, embellished with a narrow yellow zone at their base; the reverse of petals pale lilac-blue; the disc is light blue with slightly projecting white stamens; altogether a lovely flower. Pkt. 10c.

ARCTOTIS GRANDIS—THE AFRICAN LILAC DAISY.

CLIMBING MAIDEN HAIR FERN.

Adiantum Cirrhosa.—Has a striking resemblance to the foliage of the Maiden Hair Fern. It is a hardy biennial climber, growing readily from seed; foliage feathery, dainty and picture-que; blooms second year; pink and white flowers. Plant in cool, moist place. Pkt. 10c.

PURPLE FOUNTAIN GRASS.

Pennisetum Ruppelianum.—A beautiful annual ornamental grass, growing about 2½ ft. high, producing long, graceful, cylindrical, purplish plumes. An excellent ornamental plant, and the most appropriate to use as an edging to a bed of Cannas. Young plants ready in May. Each 10c. \$1.00 per doz., \$6.00 per 100; seed 10c pkt.

CHINESE LANTERN PLANT

This attractive plant which is illustrated and described on page 72 of this catalogue can easily be grown from seed Pkt 10c

EVERBLOOMING ANNUAL HOLLYHOCK.

CELOSIA SPICATA.

A wonderful new variety of Celosia and far different from any ever before seen. It is a handsome annual, forming upright, well branched pyramids, about 2½ feet in height, and producing at the summit of each branch spikes of flowers of a bright rose color when opening, changing to silvery white; fine for the garden or growing in pots. Pkt. 15c.

DAYLIGHT DOLICHOS.

A choice climber, the vines growing quickly to a height of 8 to 10 feet, and blossom profusely from base to summit, the large spikes of pure white flowers standing out boldly from the rich green foliage. As the flowers drop from the long spikes they are succeeded by broad, velvety, showy white pods which retain their purity and freshness or color a long time. Pkt. 5c; oz. 20c.

DARKNESS DOLICHOS.

A good companion for above. Both stems and under side of leaves purplish red. Pea-like flowers; blooms early. Pkt. 5c. oz. 20c.

CELOSIA SPICATA.

GOOD VENTURE GERANIUM.

You can grow Geraniums from seed, and as they sport, the gardener is frequently rewarded by charming new varieties, and may obtain a novelty of much value, especially if this new strain of seed is used. When visiting the fields of a geranium specialist in California, we noticed one lot of many hundred plants which were particularly fine. The grower was hybridizing these for seed, and we made arrangements at once for the seed, paying more than a dozen times what ordinarily good seed would cost us. They are giant flowering, the florets are round and of most perfect form and borne in splendid trusses, some of them being of immense size. They are beautiful crimson, scarlet, salmon, pink, rose, snowy white, and aureole. Start seed in the hotbed or shallow boxes of rich soil in a warm, sunny window, covering but one-eighth inch. Per pkt. 15c.

DOUBLE SWEET PEAS.

DOUBLE SWEET PEAS.

By years of hybridizing and selections, the new double flowered sweet peas have been produced and they are not only beautiful but the flower is quite lasting. About half of the plants from this seed produce flowers which are double and semi-double. Our mixture contains all the best varieties yet brought out, white, rose, crimson, maroon, lavender, striped, etc. Try them. Pkt. 5c, oz. 10c, ¼ lb. 25c, 1b. 75c.

COUNTESS SPENCER SWEET PEAS.

Truly a gigantic new variety of finest form and coloring. The standard and wings are broad and well spread. The coloring is a silvery white, suffused with soft rose-pink, which deepens at the outer edges and becomes still richer or more heavily suffused in cool weather. *In size, form, and coloring, COUNTESS SPENCER is simply exquisite* and beyond the power of words to describe. Pkt. 10c, oz. 20c, ¼ lb. 60c.

GOOD VENTURE GERANIUM.

JONAH'S GOURD.

"And the Lord prepared a gourd and made it to come up over Jonah that it might be a shadow over his head."—Jonah 4: 6.

Four years ago one of our friends was traveling in Asia and the Holy Land, and in driving through the country near Joppa he noticed a peculiar vine which grew about 50 or 60 feet in length along a fence. He was interested in it, and on making inquiry found that in that country it went by the name of Jonah's Gourd, and is probably the variety which sheltered the prophet. After considerable trouble, he secured some of the seed and presented them to us. We have grown them both in our trial grounds and on our farm and we were much pleased with the plant. It grows with wonderful rapidity and will quickly climb to the top of tall trees, and it therefore will be useful for covering old trees, walls, porches, outbuildings, etc. Leaves are quite large, flowers are pure white, two or three inches in diameter and the fruits are of great length resembling the well known Hercules Club variety. Our illustration was made from a photograph of the residence of J. B. Hammond, on one of the finest streets of Washington, D. C. Mr. Hammond says that President Roosevelt frequently saw and greatly admired it. The two vines covering the house were very attractive and produced seven large gourds. Pkt. of 12 seeds for 10c, 3 pkt. for 25c.

JONAH'S GOURD ON RESIDENCE IN WASHINGTON, D. C.

AMERICAN BANNER LARKSPUR.

This handsome flower originated on our grounds and was so distinct from all other flowers that it sprang at once into favor. The illustration represents a single stem showing how loaded the plant, are with flowers. The name American Banner was given because it is the only flower we know of that combines the national colors—red, white and blue—in each flower. Plants grow to a height of about 2 feet, of good, regular shape, with delicate fern-like foliage, a vigorous grower, and it is not injured by dry weather. The plants are fairly loaded with long spikes of double striped and blotched flowers, having various shades of pink, carmine, dark blue, purple, white, delicately and beautifully blended, sometimes four or five shades on a single floret. Pkt. 10c.

ELEGANT PALMS.

These for centuries past have been exclusively for the rich, the plants usually selling at \$3.00 to 100.00 each, and in some cases fine plants of the rarer sorts brought as high as \$1,500.00 each. It is now known, however, that they are easily grown from seed. Directions for growing printed on the packet.

PHENIX DACTYLIFERA.—A native of northern Africa; beautiful for pot culture, and very hardy. This is the palm from which date of commerce is obtained. Pkt. of 10 seeds 5c.

WASHINGTONIA FILIFERA.—Stands dust, dry air and lack of sunshine; its fan-shaped leaves are fringed with long threadlike filaments. Pkt. of 12 seeds, 5c.

UMBRELLA PALM.—(*Cyperus*.)—See description on page 85. Pkt. of 100 seeds, 10c.

LATANIA BORBONICA.—This is the typical palm, is more largely used than any other; of strong, healthy habits, very desirable for house culture. Per pkt. of 6 seeds, 10c.

CHAMEROPS EXCELSA.—One of the very best plants for house culture in cool climates, and standing ill usage remarkably well. Pkt. of 10 seeds, 10c.

BANANA PALM.—(*Musa Ensete*.)—Leaves very long and broad, green, with crimson mid-rib. Pkt. of 3 seeds, 10c.

A GRAND OFFER One packet of each of the six elegant varieties of Palms mentioned above for only 35c. Plants of the *Latania Palm* 25c each, postpaid. Larger plants, of magnificent appearance, \$1.00 to \$5.00 each, by express not prepaid.

LATANIA BORBONICA PALM.

AMERICAN BANNER LARKSPUR.

PERENNIAL PHLOX ARE BECOMING "ALL THE RAGE," AND THEY ARE GRAND FLOWERS.

-Flower Plant Novelties-

The Novelty Pages in a catalogue are always of interest to flower lovers and this year we offer many valuable novelties in flower plants which have been collected from various parts of the world and thoroughly tested in our own greenhouses and on our trial grounds. Descriptions were carefully made from nature and we are sure all will please our customers. In our general list, on pages 69 to 91, will also be found many valuable novelties in this line. Plant orders should amount to at least 25 cents. You may select plants amounting to \$1.20 for \$1.00, \$2.50 for \$2.00, or \$7.00 for \$5.00, postpaid.

NEW DOUBLE FLOWERING BEGONIA.

All plant lovers will want to try this novelty. It is a new departure and one deserving the greatest praise for its strong, vigorous growth, attractive foliage, handsome shaped double flowers, brilliant colors, and above all its wonderfully free flowering propensities. In fact, the superintendent of our greenhouses says it is rather difficult to propagate a sufficient number of plants as every branch is loaded with bloom, and the little cuttings produce flowers while still in the sand, almost before striking root. Of the easiest culture and desirable for either pots or bedding. There was such an immense demand for them last spring that we sold more of our stock plants than we should have done and consequently the supply is limited and we advise an early order if you want one. Each 35c, 3 for \$1.00.

COUNTESS LOUISE ERDODY BEGONIA.

This variety is sometimes called "Snail Begonia" on account of the peculiar formation of the leaves. The form is exceedingly odd and unique. The striking peculiarity which distinguishes it from all other begonias consists in the fact that the two lobes at the base of the leaf do not grow side by side but one of them winds in a spiral-like way until in a full grown leaf there are four of these twists lying on top of the leaf nearly 2 inches high. The leaf has a metallic lustre, dark silvery in the center, shading into coppery rose toward the margin, which is broadly and evenly edged with the same hue, but darker and more brilliant. Very curious. Each 20c. Large specimen plants 50c.

LOUISE ERDODY BEGONIA.

SUNRAY FUCHSIA.

A novelty in the Fuchsia family. Very different from the other varieties in that their beauty lies in the foliage, from which it gets its name. All the colors of the sunset, clear yellow, golden bronze and red are combined in the most effective way to make a pretty foliage plant. Each 25c.

CRIMSON FOUNTAIN GRASS.

Quite an improvement on the Purple Fountain Grass described on page 50, which has green leaves and purple seed plumes, while the leaves of this new sort are of a handsome crimson color, thus giving it a particularly fine appearance during the entire season. Each 15c, dozen \$1.25.

CHINESE KUDZU VINE.

JACK-AND-THE-BEAN-STALK VINE.

The phenomenal growth of this new Chinese hardy vine can hardly be imagined—sometimes 12 inches a day. The large leaves of bright green afford a dense shade. The clusters of rosy-purple, pea-shape flowers, 6 or 7 inches long, are very fragrant; invaluable for rapidly covering arbors, verandas, fences, dead or old trees, rockeries, etc. Perfectly hardy; 50 to 75 feet when well established. Fine seedling plants, each 20c; doz. \$2.00, postpaid.

NEW DOUBLE FLOWERING BEGONIAS.

NIGHT BLOOMING JASMINE.

World famous, deliciously fragrant Night Blooming Jasmine (or Jessamine) about which poets have sung and over which tourists, in its native land (Chili) have gone into ecstasies, and yet how few, comparatively, in our own country have ever seen it. It is of the easiest culture and still somewhat difficult for the ordinary florist to propagate and perhaps this is the reason why they are not better known. It is a plant of strong shrubby growth with handsome glossy green foliage and bears an immense number of small star shaped flowers. The delightful fragrance is dispensed only at night. It begins to bloom when very small. Each 15c, 3 for 40c.

NIGHT BLOOMING JASMINE.

CHAMELEON GERANIUM.

An Improved Single New Life.—This was first sent out a number of years ago, but owing to its slow propagation was nearly lost and it has not been prominently offered recently. When first introduced sold at \$5.00 per plant. It is what might be called a "sport" or "freak" of nature, as it is quite erratic in its growth, as shown by our illustrations. Some flowers are red, some white, some pinkish salmon, and some clearly striped with the three colors. Frequently one plant will have on it flowers of all these colors at the same time; others will bloom for months showing only one of these colors then changing to some other hue. Bears many trusses of large single flowers. Its name was suggested by its peculiar way of changing color. Each 15c.

LEOPARD GERANIUM.

A new orchid flowered ivy-leaved variety. The flower is large, 2 inches in diameter, semi-double, and borne in medium size trusses. The color is remarkable, being fully as rich and distinct as an orchid. The ground is a clear, lilac pink, the upper petals being heavily blotched with deep crimson and usually marked with distinct maroon dots. This will make one of the most distinct basket plants in cultivation. It is a strong, vigorous grower and blooms all winter. Each 20c.

TREGO GERANIUM.

This geranium is a decided novelty as well as one of the strongest growing and most free flowering geraniums. It is of robust, compact habit, regular in form. The trusses are of immense size, produced in profusion and borne on stiff stems held well above the foliage. The individual florets frequently measure 2 1/4 inches in diameter, semi-double, and of an intense brilliant, almost dazzling scarlet color. Each 15c, dozen \$1.50.

SUNBIRD CARNATION.

In our greenhouses this has proved to be by far the best of all yellows. The flowers are of good size, exceptionally bright color and very showy. They cannot fail to attract attention as they are so different from all others. The plant is a strong, healthy, vigorous grower and good bloomer. Each 15c.

NEW GERANIUM CHAMELEON

PONDEROSA OR AMERICAN WONDER LEMON.

Nothing has ever caused half the commotion that this wonderful Lemon has. It is a true ever-bearing variety. On a plant six feet high no less than eighty-nine of these ponderous lemons were growing at one time. It was a beautiful sight to see. The tree was blooming and at the same time had fruit in all stages of development, from the size of a pea to the ripe fruit, showing it to be a true ever-bearer. Blossoms waxy white and as fragrant as orange blossoms. Fruit has been taken from the tree weighing over four pounds. The lemons have very thin rinds for such large fruit. It is the juiciest of all lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. It is not uncommon to make twelve pies from one lemon. It fruits when quite small, and makes a lovely house plant. It will fruit freely the second year. Strong plants each 15c postpaid. Large two year old plants 50c and 75c each by express.

PONDEROSA LEMON.

GRACE PAGE GERANIUM.

This we consider one of the finest plant novelties of the season, and we permitted our florist to name it in honor of the daughter of the manager of this company. It is identical with the old standard dark crimson S. A. Nutt Geranium except in foliage, which is beautifully variegated. Nothing in geraniums can surpass the beauty of this variety with its large trusses of double crimson flowers against their variegated background. It is a sport from the S. A. Nutt, of vigorous growth and an exceedingly profuse bloomer. The leaves are of dark green, and each bears a border of pure snowy white. We are safe in saying that there is no variegated sort on the market which blooms so freely. It is well adapted either for pot culture or bedding, and is a much stronger grower and better bloomer than the Langguth. Don't fail to try it. Each 20c, per dozen, \$2.00.

DRACENA TERMINALIS.

One of the most beautiful ornamental foliage plants; very desirable for pot culture or growing in vases. The long waxy leaves combine the most showy tints of red, yellow and green, making at all times a handsome plant. Each 25c.

TREE ROSE.

VARIEGATED STEVIA.

During the past three seasons that we have grown the variegated Stevia we have found it to be the finest ornamental foliage plant for bordering beds that we have ever seen. It is a sturdy, rapid growing, compact plant, easily trimmed to any form desired. Leaves are long and narrow, set closely on the plant and of beautiful bright green, clearly striped with broad bands of pure white. Easily grown in any location, always bright and pleasing. Each 15c. doz. \$1.50. Ask for prices by the 100

STREPTOSOLEN.

Introduced last spring by an eastern florist and it is really a charming plant closely resembling the Browallia. It is desirable for the flower bed and also for winter blooming in the house. Makes nice bushy little plants 8 to 10 inches high, and blooms all the time, the plants being loaded with a great number of flowers. Large flowers, fully 2 inches across, lovely deep violet blue. No trouble to grow and a most constant and satisfactory bloomer, Winter and Summer. Strong plants. Each 15c, dozen \$1.25.

GRACE PAGE GERANIUM

DOUBLE NASTURTIUM.

DOUBLE NASTURTIUM.

Did you ever see one? Few people have but we have a fine lot of them this year and are offering them at a low price. It is a most charming novelty which is really difficult to describe. The flowers are large and fully double, which gives them a very different appearance from any others. They have a rich, spicy fragrance. Some flowers are of a bright yellow and some of a rich, dark orange crimson, with shading of deep mahogany red. It is not a "freak," with a few small insignificant flowers, but a really good double flower 2 to 2½ inches across, which will instantly attract the attention of everyone who sees them. Plant is a strong, vigorous grower, of climbing habit, and fine for trellises, window boxes, vases, etc. It is a constant bloomer; never produces seed. Each 15c, 4 for 50c.

PURPLE PRINCE SALVIA.

A desirable novelty which has fine large spikes of flowers of a reddish plum color nearly purple, really a most bright and desirable shade. The plant is of dwarf compact growth and blooms freely. Should become popular. Each 15c, dozen \$1.50.

ELEGANT TREE ROSES.

Last spring we set out about one hundred tree roses along a drive on our floral grounds, and they surprised and pleased thousands of persons who had never before seen roses grown in this manner. These Tree Roses are grafted on hardy rose stalks about four feet high, are tree shaped and when in full bloom are objects of beauty, making handsome plants for the lawn or rose border. In this shape we offer only the Hybrid Perpetual or hardy class. We have them in white, the different shades of red, pink and crimson. Should be protected in winter. These are all grown in Holland and usually sell at \$1.50 to \$2.50 each, but this year we have imported a very large number of extra choice specimens, which will bloom profusely the first year, and we offer them carefully packed and delivered in cars here at only \$1.00 each, \$9.00 per dozen. They can only be sent by express or freight.

CAMELIA VINE.

In the Camelia Vine (*Calystegia Pubescens*) we have a flower of true Camelia shape and size, perfectly double and of most beautiful delicate rose color. Of easiest culture growing well in any soil or location. Vine is of rapid growth, quickly covering trellis or porch and growing to a height of 15 or 20 feet. For best results set 12 to 18 inches apart. Leaves are lance shape, dark green, and lap-like shingles. Roots live in ground over winter. Blooms continuously from May to October and pleases everyone. Each 15c, dozen \$1.50.

LONICERA KURTZWEILII.

A new purple-leaved variety of Honeysuckle, which originated with Mr. Kurtzweil. It is a sport of the popular Hall's Japan, but is radically different from all other varieties. Has dark purple leaves thickly set on the strong vines. Is a vigorous, tall-growing sort attaining a great height the first season. The large clusters of flowers are produced in profusion and are a charming combination of clear pink and dark red. It is a most desirable vine for porches, arbors, trellises, etc., and a striking novelty which is sure to attract much attention. Each 20c; extra large plants 50c.

CAMELIA VINE.

A NICE BED OF CANNAS WILL GIVE UNEQUALLED SATISFACTION.

CHRYSANTHEMUMS.

Novelties which attracted universal attention at the great flower shows on account of their large size, exceptionally fine shape and handsome colors. Their large size is of course especially noticeable when grown as a single stem and only one flower allowed to develop on each plant.

JOHN K. SHAW.—A magnificent new variety of very large size and solid appearance. It is an incurved Japanese sort, of fine light pink color and very pleasing appearance. Blooms about the last of October and makes a splendid pot plant with stiff stem and fine healthy foliage. Each 20c.

SHRIMPTON.—Claimed to be the best of all reds and has indeed proved to be of extra fine quality in our greenhouses. It is of large size, 6 to 7 inches in diameter, and of striking bright red color. Neat, compact growth and abundant bloomer. Each 15c.

OCTOBER SUNSHINE.—A bright, handsome, golden yellow variety, producing enormous sized ball-shaped flowers very early in the season. Each 20c.

ROI DE ITALIA.—Another early, very large, exceptionally fine variety, of handsome yellow color. Each 15c.

MINNIE WANAMAKER.—Pure snow-white, incurved and perfectly double, with a breadth of petal and grandeur of build that is only found in the best varieties. The flowers are exceptionally large, produced on long, stiff stems, with large and handsome foliage. Each 15c.

CHELTONI.—A fine deep yellow, of elegant form. Extra large. The petals are narrow and incurved, with fine finish. Blooms last of October. Each 15c.

CONVENTION HALL.—Pure white with very broad center, petals and tubular ray florets. Each 15c.

GOLDEN CHADWICK.—A grand novelty and one of the finest yellow varieties ever introduced. Flowers are very large, globular and showy, many of them 7½ inches in diameter. Petals are broad, of great substance and handsomely curved. Each 20c.

SUNBURST.—This glorious new Chrysanthemum is an ideal exhibition or show flower, frequently measuring 22 inches in circumference and especially large when grown to single stem. It is of beautiful Japanese, somewhat incurved form, petals broad and of great substance. Intense golden yellow, with lighter yellow on reverse side, and appears so brilliant as to suggest its name. Each 20c.

WM. DUCKHAM.—Very large Japanese incurved of a most pleasing pink. Medium early. Each 15c.

THE BABY CHRYSANTHEMUM

—This is the smallest and the prettiest of the pompons. In color it is a bright golden yellow, the individual flower being from ½ to ¾ of an inch in diameter, very full and double. The sprays carry from 6 to 18 flowers. Fine for pans or pots. Each 15c.

GOLDEN CHAIN.—What do you think of a Climbing Chrysanthemum? We call it a decided novelty. Plants grow to a height of 10 or 12 ft. and will cover a trellis handsomely. The flowers are of bright golden yellow color, but single and of small size, only about 1 inch in diameter. A wonderful bloomer, in flower from October until May. Each 15c.

COLLECTION.—One plant each of the 12 Novelty Plants named above worth \$2.00 for only \$1.35, charges prepaid.

JOHN K. SHAW CHRYSANTHEMUM.

MRS. C. N. PAGE SALVIA.

During the past few years Salvias have increased greatly in popularity and this is undoubtedly the handsomest and best blooming of all varieties. We cannot too strongly recommend it as it begins blooming very early and continues in full flower until late in the fall. Each 15c, doz. \$1.35.

JAPANESE VARIEGATED ACORUS.

One of the finest plants either for outdoor beds or rockeries, or growing in pots in the house. The long sword-like leaves are handsomely striped with pure white and it retains its variegation even during the hottest weather. Can be grown either in low wet places or in dry locations. We most highly recommend it either for specimen plants or bedding. Each 20c.

THE FAIRY WATER LILY.

Leaves strikingly like a water lily but of a yellowish color, with darker veins, dark purple underneath and curiously rough and pitted. Its flowers which are produced freely the year around, are white with a yellow center like miniature Water Lilies and curiously borne on same stem which bears leaves. Grows in either deep or shallow water. A charming plant for the aquarium. Nice plants 15c, 4 for 50c.

CANNA NOVELTIES.

KING HUMBERT.—One of the grandest new cannas ever offered. Has flowers as large as the largest of the orchid flowering Cannas. Bright orange-scarlet streaked with crimson. Foliage is bronze with brownish green stripes, large, thick and leathery. A strong, robust grower; height 4 feet. Each 40c.

BLACK BEAUTY.—Undoubtedly has the darkest and most magnificent foliage of all purple-leaved Cannas ever introduced. The leaves are black shining purple, very rich and glossy, makes a magnificent plant, 4 to 5 feet high. Flowers are glowing crimson but quite small. A fine plant for center of beds, vases, etc. Each 20c.

MONT BLANC.—The nearest pure white of any canna ever offered. The flowers are large and showy. It produces few bulbs, however, and price will therefore always be high. Each 35c.

KUMQUAT ORANGE.

A handsome little plant bearing a marvelous profusion of miniature oranges of rich golden yellow color as well as handsome fragrant flowers. Each 40c.

ORINOCO BANANA.

Large showy plants having large broad leaves and fine for the center of beds, adding a truly tropical effect. Each 25c.

ARUNDO DONAX.

An ornamental plant having wide, but grass-like foliage, handsomely variegated white and green. Each 20c, doz. \$1.75.

MRS. C. N. PAGE SALVIA.

BEDS OF CANNAS.

REMEMBER WE GROW ALL THE PLANTS WE SELL AND THEY ARE THE BEST MONEY CAN BUY.

BIRDIE BLYE ROSE.

This grand new everblooming variety, which we now offer for the first time, is undoubtedly one of the choicest new sorts which has been introduced for many years past. It is very hardy and may be planted in any of the central and northern states, living over the winter with slight protection and it does well in the south also. It forms a fine, handsome bush 3 to 4 feet high, with glossy foliage, and blooms constantly from early June till freezing weather, producing at the end of every shoot clusters of bright, satin-rose blossoms, quite double, intensely fragrant, and over 3 inches in diameter. The buds are long and pointed and in color a bright carmine until they open. It was named after "Birdie Blye," or Miss Birdice Blye as her name really is, the world renowned musician who has become so famous in Europe as well as in America. She formerly lived in Des Moines, not far from where our greenhouses are now located. Each 25c.

RICHMOND ROSE.

This is a grand rose for house culture and forcing. It is a very remarkably strong grower and free bloomer, producing splendid buds and flowers on fine long stems; bright glowing scarlet crimson, exceedingly bright and beautiful; does not mildew or black-spot, and is undoubtedly one of the very best roses lately introduced. Each 20c.

LA DETROIT ROSE.

The La Detroit Rose is a magnificent new Hybrid Tea Rose, of largest size and splendid form; color clear flesh pink, shading to deep rose; fine broad shell-shaped petals, very full and deliciously tea scented; a vigorous grower and abundant bloomer. One of the handsomest and most promising of the new roses. Each 20c.

SUNRISE ROSE COLLECTION.

There is no flower so popular as the rose and the demand increases each year, and this assortment has proven to be the most popular rose collection that we ever offered. The entire collection of 6 choice plants, worth \$1.10, for 65c.

SUNRISE.—This grand new rose has taken first honors in the cut flower shows. When in bud form it is a deep coppery pink color, but as the blossoms open the inner side of petals shade from clear yellow to deep copper color, thus making a pleasing color effect. It has the true Bon Silene fragrance and is desirable both in bud and in full bloom. Each 20c.

BESSIE BROWN.—Hybrid tea variety. Blooms are very large in size, full double and of perfect shape; color creamy white flushed and tinged with pink, especially at the edges of the petals, which are shell-shaped. Blooms freely. Each 20c.

BIRDIE BLYE ROSE.

HELEN GOULD.—Has proven itself to be the strongest growing, freest blooming and largest flowering hardy rose in existence. The buds are beautifully shaped, long and pointed; the flowers are full and perfectly double; color rich rosy crimson, particularly bright and glowing; also a good winter bloomer. Each 15c.

FRANCES E. WILLARD.—Undoubtedly the best pure white ever-blooming rose ever introduced. Buds and flowers are of large size, perfect form, pure snow-white color. It is delightfully fragrant and blooms freely. Plant is a strong vigorous grower. Each 15c.

ROGER LAMBERLIN.—The most exquisitely beautiful and rich colored rose ever sent out and in fact it is so very much different from all other varieties that few persons suspect that it is a rose. Each 20c.

TULIP ROSE.—(Madam de Watteville.)—Has created a great sensation in Europe. The flower when half open is the shape of a tulip, also of a rich variegated color. It is a remarkable shade of cream yellow suffused with rosy blush. Petals are large and each is broadly bordered with bright crimson; feathery shaded. Each 20c.

COLLECTION.—The above Six Roses for 65 cents.

SUNRISE ROSE COLLECTION

SIX UNEQUALED ROSE NOVELTIES FOR ONLY

65 CENTS

OSTRICH PLUME OR PIERSON FERN.

This grand new fern we believe is the finest plant novelty introduced for many years. It resembles the Boston Fern in some ways, but is indescribably more beautiful, and being equally hardy and easily grown, will at once take its place as one of the grandest and most beautiful decorative plants for house and conservatory culture ever produced. Its feathery plume-like fronds represented in our cut more nearly resemble the graceful ostrich plume than anything else in nature to which we can compare them. One has to see a plant in growth to appreciate its beauty and value. The fronds grow broad and heavy, measuring at least six inches across when fully developed, increasing in beauty as they develop. This plant has received a gold medal on six different occasions at plant exhibitions and is conceded by everyone to be the fern of the century. It is a sport from the well known Boston Fern, differing from it in that the pinnæ of the Boston Fern frond is subdivided into separate pinnæ, making each a perfect frond. So elegant are the large plants that we frequently sell two-year-old specimens at \$3.00 to \$5.00 each. Young plants 25c. Specimen plants, \$1.00 each, by express not prepaid.

ELGANTISSIMA FERN.

This is a "sport" from the preceding, in which the plummy peculiarity of the original form is even more distinctly developed, the side pinnæ being again sub-divided and standing at right angles to the midrib, making both sides of the frond equally beautiful, while at the same time the plant is of much more compact habit, growing only one-half as tall, but with fronds nearly twice as wide, making it a much more desirable plant for all purposes. They are quite rare. Each 35c.

FLOWER LOVERS

Are invited to visit Floral Hill, where we have thirty-one greenhouses and extensive trial grounds which are a revelation of the beauties of nature, unsurpassed in any part of the west.

OSTRICH PLUME FERN.

FLOWER BULBS.

Many of the most showy, attractive, inexpensive and easiest grown of all summer and autumn flowers are contained in this important class. There are scarcely any other flowers that can compare with the noble and brilliant spikes of the gladiolus, the grace and elegance of the lily, the purity and sweetness of the tuberose, the majestic foliage of the caladium, and the wonderful markings of the tigridia. Bulbs for spring planting require scarcely any care, and quickly make a gorgeous display, while the bulbs can be kept over winter and year after year will return a hundred fold in beauty and satisfaction the trifling expense of the original cost. Our bulbs are large and strong and will be sent well packed postpaid on receipt of price, except where noted. **Discounts.**—Your selection of bulbs to the amount of \$1.20 at catalogue prices will be sent postpaid for \$1.00, \$2.50 for \$2.00.

AMARYLLIS.—Johnsonii.—Of strong, vigorous growth, bearing from three to six brilliant red flowers on each stem. The petals are striped with white; very attractive. Fragrant. Each 50c.

Formosissima.—(*Jacobean Lily*).—Of extremely rich, deep velvety, crimson color. It is a free bloomer and succeeds well either in pots or in the open ground. Each 15c, 3 for 40c, 1 doz. for \$1.25.

MONTBRETIA.—Crococsmiflora.—A showy summer-flowering plant producing many handsome star-shaped blossoms of an orange red color. Hardy, and improve year after year if left in the ground undisturbed. Each 5c, doz. 40c.

CALLAS.—Mammoth White.—Largest flowering variety and most majestic. It is of perfect flowering form, with large tropical appearing leaves of bright green color, and yielding throughout the season a profusion of white flowers. Large bulbs each 25c, 3 for 60c; medium size each 15c, 3 for 40c.

Black.—(*Solomon's Lily*).—This is the wonderful Black Lily of Palestine which was for many years supposed to be a myth. The flowers are large and sometimes a foot long and of rich velvety black, very striking and ornamental in appearance. Each 15c, doz. \$1.50.

Yellow.—This fine variety is identical with the Mammoth White in every respect, except the color, which is pure yellow, so that the great value of this grand novelty can be readily appreciated. Each 60c.

Little Gem.—A perfect miniature Calla, growing eight to twelve inches high, producing beautiful snow white blossoms. Begins to bloom when only a few inches high, blooms summer or winter. Growing plants each 15c, 3 for 40c.

Spotted Leaf.—An ornamental plant even when not in flower, the dark green leaves being beautifully spotted with white, fine for planting in the garden in summer. Each 10c, dozen \$1.00.

LITTLE GEM CALLA.

GLORIOUS CANNAS.

Such a great improvement has been made in Cannas during the past few years that they may well be called "glorious." They are now generally considered the most showy and effective bedding plants. They have tropical appearing foliage and showy flowers, some of which are truly orchid-like.

Gloriosa.—One of the grandest and most beautiful varieties ever brought out; height 2 to 2½ feet, with bright green foliage. It bears long spikes of bloom, and the individual flowers are immense; color is rich crimson scarlet with a distinct golden band around each petal blending so as to make a perfect "symphony of crimson and gold." A perpetual bloomer. Each 25c, doz. \$2.50.

Alsace.—Well known as the "White Canna." Color is a creamy white without any spotting, and when grown with the dark yellow and red varieties appears like clear white. Height 5½ feet. Each 15c, doz. \$1.30.

Pink Queen.—Has dark green leaves which are broad and of thick leathery substance; height about 3 feet, color being the brightest pink imaginable, shading to old rose. Each 15c, doz. \$1.50.

Burbank.—The new American Orchid Flowering Canna. The flowers are truly gigantic in size, the upper petals spreading fully 7 inches. Toward the inner part the petals show fine crimson spots; all the rest of the flower is of a most beautiful, rich, canary yellow. Height 5 feet. Each 15c, doz. \$1.20.

America.—Height 4 feet. One of the handsomest of the bronze leaved varieties. Leaves show some tinting of green applied in such a way that they

QUEEN CHARLOTTE,
FLORENCE VAUGHAN,
MAD. CROZY CANNAS.

appear as if striped. Has wide tropical appearing leaves; flowers of extra large size, dark yellow, veined with red. Each 20c; doz. \$1.75.

Black Prince.—Height 3 feet. Dark green leaves and a vigorous sturdy grower. Crimson scarlet flowers. Each 15c, doz. \$1.40.

Charles Henderson.—Height 4 feet. Green fodder; one of the finest bedding varieties in existence as it is of compact and vigorous growth and free bloomer. Color a deep rich crimson. Each 10c, doz. \$1.00.

Fair Persian.—Height 3 feet. Leaves are green and rather narrow. Produces numerous flower heads early in the season; flowers clear pink shading to salmon pink and lightly marked with crimson. Ea. 15c, doz. \$1.50.

J. W. Elliott.—Height 3 feet. Flowers orange scarlet, borne on strong erect stems; deep green foliage. Of vigorous habit. Ea 15c, doz. \$1.20.

Austria.—Height 6 feet. The giant golden lily-flowered Cannas. Flowers 6 to 8 inches across. Plant a strong grower. Each 15c, doz. \$1.20.

Ami Pichon.—Large bright red flowers; plant of dwarf habit with dark green foliage edged with pinkish red. Each 15c, doz. \$1.20.

Florence Vaughan.—Height 5 feet. Dark green foliage; yellow flowers, spotted with bright red. Fine for bedding. Each 10c, doz. \$1.00.

Alliance.—Splendid dwarf, light green variety. Height about 2½ feet. Flowers golden yellow, marked with light red. Each 15c, doz. \$1.50.

Alphonse Bevier.—Height 4½ feet. Leaves broad, dark green and of tropical appearance. Large heads of scarlet flowers. Each 10c, doz. \$1.00.

Madam Crozy.—Height 3½ feet. Green foliage; flowers vermilion red, gold bordered; a succession of flower trusses. Each 10c, doz. \$1.00.

Queen Charlotte.—Height 4 feet. A choice variety with green foliage; flowers rich orange scarlet with gold band. Each 15c, doz. \$1.20.

Rainbow.—Striped foliage, dark green, and very light green, red margin, stalks dark red, flowers carmine. Each 25c, doz. \$2.25.

Duke of Marlboro.—Height 4 feet. Deep crimson maroon, darkest of all. Each 10c, doz. \$1.00.

A. Crozy.—Height 3½ feet. Crimson scarlet, with broad gold border. Each 15c, doz. \$1.50.

Chicago.—Height 4½ feet. Clear vermilion scarlet; flowers and heads very large. Each 15c, doz. \$1.25.

Crimson Bedder.—One of the most showy flowered. Bright crimson scarlet. Each 15c, doz. \$1.25.

Pennsylvania.—Height 5 ft. A deep scarlet, orchid flowered variety; green foliage. Each 15c, doz. \$1.25.

Flamingo.—A dwarf variety, with dark crimson flowers pencilled with gold. Each 20c, doz. \$2.00.

President McKinley.—Height 3 ft. Green foliage. Blooms early. Each 15c, dozen \$1.40.

President Faivre.—Large bronzy variety for center of beds. Height 6 ft. Each 10c, doz. \$1.00.

Discolor.—Height 8 to 10 ft. Leaves green marbled creamy yellow bordered with bronze red. 15c, doz. \$1.25.

Robusta.—Effective large dark leaved variety. Leaves 12 to 18 in. wide. Height 8 ft. Each 10c, doz. \$1.00.

Mixed Bedding Cannas.—A nice mixture of the desirable sorts. Each 8c, doz. 75c.

GLORIOSA CANNA.

Collection of Cannas.—19 choice Cannas of three varieties for making a circular bed seven feet across for \$1 75.

DAHLIAS.

GRAND DUKE ALEXIS DAHLIA.

- Fern Leaf Beauty.**—This grand novelty has fern-like foliage and flowers of creamy white, with a distinct marking of bright crimson on each petal. Each 20c, 3 for 50c.
- Queen Victoria.**—This has long been considered the finest deep yellow variety which we have. Plant a robust grower and so covered with flowers as to appear almost like a solid mass of golden yellow color. Blooms early, very freely and continuously. Each 15c, 3 for 40c.
- Dr. Masters.**—A most beautiful decorative dahlia of delicate pink color, which we recommend very highly for late blooming. It is quite distinct from the Nymphæa and never shows an open center. Each 20c, 3 for 50c.
- Clifford W. Bruton.**—A new show dahlia of greatest merit. Extra large flowers of a bright golden yellow, perfect in shape and form; very early. Each 20, 3 for 50c.
- Orange Queen.**—One of the most striking decorative dahlias in our collection. Color is a peculiar shade of orange vermillion. Plant is a large, vigorous grower and blooms early and constantly. Each 25c, 3 for 60c.
- Black Prince.**—Very dark crimson, shaded black. Each 20c, 3 for 50c.
- Crimson Cactus.**—Desirable dark crimson variety; should be in every collection. 15c, 3 for 40c
- Cactus Dahlias.**—Mixed varieties. Each 15c, dozen \$1.50.
- Fancy Double Mixed.**—The handsome tipped, striped, spotted and variegated sorts in a splendid mixture. Each 25c, dozen \$2.25.
- Single Dahlias.**—Many people prefer these to the double varieties because of their grace, freedom of bloom, adaptability for bouquets, decorations, etc. Mixed colors; each 15c, 3 for 40c.
- Double Mixed Varieties.**—Contains a good proportion of best scarlet, yellow and white varieties, besides many other shades which are popular. Each 10c, doz. \$1.00.

CHOICE GLADIOLUS:

These are a specialty with us and our fields devoted to them make a most magnificent sight each year, appearing at a distance a mass of bright colors. It is the most desirable of all bulbs and claimed by many, who are well acquainted with their varied beauty, to be the flower of flowers.

ALTOONA GLADIOLUS.

FERN LEAF BEAUTY DAHLIA.

- America.**—A splendid new variety which we are offering for the first time. Color is a beautiful soft pink; flowers very large. Each 15c, 3 for 40c.
- Princess.**—A new giant flowered variety, having brilliant scarlet and white flowers of very striking appearance. Each 20c, 3 for 50c.
- Royal Queen.**—One of the finest and largest flowering varieties of gladiolus ever introduced. The flower spike is very long and well filled out on all sides. The flowers are of a clear, pearly white ground striped and splashed with a rich carmine, shading to a rosy purple, most beautifully blotched and marbled and of a delicate velvety texture. Each 15c, 3 for 40c.
- Perfection.**—A seedling of the Royal Queen, very much like its parents, but flower is more perfect, has longer spikes, brighter and clear color. Frequently two feet of the spikes are covered with flowers at one time, there being from 12 to 18 wide open flowers. The ground color is very nearly pure white, beautifully flaked and striped with bright rich crimson. Each 25c, 3 for 60c.
- American Banner, or Tri-Color.**—The ground color is white, striped with bright red, and spotted with violet blue on lower petals. A curious combination of colors which has given it its name. Ea. 20c, 3 for 50c.
- African.**—Darkest crimson-black, with a pure white blotch in the throat. Each 10c, doz. 90c.
- Brenchleyensis.**—Deep vermillion scarlet. Each 4c, doz. 40c.
- Eugene Souchet.**—Bright rose color, with a large white blotch and stripes. Each 5c, doz. 50c.
- Isaac Buchanan.**—Best of yellow varieties. Each 5c, doz. 50c.
- Marie Lemoine.**—Pale cream color, flushed Salmon, spotted purplish violet. Each 10c, doz. 90c.
- Ceres.**—Beautiful bluish white, marbled and striped with rosy carmine. Each 5c, doz. 50c.
- Meyerbeer.**—Rose scarlet with red blotch. Each 10c, doz. \$1.00.
- Norma.**—The flower is nearly pure white. Very beautiful. Each 7c, doz. 65c.
- Mt. Pelee.**—A grand novelty and the best bright red. The spikes are unusually large and filled with immense flowers. The flower is of the most intense flame red color. Each 15c, doz. \$1.25.
- Salmon Pink.**—Pure salmon pink color. Each 5c, doz. 50c.
- Snow White.**—Beautiful pure snowy white. Each 15c, doz. \$1.50.
- L. Keiway.**—Beautiful dark velvety red. Each 8c, doz. 75c.
- Nanceanus.**—A distinct variety of gladiolus with full, open, large flowers of various shades of red and purple. Each 10c, doz. \$1.00.
- Groff's Hybrids Mixed.**—The floral papers have been full of the praise of this new class of gladiolus. All colors mixed. Each 10c, doz. 85c.
- Lemoine Mixed.**—Often called Butterfly Gladiolus. These have odd and fantastic markings and resemble the orchids. Each 6c, doz. 60c.
- Pink, Striped and Variegated Varieties Mixed.**—Each 5c, doz. 40c. Second size, doz. 25c.
- Red Varieties Mixed.**—Each 5c, doz. 40c. Second size, doz. 25c.
- White and Light Varieties Mixed.**—Each 5c, doz. 50c. Second size, doz. 30c.
- Altoona Mixture.**—The best mixture in existence, made up mainly from the above named varieties and other very choice sorts which we do not catalogue. Large bulbs, each 8c; doz. 75c, 100 for \$5.00.
- Fine Mixed.**—Nice assortment. Each 4c, doz. 35c, 100 for \$2.00. Second size, doz. 20c, 100 for \$1.25.
- Yellow Varieties Mixed.**—Each 5c, doz. 50c. Second size, doz. 40c.

EXTRA CHOICE MIXED GLADIOLUS SEED, BLOOMS SECOND YEAR, EIGHT CENTS PER PACKET.

CALADIUM ESCULENTUM.

GIANT FLOWERING CALADIUM.

CALADIUM.—Esculentum.—(*Elephant's Ear*).—A splendid tropical plant, growing 4 to 5 feet, with immense leaves, beautifully veined and variegated with different shades of green. Very showy leaves, often growing three feet long. Of easy culture. Medium sized bulbs 10c, 3 for 25c; large bulbs 20c, 3 for 50c; mammoth 35c, 3 for \$1.00.

Fancy-Leaved.—These have in recent years grown very rapidly in popular favor, not only for the decoration of the conservatory, greenhouse and window boxes, but nearly all of the varieties succeed admirably if planted out of doors, when the ground has become warm, in partly shaded, sheltered borders. Leaves variegated red, yellow, white, brown, green, etc. Many choice varieties mixed, each 20c, dozen \$2.00.

Giant Flowering.—A mammoth variety, growing 7 to 10 feet high and having leaves sometimes 4 to 5 feet long and 2 feet wide, of a glossy bright green color, shining as if varnished. The flowers are of large size, pure white, and resemble a Calla Lily. Each 25c.

RESURRECTION PLANT.—A curiosity, sure to interest the children. Looks like a ball of dried moss, but when dropped into a bowl of tepid water, it quickly opens out into a beautiful fern-like plant. Each 10c, 3 for 25c.

HYACINTHUS CANDICANS.—Has a stem 3 or 4 feet high, which bears quantities of drooping, ivory white, bell-shaped flowers of delicate fragrance. Appear like Giant Snowdrops. Each 5c, dozen 50c.

TUBEROSES.—New Excelsior Pearl.—The tuberose is justly a universal favorite and very easily grown. The **New Excelsior Pearl Tuberoses** have been selected with great care and are superior to the ordinary Pearl tuberoses. This variety is characterized by its short, robust stem and long spikes of large flowers, which are perfectly double and twice the size of the common tuberose, while of equally delicious fragrance. Spikes frequently bear 30 to 50 flowers, remaining in bloom for a long time. They are always wax-like, pure white, and unsurpassed for buttonhole bouquets. You will be greatly pleased with them. Choicest large bulbs each 5c, doz. 40c, 100 for \$2.65, postpaid.

"I got a dozen Tuberoses of you last spring. They all bloomed and were beautiful; also pleased with seeds and bulbs received."—Mrs. W. H. Forman, McFall, Mo.

Variegated Leaved.—Leaves are bordered with creamy white; flowers single but very large and of exquisite fragrance. Bulbs continue to grow and bloom year after year. Each 5c, doz. 45c.

EXCELSIOR PEARL TUBEROSE.

MADERIA VINE.—Also called Mignonette Vine and Mexican Vine. A beautiful tuberous rooted climber, with glossy green leaves and handsome racemes of fragrant white flowers. The vine makes a very rapid growth and a few plants will cover a trellis or cottage wall in a single season. It is a very pretty thing to use for shading a porch or veranda. Each 5c, doz. 45c.

SUMMER FLOWERING OXALIS.—No bulb is so valuable for edging the borders of walks or flower beds as the beautiful flowering Oxalis. When planted three inches apart they produce an unbroken row of elegant foliage and pretty flowers; and as they bloom very quickly after planting they furnish a neat and attractive border the whole season.

Shamrock.—Leaves resemble four-leaved clover; flowers rose color and borne in profusion on vine-like stems, which make them suitable for cutting for bouquets as well as pretty for border. Doz. 10c, 100 for 50c, mammoth bulbs, per doz. 15c.

Dieppi Alba.—Pretty, low-growing variety with light green leaves and clusters of pure white bell-shaped flowers, and blooms profusely. Doz. 10c, 100 for 40c.

Lasandria.—Large, dark green, palmate or five fingered leaves, with clusters of rosy pink flowers. This is taller than the above. It would be difficult to find a more satisfactory bulb for bordering flower beds. Doz. 10c, 100 for 50c, mammoth bulbs, per dozen, 15c.

ZEPHYRANTHES.—Popularly known as "Zephyr Flowers" and Fairy Flowers. They are among our most beautiful dwarf bulbous plants, very effective for planting out in masses in the spring, flowering with great profusion during the summer. Very suitable for pot culture; 4 to 6 bulbs clustered in a 6-inch pot will give a fine display. Pink and white. Try a few of them this year and you will be pleased. Each 5c, doz. 50c.

AMORPHOPHALLUS.—Is a showy plant, with enormous palm-like leaves, 3 to 4 inches in diameter, spreading in the shape of an umbrella; the green stem is marbled brown and white; a desirable plant for specimens or groups on a lawn. The large, deep red flowers are produced before the leaves appear. It is chiefly grown, however, for the luxuriant tropical effect of the foliage. Plant out in May in rich soil. Each 35c.

TIGRIDIAS.—Peacock or Shell Flower.—Handsome summer flowering bulbs, producing large, gorgeous flowers. They flower freely throughout the summer and are of various colors, red, white, yellow, etc., handsomely spotted. Each 5c, doz. 50c.

MADERIA VINE.

TRITOMA.—(Pfitzeri)—Flaming Torch or Red Hot Poker Plant.—At all floral exhibitions, and when sent as cut-flowers to market, this plant attracts great attention. It grows from 3 to 4 feet high and the flower measures 12 to 15 inches long. They are a dazzling scarlet, lower half of flower tinged with rich orange. Each 20c, 3 for 50c.

GLOXINIA.—Giant Flowered.—One of the most beautiful and satisfactory flowers. Has large trumpet shaped blossoms of crimson, rose, scarlet, purple, white, etc., tinted with dots of a contrasting color. One bulb planted in a 5-inch pot will make a magnificent show, and if bulbs are planted at intervals will give a continuous bloom for a long period. Each 15c; dozen \$1.50

HYACINTHUS CANDICANS.

OXALIS SHAMROCK.

ZEPHYRANTHES.

HARDY BULBS.

For complete list of Lilies, Lily of Valley, Paeonies, Iris, Etc., see pages 88 to 91.

REMEMBER THAT BULBS CAN BE KEPT THROUGH THE WINTER AND YOU DO NOT HAVE TO BUY NEXT YEAR

FLOWER SEEDS.

Our floral beauties come in for their full share of attention, and aside from our seed farm we have twelve acres of land right in the city, convenient to the street cars, devoted exclusively to flowers. Here we grow thousands of varieties and have in our employ experienced specialists in this line, who, under our supervision, attend to growing whatever can be grown to advantage in this country, test all novelties offered in this country or Europe, and are constantly trying by selection and hybridization to improve the leading varieties, and make our Choice Iowa Flower Seeds just what we are striving for—the best in the world. We invite all our Customers to call and see this Floral Exhibition whenever they are in the city. Even during the winter the large green-houses on these grounds are a revelation of beauty which surprises everyone. Don't fail to notice also the novelties listed on the colored pages of this book.

Our flower seeds are all fresh and we know they are unsurpassed. Quality is always the first consideration. Our mixtures are mainly made up by ourselves from named varieties, or from growing a large number of the best named varieties together, and will yield a better assortment than is commonly found. This year we list all the varieties alphabetically together—annuals, perennials, climbers, etc., but we mention in the description the class they belong to if they are not annuals. This will make it easier to find any sort named.

DIRECTIONS FOR SOWING, ETC.—To insure success the conditions and requirements of the several species as to soil, moisture, heat, etc., should be studied and then observed in culture. Below we give a few general directions for their culture, though more complete directions will be found printed on the seed packets. The soil best adapted to most flowers is light, rich loam, containing enough sand to make it porous. If there is some clay with it the colors will be brighter. Make the surface as smooth and fine as possible, sow seeds in rows, covering each sort of seed in proportion to its size (a good general rule being to cover twice the diameter of the seed) and press the soil down firmly over it. Do not plant any seeds when the ground is wet. Many varieties, such as pansy, verberna, daisy, hollyhock and the fine greenhouse plant seeds, should be sown early in shallow boxes in the house, in soil consisting of equal parts of fine sand and rich, mellow loam well mixed together and sifted to remove all gravel and lumps. Sow as before directed. Covering the box with glass helps to retain the moisture and keeps the temperature even. Be careful not to keep too wet, and when large enough to handle, transplant to boxes from 1 to 2 inches apart to remain until put in permanent beds.

DISCOUNTS.—In spite of our very low prices by the packet, we still offer flower seeds, *in packets only*, to the amount of \$1.25 for \$1.00. This discount does not apply to collections of seeds, nor to seeds by weight or measure. All flower seeds are sent free by mail on receipt of price.

ASTERS.—The numerous forms of the aster, and the now great variety of rich colors of its perfectly double flowers make it a leading favorite. For a summer and fall display it has no equal. Sow seed early and give deep, rich soil and plenty of mulching.

Crown.—Cut No. 1.—Center of each flower is white, surrounded by a broad margin of color, such as crimson, rose, violet, etc.; flowers large, beautiful and showy; mixed colors. Pkt. 5c.

Perfection Mixed.—Cut No. 2.—(*Truffant's Improved Paeony Flowered.*)—A favorite, flowers large and almost perfectly round, incurved petals; height 18 inches to 2 feet. Pkt. 5c.

Snowball.—Cut No. 3.—Flowers are of refined and faultless form; pure white; beautifully imbricated and freely produced, 30 flowers being frequently borne on a single plant. Pkt. 10c.

Harlequin.—Cut No. 4.—A curious, attractive and beautiful variety with oddily spotted and striped very double flowers of red and blue. Pkt. 10c.

Golden Ball.—The long sought novelty—a yellow aster. Pkt. 10c.

Victoria.—A magnificent sort. Twenty

inches high; free bloomer; large, brilliant colors mixed. Pkt. 10c.

Dwarf Bouquet.—Very fine. Each plant forms a bouquet. Pkt. 5c.

Single Flowering Mixed.—Bearing a mass of star-shaped flowers. Pkt. 5c.

Washington.—Largest in cultivation, flowers often 5 in. across; mixed colors. Pkt. 10c.

Giant Comet Mixed.—The flowers are from 3½ to 4½ inches in diameter, perfectly double, many handsome colors mixed. Pkt. 10c.

Christmas Tree.—One of the most popular European novelties; of pyramidal shape, usually covered with 70 to 100 flowers. Mixed colors. Pkt. 10c.

Simple's Branching.—Useful for cut flowers. The flowers are very large and double, borne on large, stiff stems, and colors are clear and handsome. Mixed colors. Pkt. 5c.

Daybreak.—A beautiful aster, round as a ball, color sea-shell pink, very early. Pkt. 10c.

Betteridge's Quilled.—Perfectly double tube

or quill shaped petals; valuable for bouquets and bedding. Mixed colors. Pkt. 3c.

All Kinds Mixed.—Includes many varieties and colors. Pkt. 5c.

Royal Mixed.—A very choice selection of all the best sorts. No second grades. Pkt. 10c.

Dwarf Mixed.—A splendid assortment of the best dwarf growing varieties. Pkt. 10c.

Perennial Mixed.—Single flowering, hardy, herbaceous plants. If sown early will flower first season. Pkt. 5c.

ABRONIA.—*Umbellata.*—Training habit similar to verbenas, bearing clusters of sweet-scented flowers. Rose color. Pkt. 3c.

ABABIS.—*Alpina.*—Early blooming. Useful for rock work. Flowers pure white. Hardy perennial. Pkt. 10c.

AGERATUM.—*Mexicanum.*—Desirable for bouquets; produces many blue flowers and blooms a long time; largely used by florists; start seeds early. Pkt. 4c.

Albiflorum.—Like above only white. Pkt. 8c.

BALSAM.—One of the most beautiful of our annuals. The flowers are most brilliantly colored, very large and double; rich colors, ranging from white to dark crimson.

Peerless Mixed.—Made up from the best foreign and American strains. Flowers are double and of all known colors; plants loaded with hundreds of flowers. Pkt. 10c.

Camelia Flowered Mixed.—Very double, unusual size, perfect shape. Our mixture contains all best colors. Pkt. 5c.

All Varieties Mixed.—Mixture of older sorts. Pkt. 4c. oz. 25c.

BLUE BELLS.—Beautiful bell-shaped, bright blue flowers. Hardy perennial. Pkt. 10c.

PEERLESS MIXED BALSAMS.

A MILLION BEDDING PLANTS—HUNDREDS OF VARIETIES AT LOW PRICES. SEE LIST.

ANTIRRHINUM.

ANTIRRHINUM.—(*Snapdragon*).—**Giant Flowered.**—A most beautiful new class having all the finest colors and markings known in the old varieties and several new ones. The flowers are of immense size and produced in long spikes. It is a perpetual bloomer, sending up flower spikes by the dozen, one or two feet in length, almost as large and beautiful as gladiolus. Pkt. 10c.
Mixed Varieties.—The older sorts. Pkt. 3c.

ALYSSUM.—**Sweet.**—Pretty little white flowers, useful for bouquets and borders. Pkt. 3c.
Little Gem.—Very dwarf and compact, making a mass of white flowers. Pkt. 5c.

ASPERULA.—**Azorea Setosa.**—Light blue fragrant flowers. Pkt. 5c.

AMOBIMUM.—**Alatum Grandiflorum.**—A pretty everlasting, double white flower. Pkt. 4c.

AMPELOPSIS.—**Veitchii.**—(*Boston Ivy*).—Pkt. 5c.

ACROCLINIUM.—**Mixed Colors.**—An everlasting, bearing large double flowers. Pkt. 3c.

ABUTILON.—**Mixed Colors.**—Beautiful bell-shaped flowers of various colors. Pkt. 10c.

ADLUMIA.—**Cirrhusa.**—A hardy perennial vine with fern-like foliage and pretty flesh-colored blossoms. Pkt. 10c.

AQUILEGIA.—**Chrysantha.**—(*Columbine*).—A hardy perennial; large, beautiful canary yellow flowers. Pkt. 5c.

Coerulea.—Violets, blue and white. Pkt. 7c.

Double Mixed.—Pkt. 5c.

AGROSTEMMA.—**Mixed Colors.**—Fine for bouquets or cemetery. Pkt. 5c.

AMARANTHUS.—A handsome foliaged plant of many colors.

Tricolor.—Leaves yellow, red and green; well known as "Joseph's Coat." Pkt. 3c.

Salicifolius.—Known as "Fountain Plant." Pkt. 7c.

Caudatus.—(*Love Lies Bleeding*).—Producing long drooping chains of brilliant colored flowers. Pkt. 5c.

Mixed Varieties.—Pkt. 5c.

CLARKIA.—**Mixed Colors.**—Blooms freely during the summer. Pkt. 3c.

CONVOLVULUS.—**Minor.**—(*Dwarf Morning Glory*).—Showy flowers for bedding. Pkt. 5c.

BEGONIA.—Seeds very small, almost microscopic, and should be sown on top of the soil. Cover box with glass; give partial shade until up.

Vernon.—Fine for outdoor bedding. Pkt. 10c.

Rex.—The king of begonias. Pkt. 25c.

Tuberous Rooted.—Fine for summer bedding. Pkt. 15c.

Flowering Varieties Mixed.—Pkt. 10c.

BALLOON VINE.—A pretty, rapid growing climber, succeeding best in a warm situation. Flowers white. Pkt. 5c.

BROWALLIA.—**Grandiflora.**—This new sort is without doubt the most beautiful of all the Browallias, covered with an abundance of delightfully large sky-blue flowers. Pkt. 10c.

BRACHYCOME.—**Mixed Colors.**—Pretty low-growing plants, covered in summer with a profusion of cineraria-like blue and white flowers. Half hardy. Pkt. 5c.

BRYONOPSIS.—Beautiful summer climber with yellow flowers, followed by pretty, cherry-like, green fruits, which change to bright scarlet, marbled with white. Pkt. 5c.

CANNA.—**Fancy Large Flowered.**—This is a very large flowered strain of dwarf, compact growth. They flower freely and the first year from seed. Unquestionably one of the finest of bedding plants. Their handsome leaves combined with their varied and rich colored flowers have an extremely fine effect. Seed should be soaked in warm water for several hours. Pkt. 5c, oz. 25c.

NEW FANCY CANNAS.

flower, it is sometimes called Tassel flower, or Flora's Paint Brush. Scarlet. Pkt. 5c.

CELOSIA.—**Ostrich Feather.**—A handsome pyramidal plant bearing numerous massive crimson plumes. Pkt. 5c.

Mixed Varieties.—Includes many desirable sorts, Pkt. 5c.

CARNATION.—The finest of the dianthus or pink family; very fragrant. Our seed is unsurpassed.

Double Extra Mixed.—Best greenhouse varieties. Pkt. 10c.

Marguerite.—These lovely, fragrant flowers are in full bloom in about 4 months after sowing seed. Plants succeed in open garden or in pots. Flowers of high type, 80 per cent perfectly double. Color, markings, variegations, shadings wonderful. Pkt. 5c.

CALLIOPSIS, (or Coreopsis).—**Golden Wave.**—Plant bushy and compact, reaching 2 feet in height, and covered from July to October with hundreds of golden blossoms, two inches in diameter, with small dark centers. It is, indeed, a wave of gold. Pkt. 5c.

New Double.—A charming novelty, blooms freely and will please everyone. Pkt. 10c.

Lanceolata.—(*New Golden Coreopsis*).—One of the most showy hardy perennials grown, forming tall plants two or three feet high, and bearing in great profusion large flowers of golden yellow. Pkt. 8c.

Mixed Colors.—Produces flowers in nearly every shade of yellow, orange, crimson and brown. Pkt. 3c.

CHRYSANTHEMUMS.—The annual Chrysanthemums listed below are altogether different from the large-flowered perennial varieties grown by florists.

Chameleon.—New and distinct annual variety producing large single flowers, beautifully encircled with purple, black, crimson, yellow and copper. Pkt. 8c.

Double Annual.—A valuable and most unique novelty. A great variety of colors, markings and pencillings. Very double, semi-double or single, but these are almost equally charming. Pkt. 5c.

Perennial Mixed.—The popular greenhouse variety. Very showy and desirable for fall and early winter blooming. Sow seeds early. Pkt. 10c.

COCKSCOMB.—**Giant Empress.**—Very handsome; 12 inches in breadth; bright, purple combs and dark bronze foliage. Pkt. 10c.

Golden Glow.—Large combs; golden color. Pkt. 10c.

GIANT EMPRESS CANDYTUFT.

COSMOS.—**Early Dawn Mixed.**—Very early and a free bloomer, many colors. Pkt. 5c.

Mammoth Perfection.—Flowers measure from 12 to 15 inches in circumference; white, pink or crimson. Seed should be sown early in the house as they are quite late. Pkt. 7c.

CANDYTUFT.—Considered indispensable for cutting, and looks best in beds or masses; hardy, easy to cultivate and blooms profusely; one foot in height.

Giant Empress.—One of the finest varieties in cultivation, of very branching habit, and when fully grown and covered with its pure, white flowers, resembles a floral candelabra. Pkt. 7c.

Snow Queen.—An extra fine dwarf pure white variety, grows rapidly, remaining in full flower for about three months. Pkt. 5c.

Best Mixed.—A mixture of all varieties and colors. Pkt. 3c, oz. 40c.

Semper Virens.—Profuse white blooming perennials adapted for rockeries, baskets, etc. Flowers early. Pkt. 10c.

CANARY BIRD FLOWER.—One of the most beautiful climbers, with delicate finely cut foliage and curious bright yellow flowers, resembling the canary bird in shape and color. Pkt. 5c.

CACALIA.—**Coccinea.**—A handsome free flowering little plant; owing to the peculiar form of the flower, it is sometimes called Tassel flower, or Flora's Paint Brush. Scarlet. Pkt. 5c.

MARGUERITE CARNATIONS.

CALLIOPSIS, GOLDEN WAVE.

NEW DOUBLE FIREBALL DIANTHUS

CALENDULA.—Fine Mixed.—Belongs to the well known marigold family. Many nice varieties; quite showy. Pkt. 3c.

CANTERBURY BELLS.—A popular old fashioned perennial. Double and single mixed; many colors. Pkt. 6c.

CENTAUREA.—Cyanus.—Called the Ragged Sailor, Corn Flower, Blue Bottle, Bachelor's Buttons and Bluet; very old favorite garden annual, flowering freely in almost any situation. Mixed colors. Pkt. 3c.

Cyanus Double.—A most charming sport from the above. Flowers very large and globular. Continuous bloomer. Pkt. 8c.

Marguerite.—This is one of the handsomest novelties ever brought out. The large flowers are of the purest white, deliciously scented, exquisitely lacinated, freely produced. Pkt. 10c.

Gymnocarpa.—Foliage finely cut and silvery. It is perhaps the best white leaved plant for bedding purposes. Pkt. 5c.

CAMPANULA.—An old favorite perennial, bearing an abundance of handsome flowers which almost hide the plant.

Cup and Saucer.—A beautiful variety. The bell is nearly four inches in diameter, presenting the form of a saucer. Mixed colors. Pkt. 10c.

Mixed Varieties.—Choice mixture of all the best double and single varieties, suited for growing together. Pkt. 5c.

CINERARIA.—Large Flowering Mixed.—Very showy plants for pot culture. Pkt. 15c.

COLEUS.—Rainbow Mixed.—The most popular of foliage plants; the finest sort. Pkt. 15c.

Fine Mixed.—Many varieties. Pkt. 10c.

CYPRESS VINE.—A beautiful rapid climber with delicate, dark green foliage, and an abundance of star-shaped scarlet and white blossoms.

Scarlet.—Very bright. Pkt. 5c.

White.—Pretty in contrast with scarlet. Pkt. 5c.

Mixed Colors.—The above mixed. Pkt. 3c, oz. 30c.

New Ivy Leaved.—Entirely distinct from all other varieties, both in flowers and foliage. The ivy-like leaves makes a dense screen from which the pretty orange-scarlet flowers stand out in countless numbers. Pkt. 7c.

COBOEA SCANDENS.—A magnificent climber, of rapid growth and beautiful blue flowers. The seed should be planted edge-wise. Pkt. 10c.

CURIOUS CACTI.—The seed we furnish is collected from the choicest varieties. Easily grown from seed planted in a box of clean sand. Pkt. 10c.

ESCHSCHOLTZIA.—(California Poppy.)—Single Mixed.—Showy summer flowering plants; large saucer-shaped flowers of striking brilliancy. Mixed colors. Pkt. 5c.

Golden West.—A giant flower from 3½ to 6 inches across, of a rich golden yellow color. Pkt. 8c.

Double Mixed.—Pretty. Pkt. 5c.

ESCHSCHOLTZIA.

the most exquisite and gorgeous colors. Seed should be started under glass. Extra choice mixed. Pkt. 25c.

GYPSOPHILA.—Delicately pretty little flowers sometimes called "Baby's Breath," or "Angel's Breath." Graceful and easily grown. Pkt. 5c.

GLOBE AMARANTH.—(Gomphrena.)—Mixed Colors.—Popularly known as "Bachelor Buttons," handsome, globular heads of flowers, which if cut when well matured, will retain their beauty through the winter; colors purple, white, flesh colored, orange and striped. Pkt. 5c.

EUPHORBIA.—Variegata.—Strong, tall growing annuals; the flowers are inconspicuous, the foliage, however, is ornamental, veined and margined with white. Pkt. 5c.

Heterophylla.—Of branching bush-like form, with smooth, glossy green leaves which, about mid-summer, become a beautiful orange scarlet, presenting a striking and brilliant appearance. Pkt. 10c.

GRASS PINKS.—The hardy and pretty clove-scented flowers which were so much loved by our grandmothers. The flowers range from pure white to pink. A hardy perennial. Pkt. 5c.

EUPHORBIA VARIEGATA.

DIANTHUS.—The Dianthus, or Chinese Pink, has long been a great garden favorite. It is, in fact, one of our most useful plants, furnishing abundance of gay pretty flowers. Plants from seed grow and bloom very quickly.

Fireball.—A beautiful, very dwarf and compact growing pink, only 10 to 15 inches high. Flowers are perfectly double and color a rich, velvety blood red. The plants begin to flower shortly after they are up, and bloom profusely all summer and fall. Pkt. 10c.

Snowball.—A fit companion to the above; Flowers large, pure white, double, finely fringed and of perfect form. Pkt. 8c.

Crown.—The flowers average 6 inches in circumference, are densely double and produced in succession during the whole summer. Colors from purest satiny white to red shades so deep and brilliant the eye can scarcely penetrate their depths. Pkt. 7c.

Mourning Cloak.—Very dark mahogany color, almost black, each petal edged with a margin of pure white. Pkt. 5c.

Single Heddewigi.—Finest selected single mixed. One of the most showy of the pink family. Pkt. 5c.

Double Diadem Pink.—Superb double flower. Hieroglyphically marked, like the original Chinese pinks, in the middle down to base of each petal, magnificent in color and variety. Pkt. 7c.

Chinensis.—(Double Chinese Pink.)—Finest double mixed.—Pkt. 3c.

Mixed Varieties and Colors.—Pkt. 5c.

DATURA.—Cornucopia.—A showy, tropical appearing plant. Flowers 8 inches long by 5 inches across the mouth; fragrant. Pkt. 10c.

Double Mixed.—Pkt. 5c.

DAISIES.—Giant Snowball.—Unusually large double flowers. Pure white. Pkt. 10c.

Best Double Mixed.—Pkt. 5c.

DAHLIAS.—Single Flowering Mixed.—Showy single flowers of many colors. Pkt. 7c.

Double Mixed.—Our seed is of the finest strain, and produces magnificent, large, very double flowers of the richest shades. If the seed is sown early in the spring they will bloom the first year. Pkt. 8c.

FUCHSIA.—Mixed Colors.—Fine plants can be easily raised from the seed, which will bloom freely during the summer in a cool, moist situation in the open air. On the approach of frost they can be taken up and planted in pots. A packet contains about 15 seeds. Finest double and single mixed. Pkt. 10c.

DOLICHOS.—(Hyacinth Bean.)—Mixed Colors.—A rapid growing annual climber, flowering freely in clusters, followed by ornamental pods. Fine for arbors or porches, Pkt. 5c.

Princess Helene.—A beautiful white, sweet scented variety. Pkt. 10c.

DELPHINUM.—(Perennial Larkspur.)—Mixed Colors.—One of our most showy plants, producing splendid spikes of flowers in profusion throughout the summer. If sown early they bloom the first year. Pkt. 5c.

FREESIA.—Refracta Alba.—Bears peculiar clusters of white flowers of the most delicious fragrance. Start seeds early, bulbs dry off in summer. Start them growing in the house in October and you will be pleased with them. Pkt. 10c.

FOX-GLOVE.—(Digitalis.)—Showy for backgrounds and borders, and are very beautiful; mixed colors. Perennial. Pkt. 3c.

FEVERFEW.—Free-flowering plants, succeeding in any garden soil; a fine bedding plant or for pot culture. Double-white flowers. Pkt. 5c.

GLADIOLUS.—Easily grown from seed, blooming 2d year. Pkt. 8c.

GAILARDIA.—Perfection.—Improved sort, producing very double flowers, round as a perfect ball, in most varied and pleasing colors. Pkt. 5c.

Grandiflora.—Splendid new perennial varieties, with very large flowers, dark crimson centers, marked with rings of many brilliant colors. Pkt. 10c.

GILIA.—Clusters of small, delicate flowers, white, blue, lilac, rose. Pkt. 5c.

FERNS.—Can be grown from the spores, or seed, by sowing in a very moist place under glass. Pkt. 15c.

GLOXINIAS.—A charming greenhouse plant of dwarf habit. Their flowers are produced in greatest profusion; and of

Grass Pink:

SET OUT A STRAWBERRY BED THIS YEAR. OUR PLANTS ARE EXTRA STRONG AND VIGOROUS.

GERANIUM.

Allegany Mammoth Fringed.—An entirely new and distinct variety which has attracted great attention. Flowers single, semi-double and double, of rich colors and fine form. Pkt. 10c.

HELICHRYSUM.—Monster Mixed.—A pretty and popular hardy annual bearing large, double flowers of different shades and colors, ranging from white to yellow, rich red and scarlet. Best everlasting. Pkt. 5c.

HELIOTROPE.—Mixed Varieties.—A great favorite with all lovers of flowers for their beauty and fragrance. Pkt. 5c.

New Mammoth.—A grand new variety producing immense clusters of flowers. Pkt. 10c.

HUMULUS (Hop).—New Japanese Variegated.—Handsome and distinct climbing vine, valuable for trellis and high places. The leaves are strikingly variegated, bright deep green, distinctly marked and blotched with silvery white tinged with yellow. Pkt. 10c.

HIBISCUS.—Crimson Eye.—Flowers of immense size, often measuring 20 in. in circumference, pure white, with a large spot of deep velvety crimson in the center. Blooms first year from seed in the open ground. Pkt. 8c.

Golden Bowl.—Produces enormous flowers 5 to 6 inches across, of canary color with large black center. Pkt. 5c.

GOLDEN ROD.—Although considered an objectionable weed on our western prairies, there is no denying the beauty of this flower. It has been adopted by New York as the state flower. Easily grown from seed. Pkt. 5c.

GOSETIA.—Mixed Varieties.—Handsome and showy annuals about one foot high, of dwarf, compact growth, bearing freely large flowers 3 to 4 inches across, of exquisite colors. Pkt. 5c.

LEMON VERBENA.—Everybody knows the Lemon Verbena and all should have a few specimens of it, for its fragrant foliage is so fine to use in bouquets and floral work. Pkt. 10c.

ICE PLANT.—A handsome and curious plant for hanging baskets, rock work and vases. The leaves and stems appear as though covered with icy crystals. The flower is white and pink. Pkt. 5c.

JOB'S TEARS.—An ornamental grass known botanically as *Coix Lachryma*. Grows two to three feet high with broad corn-like leaves; hard shining pearly seeds. Pkt. 5c.

LINUM.—GRANDIFLORUM RUBRUM.—(or *Scarlet Flax*)—One of the most showy annuals for flower beds and masses; brilliant, crimson scarlet flowers, one inch across, borne in wonderful profusion. Pkt. 5c.

Perennial.—A beautiful hardy perennial, sending up numerous stems, which are clothed with a growth of small, almost hair-like foliage. At the tips of the branches are poised large blossoms of blue, white and yellow flowers. Pkt. 5c.

LYCHNIS.—Chalcedonica.—A pretty plant with star-like blossoms covering the

ICE PLANT.

dwarf bushy plants. Perfectly hardy, and blooms better the second season. Pkt. 5c.

Haageana Mixed.—Brilliant orange, scarlet, crimson, etc. Free flowering perennials. Pkt. 5c.

LOBELIA.—Handsome trailing plants; profuse bloomers; elegant for baskets, vases and borders. All sorts mixed. Pkt. 5c.

LANTANA.—Mixed Colors.—Greenhouse perennial; makes a fine bedding or pot plant; easily grown from seed. Pkt. 7c.

LUPINUS.—Mixed Varieties.—Strong growing garden annuals, with innumerable spikes of flowers of various colors. Pkt. 5c.

LARKSPUR.—Dwarf German Rocket.—An old and well known hardy annual. The flowers are borne in compact spikes, showy and desirable for any situation. Mixed colors. Pkt. 5c.

Tall German Rocket.—Mixed colors. Pkt. 3c.

American Banner.—Plants grow to a height of about two feet, and are fairly loaded with long spikes of double striped and blotched flowers. Pkt. 10c.

Perennial Mixed.—(*Delphinium*.)—Pkt. 5c.

OXALIS.—Choice Mixed.—Free flowering little plants. Useful for edgings. Pkt. 5c.

GERANIUM.—These favorite plants are easily raised from seed, and frequently reward the cultivator with charming new varieties. Plants from seeds started early in the house, bloom the first summer in the garden. Packets contain about 40 seeds.

Choice Mixed.—Seeds saved from nice varieties mixed. Try it. Pkt. 5c.

Good Venture.—A greatly improved strain of geranium seed grown by a specialist, which we are sure will delight anyone. Pkt. 15c.

GOURDS.—Ornamental Mixed.—A mixture of the odd shaped and fancy colored sorts. Contains some of the most popular and handsome foreign varieties. Pkt. 5c, oz. 30c.

HOLLYHOCK.—An old favorite. Start seed early in the house and they will bloom the first year.

Chater's Prize Double Mixed.—A magnificent double flower three or four inches across, and all of the brightest colors. A mixture of 17 prize varieties, including all colors and shades known. Pkt. 10c.

Fine Mixed.—Contains a good variety. Pkt. 5c.

HOLLYHOCK.

COPYRIGHTED BY A. BLANK.

MORNING GLORIES.—Imperial Japanese.—Remarkable for the large size and exquisite new colors of the flowers, with magnificent foliage, often beautifully blotched. Of strong, robust growth. The vines grow quickly to a height of 12 to 20 feet. The flowers are of gigantic size, sometimes measuring four or five inches across. The colors of the flowers, shading and markings are really wonders of nature, and of incomparable beauty. Double and single mixed. Pkt. 8c, oz. 25c.

Improved Climbing.—A great improvement on the old climbing morning glory. Of large size and great variety. Pkt. 5c, oz. 20c, ¼ lb. 60c.

Fine Mixed.—A mixture of the old varieties. Pkt. 2c, oz. 10c, ¼ lb. 20c, lb. 60c.

Brazilian.—(*Impæa Setosa*.)—One of the grandest and most luxuriant plants ever grown, very showy and graceful, with rose-colored flowers from three to four inches in diameter, and a huge leaf ten to twelve inches across. Pkt. 10c.

New Double Flowering.—A splendid novelty of rapid growth, and produces its double flowers very freely. They are white with a slight spot of red or blue at the base of the larger petals. About 8 per cent of the seedlings will reproduce themselves true from seed. Pkt. 10c.

Dwarf.—See *Convolvulus Minor*.

MIMULUS.—Tigrinus.—(*Monkey Flower*.)—Very showy and free flowering. The hardy kinds are well suited for outdoor culture. Any common soil suits. Mixed varieties. Pkt. 10c.

Moschatus.—The well-known musk plant, quite pretty, and has a strong musk fragrance. A nice plant also for pot culture. Pkt. 8c.

MOONFLOWER.—White.—(*Ipomæa Grandiflora*.)—One of the grandest of summer climbers, growing twenty-five to forty feet high, and covered nightly and on dull days with beautiful white and moon-like flowers from five to six inches in diameter. Fragrant. Pkt. of 10 seeds, 7c.

Blue Flowering.—(*Ipomæa Leari*.)—This distinct and charming novelty is valuable on account of being in beautiful and striking contrast with the true White Moon Flower. The color is exquisite, clear, satiny blue with well defined crimson bars; distinct. Pkt. 10c.

MYOSOTIS, or Forget-Me-Not.—Palustris.—The true Forget-Me-Not. A perennial. Blooms the first year from the seed. Pretty plants with neat little star-shaped blue flowers. Pkt. 7c.

Victoria.—A novelty and the best variety for pot culture. Dwarf, globular habit; beautiful sky-blue flowers with center double. Pkt. 7c.

MAURANDIA.—Delicate climber for windows or conservatories. Admirable to hang from vases. Pkt. 10c.

MARIGOLD.—African.—These fine old favorites have been greatly improved recently in size and doubleness. Pkt. 3c.

Dwarf French Double.—Pkt. 3c.
Eldorado.—Immense flowers, 9 to 14 inches around; double; primrose, lemon, orange and golden shades. Three feet high. Pkt. 5c.

MOONFLOWER.

MACHET MIGNONETTE.

JAPANESE MAIZE - Quadricolor.—An ornamental foliage variety of corn, growing 5 to 6 feet high with long wide leaves which are beautifully striped with broad bands of white, changing soon to narrow stripes or ribbons of alternate clear white and brightest green, showing tinges of pink or rose color at the edges. The variegation does not begin to show until the fourth or fifth leaf. Pkt. 5c, oz. 20c.

MIGNONETTE.—Sweet Scented.—The delicious fragrance of the Mignonette makes it indispensable for bouquets and cutting. It is best to sow seed early in the garden and they will commence blooming the first of June. Pkt. 2c; oz. 15c.

Allen's Defiance.—A remarkable and valuable variety with mammoth spikes 12 to 15 inches long, and more fragrant than any other variety. Florets are of immense size and the cut flower frequently keeps for three weeks, retaining its grace, beauty and fragrance. Pkt. 8c.

Machet.—Distinct sort of great merit. It is dwarf and of vigorous growth, and throw up numerous stout flower stalks, terminated by massive spikes of deliciously scented red flowers. Pkt. 5c.

FAIRY ROSES.—These little beauties are very easily grown from seed. The roses are only about an inch across, usually very double, but occasionally semi-double, and seldom single; they are borne in large clusters and are of many colors. What is most remarkable these Fairy Roses grow only 10 to 15 inches high and will commence blooming in a few weeks after the seed is sown, and continue year after year in uninterrupted profusion from May until frost. Also nice for pot plants for winter blooming. Per pkt. 10c.

OENOTHERA.—Evening Primrose.—Mixed Colors, Blooms fully expand only towards and during evening. Three to four inches across. Hardy annual. Mixed white and yellow. Pkt. 5c.

NIGELLA.—(Love in the Mist.)—Hardy annuals, about one foot in height, finely cut leaves and handsome flowers. Blooms early. A very pretty flower, and one our customers should try. Double flower, blue, white and purple, beautifully veiled and feathery, delicate appearing foliage. Pkt. 4c.

FAIRY ROSE.

MIRABILIS.—(Marvel of Peru, or Four o'clock.)—Mixed Colors.—This is one of the most showy annuals presenting a most gorgeous sight during the afternoon. Many colors, Pkt. 3c.

Tom Thumb Mixed.—Very handsome, compact dwarf, bushy plants with elegant golden-variegated foliage; numerous brilliant flowers pure yellow, deep red and striped and blotched. Pkt. 5c.

NICOTIANA.—Affinis.—Of all varieties of tobacco which are grown for their sweet scented flowers this is the best. The plant is literally covered with large, white star-shaped flowers, which after being cut, will remain perfect for a week. Will perfume the whole yard or garden. Pkt. 5c.

NASTURTIUM.—These may be classed among our most beautiful and showy annuals. They are of very easy culture, and make a continuous show of bloom. The following are the best dwarf varieties:

Aurora.—A magnificent variety of new color. The plant forms a perfect globe and is literally covered with flowers, completely hiding the foliage when in bloom. The flower is of deep chrome yellow, the lower petals blotched with purplish carmine and beautifully marked with bright carmine veining. Pkt. 5c, oz. 10c.

Beauty.—An extra fine dwarf variety, having handsome scarlet flowers splashed with canary yellow. Pkt. 5c, oz. 10c.

Tom Ponce.—A distinct class of trailing habit bearing brilliant little scarlet, yellow and orange flowers, many of which are handsomely marbled with contrasting shades. Very desirable for growing in baskets or vases. A good winter bloomer. Pkt. 5c, oz. 20c.

TOM THUMB MIRABILIS.

Dwarf Chameleon.—The flowers of this new Tom Thumb Nasturtium are in color crimson, gold and bronze, bordered and flamed, changing in hue almost daily, hence its name "Chameleon." No variety could be more satisfactory. Pkt. 5c, oz. 15c.

Golden Queen.—Foliage is of clear, bright yellow color. The plant is of dwarf, compact habit; flowers yellow. Pkt. 5c, oz. 15c.

Empress of India.—Of dwarf, bushy habit, the leaves of a dark, purplish blue color, making a suitable background for the brilliant scarlet-crimson flowers. Its profusion of bloom and richness of color are remarkable. Pkt. 5c, oz. 15c.

Ladybird.—Of dwarf neat, compact habit of growth. Flowers rich golden yellow, each petal barred with ruby crimson. Pkt. 5c, oz. 10c.

King Theodore.—The darkest color in dwarf nasturtiums, deep scarlet maroon. Pkt. 5c, oz. 15c.

Pearl.—Charming dwarf white variety. Pkt. 5c, oz. 10c.

Dwarf Lilliput.—A most charming and distinct new strain of very dwarf compact growth that originated from the tall *Tropaeolum Lobianum*. Plants are of smaller size than the well-known *Tom Thumb Nasturtium*, growing in closely compact form, while the flowers and rounded light green leaves are also smaller in size. The perfect flowers are so numerous that they come through the foliage in clusters, embracing many new and beautiful colorings. Pkt. 5c, oz. 20c.

Imperial Mixed.—Includes about twenty of the dwarf varieties, selected from both American and foreign growers. The varieties are so selected that the colors harmonize beautifully and delight flower lovers, as they are of neat, compact habit of growth, and bloom freely when planted in beds, producing a mass of colors. Pkt. 5c, oz. 15c, ¼ lb. 50c.

Dwarf Varieties Mixed.—A nice mixture of colors of this free blooming class. Each plant forms a small compact bush laden with bloom. Owing to the immense quantity we grow of this we are enabled to make a low price. Pkt. 3c, oz. 10c, ¼ lb. 20c, lb. 65c.

CLIMBING NASTURTIUM.—Caprice.—A charming novelty with flowers of changeable colors. A single plant frequently showing a dozen different colors or markings. Pkt. 10c, oz. 25 c.

Madam Gunter's Hybrids.—For richness and variety of colors these new hybrids have no equal among the nasturtiums. The foliage is mostly dark and contrasts very effectively with the flowers. They are climbers and free bloomers. Color of flowers is most gorgeous, ranging from white through all the shades of pink, red, carmine, crimson, salmon, golden yellow to the deepest brown and maroon—nearly black, all striped, shaded and blotched in an indescribable manner. Pkt. 5c, oz. 10c, ¼ lb. 35c.

King of the Blacks.—A very handsome climbing variety, with flowers of a very rich dark brown, almost black. Pkt. 5c, oz. 15c.

Spitfire.—A most brilliant new climbing variety of bright cardinal red. A most glowing color. Pkt. 5c, oz. 15c.

Napoleon III.—A beautiful climbing variety with golden yellow flowers, striped with rosy scarlet. Pkt. 5c, oz. 15c.

Tall Varieties Mixed.—Pkt. 3c, oz. 10c, ¼ lb. 20c, lb. 65c.

Lobb's Nasturtiums Mixed.—These are much superior to the ordinary tall Nasturtiums in brilliancy of flowers, height and rapid growth. Our mixture contains all the best named sorts. Pkt. 5c, oz. 15c.

Ivy Leaved Perfection.—This unique and most beautiful climbing Nasturtium is different from all others in foliage and flower. Plants of running growth, star-like leaves of rich green veined with white. Flowers are of medium size, intense glowing scarlet in color, and of most distinct form. Pkt. 10c, oz. 30c.

Jupiter or Sunlight.—Attracts instant attention by the great size, exquisite form and rich color of the flowers. The flowers measure 3¼ to 3½ inches in diameter, the petals 1¼ inches across. The blossoms have a most beautiful crinkled crepe like look; color is a splendid, rich brilliant yellow. Pkt. 5c, oz. 15c.

IMPERIAL MIXED NASTURTIUMS.

EMPRESS OF INDIA NASTURTIUM.

PANSIES.

INTERNATIONAL MIXED.

CASSIER'S GIANT ODIER.—Flowers of immense size, and are of the popular Odier type, being all three-spotted or five spotted on backgrounds of very rich colors. The flowers of the Cassier's are of good substance and fine form, while the plants are of most compact growth. Pkt. 15c.

MAMMOTH BUTTERFLY.—A strain of pansy of matchless forms, colors and markings with flowers half as large again as ordinary pansies. Pkt. 10c.

VIOLET SCENTED.—This new type is a cross between the pansy and violet. Flowers are much larger than the violet, more like pansies, but with the delicious fragrance of the former; mixed colors. Pkt. 15c.

PEACOCK.—This fine new variety has been named the Peacock because the upper petals of the flower resemble in color the peculiar shade seen only in feathers of the peacock, a beautiful ultra marine blue. Petals are edged with a thin white line, within which it is purplish crimson, passing into a rich central blotch of blue, shading to black. Pkt. 10c.

INTERNATIONAL MIXTURE.—In almost every country in the world there are pansy specialists, notably those of Scotland, Belgium, France, Germany and Switzerland. Each have their idea of perfection. This mixture consists of a grand assortment from the world's leading growers. Also many choice American strains, which are mainly made up by selecting and crossing the foreign sorts. If you like pansies you must have the International Mixture. Pkt. 20c; ¼ oz. \$3.00; oz. \$10.00.

IMPERIAL GERMAN MIXED.—Magnificent flowers of richest hues; one of our most popular sorts and of a high standard of excellence. Pkt. 10c; ¼ oz. \$1.00; oz. \$3.50.

LARGE FLOWERING MIXED.—Pkt. 7c. oz. \$2.75.

FINE MIXED.—Of many good sorts. Pkt. 5c; oz. \$1.00.

COLLECTION.—One packet each of the above sorts for \$1.75.

IMPROVED MADAM PERRITT OR WINE SHADES.

POPPIES.

This grand old flower has kept pace with the march of improvement, and now comes around and surprises us with its new forms, new sizes and new colors.

ROSY MORN.—This new poppy is really superb. The flowers are extremely double and of good size, forming perfect balls of a unique and beautiful shade of rose—a new and distinct color in poppies. It is of the easiest possible culture, belonging to the annual peony flowered section. Pkt. 7c.

SHIRLEY.—A new single. In color from the purest white through the most delicate shades of rose, pink and carmine to the deepest crimson. Pkt. 5c.

AMERICAN FLAG.—Flowers extra large, very double, snow white, bordered with scarlet, thus making an extra choice, very showy variety, that should be very popular. Pkt. 5c.

DOUBLE CARNATION.—A splendid assortment of the best double carnation flowered sorts. The most popular variety, and will make an attractive bed. Pkt. 5c.

ANNUAL VARIETIES MIXED.—Pkt. 3c.

ORIENTAL HYBRIDS.—For brilliancy of color there is nothing to equal these Oriental Poppies. The flowers are of enormous size, often measuring over 6 inches in diameter, while the colors range from soft flesh and rose to the most brilliant dazzling scarlet and richest maroon purple. Their culture is as simple as that of the garden poppies. They are perfectly hardy perennials, living through our winters with but little protection, and increasing in size and beauty every year. Pkt. 10c.

ICELAND.—These poppies produce flowers the first year from seed. The colors range from the purest white to the deepest orange scarlet and have a delicious fragrance. For vase and house decorations they rank among the loveliest. Pkt. 10c.

SCABIOSA. (Or Mourning Bride).

Double Dwarf Mixed.—A handsome summer border plant, producing in great profusion very double flowers in a variety of shades and colors—pure white, yellow, red, lavender, black, etc. Fine for bouquets and keep a remarkably long time. Pkt.

PANSY PLANTS.

Extra large, strong healthy plants from the best quality of seed, 50c per doz. Smaller size 25 cents per dozen.

IOWA SEED COMPANY'S SINGLE AND DOUBLE PETUNIA.

PHLOX DRUMMONDI.—If we could have but one flower for our garden that one would be the Phlox. Its brilliant shades of color, ranging from clear white to brilliant scarlet, make an almost dazzling show; continually in bloom if cut freely.

Fire Ball.—Brilliant, dazzling scarlet; very handsome dwarf, compact. Pkt. 5c.

Grandiflora Alba.—Pure white, very large flowers, constantly in bloom. Pkt. 5c.

Cuspidata or Star.—Petals run out like little spines, thus giving the flowers a beautiful effect. Many colors. Pkt. 10c.

Double Pearl.—A grand variety, introduced by us in 1888. By constant selection we have improved it so that almost every plant produces handsome, double, pure white flowers. It is very pretty, and will prove a splendid acquisition for bouquet work. Pkt. 10c.

Grandiflora Mixed.—This special large flowering strain has been selected with great care for many years, until we now have an ideal flower of immense size and for beauty of color they are unsurpassed. The colors range from the purest white to nearly black, including all shades of pink, red, violet, crimson, purple, yellow, blue, scarlet and brown, striped and blended in an indescribable manner. Pkt. 8c.

Jubilee.—A decided novelty, being an entirely new color in Phlox, a bright yellow; flowers nearly the size of a twenty dollar gold coin. Pkt. 8c.

Fringed Mixed.—Very handsome. The flowers are of the most velvety colors and handsomely fringed. Pkt. 7c.

Mixed Varieties.—A mixture of the common varieties. Pkt. 5c.

Perennial Mixed.—Splendid hardy plants which bloom continuously after the second year. Pkt. 5c.

PORTULACA.—Grandiflora Single Mixed.—This old favorite is brightest in the hot, dry weather, when other flowers are drooping. They are of almost every conceivable shade of color. Large flowered. Pkt. 3c.

Double Mixed.—Very handsome, double as a rose, contains colors and shadings unknown in the single. Our seed is extra choice and will produce sixty to seventy-five per cent of flowers as double as the most perfect rose. Pkt. 10c.

RICINUS.—(Castor Oil Plant.)—Cambogiensis—This beautiful plant grows to a height of 3 feet, and of most stately, majestic tropical appearance, Large palm-like leaves of darkest reddish maroon, covered with a bright bronzy lustre, while the main stalk and leaf stems are ebony black. Leaves have large red veins which add to the beauty. The fruit is fiery red. It is unexcelled as a decorative plant for lawn or garden. Seed will always be scarce and high. Pkt. of ten seeds 10c.

DOUBLE PORTULACA.

Zanzibarensis.—Grows to a height of 12 to 14 feet, with leaves 2 to nearly 4 feet across. A handsome specimen plant for lawns. The different varieties included in our mixture have light and dark green leaves and some of coppery bronze, changing to dark green, with reddish ribs. Pkt. 5c.

Sanguineus Tricolor.—Blood red stock; foliage reddish bronze with scarlet seed pods. Very attractive. Pkt. 5c.

All Varieties Mixed.—Contains a choice assortment. Pkt. 4c.

RHODANTHE.—Maculata.—One of the finest and most beautiful of everlastings. The flowers are of various colors. For winter bouquets the blossoms should be gathered before fully expanded, and if dried in the shade will retain their brilliancy for years. Rosy crimson with bright yellow center. Pkt. 5c.

PETUNIA.—Surely there is no garden complete without a bed of elegant petunias. They commence flowering early and continue a mass of bloom throughout the whole season, until killed by a frost; easily cultivated, requiring rich soil and a sunny situation.

Grandiflora Mixed.—Very large, elegant flower; a great improvement and fully twice the size of the old sorts, with the most beautiful shades of crimson, white, rose, maroon, etc., blotched, striped, veined, bordered, marked and fringed. Pkt. of 200 seeds 10c.

Giant Fancy Flowering.—A new strain and undoubtedly the handsomest of all. See novelties for description. Pkt. 25c.

Double Inimitable.—A splendid mixture. Our seed is the best German grown, and will produce large percentage of fine double flowering plants. Pkt. 25c.

Little Pet.—Round, bushy little plants about eight inches high, covered for months with beautiful flowers which are widely open and always look so fresh, bright and beautiful that the ladies "just love them." Most of the flowers have a distinct five-pointed star in the center and they are of a great variety of colors. Pkt. 10c.

Fine Mixed.—Best of older sorts carefully mixed. Pkt. 3c.

PYRETHENUM.—Golden Feather.—Beautiful golden leaved foliage plants of special value for borders and ribbon beds. Pkt. 5c.

Roseum.—It is from this that *Persian Insect Powder* is made. Flower large, yellow and rose colored. Pkt. 8c.

PRIMROSE.—Chinese.—One of the most desirable plants for growing indoors, being in almost constant bloom all winter, and if transferred to the border they will bloom nearly all summer. Though perennial, new plants flower more freely. Start seed under glass. Mixed colors. Pkt. 15c.

Forbesi.—*Baby Primrose.*—A wonderfully free blooming little plant, covered with a mass of small flowers especially during the winter. Pkt. 10c.

Obconica.—*Everblooming Primrose.*—A favorite on account of its great blooming qualities. Mixed colors. Pkt. 10c.

PASSION FLOWER.—A most desirable climbing plant. Sow seed early and if well cared for and seasons are favorable, vines will send out magnificent blossoms the first year, of pink, blue and white, very large and showy. Vines begin blooming when only one or two feet high, followed by golden fruit about the size of a hen's egg. If left in the open ground in winter it must have some protection. Pkt. 10c.

PLATYCODON.—(*Wahlenbergia.*)—A perennial plant blooming the first year from seed, which should be sown early in open ground. Flowers are of large size, 2½ to 3 inches in diameter, and of various shades of light blue, lavender and white. Pkt. 7c.

CAMBOGIENSIS RICINUS.

SET OUT A FEW GRAPE VINES THIS YEAR AND ENJOY FRUIT FROM YOUR OWN VINES.

SWEET PEAS.

May well be called America's favorite, as it is such a popular and easily grown flower that rich and poor alike can enjoy its fragrance and beauty. Out of nearly 200 varieties which we carefully examined on trial ground we selected the following as being the VERY BEST.

AMERICA.—Clear scarlet on a white ground. Pkt. 5c, oz. 10c, ¼ lb. 25c.

AURORA.—Extra large flowers, flaked and striped bright salmon on a white ground. Pkt. 5c, oz. 10c, ¼ lb. 20c.

BLACK KNIGHT.—Rich glossy blackish maroon. Immense bold attractive flowers borne in greatest profusion. Pkt. 5c, oz. 15c, ¼ lb. 40c.

DOROTHY ECKFORD.—The largest flowered white variety. A great bloomer. Pkt. 5c, oz. 10c, ¼ lb. 25c.

EMILY HENDERSON.—Earliest blooming, pure white variety. Pkt. 5c, oz. 10c, ¼ lb. 20c.

EMILY ECKFORD.—A superb large flower of rosy heliotrope purple color. Pkt. 5c, oz. 10c, ¼ lb. 20c.

EXTRA EARLY BLANCHE FERRY.—Earliest of all. An improvement on Painted Lady. Delicately handsome. Pkt. 5c, oz. 10c, ¼ lb. 20c.

GRAY FRIAR.—White clouded and dotted lilac. Decidedly odd and attractive. Pkt. 5c, oz. 10c, ¼ lb. 25c.

HON. F. BOUVERIE.—Pinkish salmon at base of standard and wings shading to light salmon and buff at edges. Pkt. 5c, oz. 10c, ¼ lb. 25c.

KING EDWARD VII.—A true giant-flowered variety, brighter than either *Mars* or *Salopian*; in fact, the best dark red in existence. Pkt. 5c, oz. 15c, ¼ lb. 40c.

LADY GRISEL HAMILTON.—Light lavender with azure blue wings. Pkt. 5c, oz. 10c, ¼ lb. 30c.

LOVELY.—The most beautiful shades of soft shell-pink, shading to very faint rose at the outer edges. Pkt. 5c, oz. 10c, ¼ lb. 20c.

MRS. WILMOTT.—Very large rich, orange, pink, shaded rose. Pkt. 5c, oz. 10c, ¼ lb. 25c.

SALVIA.

FINE MIXED.—A nice mixture for a very low price. Pkt. 2c, oz. 5c, ¼ lb. 15c, lb. 35c.

COLLECTION:—One packet each of above 28 varieties for 80 cents.

PERENNIAL SWEET PEAS.—(*Lathyrus*).—A very popular perennial variety wherever known and it should be more generally used. Mixed colors. Blooms second year. Pkt. 5c, oz. 20c.

SALVIA.—*Splendens*.—One of the most brilliant scarlet flowers; it thrives in any light, rich soil; often called Flowering Sage. Free bloomers. Very fine. Most satisfactory of bedding plants, especially for fall blooming. Pkt. 10c.

SALPIGLOSSIS.—One of the most beautiful of flowering annuals, forming strong, bushy plants, about 18 inches high, and bearing throughout the season large flowers 3 to 4 inches across, of many beautiful colors. Sometimes called Painted Tube Tongue.

New Variveined.—This is very much larger than the common Salpiglossis. The surface is soft and velvety and the wealth of color marvelous. The colors range from pure white to dark yellow, dark red and purplish black, including light and dark blue, velvety plum color, maroon, crimson, dark brown, golden and lemon yellow, white, dark purple, black, brilliant scarlet, with all the shades between, beautifully veined and mottled; blooms all summer till frost. Pkt. 8c.

IMPERIAL MIXED.—Sixty of the best varieties carefully selected so as to get the proper proportion of each color in the assortment. This makes the choicest mixture ever offered. Our illustration shows a bunch of the various colors and we are sure our customers will be greatly pleased with them. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

MRS. WALTER WRIGHT.—Of pinkish cream, changing to reddish purple; large. Pkt. 5c, oz. 10c, ¼ lb. 30c.

MRS. DUGDALE.—Standard rose, wings primrose, shaded and splashed rose. Pkt. 5c, oz. 10c, ¼ lb. 25c.

NAVY BLUE.—A great novelty and the darkest and truest blue of any variety in existence. A free bloomer. Pkt. 5c, oz. 10c, ¼ lb. 30c.

OTHELLO.—A beautiful dark brown chocolate red self-colored. Pkt. 5c, oz. 10c, ¼ lb. 20c.

PRINCE OF WALES.—A bright, self-colored, deep-rose flower of grand size and beautifully hooded form; frequently four on a stem. Pkt. 5c, oz. 10c, ¼ lb. 25c.

PRIMA DONNA.—A soft shade of bright rose-pink, with deeper coloring in center of standard and inner portion of wings. Pkt. 5c, oz. 10c, ¼ lb. 25c.

RAMONA.—Creamy white flower striped and flaked blush pink. Pkt. 5c, oz. 10c, ¼ lb. 20c.

ROYAL ROSE.—Beautiful clear rose. Pkt. 5c, oz. 10c, ¼ lb. 20c.

MAID OF HONOR.—Light blue on a white ground, edged with deep violet. Pkt. 5c, oz. 10c, ¼ lb. 25c.

CUPID MIXED.—Of dwarf growth. Flowers are pretty and freely produced. Mixed colors. Pkt. 5c, oz. 10c, ¼ lb. 25c.

BUSH VARIETIES MIXED.—Of distinct upright growth, forming a bush instead of climbing; many colors. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

PERFECTED MIXED.—Of graceful form, charming color, exquisite fragrance and simple loveliness. This mixture contains many choice new varieties and some old favorites. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

DOUBLE MIXED.—Saved from the best double flowered plants. Pkt. 5c, oz. 10c, ¼ lb. 30, lb. 85c.

PERPETUAL WHITE STOCKS.

SMILAX.—Considers the most beautiful of all vines for indoor growing, and specially valued by florists for decorating and floral work all times of the year. The seeds start slowly and should be planted in loose, rich soil, and kept moist and warm. Pkt. 8c.

SCHIZANTHUS.—*Fine Mixed.*—(*Butterfly Flower.*)—This is one of our prettiest summer blooming plants. It is of the easiest culture, growing quickly from seed, of excellent bushy form, and loaded with a profusion of rich and various colored flowers. The flowers frequently resemble butterflies, and are as beautiful and curious as expensive orchids. Per pkt. 5c.

SWEET SULTAN.—*Giant Flowering Mixed.*—Very large, 3 to 4 inches across, and most deliciously fragrant—the color of the flowers are infinitely varied from glistening white through shades of red to royal purple. Pkt, 10c.

SCARLET RUNNER.—A valuable climbing vine, belonging to the bean family, having bright scarlet flowers and pods; very showy as a climber, also valuable for table use. Pkt. 5c, ½ pint 20c.

ARABIAN RUNNER.—A beautiful variety of the above with striped scarlet and white flowers. Pkt. 5c, ½ pint 25c.

SWEET WILLIAM.—*Single Mixed*—One of the best edging plants for the border, bearing in early summer large heads of the richest, and most varied colors. Very fragrant. Perennial. Pkt. 5c.

Double Mixed.—Florets are finely double, brightly colored. Pkt. 5c.

STOCKS.—*Large Flowering Dwarf German.*—The most popular flower with our German customers. They are sometimes called Gilliflowers or Ten Weeks Stocks and are so fragrant, beautiful and easily grown that they deserve a place in every garden. Our mixture contains a great variety of colors. Pkt. 5c.

Perpetual White.—(*Princess Alice or Cut and Come Again.*)—Of strong growth, fine branching habit, and if sown early will bloom from May until November. Flowers very large and pure white, and the more they are cut the better they like it. Deliciously fragrant. Pkt. 10c.

SUNFLOWER.—*Globe of Gold.*—Dwarf, well branched plant growing about 3 feet high and each of its numerous branches carrying a medium sized, densely double globe shaped flower of rich, deep, golden yellow color, being veritable globes of gold. The most densely double of any sunflower. They are easily grown from seed and produce handsome, symmetrical plants, effective on lawns or in the garden. Pkt. 7c.

Excelsior Branching.—This new Sunflower caused great attention in Europe. Has a single flower five inches across producing a pyramid of bloom. Pkt. 10c.

Silver Leaved.—Leaves long and densely covered with long white hairs which give it a peculiar shining, silvery appearance. Flowers clear golden yellow, three to four inches across. Pkt. 5c.

Peerless Mixed.—A splendid assortment of fifteen of the best varieties grown together on our grounds. It includes some which are both curious and desirable. Pkt. 5c, oz. 15c.

Mammoth Russian.—Largest of all, quite showy and the most profitable to grow for feeding purposes. Per oz. 5c, lb. 25c.

SENSITIVE PLANT.—A very pretty and curious plant, the leaves closing when touched. The seeds start slowly, and it is best to start them in boxes. Always pleases the children. Pkt, 5c.

GLOBE OF GOLD SUNFLOWER.

THUNBERGIA.—*Mixed Colors.*—(*Black Eyed Susan.*)—Beautiful, rapid growing climbers for vases, trellises or rustic work. Flowers buff, orange, white, etc. Pkt. 5c.

TORENIA.—*Fornieri.*—Beautiful free flowering, trailing plants, well suited for baskets, vases, and in moist stipulations out of doors. A handsome plant, but not hardy. Pkt. 10c.

VERBENA.—The verbena is deservedly a universal favorite, unrivaled in the splendor of its dazzling brilliancy of flower. A constant bloomer and if grown from seed has a sweet fragrance. Start seed early in the house and it will bloom all summer.

New Century Mammoth.—Of most beautiful colors, largest flowers and largest truss of any verbena, and it is a variety which will please everyone. When well grown every flower truss measures over nine inches in circumference, while the single florets are as large as a twenty-five cent piece; more vigorous in growth than the ordinary verbena. Contains a great assortment of colors, the illustration showing a flower of dark scarlet with white eye. Pkt. 15c.

Candidissima.—Large trusses of pure white flowers; beautiful. Pkt. 8c.

Defiance.—A true scarlet; extra fine. Pkt. 10c.

Blue Mixed.—Desirable. Blue, purple and lavender varieties. Pkt. 10c.

Extra Choice Mixed.—From finest German collection of named sorts. Pkt. 7c.

Fine Mixed.—Contains a nice variety of colors. Pkt. 4c.

NEW CENTURY MAMMOTH VERBENA.

VINCA.—*Fine Mixed.*—(*Periwinkle.*)—A very pretty, free flowering perennial with shining green foliage and beautiful flowers. Pkt. 5c.

VIOLA.—*Odorata.*—The well known sweet violet. All colors mixed. Seeds start very slowly. Pkt. 10c.

WISTARIA.—One of the most popular hardy vines, climbing to a height of fifty feet or more. It is perennial and easily grown from seed. Of luxuriant and rapid growth, bearing in the spring immense panicles of purple flowers produced in great profusion. Pkt. 10c.

WALLFLOWER.—Greatly prized for their exquisite fragrance. They grow in long, brilliant colored spikes of flowers. Plants removed to pots in autumn will produce an abundance of delightfully fragrant flowers of many choice colors. **Double Varieties Mixed.**—Pkt. 10c.

Single Varieties Mixed.—Best single and semi-double varieties. Pkt. 3c.

Early Flowering Mixed.—Flowers early the first season from seed, blooming in profusion from early in June until late autumn frosts without injury. The blossoms are large size and borne in compact short spikes or clusters and are exceedingly sweet scented. Are also hardy and bloom well the second year. Colors range from yellow to dark brown, striped, etc. Pkt. 8c.

THE GOLD AND SILVER FLOWER IS A CHARMING NOVELTY. TRY IT THIS YEAR.

WILD CUCUMBER.

WILD CUCUMBER.—A well known vine common in many sections, and the quickest climber known for covering verandas, old trees and houses, trellises, etc., never suffering from the heat, but retaining its fresh and lively green color; never infested with insects; very profuse in bloom. It reaches a height of 30 feet in one season. It is covered with clusters of white, sweet scented flowers, followed by an abundance of ornamental prickly seed pods. It will reproduce itself from self-sown seed every year. Pkt. 5c, oz. 20c.

ZINNIA.—Strong growing, hardy and elegant plants, rivaling the dahlia in size and doubleness, while the colors are bright and varied, ranging from white to deep, purplish crimson. Splendid for hedges, beds and borders.

Pigmy, or Lilliput.—This strain is the acme of beauty and perfection in zinnias. Plants small and of bushy growth, each one bearing scores of beautiful little blossoms of the most perfect shape and brilliant colors, from pure white to very dark orange purple, crimson and vermilion. Mixed colors. Pkt. 7c.

Curled and Crested.—An unique and charming variety with petals oddly curled and crested in fantastic contortions and graceful forms. Many colors. Pkt. 5c.

Finest Double Mixed.—Pkt. 3c.

Zebra.—Beautifully and brilliantly striped with rich colors. There are always some which do not produce striped flowers. Pkt. 5c.

AFRICAN WATER LILIES.—These have been quite popular during the past few years. They are easily grown and bloom in three or four months from the time of sowing seed. Persons having no pond should sink half barrel in the ground. Directions for growing sent with seed. Mixed colors, red, white and blue. Pkt. 10c.

XERANTHEMUM.—Free flowering and easily grown, making a handsome bed. All kinds mixed. Pkt. 10c.

CHINESE HORN NUTS.—A large and most singular appearing nut, resembling buffalo horns, which is known botanically as *Trapa Nutans*. It is a native of China, and is largely used as a food there and in some parts of southern Europe. It is a swamp plant and can be grown in a jar of water, but it is better to have some dirt at the bottom. The growth is quite interesting and rapid and they produce pink single flowers. Can be grown in an aquarium. They are always of poor vitality and are sold mainly as curiosities. These nuts have been sold at the World's Fair and elsewhere at 10c to 25c each. We offer Packets of 3 nuts for 10c.

CHINESE HORN NUT.

Popular Collection.

Consists of one packet each of

Sweet Alyssum, Aster, Balsam, Candy-tuft, Convolvulus, Cypress Vine, Canna, Cockscomb, Dianthus, Larkspur, Ice Plant, Nignonette, Nasturtium, Petunia, Pansy, Poppy, Phlox, Sweet Peas, Sunflower and Zinnia.—Total 20 Packets for 50 Cents.

SPECIAL MIXTURE OF FLOWER SEEDS.

Many persons derive pleasure from watching the growth of a varied bed of flowers, entirely out of the usual trim garden style, while others desire a much more extended collection than their means will permit. To both of these classes the following special mixtures will appeal:

MIXTURE OF FRAGRANT ANNUALS.—Carefully made up from seeds of fragrant flowers only. A bed of these will give rich perfume throughout the day and evening while some of them are also suitable for cutting. Pkt. 10c.

MIXTURE OF CLIMBERS.—This is a liberally filled packet of seed of many beautiful annual climbers suitable for growing together. Pkt. 10c.

LOW GROWING ANNUALS.—This mixture contains seed of a great variety of low growing annuals, few of which exceed four to six inches in height, and which, sown in beds or borders, present the appearance of Turkish rugs, carpeting the ground in their wide range of colorings and forms. Pkt. 10c.

FLOWERS FOR BOUQUETS.—This mixture embraces seeds of annuals producing flowers suitable for cutting and for bouquets, nearly all of them having long stems. Planted in a section of the garden this will furnish a constant supply of cut flowers. Pkt. 10c.

INTERNATIONAL NOVELTIES MIXED.—Each year we make a grand test of floral novelties, obtaining seed therefor from all parts of the world, and our trial fields exhibit a truly magnificent display of flowers never before grown here. A few of the new varieties did not do well with us, but they may prove valuable in other climates or on different soils; by far the larger number are valuable acquisitions which we would like our customers to try. We have saved seed of most varieties, but instead of listing them in catalogue separately at 10c to 25c per pkt. we have decided to mix them all together and offer our customers this grand assortment at the low price of 10c pkt.; 3 for 25c.

LAWN FLOWER MIXTURE.—A special mixture of low growing, quick blooming flowers, very desirable for sowing with Lawn Grass Seed in the spring. They come up quickly, afford shelter for grass seed and will bloom by the time the grass requires cutting the first time. Also desirable for sowing on an old lawn very early in the season. Price per ounce package only 25c.

MIXED GRASSES.—A mixture of the ornamental grasses suitable to grow in masses. Makes a striking as well as useful collection. Valuable for making up into winter bouquets. These should be cut just as they come into bloom and dried in the shade. Very useful for working up with the everlastings into winter ornaments; they lend a grace and beauty not obtainable without them. Pkt. 5c.

All of the above mixtures are carefully prepared from choice fresh seeds, and cannot fail to give satisfaction. The packets are liberally filled, and in no other manner can so many seeds be obtained at such light cost.

TEACH THE CHILDREN TO LOVE NATURE BY GIVING THEM A FLOWER GARDEN THIS YEAR.

FLOWER PLANTS.

It is now just twenty-two years since we purchased a range of greenhouses and during the past few years we have entirely rebuilt them adding greatly to their size. Our trade has been so large during the past year that we have been obliged to erect seven additional greenhouses which now gives us the largest amount of glass of any concern in Central Iowa. We employ experienced florists to look after this branch of our business and all their time and attention is devoted to growing flower plants and bulbs exclusively for the mail order trade, as for this purpose they require special culture in greenhouses kept at a low temperature so that they will be hardy, healthy and vigorous. Plants grown in the high temperature at which most florists are obliged to keep their houses in order to produce cut flowers, grow so rapidly that they are soft, succulent and not fit for sending through the mails. The common hot-house grown plants are ill prepared to stand shipment or the great change of temperature to ordinary house culture or outdoor bedding. We are filling orders constantly from every state and also from various parts of Canada, Mexico, etc. Our system of packing is so very complete that plants arrive in almost as perfect condition after traveling many hundreds of miles as they were when packed.

Terms and Discounts.—At prices named we send plants postpaid except where noted. Orders must amount to at least 25c. We will furnish plants amounting to \$1.20 for \$1.00, \$2.50 for \$2.00, \$7.00 for \$5.00.

IOWA SEED COMPANY'S 31 GREENHOUSES.

Special Express Rates.—All express companies now carry plants at a reduction of 20 per cent from regular merchandise rates. If you wish your plants sent by express we will put in gratis a few extra plants to help pay the charges.

Notice.—We ship all plants as soon after order is received as weather permits. Bedding plants we will hold until usual season for setting out. If plants are ordered for immediate shipment they will be sent at purchaser's risk.

AGERATUM.—Princess Pauline.—A most distinct and novel variety, of dwarf, compact habit, rarely exceeding five inches in height, its peculiarity being that both colors, blue and white, are combined in the same flower. This pretty variegation gives the flower a most charming appearance, and it is one of the most distinct and beautiful new bedding plants now on the market. It is free flowering the entire season and very bright and pretty. Each 10c, dozen \$1.00.

White Swan.—A beautiful pure white variety, having large clusters of pretty flowers, very desirable for borders or bedding. Each 10c, dozen 75c.

Stella Gurney.—Color a deep even blue and literally forming a sheet of bloom all summer. Dwarf and compact in growth. Each 15c dozen \$1.25.

ANTIGONON.—This splendid climbing plant is sometimes called "Queen's Wreath," or "Mountain Rose." It is a rather rapid grower, and produces long racemes of handsome carmine colored flowers which somewhat resemble bunches of grapes; flowers are produced in great profusion from June until frost. Strong plants each 15c.

ASPARAGUS PLUMOSUS NANUS,

ABUTILION.—Golden Fleece.—The best yellow variety; of dwarf habit. Each 15c.

Thompsonii Plena.—Instead of a single bell-shaped bloom, like all other kinds, this has a perfectly double flower of a rich deep orange color, shaded and streaked with crimson. Foliage handsomely variegated. Each 15c.

Erecta.—Color pink, changing to orange. Each 10c.

ACHYRANTHES.—Bright colored foliage plants, used largely for bedding with coleus; several varieties. Each 10c, doz. 75c.

ALTERNANTHERAS.—Bright colored dwarf growing foliage plants, largely used for carpet bedding, borders, etc. Four varieties. Each 10c, doz. 75c.

ARTILLERY PLANT.—A neat pretty plant, resembling some of the ferns. Its graceful habit makes it very desirable for baskets and vases. Each 10c.

ASTERS.—All the best varieties mixed. Our price is low and it will pay you to have a fine bed of asters this year. Doz. 75c, 100 for \$3.00. Charges prepaid.

SWEET ALYSSUM.—Variegated.—A charming little novelty, the flower having all the sweet grace and beauty of the common sweet alyssum, being pure white and produced in numerous spikes which cover the plant. Quite fragrant. It has the further advantage of beautifully variegated green and white foliage and is attractive for borders, bedding or pot culture. Each 10c, doz. 90c.

Single White.—Nice little pure white flowers. Each 10c, doz. 60c.

Double.—Very desirable for either pots or bedding. Each 10c, dozen 75c.

ASPARAGUS.—Sprengeri.—A splendid new plant for hanging baskets or pots. It droops most naturally, sending out numerous feathery fronds which in a short time make a growth of 3 to 6 feet forming an exquisitely handsome and striking picture. It produces small white flowers which are succeeded by red berries. A well established plant is literally a mass of emerald green. Nice young plants each 10c, large size, each 25c.

Plumosus Nanus.—One of the handsomest of our foliage plants for pot culture, beautiful the year round, and there is no more decorative plant in the entire list. Easily grown even in a north window. Leaves are bright green gracefully arched, as finely woven as the finest silken mesh; their lasting qualities, when cut, are remarkable, retaining their freshness for weeks. Each 15c, large 25c.

ABUTILION.—Savitzki.—One of the most beautiful new variegated-leaved plants in existence. Its large maple-like leaves are almost white, being blotched here and there only with clear, bright green, a most charming contrast, heightened still more by the very large, orange-colored, bell-shaped flowers with which the plant is always covered. Each 15c, 4 for 50c.

THE EXTRA PLANTS WHICH WE SEND FREE WITH EACH ORDER SHOULD PROVE GRATIFYING.

VERNON BEGONIA.

ARAUCARIA.—Excelsa.—This beautiful plant resembles the pine somewhat in appearance, though much finer in texture, and is particularly adapted to table decoration. It is most unique in appearance. Its deep green feathery foliage arranged in whorls—rising one above the other at regular distance makes it a plant of rare value for house or conservatory decorations. Must be sent by express; too large to mail. Each \$1.00, \$2.00 and \$3.00.

BROWALLIA.—Mammoth.—The most beautiful of all the Browallias. The plants grow only about a foot high, forming dense little bushes, which are covered with an abundance of the most delightful sky blue flowers. For beds, borders or pots there is hardly another plant with blue flowers that compares with it. Each 15c; doz. \$1.25.

BRYOPHYLLUM.—(Sprouting Leaf.)—A most curious plant. The leaves are thick and heavy and when cut and placed in moist soil little plants start from the notches in them and make strong plants in a very short time. Flowers look like long green, red striped pods, through which breaks a pointed tube of a dull red shade. Each 15c.

BOUARDIA.—Alfred Neuner.—This magnificent and showy plant is the ideal Bouvardia. It is an erect, strong grower, making charming shaped plants, producing great clusters of the most beautiful waxy, double, pure white flowers, resembling bunches of miniature tuberoses. It blooms well during the summer, beginning early in July, but its greatest value is for winter flowering. Each 20c.

CHENILLE PLANT.—(Acalypha Sanderii.)—A most striking ornamental plant of branching habit, healthy foliage and the flower spikes which appear in pairs from the axis of the leaves, grow from two to three feet in length. They are of a bright crimson color, drooping and mixing among the green foliage with charming effect. Desirable both for outdoor bedding and in house for winter. Ea. 15c.

CHENILLE PLANT.

CUPHEA.—Platycentra.—This is the old-fashioned Cigar Plant, with narrow tubular scarlet flowers, tipped with purple; always in bloom. Each 10c.

BUTTERCUP.—Double.—A dainty little novelty. The flower is from one-half to three-fourths inches in diameter, perfectly double and of a peculiarly shining bright yellow color giving it an appearance as though varnished, and blossoms are produced in the greatest profusion. The ladies as well as children go into ecstasies over them. Each 10c, doz. \$1.00.

COBOEA Scandens.—A well known summer climber. Foliage green; large, purple, bell-shaped flowers. Each 15c.

ANTHERICUM.—Picturatum.—The leaves are deep green, broadly striped with pure white. Bears many spikes of small, star-like flowers. Each 10c.

REX BEGONIA.

ARAUCARIA.

BEGONIA.—Vernon.—Of unusual value for bedding, as it will stand the hot summer sun. Flowers are of pink, blush and brilliant red color; the foliage is very abundant, deep and glossy, and of a fine green color, spotted and margined with bronze purple. Each 10c, doz. 90c.

Tuberous Rooted.—Giant flowered, tuberous rooted begonias have been brought to wonderful perfection. Flowers sometimes grow six inches in diameter, borne upright on stiff stems and of richest colors, embracing every shade—white, rose, pink, red, scarlet, crimson, maroon, lake, yellow and orange. Each 10c, doz. \$1.00.

Double Tuberous Rooted.—Very handsome. Each 15c. doz. \$1.50.

McBethii.—Foliage fern-like. Panicles of pure white flowers produced in the greatest profusion. It is the most persistent bloomer of the begonias. Each 10c.

Profusion.—A new French variety of vigorous growth. Flowers are bright pink, produced evenly all over the plant. Each 15c.

Fournaise.—Flowers produced in large drooping panicles, bright red. Each 10c.

Alba Picta.—Leaves of a glossy green color, thickly spotted with silvery white. Flowers white. Ea. 15c.

TUBEROUS ROOTED BEGONIA.

Metalica.—This elegant variety has very large leaves shaded with green, crimson and olive, with a peculiar metallic luster over all. Flowers a clear pink, shaded with white. Each 10c.

Rubra.—This fine variety is a constant bloomer. Heavy, waxy green leaves. Flowers rosy scarlet. Each 10c.

Semperflorens Gigantea Rosea.—A superb variety, very strong and upright. Large cardinal red flowers. Each 15c.

Argentea Guttata.—Purple bronze leaves with silvery markings. The flowers are white. Each 10c.

Madam de Lesseps.—Has very large leaves of silky texture beautifully spotted with silver. Flowers pink and white. Ea. 15c.

Majorie Daw.—A beautiful trailing variety; its bright salmon pink flowers are produced in broad panicles. Bright green "angel wing" leaves. Each 15c.

Miniata.—A beautiful variety of upright bushy style of growth; flower bright scarlet. They are very free flowering. Each 10c.

Rex.—The Rex, or King Begonia, may well be called the king of foliage plants and they make a magnificent showing with their rich lustrous tints and tropical looking leaves. We have ten of the choicest varieties. Each 20c. Large specimen plants 40c.

Louise Erdody.—This is one of the finest of the Rex class. Each 20c. Large specimen plants 50c.

BOUGAINVILLEA.—This beautiful flowering variety is very popular. It is of strong and rapid growth and the brilliant, rosy crimson blossoms are produced from early in March until midsummer; in fact, a plant will frequently flower the greater part of the year. Altogether, it is a most desirable subject for the conservatory or window garden. Each 25c.

ALFRED NEUNER BOUARDIA.

CARNATIONS.

Fragrant flowers are always sought after, and the rich, spicy odor of the carnation, combined with its various colors, leaves little to be desired. Easily grown and bloom freely.

Enchantress.—A charming variety of immense size and delightful blush pink color. Illustrated on our floral plate. See page 75. Each 15c.

Prosperity.—Unquestionably the largest carnation of any color ever offered, the flowers measuring 4 inches in diameter and have a delightful clove fragrance. The color is a pure white, overlaid with shadings of soft pink. Each 15c.

McKinley.—A large, handsome flower of clear, beautiful shining pink, very showy and attractive, either for wearing or for vases. Blooms early and constantly and the flowers are of fine spicy fragrance. Each 15c.

Roosevelt.—One of the richest, deep velvety crimson flowers ever sent out. The color is so deep that it shades into maroon, and is of such good shape and color that it is sure to be popular. Each 15c.

Gold Standard, or Golden Beauty.—A novelty and by far the best yellow carnation ever sent out. Flowers extra large, three inches in diameter, well filed and double to the center. Color is a beautiful clear lemon yellow, slightly tipped with pink. Very fragrant. Each 15c.

Improved American Flag.—This improved sort is of a very strong, robust growth, a profuse bloomer, bearing its large flowers almost continuously. The showy flowers are pure white, elegantly striped with bright scarlet. Delightfully fragrant. Each 10c.

Estelle.—This is considered the finest of all bright scarlet varieties, of intensely bright shade, showing no tendency to fade. Nearly every shoot sends up a flower, and stems are long, holding the blooms upright. Each 10c.

White Cloud.—Unquestionably the finest bold handsome white we have to date; the flowers are large, well built, with good calyx and extra fine strong stem; plant strong and very vigorous, producing flowers very freely. Delightfully fragrant. Each 10c.

Mrs. Thomas W. Lawson.—The immense pink variety for which \$30,000.00 was paid by Mr. Lawson, the highest price ever paid for a plant novelty in this country. Flowers 3½ inches in diameter; color beautiful deep pink. Each 15c.

Guardian Angel.—Bright, clear pink color, nicely fringed; large size and very fragrant. Each 10c.

Jubilee.—Color intense scarlet of richest shade. One of the largest among reds; flowers full and well built; free continuous bloomer. Each 10c.

Flora Hill.—Considered by florists the best pure white variety. Flower is of enormous size and of rounded build; wonderfully free in bloom; good calyx. Each 10c.

Mrs. M. A. Patten.—A beautiful new striped Carnation. Ground color white with pink stripes. A very attractive flower. Large size with long stem. Sweet, spicy odor, habit ideal; has a grand constitution and makes a fine plant in the field. Each 15c.

Queen Louise.—Flower pure white, fragrant and of large size. Center well filled, rounding the flower to a most pleasing form. The color is very pure, stem exceptionally long. Each 10c.

Flamingo.—From all reports now coming in Flamingo has proven all that was claimed for it last season. Flowers of brilliant scarlet and hold color under all conditions. As a producer it will be hard to equal as it is an early, free and continuous bloomer, every shoot producing a flower on strong stems. Each 15c.

Vesper.—Pure white. Blooms three inches and over in diameter; beautifully fringed; very fragrant; exceedingly free blooming; early and continuous; very healthy and vigorous; stems stiff. Each 15c.

Gov. Wolcott.—Taken as a standard of excellence for white carnations. Flowers large, stems long and stout and habit of growth perfect. Each 10c.

McKINLEY DAY COLLECTION.

One plant each of McKinley, Roosevelt, Prosperity, Gold Standard and Improved America Flag for only 50c.

MRS. POCKETT
CHRYSANTHEMUM.

Pink Ivory.—A sport from and identical with Ivory in every respect except color, which is a beautiful shell pink. Each 15c.

Mrs. Perrin.—Wonderfully clear, bright pink, the brightest shade of pink yet produced in Chrysanthemums; globular, incurved form with satiny finish. Each 10c.

Christmas Eve.—The latest of all white Chrysanthemums. Flowers of immense size borne on long stems, and very desirable both as a pot plant and for cutting, as they are good keepers. Each 15c.

Timothy Eaton.—A globular Japanese incurved variety of perfect form and growth. Color pure white when fully developed. A prize winner at all shows last fall. Each 15c.

Geo. W. Childs.—A popular variety for pot culture. Color crimson. Each 10c.

White Ostrich Plume.—An exquisitely beautiful variety with grand pure white flowers of globular form; petals broad and lasting and thickly covered with fine downy hairs so much admired. Strong and vigorous plant. Each 15c.

Louis Boehmer.—Like above, but of a deep pink color; very fine. Each 15c.

HARDY POMPON CHRYSANTHEMUMS.

These small 'Mums are popular again; perfectly hardy; give showers of bloom after most other flowers are gone.

Attila.—Light apricot, tinted rose. **Delicatissima.**—Lower petals pale pink, center deep wine. **Little Bob.**—Small red flowers, very free **Snowdrops.**—Pure white. **Utah.**—Light magenta; edged and tipped white. Ea. 10c, doz. 75c

Willow Brook.—Early; profuse bloomer, pure white. Each 10c

McKINLEY CARNATION.

CHRYSANTHEMUMS.

These are now, and deservedly, the most fashionable of all autumn flowers. All these varieties are excellent for pot culture, and the best of their class.

Mrs. Pockett.—Deep canary yellow. Long, rather narrow reflexing florets. The most lovely flower it is possible to imagine. Large size and healthy growth. Each 15c.

Wm. H. Lincoln.—A magnificent golden yellow variety with straight, flat spreading petals. If you want an extra fine specimen plant, this is the variety. Each 10c.

Major Bonaffon.—Bright, clear yellow; the best for all purposes. Produces flowers 6 to 7 inches across, on straight, stiff stems of good length. An ideal Chrysanthemum. Each 15c.

Geo. S. Kolb.—A very pretty early white sort; dwarf, with nice, stiff stems. Fine for sprays. Each 10c.

Col. Appleton.—If you only have one yellow 'Mum,' let it be Appleton. It is a perfect model. Dwarf, stiff stemmed, elegant in foliage, enormous in bloom, finely incurved and golden yellow. Perfectly healthy. Each 15c.

Glory of the Pacific.—The earliest flowering light pink variety, being ready to cut October 8th. Has stiff, strong stem; excellent foliage. Dwarf and fine for pot culture. Each 10c.

Mrs. Henry Robinson.—A perfect form of exceptional merit, large and well finished, medium early white, blooming with us October 5th. Fine substance; very lasting. Each 10c.

Golden Wedding.—Of a rich golden yellow color; intensely dazzling; flowers 10 to 12 inches in diameter, petals broad and long, double to center. Ea. 10c.

Silver Wedding.—Very much like the above, but of pure silvery white. A grand novelty. Each 15c.

Willow Brook.—Early; profuse bloomer, pure white. Each 10c

WHITE OSTRICH PLUME.

CYCLAMEN.

feet high can be produced with little difficulty, and which for two or three months in the summer will be covered with delicate soft pink flowers. Each 20c.

CHRISTMAS PEPPER.—Surprisingly pretty house plant. Makes a round compact bush twelve to fifteen inches in height with dark olive green leaves and covered with curious little heart-shaped fruits of various bright colors—purple, white, yellow, orange and red on the same bush. Each 15c.

CACTUS.—To some people these curious plants are more interesting and attractive than all others, and we therefore offer them here. We have many choice varieties at 10c to 25c each. A collection of 6 varieties for \$1.00 postpaid.

Night Blooming Cereus.—This gorgeous cactus bears abundant blossoms measuring 12 inches across. Very fragrant. Each 15c, large 35c.

CAREX.—*Japonica Variegata.*—An ornamental Japanese grass which is extremely useful as a house plant, of easy growth, standing the dry atmosphere of heated rooms with impunity, and at the same time hardy if placed out in the garden. Leaves striped with white. Each 15c.

DOUBLE DAISY.—Very double; pure white and pink flowers. Blooms freely and makes a fine plant for growing in beds alone or with pansies. Each 10c, doz. 75c.

FORGET-ME-NOT.—Everyone loves the charming little Forget-Me-Not, and it seems strange that it is not more often seen in our gardens. They are easily grown and will bloom freely and continue to thrive and bloom year after year, being perennial and perfectly hardy, with only a slight covering. Plants grow twelve inches high and will thrive in most soils, though they prefer moist, sandy situations. Each 10c, doz. 75c.

COLEUS.—Whoever has been in our large city parks will never forget the ornamental beds—curving and quaint designs and mingling arabesques of all colors—which look like vari-colored rugs spread at short intervals on the smooth lawn. These are formed of Coleus. The following include the very best varieties.

Burning Bush.—Light red with dark crimson center.

Dewey.—A better bedder, a brighter color than *Verchaffeltii*; color in bright crimson, edged maroon.

Cuba Libre.—A bright crimson, shading in maroon with finely scalloped edges of pea green.

Blackbird.—Leaves and stem almost jet black; fringed edges.

Brilliantcy.—Has enormous leaves like a *Rex Begonia*; yellow, crimson, pink and green; coloring very fine.

John Rogers.—The only coleus we have found to hold its color all summer; of old gold and pea green; ruffled edges.

Anna Pfister.—Pointed leaves 6-8 in. long with deep scalloped edges, giving it a *Croton*-like appearance. Color bright golden yellow intermingled with green and crimson. Of dwarf and compact, but spreading habit.

Golden Bedder.—Color yellow, this is the best yellow coleus for bedding; deep gold in the sun.

Mrs. F. Sander.—Large creamy white center bordered with green, blotched crimson and purple; fine for pots.

Verschaffeltii.—The oldest, still one of the best, dark rich velvety crimson.

Crimson Bedder.—Purplish crimson.

Sunset.—Center of leaf brownish purple shading to crimson; edge yellow.

All of above varieties each 10 cents; dozen 75c. Mixed varieties suitable for bedding, unnamed, 60 cents per dozen, \$4 00 per 100 postpaid.

CROWN OF THORNS.

CYCLAMEN.—*Giant Flowered.*—The new giant-flowered Persian Cyclamens are considered the most beautiful and decorative of all pot plants, especially for winter and spring blooming. Foliage is broad, massive and graceful, of a dark, olive green, beautifully variegated with silver and rose. The immense, fairy-like flowers are carried on long stems and produced in boundless profusion for several successive months, and are delightfully perfumed. We offer best imported bulbs—assorted colors. Each 15c, large size 25c.

CLERODENDRON.—*Balfouri.*—A unique and beautiful climbing plant. It presents a splendid combination of colors, having bright scarlet flowers with creamy white calyx; a profuse bloomer, young plants a foot high often bearing several clusters. A strong and rapid grower; can be grown with success as a pot plant in the house or planted as a summer climber in the garden. Each 15c.

CHINESE LANTERN PLANT. or *Giant Scarlet Ground Cherry.*—A remarkable novelty of sturdy upright growth and is loaded with bloom-like husks 3 to 3½ inches in diameter. These husks are at first light green, gradually turning to bright yellow and then to intense orange scarlet. Fruit of excellent flavor either as a fresh fruit for dessert or for preserving. It is a perennial, the roots living over winter in the ground. Strong plants 10c each, 3 for 25c, doz. 75c.

GRAPE MYRTLE.—A very pretty shrub which is hardy in the south but is usually grown in large pots or tubs in this latitude so that it can be taken into a cellar in the winter. Specimens 6 to 8

CLERODENDRON.

ELECTRIC LIGHT PLANT.

—A very showy plant belonging to the *Cleome* family which blooms constantly from July until killing frosts in October or November. Is very desirable either for specimen plants or bedding. Grows four to six feet high and makes a large branching tree-like plant, each branch being tipped with bloom. Each 10c, doz. 90c.

ECHEVERIA.—A neat little succulent plant, commonly called 'Old Hen and Chicken.' Used largely in parks for ribbon beds and borders; also used in cemeteries. Each 10c, doz. \$1.00.

FARFUGIUM.—*Grandia.*—A beautiful ornamental foliage plant, either for planting in open border in shaded position; leaves 4 to 8 inches in diameter, are of a thick, leathery texture, dark green color; with bright yellow spots. Each 20c.

FEVERFEW.—Ideal. — Originated on our place and is far superior to the older sorts. It

is a vigorous, strong growing plant bearing large clusters of unusually large flowers, which are pure snowy white without any yellow shading or center. An excellent plant for bedding, producing a succession of bloom and very desirable for cemeteries. Each 10c, doz. 75c.

CROWN OF THORNS.—(*Euphorbia*)—Very curious and remarkable window plant. Strong-growing creeper or climbing plant that can be trained over any desired form, and when full of its large, bright scarlet flowers, which almost cover the deep, glossy green leaves, it is an object of rare and striking beauty. Easily grown. Grows wild in Judea, and it is claimed that it was from this plant that the crown of thorns was made which was worn by our Saviour. Each 15c

CHINESE

LANTERN PLANT

NEW VARIETIES OF COLEUS.

TRY A FANCY CARPET BED OF COLEUS ON YOUR LAWN THIS YEAR.

BOSTON FERN.

GENISTA or Shower of Gold.—A most desirable plant. The drooping branches are covered with delicate sage green foliage and every twig is tipped with a long raceme of exquisite pea-shaped blossoms of a pure canary color almost hiding the foliage. Each 10c.

IVIES.—English.—An old favorite vine, showy the year round if properly grown. Hardy in the south but will not stand our Iowa winters. Each 10c, large 25c.

Variogated English.—Foliage very prettily marked with pure white on a dark green ground. Handsome as a pot plant in the window or for trailing from the edges of boxes or baskets. Each 15c.

German, or Parlor.—A popular vine for hanging baskets and window boxes. Each 10c.

ICE PLANT.—Interesting from its being covered with ice-like crystals. Flowers very pretty. Each 10c.

HIBISCUS.—A large, shrub-like, woody plant bearing immense double or single red flowers. Each 15c.

Peachblow.—One of the finest free flowering plants for either pot culture or the open ground. Flowers very large, double and of a charming rich clear pink with deep crimson center. Each 15c.

HOYA.—Carnosa.—(Wax Plant.) The well known house climber, with thick fleshy leaves and curious waxy flowers. Each 25c.

GREVILLEA, or Silk Oak.—One of the quickest growing of any of the ornamental house plants. It is easy to manage, grows rapidly and is pretty in all stages of growth. With its long drooping, silky foliage, it reminds one of a palm or fern. The young growths are of a light bronze color, the tips being covered with a soft down closely resembling raw silk. Each 15c.

GREVILLEA OR SILK OAK.

FERNS.—We have many choice varieties of these delicate appearing, attractive plants at prices from 10c to \$1.00 each. Collection of eight varieties for \$1.00.

Boston Fern.—This is a wonderfully healthy, rapid growing and graceful house plant. It has been in great demand everywhere. Many people buy it in preference to the finest Palms or Rubber Plants. Its long, broad fronds are more graceful than the old Sword Fern and seem to grow faster. Thrives in all rooms, gas or furnace heat do not seem to injure it. It is one of the most beautiful and useful of house plants, being of easy culture and its sword-like fronds, on large specimens, attain a length of 5 to 6 feet, produced in a bewildering mass, arching, curving and interlacing in every conceivable direction. Each 15c. Large plants 25c and 50c.

Ostrich Plume Fern.—A beautiful novelty described on the colored pages of this book. It is elegant beyond description. Each 25c.

Anna Foster Fern.—A beautiful new variety of the Boston Fern having broad fronds and the petals are finely cut or divided into little leaflets, thus giving the plant a most beautiful and graceful effect. Each 20c.

Maiden Hair Fern.—Very popular; the most graceful and useful of all cut flower work. Each 15c.

Moss Fern.—(*Selagnellia* or *Lycopodium*.)—Has delicate lace-like foliage. Fine for fern dishes and always beautiful. Each 10c.

MIKADO FERN BALL.—Quite a novelty from Japan and a beautiful thing when well grown, but it is rather difficult to grow them satisfactorily in the dry atmosphere of an ordinary house. Largely advertised in the east. In dormant state, each 65c postpaid.

FIGUS, *Elastica* or Rubber Tree.—During the past few years there has sprung up an immense demand for rubber plants and they are highly valued everywhere for their tropical appearance. Leaves are very large, thick and leathery and of a beautiful shining green color. It endures the dry air of living rooms remarkably well. Everybody likes it. They are difficult to propagate and will always remain high in price. Each 50c; larger size \$1.00 and \$1.50 each.

FUCHSIAS.—These, when in full bloom, are the most graceful of all cultivated plants; nothing surpasses the beauty of well grown specimens.

White Phenomenal.—The grandest double white variety in existence and one which should be in every home. Each 15c.

Phenomenal.—Darker than Jupiter, with enormous flowers, a single one measuring 3 inches across; sepals bright scarlet, rich purple corolla, very double, flaked with red. Each 10c.

Monarch.—This is by far the largest of the single varieties. Its immense blooms are a very dark purple color. Each 10c.

Black Prince.—Tube and sepals bright carmine, sepals large and broad with pale green tips; large, open, pale pink corolla. Easily grown in tree form. We once had a plant 7 feet high, loaded with two thousand flowers at once. Each 10c.

Storm King.—Large double flowers; sepals glowing scarlet crimson, corolla delicate, waxy white, elegantly penciled with deep bright crimson. Each 10c.

Trailing Queen.—Of beautiful trailing habit; fine for hanging baskets. Bright rich scarlet and purple flowers. Each 15c.

Speciosa.—Sepals blush, corolla carmine. Best winter bloomer. Each 10c.

Little Beauty.—Tube and sepals bright red, corolla deep purple. Each 10c.

Rose of Castile.—The best single summer blooming fuchsia. Blush pink with violet corolla. Each 10c.

Elm City.—A popular variety and one of the best, tube and sepals bright coral red; large double purple corolla. Blooms all the year. Each 10c.

FIGUS, OR RUBBER TREE.

FUCHSIA.—Jupiter.—A new giant flowered variety from France. The flowers are of really mammoth size with very rich violet purple corolla. Tube and sepals bright crimson. Plant is a strong hardy, free grower. Each 15c.

HYDRANGEA.—Otaska.—A Japanese variety used extensively for Easter decorations. Produces enormous trusses of intense pink flowers. Makes excellent specimen plants for the porch or lawn. Blooms the entire season. Each 15c.

Thomas Hogg.—The immense trusses of flowers are at first slightly tinged with green, changing to the purest white. Each 15c.

Paniculata Grandiflora.—See description on page 84. Each 15c, large 35c.

KOCHIA SCOPARIA.—Beautiful feathery appearing plants for hedges or lawn specimens. By mid-summer it attains a height of about 3 feet, and is of light green color; on the approach of autumn the whole plant becomes a deep red; a splendid plant for forming a hedge for the summer. Each 10c, doz. 75c.

READ THESE.

Brussels, Belgium, Sept. 23.—The seven Rose Bushes which you sent me last Spring came through in good shape and are now growing nicely.—CHARLES J. MURPHY.

The plants that arrived last week and those received today are just as ordered and reached here in good condition.—MRS. ALEX ROBINSON, BENCLIA, COLORADO.

JUPITER FUCHSIA.

DOUBLE GERANIUMS.

Geraniums are the most easily grown and satisfactory of all flower plants and only the rose can vie with them in popularity. We have about 200 varieties growing at our place and test a large number of sorts every year. After careful comparison we have selected the following and those described in the Novelty List as the best:

OLD GLORY.—This grand novelty which we introduced, has immense trusses, sometimes six inches in diameter, of magnificent, large, semi-double flowers which cover it so as to almost hide the foliage. The color is a clear, bright, rosy pink, the upper petals are spotted with pure white which adds to its brilliancy. During the hottest, driest midsummer weather "Old Glory" was as fresh and sweet as if just watered by an April shower. Each 15c, doz. \$1.40.

JEAN VIAUD.—Very large semi-double blooms borne in large trusses well above the foliage; individual floret large, color bright rosy pink with distinct white blotch in the center. Each 15c.

BRUANTI.—One of the finest bedding sorts. As will be seen by illustration the leaves are beautifully zoned and therefore showy at all times. Flowers are double and semi-double and are of a bright vermilion red, trusses large, often eight inches in diameter. Each 10c, doz. \$1.00.

VERA VEND.—Truss and floret are both of good size; semi-double and very open with large petals, the borders of which are rosy orange, striped with white and delicately marbled and striped with orange. Each 10c.

REMARKABLE.—An intensely double variety of dwarf, compact growth and therefore desirable for pot culture as well as bedding. The florets, which look like little rosebuds, are of a dark scarlet crimson color. Each 15c.

MRS. E. G. HILL.—A most distinct and pleasing shade of salmon with light shading at the center. Each 10c, doz. \$1.00.

S. A. NUTT.—The best crimson bedding variety. This, the finest of dark crimson geraniums, has now taken the lead as a bedding variety, being used in the largest parks and public grounds of the country in preference to all others. Its dense, compact growth, profuse blooming qualities and sun proof constitution combined give it the prominence as a bedder it has attained. As a pot plant it cannot be excelled. We sell thousands for borders and large beds. Each 10c, doz. 85c; by express, not prepaid, 50 for \$2.75; 100 for \$5.00.

J. RICAUD.—A very fine, free flowering, double variety with enormous sized trusses; flowers purplish crimson, center distinctly marked white. Each 10c.

DOUBLE NEW LIFE.—A great novelty and it is a sensational departure in every way. The outer petals are large and of a brilliant red. In the center of these appear another semi-double floret, pure white in color, effecting a very charming contrast difficult to realize unless seen, and having the appearance of being produced artificially. This very novel geranium was lately sent out in England at a fabulous price. Each 15c, doz. \$1.50.

BLUE BEAUTY.—A European variety of a new color, heretofore unknown in geraniums, being of a most beautiful violet or purplish crimson, with a blue sheen over the surface. The flower is double and the three upper, outside petals have a spot of clear vermilion near the base. The blue tint shows better after flower is fully out. Each 20c

GOLDEN DAWN.—The nearest yellow of any geranium, rich orange scarlet. Each 15c.

MARVEL.—Rich crimson scarlet, large flowers and truss; free flowering. A fine bedding sort. Each 10c.

CONTRASTE.—Flowers and trusses very large; lower petals orange and carmine, upper petals clear orange. Each 15c.

BRUANTI.

SWEET SCENTED GERANIUMS.

LADY PLYMOUTH.—A beautiful variegated variety of the Rose Geranium. Propagates slowly and the demand usually exceeds the supply. Each 20c.

NUTMEG.—Small leaves with nutmeg perfume.

OAK LEAVED.—Beautiful foliage resembling oak leaves, black center with green border.

ROSE SCENTED.—Two kinds. Broad leaf and cut leaf. This is the most popular of scented geraniums.

SKELETON LEAVED.—Leaves very finely cut; rose fragrance.

BALM.—Has delicious balm fragrance.

LEMON.—A nice little plant of bushy growth with delightful lemon fragrance to the leaves.

FERN LEAVED.—A most delicate cut-leaved geranium of delightful fragrance; very free growing. The leaves are valuable for mixing with cut flowers.

MRS. TAYLOR.—A scarlet-flowered rose geranium. The blooms resemble the pelargonium, Blooms constantly.

PEPPERMINT.—A rare variety with thick, "hairy" leaves and refreshing peppermint fragrance. Each 15c.

APPLE.—A great favorite, having strong apple scent. Each 15c.

but are smaller and of bright scarlet color. Blooms constantly.

Any of the above sweet scented varieties 10 cents each, \$1.00 per dozen, except where noted.

GLORY DE FRANCE.—Large round flowers, of waxy appearance, white with carmine center, petals edged with carmine. Each 15c.

DOUBLE NEW LIFE.

ALPINE BEAUTY.—An exquisitely fine new double white. Each 15c.

IMPROVED LA FAVORITE.—What S. A. Nutt is among dark crimsons, La Favorite is among whites; without doubt the best double white geranium ever offered. It is a strong grower, a profuse bloomer. Each 10c, doz. 85c; by express, not prepaid, 50 for \$2.75; 100 for \$5.00.

WM. LANGGUTH.—This new silver-leaved geranium is a beautiful variety. The plant is of short, stocky growth, and the beautiful deep green leaves are bordered with a broad, pure snow white band, so that it is handsome even when not in bloom. It is, however, free flowering for a fancy foliage variety, and the flowers are double. Clusters are extra large and of bright red color, showing magnificently against the white foliage. Each 20c.

WM. LANGGUTH GERANIUM.

LA FAVORITE.

A BEAUTIFUL SET OF TEN FANCY LEAVED GERANIUMS FOR \$1.00, POSTPAID,

BRILLIANT COLLECTION.

This collection consists of five extra choice flowering plants which will make a really brilliant show and prove more than satisfactory. To meet the great demand which is sure to come, we have propagated a large number of each of these varieties and offer them at the very low price of 50c for the set of five.

BABY RAMBLER ROSE.

Decidedly the best rose novelty of the season and the very best bedding rose in existence. It originated in Orleans, France, from a cross of the Crimson Rambler and a Polyanthus variety and it may be called a perpetual blooming dwarf Crimson Rambler. The bush is vigorous, absolutely hardy, about 27 inches in height and on our place every plant was in bloom every day of the summer and fall. Sometimes as high as 120 flowers have been counted on a single panicle. Color bright glowing scarlet. Has won first class prizes at many of the French and English flower shows. It was never offered in America until a year ago last spring and the plants went like wild fire. Every flower lover just must have it. Nice well grown plants each 20c. Per doz. \$1.75. Large two-year-old plants each, 50c.

ENCHANTRESS CARNATION.

A most charming new variety which cannot help attracting attention everywhere as it far surpasses all other varieties. The cut blooms sold readily during the past season at double the price of other choice sorts. Color an exquisite shade of delicate bluish pink, deepening in color toward the center, delicately perfumed, of faultless shape and immense size measuring four to five inches in diameter when well grown and the stems are unusually long. Each 15c, doz. \$1.25.

LEMON LILY.

One of the handsomest flowers for garden culture. It is not a true lily as the bulb is of different shape, but the flower is very much like the *Lilium Speciosum* in form and about 3 inches in diameter. The color is entirely different from all other sorts, being a clear lemon yellow of very bright pleasing appearance. They have also a most delightful lemon fragrance. There seems to be almost no limit to the amount of bloom produced, each flower stem bearing 7 to 20 flowers. It is sure to bloom the first season and is the flower for everyone. A hardy perennial. Each 15c, doz. \$1.50.

MRS. C. N. PAGE SALVIA.

This variety introduced by us two years ago has proved to be the finest sort ever offered. It is of dwarf growth seldom more than 15 inches high, and is very compact; literally covered with long spikes of bright scarlet flowers. Begins blooming in July three weeks before any other variety of Salvia and blooms constantly until October. There is no variety which produces half as many flowers to the plant, and they are so thick that when the plant is at its best a person standing over it can scarcely discern the leaves, it being one solid mass of bloom of fiery brightness. As Salvias are now becoming one of the most popular of bedding plants, taking the place of scarlet geraniums, we predict a great run for this new sort. Heretofore the only objection to Salvias has been their late blooming, but that is now overcome in this new sort. Each 15c; dozen \$1.35.

PEACHBLOW HIBISCUS.

One of the finest free flowering plant novelties offered in recent years. It is a "sport" from the double red *Hibiscus Rosea-Sinensis*. The flowers are double and from four to five inches in diameter, of a charming rich, clear pink color, with a small, deep crimson center; an entirely new and beautiful shade. It blooms abundantly and continuously, even on small plants, during the entire summer and fall months; may be easily wintered in the house. When plants become large two or three years old they make a most magnificent show. Strong young plants each 15c, doz. \$1.50.

BRILLIANT COLLECTION One plant each of above five varieties for 50c.

ENCHANTRESS CARNATION.

MARVEL ASTER.

EARLY DAWN MIXED COSMOS.—This charming variety was introduced by us several years ago and it jumped at once into popularity on account of its extreme earliness, coming into bloom in about two months from time of sowing and continuing until destroyed by frost. The plants have fine, feathery, light green foliage and are literally covered with graceful flowers resembling single dahlias, but much better for cutting. For vases or personal wear they are unsurpassed in grace and beauty. They are of various handsome shades of violet, rose, lilac, pink and white flowers. A free blooming plant of easiest culture. Pkt. 5c.

ELITE COLLECTION OF BEAUTIFUL FLOWERS FOR 1907.

In order that our customers might have the most showy and beautiful flower garden this year that they have ever had, we have selected five of our best novelties of the season, which are illustrated in colors on the reverse side of this sheet, and offer the entire collection at about one-half the price that they would cost if purchased separately. Don't fail to include them in your orders. The entire collection for only 30c.

MARVEL ASTER.—A most charming new variety from Germany which is well illustrated by our colored plate. The flower is large and the petals are pure white, beautifully striped with a band of blue, red, pink, lilac or some other distinct color down the center of each, thus giving the flower a very brilliant and showy appearance. We do not think there is a variety of aster in existence which will create half the interest nor so many exclamations of delight from flower lovers, as it is so distinct and different from the varieties ordinarily grown. While the seed is quite scarce, still we are sure every lover of beautiful flowers will want to try this unique new candidate for public favor. Packet of about 100 seeds, 15c.

BURBANK'S CRIMSON ESCHSCHOLTZIA.—One of the most charming of the new flowers which have been originated by that "wizard of horticulture," Luther Burbank. It required nine years of patient crossing and selection to make it what it now is, and we are sure flower lovers will be delighted with it. Instead of the old shades of yellow it now produces flowers of a very clear rosy crimson and they are freely produced and always beautiful. Packet 15c.

CALIFORNIA GIANTS SWEET PEAS.—Tourists from the east are always greatly surprised and delighted with the Sweet Peas which bloom so freely in California. One of the best growers there who has been growing sweet peas for us during the past twelve years and who devotes about fifty acres annually to their culture, has during the past few years been selecting seed from the specially large flowers and we now offer it in a splendid mixture. No matter what other flowers you grow be sure to give these a trial. Pkt. 10c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

GIANT FLOWERED ZINNIA.—This variety, which is also called *Robusta Grandiflora*, is a mixture of the largest Zinnias yet obtained. The plants being of vigorous growth, about 3 feet high, and very profuse of bloom. The flowers are extremely double and very brilliant in color, showing shades not found in any former collection, while in size they surpass all other Zinnias, often 4 to 5 inches in diameter. It also includes the striped and marked in scarlet and gold, white and scarlet and other combinations. Pkt. 10c.

SINGLE GERANIUMS.

It is usually supposed that the single varieties bloom more freely than the double.

HALL CAINE.—Fine large trusses produced in great profusion, held high above the foliage: individual florets immense, 2½ to 3 inches in diameter; color bright cherry red; the habit is dwarf and compact, and exceptionally valuable as a pot plant for exhibition purposes. Each 15c.

FLEUR POITEVINE.—Extra large single flowers, brilliant rosy carmine, marked and striped with pure white, center orange scarlet. Each 10c.

WONDER.—One of the finest French novelties and a wonderful bloomer. Flowers are most intense dazzling scarlet and are borne in great trusses of enormous size, measuring from 18 to 20 inches in circumference, with single florets measuring 7 inches in circumference. Each 10c.

GARMEN SYLVA.—The grandest single pure white geranium in existence. It is of vigorous, healthy growth and blooms profusely, the plant being loaded with immense trusses of bloom which do not turn pink even in severe weather. Each 15c.

COLUMBIAN.—Brilliant scarlet with large, strong trusses; it may be classed as one of the freest bloomers in cultivation. Each 10c.

RENOMMIE LYONAISE.—Center of florets white, surrounded by a rose and broad scarlet border, giving it a very brilliant effect. Each 15c.

CHAMPION.—Has elegant large flower, of carmine crimson. Each 10c.

ALICE OF VINCENNES.—A charming novelty which has a border of intense scarlet forming a band around the body color of rosy pink, heavily veined with scarlet; center white. Each 15c.

ANDREW LANG.—Glowing scarlet, with white blotch on upper petals, center of flower surrounded by aureole of rich carmine, trusses immense and borne in greatest profusion. Each 15c.

BLACK PRINCE.—Very dark, rich velvety crimson. The nearest black known in single geraniums. Each 10c.

ELECTRIC.—Very large flower of most brilliant scarlet color with distinct white eye. Each 10c.

MARQUIS DE CASTELLANE.—Flowers are very large, perfect in form and borne in large trusses. The color varies from a brilliant cerise to a bright cherry red, with brilliant carmine shadings. Each 15c.

SOUVENIR DE MIRANDE.—One of the handsomest and most satisfactory of all. Nicely formed, round florets, upper petals cream white, with distinct salmon rose border; lower petals salmon rose, streaked with pure white; very free flowering and produces fine trusses of magnificent blooms. Ea. 10c; doz. \$1.

AUREOLE.

AUREOLE.—(*Mad. Bruanti*).—A fancy flowered sort of remarkable colors. Plant is loaded with blooms and each floret is large, center being white, beautifully veined with carmine lake, radiating into a handsome aureole, each petal being bordered with bright solferino. Fine pot plant and constant bloomer. Each 15c.

IVY LEAVED GERANIUMS.

EDEN MARCHI.—Handsomest of the ivy leaved sorts. Has enormous sized flowers; color beautiful salmon rose, slightly shaded violet. It is an improvement on the Charles Turner. It is a strong, free grower, producing flowers at almost every joint which are full double and perfect in form. Each 15c.

CHARLES TURNER.—Very double, and is without doubt one of the handsomest ivy geraniums ever introduced; florets two and a half inches across. The color is a deep, bright pink, approaching scarlet in color. Each 10c.

VARIEGATED IVY GERANIUM.—This is quite a novelty and will attract attention anywhere. Leaves handsomely variegated, pure white and dark green; frequently also margined with pink. Each 25c.

JEAN DE ARC.—Very large and finest white in existence. Perfectly double, white as snow; flowers literally cover the plant when in full bloom. Each 10c.

P. CROZY.—A hybrid between the Zonales and Ivies. Color soft, bright scarlet with veinings of maroon. Each 10c.

GARDEN'S GLORY.—Fine, bright scarlet, large bold, full flowers; constant bloomers; one of the very best. Each 10c.

Set of Six Ivy Leaved Sorts for 60c.

SOUVENIR DE MIRANDE.

FANCY LEAVED GERANIUMS.

MRS. POLLOCK.—Magnificent. Green leaf disc, overlaid by beautiful bronze red, belted with bright crimson, outwardly margined with golden yellow. Each 15c.

MARSHALL McMAHON.—Golden yellow, marked with a deep chocolate zone. A splendid bedding variety. Each 15c.

MAD SALLEROI.—A very compact variety of silver leaf geranium; fine for massing or bordering; thrifty, leaves green, edged white. Has a peculiar manner of growth which renders it of special value for edgings or ribbon work. Each 10c; doz. 85c.

CRYSTAL PALACE GEM.—Yellow with green disc; fine bedder. Each 10c.

DISTINCTION.—Round green leaves, with clear black circle. Each 10c.

MOUNTAIN OF SNOW.—Finest of this class for ribbon lines or massing; center of leaf bright green, margin broadly marked silver white, scarlet flowers. Each 10c.

HAPPY THOUGHT.—A tri-colored geranium with dark green foliage, creamy white center with dark band about the light zone; flowers bright scarlet. Each 10c.

GOLDEN CIRCLE.—Green foliage, golden yellow edging, flower scarlet. Each 10c.

MRS. PARKER.—A grand new silver leaved variety with double pink flowers. A unique novelty. Each 20c.

IVY GERANIUM—EDEN MARCHI. (One-half natural size.)

PREPARE FOR A SHOWY BED OF CANNAS THIS YEAR. OUR STOCK IS UNSURPASSED.

PERFECTION LANTANA.

JASMINE—Maid of Orleans.—A beautiful plant of easy culture, fine grower, good bloomer, very fragrant and of elegant waxy white appearance. Each 20c.

Night Bloomer—World famous variety, producing pure white fragrant flowers incessantly. Each 15c.

MUSK PLANT—This is the true musk plant and has a refreshing, delightful fragrance which becomes quite strong and pervading when the leaves are rubbed. It is a pretty little plant and of much value for pot culture and bedding. Flowers yellow. Each 10c.

MAURANDIA—Graceful climbers for window or conservatories or open ground in summer; admirable to hang from vases, cover stumps and low trellises, flowering freely. Each 10c.

MOUNTAIN PINK—A fine plant for baskets or rockeries. Flowers bright pink, two inches in diameter. Each 10c.

MONARDIA DIDIMA—Strong growing plants, from two to three feet high, dense foliage, aromatic and sweet scented. Large spikes or heads of intense, rich, deep scarlet flowers. It blooms throughout July and August. Each 10c, doz. \$1.00.

MOON FLOWER—A very handsome climber, growing to a height of twenty-five to forty feet, and covered nightly and on dull days with its white, moon-like flowers five to six inches in diameter. Each 15c, doz. \$1.25.

MANETTA—Bicolor.—One of the handsomest little vines in existence. It is easily and quickly grown and blooms continuously. It is well adapted for hanging basket, pot culture, vases or bedding. The flower is of the size and shape shown in our illustration, and of brilliant scarlet, tipped with clear golden yellow, making it most wonderfully attractive. Manetta Bicolor blooms constantly and profusely during all the summer months out of doors and all of the winter months when taken into the house. We heartily recommend this vine to all our customers, and feel assured of no complaint when tried. Each 10c, large size 25c.

MANETTA BICOLOR.

LOBELIA—Handsome trailing plants, profuse bloomers; elegant for baskets, vases and borders. Each 10c.

LANTANA—We consider this one of the most satisfactory plants grown. It is the flower for everybody, both for outdoor bedding and blooming all winter in house. It has a flower somewhat resembling the Verbeena, borne on a woody, bush-shaped plant. The flowers embrace all shades of orange, sulphur, lilac, red, pink, white, etc., changing from one distinct color to another as they increase in age and development.

Javoi—The best, largest and freest blooming white variety. Every one will be pleased with it. Each 15c.

Perfection—The only Lantana having variegated foliage. Is unusually handsome. Outside rows of florets are pink with rose center; inside florets very light sulphur yellow, with orange center. Blooms freely. Each 10c, doz. \$1.00.

Gold Cup—A dwarf compact grower, with very pretty lemon yellow flowers, having golden yellow center. Each 10c.

Amiel—Semi-dwarf, very compact, fine bloomer, umbel and floret, fine size. Reddish orange with yellow center. Each 10c.

Weeping—A beautiful trailing variety, very desirable for planting in hanging baskets, vases, pots or open ground. Bears an immense profusion of lovely clear pink flowers from early summer until late in the fall. Everyone is delighted with it. Each 10c.

LEMON VERBENA—A universal favorite, invaluable for its fragrant leaves. They will retain their fragrance for years when dried. As a plant for the garden or for pots it is equally valuable, its fine sprays of foliage and delicious fragrance making it desirable for bouquets, etc. In good rich soil each plant will cover a space of three to four feet in diameter. Each 10c.

A. BLANC

HELIOTROPE—These are universal favorites on account of their delightful fragrance. Flowers equally well as bedding plants in summer, or as pot plants in the house during the winter.

Czar—A new giant flowering, very dark colored sort, almost black. Each 15c.

Czarina—A fine companion for the above. It grows a trifle taller and bears an enormous truss of deep indigo blue flowers with clear white eye. Each 15c.

Jersey Beauty—Very large trusses of blue flowers. Each 10c.

Madam Blonay—Immense truss; very light colored flowers. Each 10c.

Snow Wreath—Superb large cluster of delicious fragrant flowers, nearly white. Each 15c.

MARGUERITE—(or Paris Daisy).—**White**—A French improvement on the old White Marguerite which has for years been so popular. Much larger and will produce ten times as many flowers. All flower lovers should try a few of these. Each 10c, doz. \$1.00.

Yellow—Similar to the above, but of a very pretty canary yellow color. It blooms freely and continuously. Each 10c.

Blue—A strikingly beautiful flowering plant, producing an abundance of clear sky blue flowers. Plants are fairly loaded with the flowers, which are very desirable for cutting. Each 10c.

WEeping LANTANA

OTAHEITE ORANGE—An extra fine pot plant, with glossy green leaves, the true fragrant orange bloom and abundant little bright oranges that will hang on the little bush like balls of gold for six months after they are ripe. With good culture they are never out of fruit from one year's end to another and at least two-thirds of the time are in flower also. In beauty, grace and fragrance there is nothing like its delicate, leafy sprays of bloom. Fine plants for blooming and fruiting at once. Each 20c.

OLEANDERS—These old fashioned shrubs are becoming popular again. No plant makes more handsome specimens in tubs for veranda or yard. Each 25c.

OTTHONA, or Pickle Plant—A very pretty plant for basket culture. Each 10c.

OXALIS—Golden Star—(Ortyesi).—A shrubby plant, about 12 inches in height, branching freely; loaded at all times with clusters of bright golden star-shaped flowers. Each 15c.

Bermuda Buttercup—Fine for pot culture. As many as fifty flower spikes have been produced by a single well grown plant and as many as one thousand flowers in a season. Flowers are pure bright yellow. Each 10c.

OTAHEITE ORANGE.

BABY PRIMROSE.

PRIMROSE.—The Baby.—(*Primula Forbsi*).—It is a wonderfully free blooming plant, commencing to flower as soon as born. It forms a dense rosette of somewhat fleshy leaves from which spring the flowering stems, twelve, fifteen and even twenty inches tall, supporting three tier or whorls of dainty flowers of a delicate rosy lilac, with eye of pale gold. The flowers are not more than a half inch in diameter, but they are produced in great abundance from September until June. Each 10c.

Mexican.—Is a perpetual bloomer, in flower all times of the year, a good specimen showing always from ten to thirty large saucer shaped blossoms two to three inches across, of several beautiful colors. Each blossom keeps perfect many days before fading and when it droops others are out to take its place, and this succession of beauty is continued. Ea. 10c.

Obconica.—A lovely perpetual blooming primrose. The flowers are of rose lilac, shading to white. Each 10c.

Chinese.—One of the most popular flowers for winter blooming. Each 15c.

PENTSTEMON.—One of the most beautiful and useful hardy perennials; produces large spikes of flowers as handsome as the most rare sorts of Gloxinias and greatly resembling them. Give good culture and attract much attention, as few persons have ever seen it. Each 15c.

PANSIES.—Pansy plants are quite a specialty with us and we sell immense numbers of them every year. Our plants are grown from the very best quality of seed and are strong and vigorous and have beautiful large velvety flowers of all shades and colors known in pansies. Extra large strong plants, 50c per dozen; four dozen for \$1.50 postpaid. Smaller size 25c per doz., five dozen for \$1.00.

PLUME POPPY.—(*Bocconia Cordata*).—Tall and stately, ornamental and sub-tropical in appearance with large, handsome foliage and large heavy plumes of white flowers on tall stems from six to eight feet high. Desirable for planting in the border or with shrubbery. Blooms continuously through July and August. Each 15c cents; dozen \$1.25.

PETUNIA.—Double.—One of the grandest, most beautiful plants for massing, mixed borders and vases. The brilliancy and variety of its colors, combined with the duration of its blooming period, render it invaluable for garden decoration. Our stock is unsurpassed and includes the best blotched and fringed sorts. Mixed varieties. Each 10c, dozen 90c.

Crimson Queen.—One of the best crimson petunias. Each 10c.

Fantasa.—A handsome double white and purple petunia. Striking variegation. Each 15c.

Fritz.—This is a decided novelty. The ground work of the flower is a deep purple, which is beautifully marked and penciled with cream, white and pink, the whole forming a most gorgeous combination. Each 15c.

Helen Gould.—A beautifully fringed pink variety. One of the handsomest sorts in existence. Each 10c.

Sea Foam.—A new double white fringed variety; unsurpassed among fringed sorts for purity of color, size, form and vigor of growth. Each 15c.

Snow Queen.—White varieties are always scarce; this is an extra choice new double white petunia which for profuse flowering qualities is unsurpassed; for keeping has no equal. Ea. 15c.

MEXICAN PRIMROSE.

PANSY GERANIUM.—This beautiful flower belongs to the Pelargonium class. The flowers are of medium size and have white throat. Each petal is shaded toward the center with a rich lavender pink and a dark maroon blotch in the center. Very handsome; will attract attention. This new and beautiful geranium is of easiest growth, dwarf in habit and literally covered with flowers, and as it requires little or no attention it is invaluable as a window plant. Colors and markings of flowers are most extraordinary. Each 25c.

PANSY GERANIUM.

PALMS.—The most elegant and highly decorative of all plants and the low prices at which they are now offered place them within the reach of all. The following are the most desirable for house culture.

Latania Borbonica.—or *Fan Palm*.—One of the most popular varieties grown, prized especially for its beautiful, large fan shaped leaves of deep glossy green. Each 25c, large plants by express, 50c, to \$5.00.

Kentia.—This is considered one of the hardiest and best palms in cultivation. A rapid grower. Each 35c; large plants by express, \$1.00 to \$5.00 each.

Chamærops.—Handsome fan-leaf palm of rapid easy culture. Very valuable and useful for outdoors during the summer. Each 20c.

Cycas Revoluta.—*Sago Palm*.—Magnificent plants of nobled an majestic habit. Their heavy, glossy, deep green fronds resist alike the gas, dust or cold. Strong young plants are 50c, each postpaid; large specimen plants at \$1.00, \$2.50, \$5.00, and \$10.00 each, according to size, by express.

PELARGONIUMS.—Commonly known as *Lady Washington Geraniums*, and the improved large flowering sorts are undoubtedly the most beautiful of all geraniums. Is highly prized everywhere for house culture and for winter blooming.

Mrs. Robert Saniford.—A grand, double white variety; the flowers are extra large, perfectly double and beautifully laced and ruffled; the color is glistening snow white, exceedingly beautiful. Each 25c.

Victor.—Bright, cherry red with white markings at base of petals, upper petals heavily spotted with deep maroon. Each 20c.

Captain Raikes.—A grand ruffled or fringed variety with very large flowers borne in large, finely shaped trusses. Color bright red, with light center, heavy maroon blotches in upper petals. Each 25c.

Mad. Thibaut.—White, richly marked and blotched with rose, the upper petals marked crimson maroon with large white center; petals heavily ruffled, giving it a double appearance. Each 20c.

RUSSELIA.—*Elegantissima*.—A pretty little plant producing hundreds of bright scarlet flowers, fine for hanging baskets or vases. Each 10c.

PLUMBAGO.—Capensis.—There is no plant in our greenhouse that has caused more exclamations of delight than these beautiful heavenly blue Plumbagoes. They are most excellent pot plants, flowering freely at all times of the year. Flowers are borne in large clusters and are exceedingly beautiful in color. They are of very easy culture, growing in any situation as freely as geraniums. Each 10c.

PASSION FLOWER.—One of the most desirable of all climbing plants. Will climb up a trellis 10 to 12 feet high in a season and cover it all over with pretty leafage and large clusters of handsome flowers. The flowers are 3 to 4 inches across and the colors a remarkable combination of red, white and blue shades. Each 15c.

IRISH SHAMROCK.—A pretty little plant and quite popular with the Irish. Resembles clover in shape of leaf. Does well when grown either in the open ground or in pots and its neat foliage is quite attractive. Also fine as border plant. Each 10c.

FANTASA DOUBLE PETUNIA.

KENTIA PALM.

STEVIA.—*Serrata.*—A pretty flowering plant, largely grown by florists in pots for blooming in the fall and winter. Plants are of upright growth, 18 in. in height, producing numerous sprays of small white florets, of delightful fragrance. Not hardy and therefore should be potted in the fall for winter blooming. Each 15c.

Variigated.—A beautifully variegated green and white leaved variety of Stevia of great value for ribbon beds and borders. Each 15c; dozen \$1.50.

SANSEVERIA.—*Zelanica.*—There is scarcely a decorative plant listed that is more striking in appearance, and certainly none other that will stand as much downright neglect. It will grow in a dark, cool room or stand on the mantel in a heated sitting room. Will stand gas or dust and go months without water, yet remains as thrifty as ever. Singularly beautiful as well as easily grown. Erect, rigid, sword-like leaves which are thick and fleshy, dark green color, beautifully striped crosswise with white. Each 15c; large specimen plants 40c.

SWAINSONIA.—*White.*—A beautiful new climbing plant. The habit of growth is extremely graceful, and the vine trained up at the side of a window, or on a trellis presents a lovely sight of light green, feathery foliage, and a splendid profusion of pure white sprays of flowers resembling Sweet Peas in form. Easily grown and under favorable conditions is almost a perpetual bloomer. Each 10c.

Pink.—A beautiful, new sort, quite similar to above, except that flowers are a clear pink color. Each 15c.

SANSEVERIA.

SELAGINELLA.—A beautiful low growing, moss-like plant. Fine for ferneries or planting in moist places. Each 10c, dozen \$1.00.

SALVIA.—*Mrs. Chas. N. Page.*—One of the finest of all bedding plants, being completely covered during the summer and autumn with long spikes of dazzling scarlet flowers, remaining in bloom until cut down by frost. Each 15c, per doz. \$1.50.

Golden.—*Hardsome* yellow leaved variety with brilliant scarlet flowers. Each 10c, doz. \$1.00.

Silver Spot.—Foliage green, spotted clear white. Each 15c, per doz. \$1.25.

Clara Bedman.—A dwarf early and very free blooming variety, the plants appearing to be almost completely hidden by the mass of brilliant scarlet flowers. Each 10c, doz. \$1.00.

Purple.—A handsome free blooming variety of compact growth. Flowers reddish plum color. Each 15c.

SWAINSONIA.

SANTOLINA.—A very pretty dwarf growing little plant. The foliage is finely cut and of a silver gray color, thus making it particularly useful and valuable for edgings and ribbon beds, as it contrasts finely with plants of darker color or larger leaves, like Coleus. Each 10c, doz. 75c.

SOLANUM.—*Jasminoides Grandiflorum.*—This beautiful plant is of trailing habit, but if desired it can be cut back to a bush form. It has star-shaped flowers borne in large clusters or panicles, frequently a foot across. They are pure white with a violet tinge on the back; is equally a good bloomer in summer and winter and is very effective when planted to cover a low wall or trellis. Each 10c, doz. \$1.00.

STROBILANTHE.—*Royal Purple.*—An excellent bedding plant as well as a beautiful foliage plant for pot culture. It forms a compact bush eighteen inches high with leaves six to nine inches long, of beautiful metallic purple, shading into light rose with a light green margin, a combination unapproached by any other plant. The flowers are violet blue, borne in immense racemes. Each 15c.

SEDUM.—(*Stone Crop.*)—Small low growing plants desirable for rockeries or bedding. Four varieties. Each 10c, dozen 75c.

ELEGANTISSIMA VINCA.

SAXIFRAGA.—(*Strawberry Geranium.*)—The well-known, much used old basket plant with long, strawberry-like runners. Each 10c.

STEPHANOTIS.—*Floribunda.*—One of the most charming hot house climbers, growing rapidly, with long deep green foliage, and producing clusters of pure white deliciously fragrant flowers. Does finely for house culture, blooming all summer. It is not hardy, but should be kept partially dormant in the house during the winter. A really beautiful decorative plant when properly trained on trellis and a plant rarely seen. Each 25c.

IMPATIENS SULTANA.—Beautiful flowering plant producing waxy, bright flowers almost continuously, winter and summer; suitable for either pot or garden culture. Plant of compact growth and almost a perpetual bloomer. Each 15c.

SMILAX.—A well-known handsome climber and the most popular of all vines with the florists. Each 10c.

WANDERING JEW.—An old, well-known trailing plant, nice for growing in hanging baskets, vases, pots or window boxes. Several varieties with variegated foliage. Each 10c, 4 for 25c.

WAHLENBERGIA, or Bush Clematis.—A plant of wonderful beauty which blooms profusely all summer. White and various shades of blue. Each 15c, large size 25c.

VINCA MAJOR.—*Elegantissima.*—One of the handsomest vines in existence for growing in window boxes, hanging baskets, trailing from pots, rockeries, etc. The long trailing stems of glossy green leaves are broadly margined and variegated with white and they are always bright and pretty. Plants are of the easiest culture, will stand neglect and mistreatment and grow very rapidly. Does well either in a sunny place or in the shade. Blue flowers. Each 10c, doz. \$1.00, large size 25c.

Harrison.—Similar to above but with darker variegation. Each 10c, doz. \$1.00.

MAMMOTH VERBENAS.—Everybody likes Verbenas, as no one can help enjoying the sight of a nice bed carpeted with dark green leaves and brilliant blossoms. We have a large stock of the large flowered varieties which bloom freely and are of the finest colors. We can furnish separate colors or nicely assorted just as you prefer at 10c each, 75c per dozen.

MAMMOTH VERBENAS.

ROSES.

We consider these not only the most popular, but also the most satisfactory of all flowers, and therefore we make roses a leading specialty and are now devoting more space in our green houses and more land in our fields to roses than ever before. Our plants are grown on their own roots and are strong, healthy and vigorous. We have taken great pains in preparing this list which represents the choicest selections from nearly a thousand varieties and we are sure everyone will prove satisfactory. The two year old plants offered are outdoor grown dormant plants of most varieties. Roses are sent by mail or express prepaid in perfect condition to the most distant parts of the United States and we guarantee safe arrival. Directions for culture sent with every package. **One doz. of any variety at price of ten.**

AM. BEAUTY COLLECTION

Six of the choicest new varieties for 75c. Described on inside front cover.

NOVELTIES.—Be sure and notice the desirable new varieties described in novelty list and back of colored plate.

SOUVENIR DE WOOTON.—We put this first on our list as we consider it one of the most beautiful and satisfactory roses grown. Color a rich shade of velvety crimson, deliciously fragrant, a constant and most prolific bloomer, and flowers frequently six inches across. Each 10c. Two-year-old plants 25c.

CHATENAY.—A most wonderfully beautiful rose. Flowers are of elegant shape with slightly recurved petals. Color creamy rose shaded with rosy carmine. An extra choice free blooming garden variety. Each 20c. Two-year-old plants 35c.

GOLDEN BEDDER.—The finest golden yellow Tea Rose. A strong healthy vigorous grower and a profuse bloomer being fairly loaded with flowers and buds the entire season. By some it is called the *Star of Lyons*. Each 20c. Two-year-old plants 35c.

MAMAN COCHET.—The best pink garden rose in the world. The buds are large and pointed, while the open flowers are extra large, double and blooms all the time. Each 15c. Two-year-old plants each, 30c.

LIBERTY.—Color indescribable rich glowing, dark crimson scarlet, of immense size, very fragrant and double. The original plants of this rose sold for \$7 500 00. Each 20c. Two-year-old plants, 40c.

GRUSS AN TEPLITZ.—One of the brightest colored roses grown. When first opened it is a dark rich crimson, quickly changing to a bright scarlet. Blooms continually; flowers good sized and fragrant. Each 15c; two-year-old-plants 30c.

RAINBOW.

SOUVENIR DE WOOTON.

HALLOWE'EN.—A beautiful new variety resembling the Meteor in shape, but the flowers are of dark crimson color, distinctly striped with pink and pure white. Each 15c, two-year-old plants 30c.

CHAMPION OF THE WORLD.—The champion bloomer. It is claimed that one plant will produce more flowers during the year than ten plants of any Tea Rose. Blossoms are perfectly double to the center, of good shape. Color, a degree of loveliness which few roses can equal; rich, deep, rosy pink. Each 15c; two-year-old plants 30c.

THE QUEEN.—It is pure snow white, makes good fine-formed buds, is quite full, double, showing but little center and is very fragrant. Each 15c; two-year-old plants 30c.

KAISERIN AUGUSTA VICTORIA.—The finest white ever-blooming hardy garden rose. Soft pearly white, lightly tinted with lemon in the center. Each 15c; two-year-old plants 30c.

EMILE GONIN.—A grand new variety. Creamy white tinted with orange yellow at the base of petals, while the tips of petals are reflected and broadly margined with bright carmine crimson. Each 15c, two-year-old plants 30c.

PERLE DES JARDINS.—Fine straw color; very large and perfect. Blooms freely. Each 10c; two-year-old plants 25c.

GOLDEN GATE.—A beautiful free blooming and healthy Tea Rose that we can recommend to every one desiring large flowers, long stems and continuous bloom. Flowers creamy white, delicately tinged with golden yellow and bright rose color. Each 10c; two-year-old plants 25c.

RAINBOW.—A elegant striped Tea Rose; strong, healthy growth and exceedingly free flowering habit. Color a lovely shade of pink, striped and mottled in a most unique manner with intense crimson, and elegantly covered with rich golden amber at center and base of petals. Each 15c; large two-year-old plants 35c.

HERMOSA.—An excellent rose, blooms in fine clusters; large, very double and fragrant; color a beautiful clear rose. Each 10c; two-year-old plants 25c.

BEAUTY INCONSTANT.—A wonderful new variety, producing flowers of many shades of pink, red, crimson and yellow, all on the same bush at once, making a plant of indescribable beauty. Each 15c; two-year-old plants 40c.

VERDIFLORA.—The wonderful green rose that cannot fail to attract attention and causes surprise wherever seen. Deep green petals and a free bloomer. Each 15c.

PRESIDENT CARNOT.—Magnificent New Hybrid Tea Rose which we consider one of the daintiest and most charming and fragrant roses in cultivation. Color soft, creamy fawn, overlaid with delicate pink. Each 15c; large two-year-old plants 35c.

WHITE COCHET.—An exact counterpart of the beautiful Maman Cochet except that it is of the purest white. Very desirable. Each 15c; two-year-old plants 35c.

COQUETTE DE LYON.—A most desirable bedding variety of light canary yellow color. The flowers are extra large, finely formed, deep and double. Each 15c; two-year-old plants 35c.

BRIDE.—A fine pure white cut flower rose. Very double. Buds are of very large size, carried high and erect; unsurpassed for purity and whiteness. Each 15c; two-year-old plants 25c.

BRIDESMAID.—Like above but a lovely shade of clear pink. Thousands of this variety are grown every year for cut flowers, and it is also very desirable for summer bedding out of doors. Each 10c; two-year-old plants 25c.

SUNSET.—Beautiful old gold color shaded with coppery crimson, with sunset tints. Each 15c; two-year-old plants 30c.

METEOR.—Large flowers of deepest glowing crimson. Each 10c; two-year-old plants 25c.

FRANCISKA KRUGER.—A strikingly beautiful rose of deep coppery yellow quite unique and distinct from all others. Of large size and very symmetrical. Each 15c; two-year-old plants 35c.

CHAMPION OF THE WORLD.

USE A TYRIAN OR SCOLLAY SPRINKLER TO SPRAY YOUR PLANTS.

CLIMBING ROSES.

For porches and trellises nothing surpasses the climbing roses, especially the ever blooming varieties. We recommend the two-year-old dormant plants for immediate effect.

MRS. ROBERT PEARY, or Climbing Kaiserin Augusta Victoria.—The most remarkable new Rose of recent introduction. The flowers are extra large, full, deep and double. The buds are long and pointed. Color pure ivory white of delicious fragrance. Grows 10 to 15 feet in a single season. Each 20c. Strong two-year-old dormant plants each 50c.

MANDA'S TRIUMPH.—A beautiful white climbing rose. It is a very rapid, sturdy grower, and bears a profusion of double, pure white, beautiful imbricated flowers; elegant for cemetery. Each 10c; dormant 25c.

ENGLAND'S FAVORITE.—An ever-blooming climber of beautiful golden yellow color, shading to a rich copper color in the center. A striking, unique shade, sure to attract attention. Delightfully fragrant. Each 20c; dormant 40c.

RUSSELL'S COTTAGE.—Dark crimson, very double and full; Extra strong, rampant grower of iron-clad hardness. This is the only satisfactory dark red climbing variety. Each 15c; dormant 30c.

MARECHAL NEIL.—Very bright golden yellow; very large, full and perfect form; of vigorous climbing growth and a free bloomer. Not hardy. Each 15c, dormant 35c.

SEVEN SISTERS.—Crimson changing all shades to white; blooms in clusters. Each 15c; dormant 25c.

MARY WASHINGTON.—A hardy perpetual blooming climber, producing double snow white blossoms from June until frost. In this lovely rose our first president took special delight and named it after his mother, Mary Washington. The original bush can yet be seen at Mt. Vernon. Each 15c, dormant 20c.

BALTIMORE BELLE.—Double blush white, large clusters covering plant with bloom. Each 10c, dormant 25c.

PRAIRIE QUEEN.—An old standard that will always be popular. Bright rosy red, large flower. Each 10c, dormant 25c.

FAIRY ROSES.

Small roses which are marvels of grace and beauty; bloom in clusters of 25 to 50 on a single stem.

MOSELLA.—A choice novelty. Flowers very double, ball shaped. The petals are tinted white, on beautiful light yellow ground. Each 15c.

PRINCESS BONNIE.—A rich solid crimson. Each 10c.

LITTLE WHITE PET.—A pure white; of perfect shape Hardy. Each 10c.

MIGNONETTE.—Clear, soft pink, passing to white. Flowers full and double. Each 10c.

CLOTHILDE SOUPERT.—This hybrid polyantha Tea Rose is one of the most popular White, shaded pink. Each 10c.

MRS. ROBT. PEARY
ROSE.

RAMBLER ROSES.

CRIMSON RAMBLER.—The most popular rose in existence as it is always satisfactory. Many instances are reported of 3,000 to as high as 19,721 flowers by actual count on one bush. It is exceedingly hardy. Flowers are produced in large trusses of pyramidal form and of the brightest crimson color. The blooms remain on the plant for a great length of time without losing their brightness. Each 10c, strong dormant plants 25c. We have also a few extra strong four-year-old Crimson Ramblers at \$1.00 each.

YELLOW RAMBLER.—Grand new variety like above except that it is golden yellow. One of the most satisfactory sorts. Each 10c, dormant 25c.

WHITE RAMBLER.—Pure white, very fragrant. A beautiful, popular and satisfactory sort. Each 15c, dormant 25c.

PINK RAMBLER.—Of shining rose color. Each 10c, dormant 30c.

DOROTHY PERKINS.—A grand new sort remarkably like Crimson Rambler, but the flowers are more double and of a beautiful shell pink color. Very hardy. Each 10c, dormant 30c.

PHILADELPHIA RAMBLER.—An improvement on the Crimson Rambler. Begins blooming two weeks earlier and color is brighter, more intense crimson, almost entirely free from milders. Each 15c, dormant 30c.

HELENE.—Large and more double than Crimson Rambler. Color soft violet rose. Each 15c.

SPECIAL.—Set of seven Rambler Roses for only 50c.

EVERGREEN MEMORIAL ROSES.

These hardy roses creep over the ground like ivy. The leaves are glossy dark green; profuse flowering; used extensively in cemeteries, rockwork, etc.

WHITE MEMORIAL.—(*Wichuriana*) The finest rose for cemetery planting. Has dark green leaves and creeps on the ground like an ivy, rapidly branching and covering any surface. The flowers are single, pure white; hardy. Each 10c, dormant 25c.

EVERGREEN GEM.—Flowers are creamy white, changing to pure white and of a delightful Sweet Briar fragrance. Each 10c, dormant 25c.

SOUTH ORANGE PERFECTION.—Produces multitudes of the most perfectly formed double flowers; color soft blush pink at tips. Each 10c, dormant 25c.

GARDENIA.—Buds bright yellow, open flowers, cream color, 3 to 3½ inches in diameter. Delightfully fragrant. Each 10c, dormant 25c.

JERSEY BEAUTY.—Extremely vigorous grower, flowers large, single, 3 inches in diameter, opening pale yellow, with clusters of bright yellow stamens. Each 10c, dormant 25c.

UNIVERSAL FAVORITE.—The blooms are very abundant, of large size, double, of a beautiful rosy-pink, and very fragrant. Each 10c, dormant 25c.

Set of 6 Memorial Roses for only 50 cents.

CRIMSON RAMBLER ROSE.

MOSELLA FAIRY ROSE.

MARY WASHINGTON ROSE.

ORDER YOUR ROSES AND SET THEM OUT EARLY TO SECURE LOTS OF FLOWERS.

BEAUTIFUL HARDY ROSES.

The most satisfactory of all flowering plants, making a permanent improvement which is constantly growing in value. The lower priced roses below named are growing plants, from 2 to 2 1/2 inch pots, while the larger sizes are strong, hardy, out-door grown, two-year-old plants, which have been kept dormant. These can be planted outside early in the spring, before it is safe to set out plants that are growing in pots, and are ready to begin blooming almost as soon as set out. Should our stock of dormants be exhausted we will send strong, two-year-old plants which have been kept growing in pots. Our experiments prove that the following are the most satisfactory varieties for general use and we have discarded all others. Remember—we prepay the postage or express charges on all plants at prices named.

MRS.

JOHN

LAING.

JOHN HOPPER.—Flowers large, regular and full; color brilliant rose, shaded rich crimson. Very sweet. Each 15c, dormant 35c.

GENERAL JACQUEMINOT.—One of the grandest roses in existence; nothing can surpass them in beauty. Color a rich dazzling scarlet, shaded with deep velvety crimson, a superb glowing color. Each 15c, dormant 30c.

MAGNA CHARTA.—A splendid rose with extra large, rosy red flowers, beautifully flushed violet crimson. Each 15c, dormant 30c.

PAUL NEYRON.—Double flowers of shining carmine pink. Largest rose known, and one of the most prolific bloomers. It is an exceptional grower, making shoots 4 to 5 feet high in a single season. We heartily recommend this if a hardy, pink-colored rose is desired. Each 15c, dormant 30c.

ULRICH BRUNNER.—Rich, glowing crimson scarlet; flowers of exquisite shape. Each 15c, dormant 30c.

COQUETTE DES ALPS.—Flowers large and full, finely formed and pure white. Profuse bloomer. Each 15c, dormant 30c.

MAD. CHARLES WOOD.—Bright, fiery scarlet, passing to rosy crimson, shaded maroon. Each 15c, dormant 35c.

PRINCE CAMILLE DE ROHAN.—A fine rose of rich velvety crimson, passing to maroon, shaded black. Each 15c, dormant 35c.

GLORIE DE MARGOTTIN.—This grand new hybrid perpetual rose is believed to be one of the very finest varieties. Flowers are very large, symmetrical, very full and deliciously scented. The color is clear, dazzling red. It is certainly one of the most brilliant roses ever seen. It is a free bloomer and vigorous grower, of great beauty and wonderful color. Each 15c, dormant 40c.

AMERICAN BEAUTY.—One of the best and most valuable roses, both for garden and house culture. Color rosy crimson, exquisitely shaded and very handsome. Extra large, full flowers and fine buds; a good bloomer and the most popular variety in existence. Each 15c, dormant 35c.

BARON DE BONSTETTEN.—The Black Rose.—Rich, dark red, passing to a deep velvety maroon, nearly black. Large, highly scented. Each 15c, dormant 35c.

DINSMORE.—We cannot praise this enough. Always in bloom, with large, imbricated very double flowers, of a dazzling crimson scarlet color, rich, spicy fragrance. Of compact, bushy growth, fine for bedding and very hardy. Each 15c, dormant 30c.

MRS. JOHN LAING.—This rose for outdoor planting is undoubtedly the finest. Color a beautiful, soft pink, with most delicious fragrance; very double and of large size. A constant bloomer. Each 15c, dormant 30c.

JUBILEE.—A grand, hardy perpetual blooming variety. Color dark crimson shaded velvety maroon, flowers sometimes six inches in diameter. Each 15c, dormant 30c.

GENERAL WASHINGTON.—Color brilliant crimson, very rich and beautiful; large, perfectly double and a free bloomer. Each 15c, dormant 30c.

VICK'S CAPRICE.—Perfectly hardy. Flowers are large, soft, satiny pink, distinctly striped and dashed with white and carmine. Each 15c, dormant 30c.

CAPTAIN CHRISTY.—Very double, color fresh, delicate pink. Each 15c, dormant 30c.

CLIO.—Very large, flesh color with rosy pink center. Each 25c, dormant 50c.

MADAME PLANTIER.—Flowers borne in great profusion, pure white, hardy as an oak, and as certain to grow as grass. Blooms in June. Each 10c, dormant 25c.

HARRISON'S YELLOW.—One of the finest, pure deep yellow hardy roses ever grown. Dormant 40c.

ENGLISH SWEET BRIAR.—Flowers are bright pink; single but the exquisite fragrance of the flowers, the leaves and young branches in spring frequently perfume a whole neighborhood. Each 15, dormant 40c.

GENERAL JACQUEMINOT ROSE.

SET OF LA FRANCE ROSES.

La France roses are certainly the nearest perfection of flowers. Distinctive characteristics of the set are the true La France fragrance and beautiful form. Hardy.

LA FRANCE.—Beautiful form in bud and in full bloom very large, full and globular; a constant bloomer; color pink or silvery rose—a satiny sheen as it has been termed. Each 15c, dormant 30c.

WHITE LA FRANCE.—Identical with LaFrance except color. It is pearly white, sometimes tinted fawn. Each 10c, dormant 30c.

STRIPED LA FRANCE.—Rich, creamy pink with silvery gloss, the whole beautifully etched and streaked with carmine. Each 15c, dormant 30c.

RED LA FRANCE.—(Duchess of Albany.)—Deep rosy pink hue. Very large, double and of superb form. Each 10c, dormant 35c.

Set of Four La France Only 40 Cents, dormant \$1.00.

CRESTED MOSS ROSE.

TEN HARDY DORMANT ROSES, ALL DIFFERENT, OUR SELECTION FOR \$2.00.

HARDY SHRUBS.

There is nothing which so quickly, and for so little cost, adds so much to the beauty, cheerfulness and homelike appearance of a place as an assortment of hardy shrubs. They are permanent improvements which increase in size, value and beauty year after year. Our price is for strong healthy plants sent by mail or express prepaid. Those marked large or dormant are strong two-year-old plants.

WEIGELA.—*Rosea.*—No shrub in our large collection has attracted more attention. It is of robust but graceful growth, 5 to 7 feet high, and produces immense numbers of superb, large trumpet-shaped flowers in June, July, and also some in the fall. Plants frequently have more flowers than leaves. Flowers shade from dark pink to nearly white in the same cluster. Each 15c, dozen \$1.50. Large 25c. Dozen \$2.50.

Variiegated.—A neat, dwarf shrub, valuable for the clearly defined variegation of green, yellow and pink in its leaves; flowers delicate pink. A fine variegated-leaved shrub. Each 15c; large 35c.

HYDRANGEA.—*Paniculata Grandiflora.*—The grandest as well as the most popular of all shrubs, and hundreds of thousands of them are sold every year and the demand is constantly increasing. Unsurpassed for the lawn, a hedge, or for cemetery planting. It readily attains a height of 5 to 7 feet; hardy in all localities, needs no protection in winter; blooms the first and every season in July and August and continues in bloom for two or three months; the flowers are massive, cone-shaped sometimes, ten inches in length, and changing from the original pure white to pink, and finally to a beautiful rich coppery red. Each 15c, doz. \$1.25. Large dormant plants 35c, doz. \$2.50; large tree form plants 75c. Very large four-year-old specimen plants \$1.00 each.

AZALEA.—*Mollis.*—Showy, low-growing, hardy plants, used extensively in parks and public grounds. The brilliancy of their yellow, orange and carmine flowers is not approached by any other hardy shrub. Each 75c.

ARALIA SPINOSA.—A curious spiny-trunked shrub-like tree sometimes called *Heracles' Club* or *Devil's Walking Stick*. Valuable for producing tropical effects. Very showy. Each 40c. Extra large size by express \$1.00.

LILY OF VALLEY SHRUB.—(*Andromeda*)—It is of dwarf, compact growth (2 to 3 ft. high.) The flowers are waxy white, drooping like little bells and bears a great resemblance to Lily of the Valley. Should be protected with straw in winter weather. Each 40c.

POMEGRANATE, Dwarf.—A beautiful shrub bearing large double scarlet flowers. Must be kept in the cellar over winter in the northern states. Each 25c, large 40c.

EXOCHORDIA.—*Grandiflora.*—(*Pearl Bush.*)—A neat compact bush 10 to 12 feet high; can be trimmed any desired shape; pure white flowers borne in slender racemes of 8 to 10 florets each. Large size each 30c.

DEUTZIA.—*Pride of Rochester.*—By far the handsomest variety of Deutzias. It is very desirable shrub of strong, hardy growth, with nice luxuriant foliage and bearing an abundance of beautiful racemes of double, pure white flowers. Must be seen to be appreciated. Every one of our customers should have at least one of these. Ea. 15c, large 30c.

Wateri.—A grand variety with large white flowers. Small 15c, large 30c.

Crenata.—Flower double white, tinged with pink. Small 15c, large 25c.

Gracilis.—A pretty, small, round, bush-shaped Deutzia blooming freely. Each 15c.

LILAC.—*Persian.*—A well known strong growing shrub, bearing large, fragrant clusters of purple flowers early in spring. Each 10c; large 25c.

Single White.—Like above but has white flowers, making it more desired by some. Each 15c, large 35c.

New Double White.—A novelty of great merit and the finest flowering shrub which has been introduced for many years. The truss is of large size; they are produced in profusion. The individual flowers resemble miniature tuberoses. Each 25c, large 50c.

Common.—The old standard variety with bluish purple flowers. Each 10c, large 25c.

LONICERA.—*Red Tartarian.*—*Bush Honey-suckle.*—Blooms in June, with beautiful pink and white flowers, followed by red berries. Ornamental through the season. Each 15c, large 30c.

ROBINIA.—*Hispid.*—Various known as "Sweet Pea Shrub," "Flowering Locust," "Moss Locust" and "Rose Acacia." The shrub of shrubs for bouquet makers. When it is in bloom it is really but a big bouquet itself, full of dainty sprays of large lovely rose-pink blooms which are of size and shape of beautiful sweet peas. Each 35c. Tree shape 75c.

WEIGELA ROSEA.

CALYCANTHUS.—A beautiful, sweet-scented shrub; flowers purple, quite double, exquisitely fragrant. Each 25c.

CORCORUS.—*Japonica*—(*Kerria*)—A grand shrub from two to five feet high which is almost constantly in bloom from June to October. Produces hundreds of large, double yellow flowers. Each 15c, large 25c.

CORNUS.—*Stolonifera.*—(*Red Twigg'd Dogwood*)—An improvement on *Sanguinea*. A strong growing shrub with clusters of fine white flowers, the stem and branches turning blood-red in winter. Very conspicuous and ornamental. Each 15c, large 30c.

CYDONIA.—*Japonica.*—(*Japan Quince*)—Bright scarlet crimson flowers. Blooms early in spring. Fine for specimen plants on the lawn or for hedges. Each 35c.

FLOWERING ALMOND.—*Double Pink.*—One of the earliest flowering and finest of shrubs. Loaded with double pink flowers which attract attention. Each 15c, large 35c.

Double White.—Like above but with snowy white flowers. Each 20c, large 40c.

ELEAGNUS.—*Longipes.*—(*Japan Oleaster*)—A very desirable shrub with silvered foliage and bright orange red edible berries of large size and agreeable flavor. When laden with fruit is very ornamental. Each 25c, large 40c.

FORSYTHIA.—(*Golden Bell*)—A fine, hardy shrub of weeping or pendulous habit; with deep green leaves and bright yellow flowers; blooms early. Each 10c, large 25c, extra large four-year-old plants 75c each.

PURPLE FRINGE.—A large shrub with long feathery flower stalks, giving the tree the appearance of being covered with a cloud of smoke. Each 15c, large 30c.

RHODODENDRON.—(*Rosebay*)—This is the most showy, magnificent evergreen shrub. Has broad, thick evergreen foliage of glossy richness and beautiful flowers in clusters. Not hardy in Iowa. Ea. \$1.25 by express at purchaser's expense.

HEDGE PLANTS.

BERBERIS.—(*Barberry*)—*Purple Leaved.*—A handsome hedge plant, the foliage being always clean, of a deep, rich plum color, and does not fade out in summer as do most purple leaved plants. Each 15c, doz. \$1.50 postpaid. Extra large strong specimen plants 35c, \$3.00 per dozen.

Thunbergii.—A very pretty variety from Japan; of dwarf graceful habit; foliage small, changing to beautiful bright red early in fall; very showy. Each 15c, doz. \$1.50. Large 25c, dozen \$2.50.

PRIVET.—*California.*—A remarkably vigorous grower, of compact and regular form, and foliage is a beautiful shade of glossy, wax-like green which it retains well into the winter, in sheltered situations, being almost an evergreen. The tops frequently winter kill in this latitude but it is hardy in New York State and throughout the east and south. For hedges plant 8 to 10 inches apart. Strong one-year old plants, per doz. 75c; per 100 \$4.50 postpaid. By express per 100 \$3.00; 500 \$12.50. Extra large per doz. \$1.00; 100 \$6.00.

Amurensis.—A very hardy variety fully as handsome as the one above, with glossy leaves and almost evergreen. A very desirable hedge plant for Iowa and the north. Each 30c, doz. \$1.50, per 100 \$10.00, postpaid. By express per 100 \$8.50.

HYDRANGEA PANICULATA GRANDIFLORA.

PRIDE OF ROCHESTER DEUTZIA.

KEEP SOIL LOOSENEED AROUND SHRUBS IF YOU WANT VIGOROUS GROWTH.

DOUBLE BI-COLOR ALTHEA.

SUMACH.—Cut Leaved.—A shrub of most striking appearance. Leaves are deeply cut, resembling ferns. Dark green turning to a rich red in the autumn. Each 25c, large 50c.

SWEET PEPPER BUSH.—(*Clethra*).—One of the handsomest of our native shrubs; pure white; delicious flowers in July and August. Each 15c.

SYRINGA.—(*Mock Orange*).—Immense masses of pure white, intensely fragrant flowers in June. Each 40c, large 25c. Large specimen plants \$1.00 each.

SNOWBALL.—Common.—A well-known and popular shrub covered with dense white flowers, which gives it its name. Each 15c, large 25c.

Japan.—A valuable improvement on the common Snowball; the flowers are smaller, more numerous, frequently as many as twenty balls on a stem 18 inches long. Each 20c, large 35c.

ALTHEA.—Double White.—(*Rose of Sharon*).—One of the most beautiful shrubs; perfectly hardy and always satisfactory. The bushes are of neat shape, have nice foliage and would be valuable as an ornamental hedge plant even if it produced no flowers. The plant, however, is loaded with large, beautiful flowers during August, September and October. Double white flowers produced in great profusion. Each 15c, large 30c.

Double Purple.—Like above, except that the flowers are of a beautiful purple color. Each 15c, large 25c.

Double Bi-Color.—Flowers white blotched with pink. Very beautiful. Each 15c, large 35c.

Variegated Leaved.—The beautiful foliage of this variety attracts attention everywhere. It is a deep green, bordered with a band of creamy white. Flowers double red. Very ornamental, and more dwarf in growth than the above. Each 15c, large 35c.

ROSA RUGOSA.—RED.—We class this fine single-flowered rose with the hardy shrubs. It makes a handsome large bush with shiny bright green leaves and the clusters of deep rose-colored flowers are produced almost continuously, followed by large, apple-shaped, bright red fruits. Large, strong plants each 40c.

WHITE.—Similar to above white flowers. Each 40c.

SPIREA.—Prunifolia.—(*Bridal Wreath*).—The most popular variety of Spirea. Of symmetrical growth and bears long graceful sprays of pure white flowers in great profusion. Blooms in May. Perfectly hardy and always satisfactory. Each 10c, large 25c.

Anthony Waterer.—Makes a dwarf bush 15 to 18 inches high, covered from spring till late in the fall with large heads of crimson flowers. Each 10c, large 25c.

Van Houtti.—The hardiest of all Spireas. The bushes form fine, compact clumps; the pure white flowers are borne in such masses that they form great plumes, drooping gracefully, giving the clumps the appearance of a snowbank of white bloom. Each 15c, large 25c.

Thunbergia.—Slender, gracefully drooping branches. Single white flower. Blooms early. Each 15c, large 30c.

SAMBUCUS.—(*Golden Leaf Elder*).—Another year only adds to our high opinion of this handsome shrub. It is the most showy of all shrubs for the lawn. Grows to the height of about six feet and has wide-spreading branches. Leaves are of dark, dazzling yellow color. Each 15c, doz. \$1.50, large 30c each.

Variegated.—Variegated green and white variety. Each 15c, large 35c.

Cut Leaved.—Elegantly divided leaves. Each 25c, large 40c.

VIRBURNUM.—Opulus.—(*High bush Cranberry*).—Handsome and dense foliage; flowers white in drooping flat cymes, followed by brilliant scarlet fruit in showy pendulous bunches that remain on the plant all winter. Each 30c.

SYMPHORICARPUS.—Racemosus.—(*Snowberry*).—Bears small pink flowers, followed by large, white berries which hang on most of the winter. Very showy and desirable. Small plants 10c, large 25c.

Vulgaris.—(*Coral Berry*).—Like above, but with small red fruit. Each 10c, large 25c.

TAMARIX.—Foliage light, feathery, graceful; sage blue in color; blooms through summer and autumn. Each 10c, extra large 35c.

AQUATIC PLANTS.

The constantly increasing demand proves the coming popularity of aquatics. Their requirement is very simple, only sunshine, shallow water, and rich soil being necessary. Artificial ponds can easily be made or you can grow them in tubs or tanks. Most of the varieties we offer are also adapted for growing in aquariums in the house.

FAIRY WATER LILY.—This resembles a miniature water lily bearing white flowers the year around. Fine for aquariums. Each 15c.

WHITE POND LILY.—(*Nymphaea Odorata*).—The praises of our fragrant water lily can never be too highly sung. It has lovely, pure white flowers. Strong roots 30c each; dozen \$3.00.

PINK POND LILY.—(*Nymphaea Odorata Rosea*).—This is the famous pink lily of Cape Cod, and is a grand acquisition. Very fragrant. Large roots 75c each.

YELLOW POND LILY.—(*Nymphaea Flava*).—Flowers of golden yellow color. Each 60c.

EGYPTIAN LOTUS.—(*Nelumbium Speciosum*).—A noble aquatic plant known in Egypt, India and China as the "Sacred Lotus." Has gigantic leaves of most tropical appearance, and flowers sometimes a foot in diameter. Color white shading to pink. Each \$1.25.

LUDWIGIA.—A pretty plant with smooth green leaves, variegated at certain seasons with yellow and red. It grows nicely in pots, vases and hanging baskets. Each 10c, 6 for 50c.

SAGITARIA.—A grass-like plant, quite desirable for growing in aquarium. Of a fine, waxy appearance; grows rapidly. Each 25c.

WATER LILIES.

LEMNA.—Sometimes called Duckweed. Has small, oval leaves, with rootlets hanging down in the water, and the plants are produced very rapidly by off-shoots. Bunch 15c.

WATER HYACINTH.—One of the most remarkable, curious and beautiful plants. It floats in the water, forming a lovely rosette of its curious shining green leaves, and throws up spikes of most exquisite flowers. Color is a beautiful, soft, lilac rose, sparkling as if covered with diamond dust. The upper petal has large metallic blue blotches and in the center of that a small golden yellow spot. Each 15c.

PARROT'S FEATHER.—A dainty little jewel. Its long trailing stems are clothed with whorls of most exquisite foliage, as finely cut as leaves of the cypress vine, but more delicate. Each 15c.

CABOMBA.—or *Aquaria Moss*.—This is the prettiest plant in existence for growing in aquariums, and also the most valuable. The foliage is of a beautiful light green and the leaves spread out like a fan, which gives it the name of Fanwort. The leaves are beautifully and regularly cut and resemble a delicate lace fern. Grows all the year round, but it looks a great deal better during the fall and winter months than during the spring. It may be broken any length and roots readily. It should be weighted down so that the base of the stems are in the sand. Per bunch of ten stems 25c, postpaid.

UMBRELLA PALM.—(*Cyperus*).—An ornamental plant which throws up slender, round stems about 2 feet high, surmounted at the top by a whorl of flat, ribbon-like leaves, diverging horizontally, thus giving the plant a very curious and fantastical appearance. It is a splendid decorative plant, being as ornamental as a palm or fern, and above all it is as easily grown as the commonest weed, and will thrive in the shade as well as the sun. It is an excellent plant for the dining-room table, or as a water plant in very moist spots, or for aquariums or fountains. It should have an abundance of water, though it will do fairly well in dry soil. We sell thousands of these plants and they are always satisfactory. Each 10c, larger 25c and 50c each.

WATER HYACINTH.

CYPERUS OR UMBRELLA PALM.

HARDY VINES.

APIOS TUBEROSA.

APIOS.—*Tuberosa.*—A valuable, hardy tuberous rooted climber, resembling in miniature the Wistaria vine, and having clusters of deep purple flowers which have a strong violet fragrance. They grow to a great height, and bloom profusely. Plant several bulbs close together to produce a mass of vines and flowers. Each 5c, doz. 50c.

CALYSTEGIA.—An excellent, rapid-growing hardy vine, coming up from the roots each year. Bears a profusion of beautiful, double pink flowers. Ea. 15c, doz. \$1.50

BIGNONIA.—*Radicans*—(*Trumpet Creeper*.)—Another old-fashioned hardy climber. It has clusters of large, trumpet-shaped crims on orange flowers. It grows in almost any soil and under trying conditions; hardy. Each 10c, large plants 25c.

HARDY MOON FLOWER.—(*Ipomoea Pandurata*)—A nice tuberous rooted climber which increases in size and beauty each year. The flowers are four to six inches in diameter, pure white, shading to pink with a handsome purple throat. Blooms are produced in great profusion and remain on the plant for several days. Each 20c.

CINNAMON VINE.—This beautiful climber possesses the rare quality of emitting from its flowers the delightful odor of cinnamon, and is very appropriately called the Cinnamon Vine. Perfectly hardy, the stem dying down every autumn, but growing again so rapidly as to completely cover any trellis or arbor very early in the season. With its beautiful heart-shaped leaves, clusters of delicate white flowers and delicious cinnamon odor it is a most desirable climber. We have always been short of these, but this year grew about 25,000 roots and hope to be able to supply the demand. We furnish the large tubers, postpaid, for 10c, 3 for 25c, dozen for 65c.

Bulbets—Quite satisfactory but do not produce as much vine as the large roots the first year. Per dozen 15c, per 100, 75c.

AMPELOPSIS.—*Veitchii.*—(*Boston Ivy*.)—A very beautiful and hardy climbing plant. This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingled with green leaves. Should be slightly protected the first winter, but after that it will be found entirely hardy in the most exposed places, attaining a height of 20 to 30 feet in two or three years, clinging to stones, brick or wood work with the greatest tenacity. It is a great protection to houses, as the leaves lapping over each other like shingles on a roof, effectually prevent the rain from penetrating the walls. For covering dead trees, gate posts, boundary walls, etc., it has no equal. In the summer the foliage is rich shade of green, but in the fall it assumes the most gorgeous tints of crimson, scarlet and orange, so dazzling as to be seen at a great distance. Each 10c, large plants 25c.

Variegated.—A sport of the above variety having beautifully variegated green and white foliage. A desirable novelty. Each 15c, large 35c.

SILK VINE.—(*Periploca Creeca*.)—A beautiful, rapid-growing climber, grows thirty to forty feet high; hardy. Leaves glossy and glitter like silk, therefore its name. Flowers purplish brown and borne in clusters. Each 20c, large 40c.

WOODBINE.—(*Virginia Creeper*.)—A strong, rapid grower; foliage large, dark green; in autumn bronze and crimson. This is an old favorite and quite common in most localities. Valuable for covering back porches, out-buildings, arbors, etc. Each 10c, doz. \$1.25, large size 30c, doz. \$2.50.

ENGLISH IVY.—A well known evergreen climber, highly valued in the east and south, but not hardy here. Makes a nice climber for the house, and when planted in the open ground should be on the north side of a building, as it is apt to suffer if exposed to sun in winter. Each 10c, large 25c.

In making a home, plan for future beauty, comfort and happiness by planting a variety of hardy clematis, ornamental vines, shrubs and roses which will constantly grow in beauty and size. Such permanent improvements add greatly to the value of any property, and the value grows from year to year, so that instead of an expense they should be considered a paying investment. We prepay the postage or express charges at these prices.

AKEBIA QUINATA.—A perfectly hardy, fast-growing Japan vine, producing flowers in large clusters, of chocolate purple color, possessing a most delicious perfume; unsurpassed for covering trellises and verandas; the foliage is never attacked by insects. Each 15c, large 30c.

HARDY CLEMATIS.—The most popular climbing plant of the day, and is constantly gaining in popularity—and why should it not?—as it is hardy, standing our most severe winters with but slight protection, grows rapidly and blooms freely during the entire season.

Jackmanii—Most magnificent and showy vine in existence; of strong, healthy growth, perfectly hardy and sure to succeed anywhere. Flowers four to six inches in diameter, of a rich, deep, velvety purple, distinctly veined. It is a prince among all hardy flowering vines. It is especially adapted to open lawns or house fronts in the city or country; blooms the entire season, from July to October, bearing beautiful and lasting flowers. Strong plants, each 50 cents; extra large, three-year-old roots, 75c.

Henryii.—This may be briefly described as a white flowered Jackmanii. It is the finest of all white sorts the same size as Jackmanii. Each 50c.

Mad. Edouard Andre.—An entirely distinct and beautiful new variety being the nearest approach to bright red ever sent out. Has the same vigorous growth, hardiness and freedom of bloom as the above, while the color is a pleasing carmine red. Each 50c.

Paniculata—This small-flowered variety of Clematis is one of our most beautiful, hardy, fall-blooming vines. The flowers which are pure snow-white, are produced in immense clusters, fairly covering the plant with a mass of fleecy white. They have a delicious fragrance. The plant is of extreme rapidity of growth. Each 15c. Large, extra strong plants, 30c.

Coccinea.—A charming variety of Clematis. Flowers are bell-shaped and of a brilliant coral red color. A rapid grower and a free bloomer, flowering from June until frost. It is an herbaceous perennial growing about twelve feet high. Each 25c.

Virgin's Bower.—(*Clematis Flammula*.)—An old fashioned popular climber, growing to a height of 20 feet, and covered with thousands of pure white fragrant flowers. The vine is perfectly hardy, rapid growing, graceful, and will succeed everywhere. Each 10c, large 25c.

COLLECTION.

A nice plant of each of the above six kinds of Clematis for only \$1.40 postpaid. A great bargain. Regular price \$2.00

HOP VINE.—A vigorous, hardy, ornamental vine, useful for covering old trees, outbuildings, fences, etc. Each 15c.

BITTER SWEET.—A native climbing or twining plant; large leaves, yellow flowers, orange capsuled scarlet fruit. Each 10c, large 25c.

CLEMATIS JACKMANII.

CLEMATIS HENRYII.

CLEMATIS PANICULATA.

CINNAMON VINE.

A PORCH IS UNATTRACTIVE WITHOUT PLENTY OF VINES.

GLECOMA.

HARDY BLUE SOLANUM.—A hardy perennial vine of rapid growth. The handsome cut foliage makes a beautiful shade for porch or arbor and is also desirable to train along fences, etc. It is covered during the summer months with hundreds of clusters of blue flowers, brightly set off with golden stamens; clusters measuring 15 inches in circumference. The flowers are succeeded by bright scarlet berries. When you consider its handsome foliage, and beautiful flowers and berries, and hardness, it is difficult to find a more satisfactory climber. Each 15c, large 30c.

Don't fail to try the
BEAUTIFUL CAMELIA VINE.

A perfectly hardy climber described with novelties. Each 15 cents

GLECOMA.—(Variegated Ground Ivy.)—The foliage is a bright green, marked with pure white and has a refreshing fragrance similar to mint. Graceful and beautiful for hanging baskets. Entirely hardy when planted out, and makes an ornamental, dense mat on the ground. Each 10c, doz. 75c.

ARISTOLOCHIA. (Dutchman's Pipe Vine.)—The well-known, vigorous and rapid-growing climber used so extensively for archways or verandas. It takes its name from the singular brownish colored flowers, resembling in shape a pipe. The leaves are heart-shaped and retain their color from early spring to late fall. Each 40c.

CHINESE KUDZU VINE.—A new hardy vine of really phenomenal growth, sometimes growing 12 inches a day, and reaching the extraordinary length of 50 to 75 feet. The large bright green leaves afford a dense shade and the clusters of rosy purple, pea-shaped flowers are fragrant and beautiful. Fine seedling plants; each 20c, doz. \$2.00.

HONEYSUCKLE.—Red Coral.—A shrubby climber and one of the most satisfactory of all plants. Has been a favorite for many years. The odd shaped foliage is showy and attractive and it produces its bright red, fragrant, trumpet-shaped flowers almost continuously. Nice for a hedge or for training over a residence. Each 15c, doz. \$1.50. Large dormant plants 25c.

Halliana.—(Hall's Japan.)—For real home vines to climb over your windows and doorways there is nothing prettier than the Honeysuckles, and the Halliana is considered by many the sweetest and most beautiful of all. It is a strong, rapid grower, perfectly hardy and almost an evergreen even in this severe climate. Blooms constantly and profusely from June to November. Flowers pure white changing to yellow, and of peculiarly delicious fragrance. Excellent for trellises or pillars. Foliage is bright, glossy green and makes a dense shade. Each 10c, doz. \$1.00; large two-year-old plants 20c.

Golden Leaved.—Slender, moderate grower; leaves beautifully veined and netted with clear yellow, so that the prevailing color of the foliage is bright yellow; flowers yellow and sweet-scented; fine for pillars and trellises. Each 15c, large 35c.

WISTARIA.—Blue Chinese.—A very rapid grower, and one of the most beautiful of all climbers. It is perfectly hardy, climbing to a height of fifty feet; when covered with bloom it is magnificent. Each 15c; large 30c.

White.—Like above but has pure white flowers and is a lovely climber. It is a strong, vigorous grower and flowers are freely produced in long pendant clusters. Each 20c, large 35c.

WISTARIA.

ARISTOLOCHIA.

CHINESE MATRIMONY VINE.—A vigorous growing shrubby climber which is perfectly hardy and desirable for training on trellis, wall or fence. Every new shoot becomes filled with small purple flowers, which are followed by brilliant scarlet berries which remain on the vine until late in the winter. Although the flowers are not showy, the long stems droop gracefully and make an admirable covering for the porch. Each 10c large 25c.

COLLECTION Ten Hardy Vines, all different, our choice of varieties, but all desirable **\$150**

CLIMBING ROSES.

If our customers only realized the importance and satisfaction there is in growing the climbing roses we fear that it would be impossible to supply the demand, although we have grown many thousands of plants for this year's trade. Notice the descriptive list of roses on page 82.

VALUABLE BOOKS.

HARDY PERENNIAL PLANTS.

It is really wonderful the immense demand which there has been for these hardy plants during the past few years, our trade in this line multiplying fourfold every year. Our customers are learning that they require less care and are more satisfactory with ordinary culture than most other classes of plants. When once set out they bloom year after year, the flowers really becoming better as the plants grow older. These varieties are all hardy, the tops dying down every winter, but coming up again in spring. Cover with leaves or litter after ground is frozen. We prepay postage on all of these and you may select \$1.25 worth at the single rate for \$1.00.

PEARL ACHILLEA.

woods. Many handsome colors.

ASTILBE Japonica.—Hardy everywhere, growing about two feet high, in compact shape, with handsome foliage, from above which rise its panicles of small, feathery white blossoms, the embodiment of grace and delicacy. Give a half-shaded position. Each 15c.

ANEMONE.—Whirlwind.—This beautiful Japanese Anemone has proved one of the finest hardy full-blooming plants in cultivation, growing to a height of three feet, and holding up on stiff stems double flowers from 2½ to 3 inches across, of pure white, and heavy waxy texture. A large bed of this is worth going miles to see, and the large, graceful flowers are unexcelled for cutting. Ea. 15c

Queen Charlotte.—Similar to above but earlier and of beautiful shell pink color. An early flowering pink Anemone. Each 15c.

ARUNDO, Donax Variegata.—A beautiful variegated giant grass. Foliage creamy white and green, growing 7 feet. Each 25c, doz. \$2.50.

ASCLEPIAS. Tuberosa.—(*Butterfly Weed.*)—Bright orange flower; showy and beautiful. Each 15c.

BABY'S BREATH or MIST—(*Gypsophila Paniculata.*)—Possesses a grace not found in any other perennial, and when in bloom it forms a symmetrical mass two to three feet high, of minute white flowers, giving it a beautiful gauze-like appearance. For cutting purposes it is exquisite, especially in combination with high-colored flowers. Each 10c, doz. \$1.00.

BOLTONIA Asteroides.—A beautiful native plant, growing 4 feet high, producing white Aster-like flowers. Each 15c.

IRIS.—Japanese.—(*Kaempferi*)—These magnificent Iris are among the most beautiful of our summer flowering plants. Of immense size and beautiful colors. Think of a plant sending up to a height of three feet a dozen flowering spikes, each spike bearing two to four blossoms eight or ten inches across, and of most beautiful colors, markings and combinations—white, Indigo, purple, bluish, yellow, etc. Once they are planted in your garden they are a joy for a lifetime, blooming profusely in June and July. Double and single mixed. Each 15c, doz. \$1.25.

German.—The true "Fleur-de-Lis," the national flower of France. Perfectly hardy, thrive anywhere, grow and bloom luxuriously, particularly if plentifully supplied with water, or if planted in moist situations. Each 10c, doz. 85c.

Pumula.—A dwarf, early blooming variety, quite desirable for borders and edgings. Mixed colors. Each 5c, doz. 50c.

CRIMSON EYE HIBISCUS.—This elegant Hibiscus is a robust grower, with dark red stems and foliage. The flowers are immense in size, often measuring twenty inches in circumference. The color is of the purest white, with a large spot of deep velvety crimson in the center of each flower. It will succeed anywhere and is perfectly hardy. Each 15c, dozen \$1.25; extra large 30c each.

GRASS PINKS.—The hardy and pretty clove-scented flowers which our grandmothers loved. The fragrance is quickly noticed by anyone passing by the yard where they are growing, before seeing the flowers. Flowers are double, semi-double and single, and range from pure white to dark pink and red. Each 10c, dozen \$1.00.

PARDANTHUS.—(*Blackberry Lily.*)—Quite curious and handsome. Flowers orange colored spotted with brown, about two inches in diameter. The blossoms are followed by seed clusters like a blackberry in size, shape and color. Each 10c, dozen 85c.

GAILARDIA.—Grandiflora.—These are among the showiest and most effective of hardy perennial plants; beginning to flower in June, they continue one mass of bloom the entire season. They will thrive in almost any position or in any soil, but respond freely to liberal feeding. Being perfectly hardy, they require absolutely no protection, taking care of themselves. The flowers are large, from 2½ to 3½ inches in diameter. They are produced on long stems, excellent for cutting and of gorgeous coloring. Center is dark reddish brown. Petals brilliant scarlet, crimson, orange and vermillion. Each 15c, doz. \$1.50.

JAPANESE IRIS.

ANEMONES.

BLUE BELLS.—No one can help loving the beautiful "Blue Bells of Scotland," and they are just as beautiful when grown here. Poets have sung their praises more than almost any other flower. Each 15c, doz. \$1.25.

CAMPANULA.—Assorted colors. Each 10c, doz. \$1.00.

DAY LILY.—White.—(*Funkia*)—A very beautiful plant for partly shady places. Large, round, heart-shaped leaves, clusters of fragrant lily-shaped white flowers. Each 15c, doz. \$1.50.

Blue.—Like above only flowers are of a lovely blue color, borne on tall spikes. Each 15c, doz. \$1.25.

Variegated.—Beautifully mottled dark green and pure white leaves, lilac flowers. Each 20c, doz. \$2.00.

DICENTRA.—Spectabilis.—The old Bleeding Heart, as lovely as ever. In early spring it bears its long chains of pendulous bloom of exquisite beauty. Each 25c.

LYCHNIS.—An old favorite, bearing large heads of bright flowers. Each 15c, doz. \$1.40.

GAILARDIA GRANDIFLORA.

RUDBECKIA OR GOLDEN GLOW.

PERENNIAL ASTER.—One of the finest of the perennial plants: very showy, exceedingly strong-growing and free-flowering, presenting a mass of small, bright rosy pink flowers in large clusters during late summer and autumn. Each 10c doz. \$1.00.

HARDY PHLOX.—We know of nothing in hardy perennials more showy or effective than a fine collection of hardy phloxes, and the new and improved varieties that have been introduced recently will add very much to their popularity. Some of the varieties have exceeding brilliant shades of color. In others the flowers are very large and the coloring very desirable. They bloom from June until very late fall.

Fringed Queen.—A novelty and the most beautiful pure white variety ever sent out. The trusses or flower heads are of immense size and each floret is large and beautifully fringed or feathered. Each 20c.

Pearl.—Best pure white variety. Large beautiful flowers. Each 15c.

Amphion.—Deep purplish crimson. Each 15c.

Wm. Robinson.—Rosy salmon. Each 15c.

Amorite.—White overlaid with lilac. Center rosy crimson. Each 15c.

Bayard.—Attractive new variety. Bright rosy lilac. Each 15c.

Champs Elysee.—A rich dark crimson. Ea. 15c

Mixed Varieties.—A fine assortment. Each 10c, doz. 85c. Large field grown clumps, each 250

MARGUERITE.—Golden.—(*Anthemis.*)—A fine yellow flowered perennial; a continuous bloomer the entire summer, withstanding both wet and dry weather. The flowers are of the exact form of a daisy, but clear yellow. Each 15c.

BLUE SPIRAEA.

RUDBECKIA, or Golden Glow.—

A glorious new hardy plant that should find a place in every garden. It is of fine habit; vigorous growth, with early, continuous and immense blooming qualities. It will be found excellent also for cut flower purposes. The stems are long and gracefully poised. The foliage is abundant and ornamental. It attains a height of six to eight feet, and a small plant set out in the spring will produce hundreds of blossoms during August and September, each are as large as a good sized chrysanthemum. Thousands of flower lovers have admired this plant on our place. It is of easiest culture and sure to please all. Nice for a screen row at back of lawn. Price 10c, dozen \$1.00.

PHLOX.—*Sublata.*—(*Moss Pink.*)—One of the finest of low, turfy-growing plants, fine for carpeting under trees, around rock-work, edging beds, etc. Early in spring is very showy with its cloud of bright pink and white blossoms. We do not understand why this is not more widely grown, for it is perfectly hardy, and will care for itself. Each 10c, doz. 60c.

HOLLYHOCKS.—These old favorites are again becoming quite popular and they are both showy and desirable for backgrounds and massing. Choicest varieties; mixed colors. Strong plants. Each 15c, doz. \$1.50. Large clumps each 35c.

IBERIS.—*Sempervirens.*—(*Perennial Candytuft.*)—A dwarf plant producing clusters of handsome flowers. Each 10c, doz. 90c.

MYRTLE.—*Green.*—A handsome trailing plant largely used for cemetery planting. Has beautiful, glossy, dark green leaves forming a mat over the surface of the ground. Flowers heavenly blue. Attract the attention and admiration of all observers. Each 10c, dozen 75c, \$4.00 per 100.

Variegated.—A beautiful little trailer like above, but having handsomely variegated green, yellow and white leaves. Each 15c; dozen \$1.25.

MONARDIA.—*Didima.*—(*Oswego Tea.*)—Flowers bright scarlet, produced in spikes. Each 10c, dozen 75c.

HELIANTHUS.—*Multiflorus Plenus.*—A plant that should be in every garden, and one that will give entire satisfaction. The flowers are from 3 to 4 inches in diameter, as double as any Double Dahlia, and cover the plant from the ground to the top. Color a bright golden yellow. It should have a sunny position and a rich soil. Each 15c, doz. \$1.25.

FOXGLOVE.—These are among the most satisfactory of the summer-flowering hardy perennials, succeeding under almost all conditions, and with but trifling attention will give a wealth of flowers during June and July. They are used extensively with good effect for naturalizing in shrubberies and other shady situations. Each 10c, doz. \$1.00.

EULALIA.—*Zebrina.*—A stately ornamental grass for the lawn or hardy border. The variegated foliage is evenly striped crosswise with broad bands of golden yellow; hardy; produces 50 to 100 plumes. Each 25c.

HARDY PERENNIAL PHLOX.

STOKESIA.—*Cyanea.*—Produces showy Aster-like deep blue flowers which measure from 4 to 5 in. across. Each 15c, doz. \$1.50.

HARDY GARDEN PINKS.—Dwarf hardy plants that will grow anywhere and increase in beauty every year; delightful clove-like fragrance; long blooming.

Her Majesty.—A grand variety; plants grow to large size, spreading and producing immense numbers of pure white, perfectly double flowers. Each 10c, doz. \$1.00.

Abbotsford.—Deep carmine, marbled with white; rich clove fragrance. Each 10c.

Gertrude.—White with maroon markings. Each 10c.

Aristocrat.—A single or semi-double fringed variety. Salmon pink blotched maroon. Each 10c.

Large field-grown clumps assorted, unnamed varieties of Garden Pinks, 20c each, \$1.75 per dozen.

COLUMBINE.—The Columbines are old favorite late spring and early summer blooming plants, growing about two feet high, that succeed in any ordinary garden soil. The varieties offered are a selection of the best kinds. Each 15c, doz. \$1.25.

DELPHINUM.—*Formosum.*—(*Hardy Larkspur.*)—Its long spikes of bright blue flowers are produced continually from June until frost. Handsome in clumps. If clipped off as they begin to fade they produce a succession of bloom all summer. Each 15c, doz. \$1.50.

HELIANTHUS MULTIFLORUS PLENUS.

WE INVITE FLOWER LOVERS TO VISIT OUR TRIAL GROUNDS—12 ACRES OF FLOWERS.

PAEONIES.

FESTIVA MAXIMA PÆONY

SWEET WILLIAM.—Well known, free blooming, hardy perennial plants, which produces masses of lovely, brilliant, sweet scented flowers through a long period, making a splendid effect in beds. One foot high. Flowers borne on heads or umbels, with individual florets nearly an inch across. Color white, pink, crimson, carmine, purple, etc., with eyes and rich markings. Each 10c, doz. 85c.

POPPY Iceland. — Fern-like foliage and bear an immense number of elegant flowers. Each 15c, dozen \$1.25.

Oriental. — Mammoth flowers of gorgeous splendor. Each 15c, dozen \$1.25.

SPIRAEA —Blue.—(*Caryopteris*)—A handsome shrubby plant from China; hardy cover with straw during winter. Color a beautiful azure blue; a fine plant for pots or open ground. Bloom luxuriantly from mid-summer until heavy frosts. Each 20c.

SAPONARIA.—(*Bouncing Betsy*.)—Old fashioned perennial with pink flowers. Each 10c, doz. 75c.

EVERYONE knows the old-fashioned red "Piny" of our grandmother's garden, but the specialists of America, Europe, and particularly those of Japan, have been at work so that there are now more than one thousand named varieties, many of them of the most curiously beautiful shapes, and colors. They are as hardy as an oak of the easiest culture, most vigorous habit, and free from all disease and insects. Many of the newer varieties are quite fragrant and no other flower is so well adapted for large, showy bouquets. We have acres of paeonies including a large number of sorts, but list only a few of the most popular.

Festiva Maxima.—This variety is far the finest double white paeony grown. The flower is of immense size, perfectly globular, the guard petals being large, while the inner petals are crimped, thus making it appear extremely double. The color is of the purest snow white with sometimes slight carmine marks in the center. Usually sell at \$1.00 each, but we offer it at only 75c, dozen \$8.00.

Victoria Tricolor.—Has a very large full flower. The outer petals pale rose mottled with pink; center yellowish white. Each 25c, doz. \$2.50.

La Esperance.—An exceedingly fine vivid rose colored flower, growing compact and highly perfumed, early, free flowering. Each 35c, doz. \$3.50.

Andre Lauries.—A very double flower of deep bright red that blooms till late in the season. Each 25c, doz. \$2.50.

Grandiflora Rubra.—Extra large perfect balls of pure blood red, magnificent flowers. Probably the largest red variety in existence, often eight or nine inches across, and so double as to appear like perfect balls. Give it rich soil and you will be surprised. Each 50c, dozen \$4.75.

Double White.—Large double flowers which appear to be pure white on the bush, but when placed beside Festiva Maxima show a slight creamy tint; a free bloomer. Each 35c, doz. \$3.50.

Rubra Triumphans.—An early blooming, very sweet scented flower of rich, brilliant, glowing, satiny crimson color. Each 25c, dozen \$2.00.

Fine Mixed.—This mixture contains many of the choicest American and foreign sorts, but as we have a very large stock we offer them at only 20c each, \$2.00 per dozen, \$12.50 per 100, charges prepaid. Why not put in a large bed or border your drive with them?

Golden Harvest.—It is probably the nearest approach to a yellow Paeony. A very sweet and showy flower. Each 60c, dozen \$5.50.

Achille.—A very lovely large silky flower; white shaded with soft delicate flesh color. Full double, a good bloomer, fragrant. Each 40c, doz. \$3.50.

Ruth.—An especially choice sort. Foliage rich, glossy green, ornamental even when flower is not in bloom. Flower is of good size, perfectly double and of a clear handsome pink color. Each 25c, dozen \$2.50.

GRANDIFLORA RUBRA PÆONY.

TRITOMA.—Pfitzeri—Sometimes known as Flaming Torch or Red Hot Poker Plant. At floral exhibitions and when sent as cut-flowers to market, this plant attracts great attention. It grows from 3 to 4 feet high, the flower measuring 12 to 15 inches long. They are of dazzling scarlet, lower half of flower tinged with rich orange. Each 20c, 3 for 50c.

STRIPED RIBBON GRASS.—The common striped grass, no two leaves alike. Pretty in clumps or borders. Each 10c, dozen 75c.

VIOLETS.—Of all perfumes that of violets is no doubt the most delicate and pleasant and easily places these modest little blue flowers among our greatest favorites. Violets grow and bloom freely if given a cool situation, but will not succeed in a warm place, and should be well covered to insure their protection during the winter months.

Swanley White.—Unquestionably the finest double variety in existence and is a decided acquisition. Plants are of vigorous growth, producing a great many of the pure, snowy white, double flowers. It has such a delightful odor that it has been called the "Queen of Fragrance." Each 10c, doz. \$1.00.

Marie Louise.—To contrast with the white we offer this, the finest double blue violet grown. Color deep violet blue; very fragrant; continual bloomer. It is of easy growth. Each 10c, doz. \$1.00.

California.—Grand new single variety. A sturdy grower, dense, heavy foliage, free from disease. Flowers fragrant, a clear unfading violet purple. Flowers are large and borne on stems ten to twelve inches long. Hardest of all. Each 10c, doz. \$1.00.

Princess of Wales.—Broad, pansy-like flowers of a beautiful violet purple shade, with lighter center. A vigorous growing plant with clean, healthy foliage and stiff, long stems. It is one of the most beautiful and free flowering violets. Each 10c, doz. \$1.00.

YUCCA.—Filamentosa.—(*Adam's Needle*.)—Tropical looking plant with long, narrow leaves; remains green the entire year. Grows in clumps and throws up a flower stock from 3 to 4 feet high, from which hangs from 100 to 300 creamy white bell-shaped flowers. It blooms a long time. Each 15c, doz. \$1.50; strong 2-yr. old plants 30c.

PLATYCODON.—(*Bush Clematis*)—A low-growing, bushy, herbaceous plant with handsome, deep green foliage and bearing grand clusters of beautiful, large, bell-shaped flowers; lovely violet blue; blooms June to October. Each 15c, large size 30c.

White.—Similar to above; white flowers. Each 15c, large size 30c.

SWANLEY WHITE VIOLET.

YUCCA FILAMENTOSA.

BEAUTIFUL LILIES.

NOTHING can surpass the Lily in beauty, purity, delicacy and stately magnificent grandeur. A few clumps planted in some place in your yard where they will not be disturbed from year to year, will reward you with abundant flowers. These varieties are perhaps, the most popular lilies grown, being of easy cultivation, and producing large flowers of delicate beauty on strong stems. Bloom better the second year and thereafter.

AURATUM.—(*Japanese Gold Banded Lily*.)—This is justly entitled to the name often given it. "The Queen of Lilies." The immense flowers are produced in great profusion and are deliciously fragrant. The large white petals are thickly spotted with rich chocolate crimson, and have a bright golden yellow band through the center of each. Each 20c, doz. \$1.75; extra large bulbs each 30c, doz. \$2.75.

SPECIOSUM RUBRUM.—These are perhaps the most popular Lilies grown, being easy of cultivation and produce large flowers of delicate beauty on strong stems; height from 2 to 4 feet. Blooms in August. Flowers are white, with a deep rosy or crimson band on each petal, with deeper colored spots between. They are 5 to 6 inches in diameter, very fragrant, and have all the hardiness of the Speciosum class. Each 15c, 3 for 40c.

SPECIOSUM ALBUM.—Has large white flowers of great substance, beautifully recurved. Each 20c, 3 for 50c.

TIGRINUM SPLENDENS.—An improved Tiger Lily growing sometimes six feet high, and producing large pyramids or orange red flowers spotted with black. Each 10c, doz. \$1.00.

LONGIFLORUM.—(*Easter Lily*)—This mammoth white trumpet Lily with flowers 4 to 5 inches long, is one of the best of Lilies for winter blooming, because its grand trumpet-shaped flowers, which give forth a delicate perfume, are wonderfully beautiful and expressive. When planted in the open ground they should be protected during the winter. Each 20c, 3 for 50c.

THUNBERGIA ELEGANS.—A strong grower, dense foliage, 3 feet high, flowers upright, cup-shape, and borne in clusters of 5 to 12. Color a dark orange spotted brown. Perfectly hardy. Each 15c, 3 for 40c.

DOUBLE TIGER LILY.—A double form of the old Tiger Lily. The flower is densely double, color orange red, spotted with black. Blooms freely and should be more largely grown. Each 15c, doz. \$1.35.

TENUIFOLIUM.—The lovely Coral Lily of Siberia. Brightest of all Lilies, of shining coral red color. Foliage finely cut. This is indeed a little beauty. Each 15c, doz. \$1.50.

LILY OF THE VALLEY.

A well-known and universally admired spring flowering plant, bearing bell-shaped, freely produced and powerfully fragrant flowers. To grow in open ground select a partly shaded rather moist situation, and they are charming when grown in large patches as their handsome green leaves and lovely sprays of flowers make a beautiful effect together. When once planted and established, the crowns increase in number and the larger ones flower each year without attention. Now is the time to set out a bed of these delightful flowers. Our price is low for choice stock such as we send out. Four strong roots for 15c, doz. 35c.

LILY OF THE VALLEY.

MELPOMENE.—Words cannot describe the beauty of this variety. Frosted white, spotted, clouded and bearded with pinkish crimson. Petals recurved and widely bordered. Each 20c, 3 for 50c.

CANADENSE.—A handsome native variety which has drooping bell-shaped yellow and red flowers. Each 15c, doz. \$1.25.

ORANGE LILY.—(*Hemerocallis Demorteri*.)—Similar to Lemon Lily, but of a fine orange color. Each 15c, dozen \$1.50.

WINTER BLOOMING BULBS.

Some of the most beautiful and fragrant of all the flowers grown belong to this class, and when potted in the house, they come in bloom just at the time when flowers are most wanted and most difficult to obtain. Our bulbs arrive from Holland about Sept. 15th. The best way is to order during the spring or summer, then your order will be filled as soon as bulbs are received. We name only a few kinds here. You should send for fall catalogue which contains a full descriptive list. Ready September 1st.

HYACINTHS.—Beautiful fragrant flowers for winter blooming in the house or bedding in the garden. Either double or single mixed. Each 8c, doz. 85c.

WHITE ROMAN HYACINTHS.—For winter forcing. Each 5c, doz. 50c.

CROCUS.—Fine for borders. Mixed colors. Doz. 10c.

DAFFODILS.—Von Sion.—The true double yellow. Each 4c, doz. 35c.

NARCISSUS.—Paper White Grandiflora.—Each 4c, doz. 35c.

NARCISSUS.—Poeticus or Pheasant's Eye.—Each 3c, doz. 20c.

TULIPS.—Double or single mixed. Each 4c, doz. 30c.

SCILLA SIBERICA.—Each 4c, doz. 35c.

CHINESE SACRED LILY.—Each 15c, doz. \$1.40.

SNOWDROPS.—Single—extra fine bulbs, 15c per doz. Double—extra fine bulbs, 25c per doz.

FREESIAs.—Each 3c, doz. 20c. Mammoth. Each 5c, doz. 50c.

DOUBLE TIGER LILY.

REMEMBER THAT BULBS CAN BE KEPT THROUGH THE WINTER AND YOU DO NOT HAVE TO BUY NEXT YEAR

NURSERY STOCK.

Nothing is more beautiful than fruit, and nothing more easily grown. No farm, garden or city lot is complete without a few fruit trees and small fruit plants. It is essential that you secure good plants and trees in order to grow good fruit. We aim to send out only the very best stock, which with necessary care in planting and cultivating will surely give satisfactory results. The following prices are all for first-class stock, carefully packed for shipping. Fifty or more of any variety at the hundred rate. Where quoted "by express" the purchaser is to pay the transportation charges by express or freight. Orders for nursery stock must amount to at least fifty cents. Ask for special prices on large orders, sending list of wants.

RASPBERRIES.

NEW CARDINAL.—This wonderful berry surprises all by its great growth, extreme hardiness, exceeding productiveness and the unusual richness of its pure flavored, large purple berries. Leading horticulturists everywhere have pronounced it one of the fruit wonders of the century and the most profitable of all sorts. Each 20c, doz. \$1.25, prepaid. By express per 100 \$2.75.

CUMBERLAND.—This is undoubtedly the best blackcap variety yet introduced. It is of very large size, good quality, firm and handsome, and an excellent shipper. Plants vigorous and hardy, productive and free from disease. Each 20c, doz. \$1.25 prepaid; by express per 100 \$2.50.

CONRATH.—Resembles the Gregg in many ways, but is much earlier, better quality and harder. It makes a very strong, healthy growth, and is considered one of the iron-clad varieties. Each 15c, doz. \$1.00 prepaid; by express per 100 \$2.25.

GREGG.—Too well known to need description. Has been one of the leading blackcap varieties for many years. Each 15c, doz. 75c prepaid; by express per 100 \$2.00.

HAYMAKER.—Purple red color cap, not so dark as Columbia or Shaffer, but larger and firmer than either of these varieties; never crumbles and stands up well in shipping. Considered the best purple cap yet introduced. Roots from the tips. Each 25c; doz. \$2.00.

STRAWBERRIES.

Perfect flowered varieties are marked (s); the imperfect marked (p), must have perfect flowered sorts planted with them or they will not fruit. Ask for price by the thousand.

ROUGH RIDER (s).—This new variety has proved to be one of the most vigorous growing and productive varieties yet introduced. The fruit is very large, slightly irregular, quite firm and of most excellent quality. Ripens from medium to late. Per doz. 40c, per 100 \$1.75 postpaid. By express per 100 \$1.50.

SAMPLE (p).—Of large size, fine shape, good quality. It has been claimed that it produced 16,000 quarts per acre on the grounds of the originator in Massachusetts. The season for ripening is long, and it holds its size well to the last picking; also does well in matted rows. Per doz. 40c, per 100 \$1.75 postpaid. By express per 100 \$1.50.

CLYDE (s).—This has been one of the most popular varieties in the west for the past few years. It is of vigorous growth and very productive. The berries are a deep scarlet in color and moderately firm. Decidedly the best early sort, Per doz. 40c, per 100 \$1.25 postpaid. By express, per 100 \$1.00.

SENATOR DUNLAP (s).—A medium sized variety; very hardy, productive and vigorous grower. Remains in bearing until quite late. It is unsurpassed in quality; Claimed to be the best all round variety yet introduced. Per doz. 40c, per 100 \$1.50 postpaid. By express per 100 \$1.25.

BISMARCK (s).—This resembles Bubach, of which it is a seedling, but is not quite so large, but much better in shape, color and quality. It is very productive and ripens late in the season, Per doz. 40c, per 100 \$1.25 postpaid. By express per 100 \$1.00.

SEAFORD (p). Of extraordinary merit. Begins ripening early and continues late. A most excellent variety for home use. It is a deep, glossy crimson, of excellent quality. The plant is an exceptionally vigorous grower. Per doz. 40c, per 100 \$1.25 postpaid. By express per 100 \$1.00.

WARFIELD (p).—This is one of the best known market berries, of medium size and excellent quality and a good shipper. It is one of the best early sorts and maintains its size well throughout the season. Per doz. 25c, per 100 \$1.00 postpaid. By express per 100 75c.

ROUGH RIDER.

BEDERWOOD (s).—This is one of the best known varieties for planting with Warfield or Crescent, as it produces a large amount of pollen. It is of excellent color and a good shipper. Ripens early. Per doz. 30c, per 100 \$1.00 postpaid. By express per 100 75c.

CRESCENT (p).—One of the old standard varieties, which will produce a large crop where other varieties would fail, as it will stand an unusual amount of neglect. The berry is of medium size and fair quality. Per doz. 25c, per 100 \$1.00 postpaid. By express per 100 75c.

NICK OHMER (s). Very large in size, uniform in shape, dark glossy red, firm and excellent flavor. Season rather late. Per doz. 40c, per 100 \$1.50 postpaid. By express per 100 \$1.25.

BRANDYWINE (s).—Large berry, vigorous strong grower and makes a large heavy plant. It is fine for market, being large, firm, and of a handsome red color. The blooms are perfect, making it a good fertilizer for other varieties. Per doz. 40c, per 100 \$1.25 postpaid. By express per 100 \$1.00.

PARKER EARLE (s).—One of the most vigorous and best sorts for family garden. Per doz. 50c, per 100 \$1.75 postpaid. By express per 100 \$1.50.

WM. BELT (s).—Plant large and a thrifty grower. Berry large, of brilliant glossy red color and best quality. Per doz. 40c, per 100 \$1.60 postpaid. By express per 100 \$1.40.

CARDINAL RASPBERRY.

DEWBERRY.

LUCRETIA.—The best dewberry yet introduced for this section. Berries much larger and better in quality than blackberries. Each 15c, doz. \$1.25 prepaid. By express per 100 \$3.00.

BLACKBERRIES.

OHMER.—A valuable late variety. Fully as hardy as Snyder; very productive and of excellent quality. Each 20c, doz. \$1.25 postpaid. By express per 100 \$3.00.

ERIE.—Very productive. Fruit large and of fine quality. Makes a very attractive appearance on the market. Each 20c, doz. \$1.25 prepaid. By express per 100 \$3.00.

ANCIENT BRITON.—This is regarded as one of the hardest blackberries and especially adapted to Iowa, Wisconsin and Minnesota. Each 15c, doz. \$1.00 prepaid. By express per 100 \$2.25.

SNYDER.—Extremely hardy and very productive. The standard sort for the west. Each 15c, doz. 75c prepaid. By express per 100 \$2.00.

ERIE BLACKBERRY.

CLYDE.

Certificate No. 76.

State of Iowa,

CERTIFICATE OF NURSERY INSPECTION.

This is to certify, that the nursery stock for sale by the Iowa Seed Co. of Des Moines, County of Polk, State of Iowa, has been inspected according to the provisions of Chap. 53 of the 27th Gen. Assembly, and that no indications have been found of the presence of the San Jose scale or other dangerous insect or plant disease. This certificate is invalid after June 1, 1907.

Aug. 7, 1906, Ames, Ia. H. E. SUMMERS, State Entomologist.

IF YOU WANT A LARGE LOT OF NURSERY STOCK WRITE FOR PRICES.

GRAPES.

McPIKE.—This grand new sort is now pronounced the most valuable black variety ever offered. A great improvement on the Worden. Early, bunches large and compact, ripens evenly and berries are of enormous size. Each 50c, doz. \$4.00 postpaid.

CAMPBELL'S EARLY.—Strong grower with large, healthy foliage. Very productive, its keeping and shipping qualities are unequaled by any other early grape. Ripens with Moore's Early. Bunch and berry large, glossy black with blue bloom. Sweet and juicy; clusters are usually shouldered. Each 35c, per doz. \$3.50 postpaid. By express, per 100 \$15.00.

MOORE'S EARLY.—Bunch large, berry very large and round, vines exceedingly hardy. A very desirable early market black variety, extremely hardy. Each 25c, doz. \$1.75 prepaid. By express, per 100 \$5.00.

WORDEN.—A large grape of the Concord type, much earlier, larger and of better quality, hardy and more productive. The best all around black grape. Each 25c, doz. \$1.50 postpaid. By express, per 100 \$4.25.

CONCORD.—The well known standard black variety. Succeeds well everywhere. Each 20c, doz. \$1.50 postpaid. By express, per 100 \$4.00.

LUCILE.—A beautiful bright red grape, supposed to be a seedling of the Wyoming Red. Berry is very large and bunches large and compact. Is an enormous bearer of excellent fruit. Has never been known to winter kill, and is free from mildew and disease. Each 50c, doz. \$4.00 prepaid.

AGAWAM.—Berries are very large, bright red, with thick skin, very vigorous grower. Fruit of good quality. Each 25c, doz. \$1.50 postpaid. By express, per 100 \$4.50.

WOODRUFF.—Of iron-clad hardness, a rank grower and very healthy. Fruit large and very attractive. Usually shouldered. Sweet and of fair quality. Ripens soon after the Concord and stands at head of list of red varieties. Each 35c, doz. \$2.50 postpaid. By express, per 100 \$8.00.

NIAGARA.—This is a leading white variety, very productive and hardy. Bunch and berries large, green or white, changing to pale yellow when fully ripe; the skin thin and tough. Quality extra fine. Each 25c, doz. \$1.75 postpaid. By express, per 100 \$5.00.

BRIGHTON.—Of the best quality. Bunch and berry large, of bright red color and it is quite productive. Each 25c, doz. \$1.50.

CAMPBELL'S EARLY.

PEARS.

Any of the following by express, each 50 cts.; per doz. \$4.00.

KIEFFER.—Large, rich colored and good quality. Excellent for canning; will keep until late in the winter.

BARTLETT.—Large size of excellent quality. One of the leading varieties.

SECKEL.—Small, but of excellent quality; very hardy

PEACHES.

Each 30 cts.; per doz. \$2.50. Not prepaid.

CHAMPION.—Fruit large, beautiful in appearance, excellent flavor, skin creamy white with red cheeks, extremely hardy with freestones.

CROSBY.—Medium size, bright orange yellow, streaked with carmine. One of the best standard sorts and claimed to be the hardiest of all peaches. Ripens in September.

CRAB APPLES.

TRANSCENDENT.—Medium size, golden yellow, rich, crimson red cheek, hardy and an abundant bearer.

HYSLOP.—Large, produced in clusters. Color dark rich red. Late.

WHITNEY NO. 20.—Red striped. Fruit of medium size. Flesh firm and juicy. Early.

Each of above 35c, dozen \$2.75 by express.

APPLES.

Price 25 each; \$2.25 per doz. Purchaser to pay transportation charges. Ask for prices by the hundred.

EARLY VARIETIES.

YELLOW TRANSPARENT.—Early, fine quality, juicy and sub-acid.

BENONI.—Medium size, red, tender, juicy, productive.

RED JUNE.—Medium of excellent quality. **DUCHESS.**—Good size, very early, rich, juicy fruit.

AUTUMN VARIETIES.

MAIDEN'S BLUSH.—Beautiful blush cheek, large.

DYER.—Light yellow, excellent quality. **FAMEUSE.**—(or Snow Apple.)—Medium size, striped with deep red; flesh very white, juicy, excellent quality. **SWEET SWAAR.**—Large, yellow, tender, spicy.

WINTER VARIETIES.

WEALTHY.—Large, red, showy, sub-acid and productive.

MAMMOTH BLACK TWIG.—Resembles Winesap, but is from one-third to one-half larger; very vigorous, strong grower. Productive, good quality and hardy. **INGRAM.**—Is from the seed of Rawle's Janet, but is larger; tree very productive; valuable for a long keeper. **BEN DAVIS.**—Large, handsome, standard western variety for market. **GRIME'S GOLDEN.**—Good size, yellow, of highest quality, very productive. **JONATHAN.**—Medium, red, extra quality. **GANO or BLACK BEN DAVIS.**—An improved Ben Davis, nearly covered with deep dark red. **RAWLE'S JANET or JENETIN.**—Medium, yellow striped with red. Rich, crisp and juicy; a long keeper. **TALMAN SWEET.**—Medium, yellow like snow apple. **WAGENER.**—Is one of the most beautiful winter apples ever grown. Supposed to be a seedling of the Northern Spy. It is much brighter red and of the highest quality; the flesh being crisp, tender aromatic. **NORTHWESTERN GREENING.**—Hardy, yellow, of rich flavor and a good keeper. Price:—any of above 25c, doz. \$2.25, by express or freight, at purchaser's expense. Ask for prices by the hundred.

KIEFFER PEAR.

CURRENTS.

POMONA.—The most productive and vigorous red current ever introduced, ripens early, but remains on the bush longer than any other sort. Of remarkably fine quality. Each 20c, doz. \$1.75 prepaid.

FAY'S PROLIFIC.—One of the most prolific, of excellent quality. Each 15c, doz. \$1.25 prepaid.

WHITE GRAPE.—Each 15c, doz. \$1.00 prepaid.

GOOSEBERRIES.

JOSELYN.—A new variety of gooseberry of superior merit. Very large, hardy, productive and free from mildew. Regarded the best of recent introduction. Be sure to secure one or more plants of this variety. Each 35c, dozen \$2.75 prepaid.

PEARL.—One of the most prolific gooseberries known, very hardy, entirely free from mildew. Superior in size and productiveness to Downing. One of the best of recent introduction. Each 25c, dozen \$2.25 prepaid.

INDUSTRY.—The best English sort yet introduced in this country. Berries of immense size, 1 to 2 inches long. Each 25c, dozen \$2.25 prepaid.

HOUGHTON.—Pale red, good quality and productive. Each 20c, dozen \$1.25 prepaid.

DOWNING.—Large, pale green berries. Each 20c, dozen \$1.50.

PLUMS.

Any of the following sorts by express each 50 cents, dozen \$4.00.

BURBANK.—Considered by some to be the best of all the European sorts. Color clear cherry red with thin lilac bloom. Flesh deep yellow, very sweet and agreeable

LOMBARD.—A valuable market variety, one of the most hardy and popular. Late

FOREST GARDEN.—Large mottled red and yellow, very sweet and rich.

ABUNDANCE.—Hardest of Japanese varieties. Large, showy and fine quality.

WEAVER.—Flesh firm, red, juicy, with flavor resembling the apricot; freestone early bearer and very productive, hardy and said to be curculio proof.

WILD GOOSE.—Large, rich, melting and delicious. Strong grower and prolific

CHERRIES.

Price each 50 cents, dozen \$4.50, not prepaid.

EARLY RICHMOND.—Medium size, dark red, juicy acid flavor. Unsurpassed for cooking.

MONTMORENCY.—Large red acid cherry, larger than Early Richmond and about ten days later.

WRAGG.—Large, late acid variety, dark purple; very productive.

ENGLISH MORELLO.—Fine large late variety.

EVERGREENS.

Our Evergreens are all nice shaped and transplant. Purchaser to pay express charges.

"AYE, KEEP PLANTIN' A TREE JOCK, IT'LL BE GROW'N WHILE YOUR SLEEPIN'."

LAWN SUPPLIES.

ALL OF THE BEST QUALITY.

IOWA SEED CO'S
NEW BALL BEARING
CONQUEROR
LAWN MOWER

NEW BALL BEARING CONQUEROR LAWN MOWER.—For six years past one of the oldest and largest manufacturers has been experimenting to adapt the ball-bearing and other new features to lawn mowers. For two or three years he has put out a few dozen each year to give them a practical test and they have proved wonderfully successful. He has now put them into our hands, and we can offer our customers by far the best mower ever put on the market. The shaft is extra heavy, bearing four cutting knives, and it runs at a high speed compared to ordinary mowers. This gives it a continuous cut and makes a smoother, cleaner lawn. The wheels are nine inches in diameter, with skeleton rims. It has parallel bearings provided with micrometer adjustment, so that practically it cannot wear out. Stationary knife is of the best cast steel, hardened, tempered and self-sharpening. In all respects it is designed for hard, continuous service, and still the ball-bearings and all parts are so perfectly adjusted that it runs as easy as a bicycle. As will be noticed the handles are a new style made specially for us. If desired we can furnish mowers with the ordinary handles at 50c less. The mowers are warranted, and we are sure will please the most particular. Price for mower cutting 14-inch swath, \$6.50; 16-inch, \$7.00; 18-inch, \$7.50; 20-inch, for large lawns, \$7.75.

IOWA CLIPPER LAWN MOWER.—For six years we have sold a great many of these and they gave splendid satisfaction everywhere. It is thoroughly well made, runs easily, does excellent work, cutting smooth and clean. Diameter of drive wheels 8 1/4 inches. Its cutting bar is solid steel and all parts are of best quality, while its simplicity of construction insures durability and also lessens the cost. By purchasing a large number we are enabled to offer them at wonderfully low prices. Price for mower cutting 12-inch swath \$2.75; 14-inch, \$3.25; 16-inch, \$3.75.

IRON RESERVOIR VASES.—These are the best vases made for general use, as well as for cemeteries, as they do not require watering oftener than once in ten days. The top part or earth receiver has a tube in the bottom extending down into the water reservoir which is packed with moss or sponges through which the moisture is drawn up into the earth by capillary attraction so that the roots of the plants always have sufficient moisture and are never over watered. Price \$10.00 each; larger size \$20.00.

IRON RESERVOIR VASE

PLANT TUBS.—For large plants, 13 1/2 inch, \$1.00; 14 inch \$1.25; 16 inch, \$1.60; 20 inch, \$2.10; 24 inch, \$3.00.

EUREKA WEED KILLER.—Weeds, grass and moss are a nuisance on gravel and brick walks and driveways. They are easily killed and the walks made bright and clean by using this preparation, one packet of which is sufficient when mixed with 25 gallons of cold water to clean 100 square yards. Package 75c, by express.

ELECTRIC ANT EXTERMINATOR.—Lawns sometimes become infested with ants which disfigure it with unsightly heaps of dirt and kill the grass in spots. Many experiments have been tried to destroy them, with little success, until the invention of this new preparation which does the work. Per package 25c, or postpaid for 30c. Also nice for use in the house.

CLIMAX LAWN WEEDER.—A simple and easy working device for removing noxious weeds and plants from lawns. Easily operated and does effective work. The full length is 42 inches, enabling the operator to stand erect. Push the chisel under the plant at an angle that will sever the roots. A slight pull on the trigger brings the grab down which securely holds the plant, lifting it out and leaving only a slight mark. Price \$1.00.

CLIMAX WEEDER.

SELF CLEANING LAWN RAKE.—Best cheap device for raking the lawn. Automatic self cleaner, keeping the teeth clear. 75c each.

GRASS CATCHERS.—The most successful device yet brought out for the purpose. It is easily attached to any make of lawn mower that we know of, and as it fastens to the handle only, it does not in any way interfere with the action of mower. Our cut shows it adjusted ready for use. It can be almost instantly loosened at the lower end to dump the grass. No. 1, suitable for the 12 or 14-inch low wheel or ordinary lawn mowers, each 50c. No. 2, for 14 or 16-inch high or low wheel, 65c. No. 3, for 16 or 18-inch high or low wheel, 80c. No. 4, for 20-inch high wheel, extra strong \$1.00.

PRESTON LAWN SPRINKLER.—The whirling arms give a beautiful fountain-like appearance and fine spray. One of the most effective sprinklers made. The whirling arms distribute the water evenly, give a fine spray, cover a large circle and make a very attractive appearance on the lawn. The sled arrangement on which it rests makes it easy to move from place to place by pulling the hose. Each \$1.35.

DUDE HOSE REEL.—It pays to use a reel as it keeps the hose in better shape and saves considerable labor and annoyance. Price 85c.

Iowa Clipper
Lawn Mower
and Grass Catcher.

MAGIC NOZZLE.—Sprays, or will throw a solid stream. Each 50c

for 1000 square feet of lawn, or 400 lbs per acre, early in spring. Price 10 lb. package, 60c; 25 lb. package \$1.00; 50 lb. package \$1.85; 100 lbs. \$3.50; 400 lbs. \$12.00.

ESTIMATES On lists of Lawn Grass Seeds, Shrubbery or Decorative Plants, Lawn Supplies, etc., furnished on application, and customers may depend on honorable treatment and lowest prices, considering quality. Send your list to us for prices. We can please you.

LAWN GRASS SEED.—See descriptive list of Lawn Grass Seed on page 41 of this book and ask for special circular with directions for making lawn.

EXCELSIOR HORSE LAWN MOWERS.—The best make, 30-inch cut, \$80.00; 35-inch, cut, \$95.00; 40-inch, \$120.00.

FINLAY ROTARY LAWN RAKE.—It does the work of raking and gathering up all loose grass, leaves, twigs and loose litter. It works very rapidly and cleans the lawn thoroughly. Price \$12.00

IMPROVED GRASS SHEARS.—An improvement on the ordinary grass or sheep shears. Has long blades and handle is curved to prevent rubbing knuckles on the ground when using. Each 50c.

TURF EDGER.—For trimming borders of walks, drives, etc., to make a square edge. Price 50c each.

RUBBER HOSE.—Few realize the great difference there is in the quality of rubber hose. The price ranges from \$2.00 to 12.00 per length of fifty feet. The low grades will not stand ordinary water pressure and are gone in a few days. The most expensive grades, are intended only for steam. For general use the grades which we offer this year, are, we believe superior to any other. We want to warn every one not to leave their hose out in the sun when not in use as the water left in it gets very warm and will rot the best of hose.

RUBBER HOSE.—A high grade of five ply rubber hose. Per coil of 50 feet, \$7.50.

COTTON HOSE.—Many persons consider the cotton hose more serviceable than rubber. Per coil of 50 feet, \$6.00.

HALF INCH RUBBER HOSE.—Every year the half inch hose is becoming more popular as it is lighter and easier to handle. Per coil of 50 feet, \$5.00.

GRASS HOOKS or SICKLES.—Useful for trimming the edges of lawns, next to fences, around trees, shrubs, etc. Price 25c each or a superior quality for 40c.

WIRE TREE GUARDS.—It pays to use them and avoid any injury to the bark from animals, lawn mowers or accidents. No. 1, 5 ft. 3 inches high 7 inches in diameter, each \$1.00; doz. \$9.50. No. 2, 6 ft. high, 7 inches in diameter, each \$1.30; doz. \$12.00.

PEERLESS LAWN FERTILIZER.—Lawn grass is a voracious feeder, and will not thrive and hold its beautiful dark green color and velvety appearance unless it is suitably fed. The lack of this one requisite causes many poor and rusty looking lawns. Our Peerless Lawn Dressing is prepared specially for lawns and is of the best quality, dry, finely pulverized and easy to apply. It possesses in the highest degree and concentrated form those constituents best calculated to nourish the grass, promote its luxuriant growth, and the dark green color so greatly admired. It is not only the most perfect lawn dressing that has been devised, but it is the most pleasant to handle, being practically non-odorous. Being dry and fine it is easy to apply, and imparts a vigorous growth to the grass. In preparing a new lawn, sow 10 to 30 lbs. per 1000 square feet of surface, according to richness of soil, raking it in thoroughly. For top dressing on lawns, use half this amount, about 10 lbs.

TOOLS AND IMPLEMENTS.

To reduce the cost of gardening it is necessary to have the best tools. A good wheel hoe is as much superior to a common hoe for cultivating a garden as a mowing machine is to the sickle in the hay field. All of the following tools have been thoroughly tested, and for their own particular class of work, have given splendid satisfaction. Notice reduced prices. If you desire it we will send illustrated circular describing any of the tools in which you are interested.

MATTHEWS' NEW UNIVERSAL CONSTELLATION DRILL.—The latest improved, and we are convinced that this new tool is one of the best. For many years we used the Matthews' Seed Drill on our farm and this is improved in many ways. It sows perfectly all kinds of seeds at any depth with mechanical precision, covering and rolling it down in the most approved manner; has a very complete set of cultivating attachments consisting of plows, hoes, rakes and cultivator teeth as shown in cut. Can be used either with one or two wheels and the seeding apparatus is detachable and interchangeable with the cultivator tools. Price, only \$8.00.

MATTHEWS' NEW UNIVERSAL CONSTELLATION DRILL AND CULTIVATOR.

UNIVERSAL DOUBLE WHEEL HOE.

ments shown in cut, consisting of one pair each of hoes, plows, rakes, narrow cultivator teeth, and wide cultivator teeth. Also a pair of leaf lifters or vine guards, which are quite a help when the plants become large. The adjustable arch not only forms a means for gauging the depth of work to be performed, but, by an ingenious device, enables the teeth to be pitched at any angle desired. Price, only \$5.00.

UNIVERSAL DOUBLE WHEEL HOE.—Plain.—The above tool with only one pair of hoe blades for \$3.50.

PLANET JUNIOR NO. 16, SINGLE WHEEL HOE.—This latest and best single wheel hoe has a very full set of tools, several of them being of new design, such as have been found to work in the very best manner. It has an 11-inch wheel, with broad face; is very light, strong and easy running. It has adjustable handles and quick-change frame. The tools are a well-shaped plow, a pair of 6-inch shield hoes and three all steel patent cultivator teeth, also a set of two rakes and a practical leaf guard. Price, \$5.35.

PLANET JR. NO. 17, SINGLE WHEEL HOE.—Has one pair of hoes, three cultivator teeth and a plow. This is just the right assortment of tools for a family garden and should become very popular. If desired, the rakes and other attachments can be added later to make a complete tool. Price, only \$4.50.

PLANET JR. NO. 12, DOUBLE WHEEL HOE.—This most practical tool is made for gardeners. The arch is high enough to enable the operator to work both sides of the row at once until the plants are eighteen inches high, then the wheels can be set close together and work between the rows. It will do the work of six men with ordinary hand hoes. The cultivating attachments consist of one pair of 6-inch hoes, two pairs of hollow steel cultivator teeth, one pair plows and one pair of leaf lifters. Price, \$6.50. Rakes 75c pair extra.

PLANET JR. NO. 13, DOUBLE WHEEL HOE.—This is identical with No. 12, described above, but has only one pair hoes; no other attachments. Price, \$4.25.

PLANET JR. NO. 8, SEED DRILL.—We regard this drill as the acme of perfection and most decidedly the best seed sower made. It will sow perfectly, either in a continuous row or drop the seeds in hills, 4, 6, 8, 12 or 24 inches apart. It opens the furrows, drops in hills or drills, covers, rolls down and marks the next row, all at one operation. It has a force feed, sows equally well whether the hopper is full or contains only a paper of seed. Price, \$10.00.

FIRE-FLY PLOW.—This is one of the nicest little tools imaginable. With it you can plow the ground, even if hard, by attaching ropes to the eyelet holes on each side of the wheel. It makes the care of the vegetable garden a pleasure. Price, only \$2.25.

FARMERS' SINGLE WHEEL HOE.—This is made by the manufacturers of the celebrated Planet Jr. tools and is especially designed for the farmers' garden work. The wheel is high so that it runs easily. The attachments consist of a large plow steel, a 10-inch sweep, 6-inch sweep, 4-inch cultivator tooth and a 2-inch cultivator tooth. It is strong, well made and can be quickly set so as to be useful, whether in the hands of a man or woman, boy or girl. Strength, variety of tools and cheapness are its great virtues. Price, \$3.75.

ACME SEED DRILL.—A little tool of very simple construction. While not equal to the more expensive drills, still thousands of persons have been pleased with them. Price, \$1.25, or to persons who order seeds from us also, the price will be only \$1.00, charges prepaid.

EUREKA SEED DRILL.—A great improvement on the above in every respect. Gardeners will like it for sowing seeds in hot-beds. Price, \$1.25, or postpaid for \$1.50.

SPECIAL PRICES.
If you want any tools and a bill of seeds send list for our special quotations on the entire bill.

FARMERS' SINGLE WHEEL HOE.

Ask for Catalogue of Planet Jr. Tools and prices on Special Tools

PLANET JR. NO. 1, COMBINED DRILL.

and from, etc. As a hoe, it works safely to and from both sides of the row at once, or between the rows. As a cultivator it is admirably adapted to deep mellowing of the soil. Each machine is sent out with the tools shown in the cut. Price, \$9.00. Pair of rakes for same 50 cents extra.

PLANET JR. NO. 8, HORSE HOE.—Probably no other cultivating machine is so widely known as the "Planet Jr." Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world. It is so strongly built as to stand incredible strain, yet is light and easy to handle. The depth is under perfect control by a new lever wheel and patent depth regulator, moved instantly in unison by a single lever, making exact work, steadying the machine and relieving the operator. The reversible side hoes act as plows or hillers, but when turned end for end the tool becomes a genuine horse hoe, working so shallow and so close, without injury to the roots, that an immense amount of hand labor is saved. Price, \$8.50.

PLANET JR. NO. 25, COMBINED SEEDER AND CULTIVATOR.—A large Drill and Double Wheel Hoe, intended specially for market gardeners. Sows all kinds of garden seeds in hills or drills, and combines with it a Double Wheel Hoe, Cultivator and Plow. Ask for descriptive circular. Price, \$13.00.

CLIPPER SEED CLEANER.—An up draft fan-mill and does the best work in cleaning all kinds of seed and grain. Farmers would in many cases save the price of a mill by cleaning and grading up their grain before selling. Price, only \$22.00, or if sent direct from the factory in Michigan, only \$19.40.

PLANET JR. TWELVE-TOOTH HARROW.—For fine cultivation either deep or shallow, this has no equal. Hand levers regulate both width and depth while in motion. It cultivates deep without throwing earth upon the plants, and the smooth, round throated teeth turn strawberry runners without injuring them. We know and will guarantee it to be the best harrow on the market. The recurved throat and high frame prevent clogging, and the reverse position is given to the teeth in a very short time by changing a single bolt in each. It is provided with a pulverizer which leaves the ground in fine condition. Price, \$8.50, or without the pulverizer, \$6.90.

EUREKA SEED DRILL.—A great improvement on the above in every respect. Gardeners will like it for sowing seeds in hot-beds. Price, \$1.25, or postpaid for \$1.50.

SPECIAL PRICES.
If you want any tools and a bill of seeds send list for our special quotations on the entire bill.

PLANET JR. 12-TOOTH HARROW AND PULVERIZER

SPECIAL PRICES MADE ON PLANET JR. TOOLS WHEN ORDERED WITH A BILL OF SEEDS.

INDIANA BROADCAST SEED SOWER.

—Has a solid malleable iron frame but the hopper and most of the balance of the machine is of steel. The bag will hold half a bushel. It is equipped with an agitator thus making a practical force feed, and also with a seed gauge for adjusting quantity of seed sown. The crank can be used either on the right or left side, and it is therefore the only seeder that we

know of that a left-handed operator can use with ease. It weighs only 3½ pounds; will sow 50 feet of wheat or rye at a round, 30 to 36 feet of flax, clover, timothy or millet; light grass seeds 15 to 30 feet. Price only \$1.50.

LITTLE GIANT BROADCAST SEED SOWER.

—Simple in construction, light, strong and durable, no feed plate to carry and only weighing 3 pounds complete. Will sow orchard grass, clover, timothy, wheat, etc. Even if you only have a small field to sow it will pay you to have one of these so as to get it distributed evenly. Each \$1.25.

EUREKA POTATO PLANTER.

—The best hand potato planter that we know of as it does the work perfectly. Also plants beans and seed corn equal to any corn planter. See cut. Price \$1.25.

GARDEN TROWELS. — 5-inch 10c, by mail 15c; 6 inch 15c, by mail 20c.

FLORIST TROWELS. — Extra heavy 40c; by mail 50c.

DIBBER. — Steel pointed, for transplanting vegetable plants. Each 30c, by mail 40c.

LITTLE GIANT.

EUREKA POTATO PLANTER.

WATER'S TREE PRUNER. — The standard make; with 6 ft. pole 85c, 8 ft. pole \$1.00 10 ft. pole \$1.20.

IMPROVED HAND PRUNING SHEARS. — The best hand shears on the market. Made specially for pruning berry or rose bushes, grapevines etc. Made of best steel, 8 inches long, spiral spring. Price 75c, postpaid 90c.

CONNECTICUT PRUNING SHEARS. — A good tool for most work. Steel blades, flat spring, malleable handles. Price 50c, postpaid 65c.

WILKINSON'S HEDGE SHEARS. — The best hedge trimmer that we know of. Prices, 10-inch blade \$3.00, 12-inch blade, \$4.00 per pair.

CONCAVED AND CURVED SEED POTATO KNIFE. — It is thin and of the right shape to cut 1, 2 or 3 eye pieces fast and not crack the tuber, nor injure the germ. Each 35c, postpaid.

HOTBED THERMOMETER. — A tested 10-inch thermometer incased in a round wood tube, with open face, and pointed brass bottom. Each \$1.00.

RAFFIA. — Excellent for tying asparagus and other vegetables. Also used for budding. Lb. 25c, 10 lbs. \$2.00; by mail, lb. 40c.

'HANDY' CORN SHELLER. — Sheller is simple, strong, convenient and cheap. Can be used for shelling seed corn, pop corn, corn for chickens, etc. Weight 15 lbs. Price \$1.75.

LANG'S HAND WEEDER.

—It is our opinion the best weeder made. Its special advantage over all other weeders of this class is that it has a band which passes over the fingers, which, when the tool is not in use, gives full use of the hand for pulling weeds and thinning out plants without laying down the tool. Price 25c, \$2.50 per dozen, or 30c each, postpaid.

LANG'S HAND WEEDER
HANDIEST TOOL ON EARTH. 30¢ BY MAIL PREPAID

RAMSEY ADJUSTABLE CORN HUSKER. — Farmers say that with it they can husk 25 to 50 per cent more corn and can do it with less labor. The strain does not come on the fingers and thumb, but is on the strongest part of the hand. The husker is attached with triple straps and three buckles and fits the hand perfectly, leaving the fingers free and making a perfectly wrist support. Price 50c each, postpaid; 6 for \$2.50.

EXCELSIOR WEEDING HOOK. — Can be used to great advantage among small and tender plants. Price 10c, doz. \$1.10, or postpaid for 20c each.

BLUE GRASS STRIPPERS. — For gathering seed. Each \$2.00. |

GALVANIZED WIRE TRELLIS.

—For vines, peas, tomatoes, etc. In dispensable in every well-kept garden, is easily put up, more tidy than brush and practically indestructible. Can be rolled up, stored away and used again year after year. The best trellis made for Sweet Peas and other flowering vines, as well as for garden peas, tomatoes, etc. Trellis of best galvanized netting, 4 feet wide, 2 inch mesh, is furnished in 10 foot lengths. Price, per 10 ft. length, 40c, per dozen length, \$4.00.

**GALVANIZED WIRE GARDEN TRELLIS.**

—Decidedly the best hand corn planter made, and a very desirable implement for those who have but a small field, or need to replant their ground. It puts the corn exactly where you want it and at a proper depth. Price \$1.50.

ROTARY CORN PLANTER.

—If you are bothered with moles you should purchase one of these traps. It is undoubtedly the best trap made and no mole can pass under it and live. Price only \$1.00.

DANDELION PULLER. — Each 25c, by mail 40c.

SPHAGNUM MOSS.

—Clean, nice moss which is used largely for packing fruit plants for shipment. It is put up in large burlap or wire-bound bales. Price \$1.25 per bale; 5 bales or more at \$1.10.

SCREW BRID CAGE HOOKS.

—The most popular style as it is inconspicuous, neat, cheap and makes only one hole in the casing. Nice for bird cages

ROTARY PLANTER.

or hanging baskets. Each 5c, postpaid 12c. Other styles 10c to 65c each.

FLUTED FLOWER POTS. — A handsome pattern. The following prices per dozen are for the pots and saucers; 4-inch 60c; 6-inch \$1.00; 7-inch \$1.50; 8-inch \$2.40; 9-inch \$3.00. We make no charge for packing or delivering at the depot here. Orders for these must amount to at least \$1.00. Hanging baskets and jardiniere, many styles @ 15c to \$1.00 each.

REDDICK MOLE TRAP.

RAFFIA WORK.

Making Indian Baskets is now attracting a great deal of attention, and the work is taught in public schools, art classes, etc. It is a very interesting and fascinating pastime, is easily learned and many ornamental pieces are made. We furnish the materials in large quantities to schools, as well as to private parties. Our stock is unsurpassed.

NATURAL RAFFIA. — Per bunch (about 3 ozs.) 10c, lb. 25c; 5 lbs. \$1.00.

COLORED RAFFIA. — In many handsome colors, such as light and dark red, pink, three shades of green, light and navy blue, light and dark brown, orange, yellow, black, purple, etc. Price per bunch (about 2 ounces) 10c; lb. 75c. Mixed colors same price. Bleached white bunch, 15c; lb. \$1.25.

REEDS. — (Rattan.) — Any size, 10c per bunch. The No. 1, \$1.50 per lb; No. 2, \$1.25; No. 3, \$1.00; No. 4, 85c; No. 5, 75c; No. 6, 60c; No. 8, 50c per lb.

POSTAGE. — If to be sent by mail, add 3 cents per bunch, 16c per lb., for postage on the above Raffia and Reeds.

RAFFIA NEEDLES. — 12c per pkg. postpaid.

HOW TO DO IT. — A book telling how to make baskets and other Raffia weaving. Price 25c.

CHILDREN'S GARDEN TOOLS.

Why not give your children a garden this year? It is not only healthful exercise but they consider it play, and the care of the garden teaches them much of nature and they early learn to love flowers. The following sets of garden tools are desirable. We do not prepay express charges on these tools:

No. 1. Consists of small hoe, rake and spade. Length 22 inches. Price per set only 10c.

No. 2. Large and much better tools. Price per set 25c.

No. 3. A really serviceable and desirable set. Used also by many ladies for working in their flower beds. Price per set 50c.

WE DO NOT PREPAY THE CHARGES ON ANY TOOLS OR SUNDRIES EXCEPT WHERE NOTED.

SPRAYERS AND INSECTICIDES.

DAISY SPRAYING PUMP.

Each year proves the importance of spraying fruit trees and plants in order to destroy the insects and secure a good crop of fruit. The largest and most successful fruit growers are the most enthusiastic on spraying. It will pay you to invest in spraying apparatus if you have only one fruit tree. The spraying of apple and plum trees is especially recommended. Will furnish table giving formula for making mixtures and directions for application of same, upon request.

DAISY SPRAYING PUMP.—This popular little sprayer is shown by our illustration. We sell hundreds of these pumps which are used for spraying insecticides and whitewash in the poultry house, also for spraying fruit trees and plants. Can be changed so as to throw a solid stream of water 20 to 30 feet high and used for washing windows, buggies, etc. Price only \$1.00. Can be sent by express only.

RIPLEY'S COMPRESSED AIR SPRAYER.—We believe this is the best sprayer on the market for general use on all kinds of plants and trees not over 25 feet high. It is claimed by the manufacturer that it will stand a greater pressure and force a finer spray or a continuous stream a greater distance than any other compressed air sprayer made. It is made to strap to body and a person can walk along and spray at leisure by simply turning the stop cock off and on. These sprayers are all fitted with single Vermorel nozzle for fine or coarse spray, and with three feet of hose.

No. 15—4 gal. galvanized, the most convenient size each.....\$5.00
No. 16—4 gal. copper, will last the longest in using poison solutions, each..... 7.00

TYRIAN PLANT SPRINKLER.—Excellent for use on house plants. With it you can without injuring the plants or soaking the earth quickly and very effectively sprinkle them. It will render valuable aid in keeping the foliage fresh and healthy and free from insects of all kinds. The bent neck enables you to spray the under sides of the leaves, which are usually the insects' hiding place. Each 75c. postpaid.

RIPLEY'S COMPRESSED AIR SPRAYER

LEVER BUCKET or BARREL SPRAY PUMP.—Similar to the Little Giant, but has lever handle and can be attached to barrel or bucket. Price \$4.75, with 8-foot extension \$5.25.

LIGHTNING SPRAYING PUMP.—A low-priced serviceable bucket spraying pump that will give satisfactory results. It is made of heavy galvanized iron, furnished with nozzle for throwing either a stream or a spray. Each \$1.90.

MYER'S BARREL SPRAY PUMP.—This is a most complete and satisfactory spraying pump, and especially adapted for spraying large orchards. The cylinder, valves, valve seat and discharge are all brass. Furnished complete with five feet of discharge hose. Price \$9.00; with 8-foot extension pipe 50c extra.

LIGHTNING C. A. SPRAYER.

LIGHTNING COMPRESSED AIR SPRAYER NO. 30.—An improved heavy galvanized iron tank, holding two gallons which works with a compressed air pump automatically. Will give a fine mist spray or throw a solid stream 20 feet high. It is provided with a safety valve to prevent over pressure and a strainer so no sediment can obstruct pipe. Complete with hose and new style spring faucet, only \$2.50.

THE LITTLE GIANT BUCKET SPRAY PUMP.—Constructed entirely of brass and is provided with a large air chamber and has ball valves, and the pressure is held uniformly in the air chamber and on the hose, so that the nozzle throws a continuous spray. Will throw a solid stream 50 to 60 ft.; fitted with hose and imperial combination and fine and coarse spray and solid stream nozzle and malleable foot rest. Price \$3.75; with 8-foot pipe extension \$4.25.

LITTLE GIANT PUMP.

TYRIAN PLANT SPRINKLER.

LIGHTNING ATOMIZER NO. 2.—One of the best insect exterminators on the market. The reservoir is made of the best brass with double tube and has double the capacity of any other atomizer that we know of, thoroughly covering a wide space at each action of the handle, and spray is so fine that it thoroughly covers both under and upper sides of the leaves. Price only \$1.00; postage 25c extra.

FAULTLESS INSECT SPRAYER.—An all brass hand sprayer. Will not rust. The best hand sprayer for applying liquids and insecticides to poultry houses and live stock. Also valuable for spraying grapevines, small trees and shrubbery. Made of heavy brass and very durable. Price by express, not prepaid \$1.00. Same made of tin 50c.

FAULTLESS SPRAYER.

STAR INSECT POWDER GUN.—Handy size for house use to blow powder in cracks and crevices. Largely used for killing houseflies 10c each, postpaid 13c.

DALMATIAN INSECT POWDER.—The best grade, fresh and nice. It does not pay to use the cheap ordinary grades. Lb. 40c, 5 lbs. or more at 35c; postage 16c per lb. extra.

TOBACCO DUST.—Destroys rose bugs, lice, cut worms, vine bugs, tomato worms, cabbage lice and parasites of all descriptions. Should be applied when the foliage is wet. Also a most complete fertilizer for plants and vines; will not burn or injure the plants. Price, lb. 10c; 5 lbs. for 25c; 16c per lb. extra if by mail.

DISPARENE.—After two years test in our own orchard we are convinced that this is the best of all insect destroyers. It is safe to apply on even the most tender foliage and stays on well. Price, 2 lb. can 60c, 5 lb. can \$1.20 by express.

BELLOWS.—Use for applying Slug Shot or any kind of insect powder. It is thoroughly well made and works well. Length 23 inches. Holds 6 ozs. of powder. Price \$1.00. Postage, if sent by mail, 30c extra. Spreader for distributing powder evenly, 25c extra.

SULPHO-TOBACCO SOAP.—For a cheap, effective, clean and harmless insecticide for amateur and professional growers this is unexcelled. Quickly exterminates all insect life on plants and flowers in and out of doors. Unsurpassed for rose bushes. For domestic purposes it rids the house of cock-roaches, and is a superior wash for dogs and all animals. Prevents poultry lice. A trial will give highly gratifying results. Three ounce cake, sufficient for 1½ gals., prepared solution, 10c, mailed postpaid 13c. Eight ounce cake, sufficient for four gals., prepared for solution 20c, mailed postpaid 28c.

SPRAGUE'S FLY BOUNCER.—It instantly drives away flies, mosquitoes and all other insect pests. It is a relief to cows, horses, etc. Stock of any kind sprayed with Fly Bouncer will not be troubled with insects while feeding. It is excellent for barbed wire cuts and other injuries. It prevents inflammation and causes wounds to heal rapidly. Can be economically applied by using with our Faultless Sprayer. Price ½ gal. can \$1.00, 1 gal. can \$1.50, 5 gal. can \$7.00.

ANT EXTERMINATOR.—Ants become great pests and disfigure the lawn badly with their piles of dirt. This is a non-poisonous powder which, when sprinkled around, will kill or drive away ants from lawns, trees, houses, etc. Has proven very satisfactory to our customers. Price 25c. by mail 30c.

HAMMOND'S SLUG SHOT.—A combination of the most potent insecticides and soluble plant food. It destroys all insects injurious to house and garden plants, shrubs, trees, vines, potatoes, melons, cabbage, currants and vegetables and fruits of all kinds. This preparation, though poisonous to insects, does not injure the foliage in the least. When you order your seeds, if you have not tried Hammond's Slug Shot, order a five or ten lb. package. Not prepaid, 5 lbs. 30c, 10 lbs. 60c, 25 lbs. or more at 5c per lb.; postpaid, 1 lb. 25c, 4 lbs. 95c.

DUSTERS.—Buckets with perforated bottom used for applying Slug Shot. Each 35c.

TRADE MARK.

Spraying Instructions:

tions how and when to use them, mailed free on request.

A circular giving full formula for making all the best spraying preparations and instructions

BOWKER'S FOOD FOR FLOWERS.—A fertilizer made especially for plants grown in the house; clean, free from offensive odor and is largely soluble in water, producing healthy plants and early and abundant blossoms, to which it imparts a rich and brilliant color. A large box containing sufficient for 20 plants for one year 25c, or postpaid 40; small package 15c, postpaid 25c.

WALKER'S EXCELSIOR PLANT FOOD.—A soluble food for house plants containing all the elements necessary to nourish and make beautiful both flowers and plants. It makes brighter flowers and prolongs the period of blooming. Large box containing sufficient for 25 plants one year 25c, or postpaid 40c; small pkg. 15c, postpaid 25c.

JAPANESE PALM FOOD.—A chemically prepared fertilizer that will make healthy plants and beautiful foliage. Odorless, soluble and readily assimilated. Endorsed by palm growers who have used it. Excellent for Palms, Ferns, Rubber, etc. Price 25c, postpaid 45c.

WIRE PLANT STANDS.—For strength, beauty of design and superior finish, our stands are unexcelled, if equalled. The No. 10 illustrated herewith, is a very popular style. Price only \$4.50, or without the arch for \$3.50. Other styles cheaper. Illustrated list free.

WIRE WINDOW SHELVES.—These can be fastened to window frames either inside or outside. They are strong and attractive. 36 inches long, 6 or 7 inches wide. Each \$1.00.

WIRE BRACKET.—This new pattern is a very cheap, handsome bracket, made of tinned ware. Price, 4 1/2-inch, 10c each, \$1.00 per doz.; 5 1/2-inch, 12c each, \$1.25 per doz.; 6 1/2-inch, 15c each, \$1.50 per doz.; postage 8c each extra.

TRELLISES.—Many patterns of wood and wire trellis. 15c to \$2.00 each.

CANE PLANT STAKES.—Desirable for plant supports. 20c per doz., \$1.00 per 100.

NO. 10 PLANT STAND.

FRUIT PACKAGES.

Bright smoothly cut stock which will make the fruit look nicer and sell better. Prices named here are subject to change. Ask for price list.

BERRY BOXES.—Made of the best white wood (poplar) heart stock, cut smoothly, and perfect shape; size 4 1/2 x 4 1/2 x 3 1/2, and will hold a wine measure quart. The bottom is set up for ventilation. They are usually put up in bundles of 500 boxes, complete for shipment, and are all ready for putting together which can be done very rapidly. We furnish 500 at the 1,000 rate; broken bundles at the 100 rate. Price per 100, 40c; 1,000 \$3.25. If a large lot is wanted ask for prices.

ANNEALED TACKS.—1 lb. makes 1,000 boxes. Per lb. 25c, 5 lbs. \$1.00.

MAGNETIC TACK HAMMER.—Picks up the tacks and saves much of the labor. Each 12c.

CRATES.—Made of thoroughly seasoned stock, well ventilated at sides and bottom, but with a tight cover to protect from dust. We always ship in the flat or "knockdown." 16-qt. crates per 10, \$1.00, per 100, \$8.50; 24-qt. crates per 10, \$1.10; per 100, \$10.00.

CRATE NAILS.—Coated wire and far superior to any other. 12 lbs. (will make 100 crates) for \$1.00.

CLIMAX GRAPE BASKET.—The best package for shipping grapes, cherries, plums, etc. Nested for shipment with covers and bent handles in separate pkgs. 10 for 50c, 25 for 90c, 100 for \$3.25. Ask for prices in large lots.

SMALL CLIMAX GRAPE BASKET.—For fancy grapes, etc. Holds about 4 lbs. 10 for 50c, 25 for 90c, 100 for \$3.25.

HALF-BUSHEL BASKET.—The best all around basket for the use of farmers, fruit growers and grocers that we know of. It is very strong and well made and particularly adapted for picking fruit, potatoes, tomatoes and other vegetables. Swinging bale makes it easily handled. Price 15c each, \$1.65 per doz.

NO. 1.—ONE BUSHEL BASKET.—The ideal basket for general use. Thoroughly well made and meant for hard usage and should last many years. Each 25c, doz. \$2.75.

NO. 2.—ONE BUSHEL BASKET.—Like the No. 1, but cheaper made. One of the best packages for shipping apples and other kinds of fruit and vegetables. Each 15c, doz. \$1.75.

STAVE BASKET COVERS.—Made of slats for covering the baskets in shipping; make a secure cover. Price for one-bushel size 50c per doz.

DIAMOND MARKET BASKETS.—Per doz. 50c, 10 doz. \$4.25.

IRON MEASURES.—Made of heavy galvanized iron with side handles. Peck size, each 35c; half-bushel, each 45c; one-bushel, each 65c.

WOOD MEASURES.—Iron bound, to make them stronger. Half-peck, each 20c; peck, 25c.

CUT FLOWERS.

Owing to the fluctuation in the value of cut flowers at various seasons of the year, it is impossible to give a list of prices in this catalogue, but we will quote lowest prices on any list of flowers desired, by mail. They are always much higher at Christmas and Easter than at any other time. Ask for a catalogue of our Cut Flower Department which is conducted under the name Iowa Floral Co. Floral designs and decorations for weddings, banquets, funerals, etc., are a specialty.

Birds and Gold Fish.

We are sure that many of our customers will be interested in this department as the companionship of a bird has brightened the life of many a tired, overworked mother and the music of a good songster makes the whole house more cheerful. For many years we conducted the largest mail order business in this line in the world, but it has now been sold to the IOWA BIRD CO., of Des Moines, whose beautiful illustrated catalogue can be had free on application. We list a few of the most prominent items which can be ordered from us if desired and we guarantee prompt shipment and good stock. Prices are subject to change. Winter is the best time to ship birds and we ship them everywhere.

HARTZ MOUNTAIN CANARY.—These are bred in Germany, high up among the Hartz Mountains, and are famous for their restful melody. Male birds \$3.00 each. Female Canaries—for breeding, \$1.00 each.

ST. ANDREASBERG ROLLER CANARIES.—These birds are without doubt the finest songsters in the world. Each \$5.00.

EUROPEAN GOLD FINCHES.—Each \$2.50.

PARROTS.—We guarantee each bird to learn to talk. Stock is changing constantly. Ask for price when ready to buy.

IMPROVED BRASS CAGES.—Thoroughly well made and decidedly better than painted cages for birds. Size 5 1/2 x 8 1/2 in. 75c; 6 x 9, \$1.00; 6 1/2 x 9 1/2 \$1.25; 7 x 10 \$1.50; 7 1/4 x 10 1/4 \$2.00; 8 1/4 x 11 1/2 \$2.50. Fancy styles and larger sizes \$2.00 to \$5.00 each.

SUPERIOR MIXED BIRD SEED.—This is a specialty with us and we sell tons of it. Per lb. 10c, 3 lbs. 25c, 13 lbs. \$1.00, 50 lbs. \$3.50, 100 lbs. \$6.75. Postage 10c per lb. extra.

GERMAN SUMMER RAPE.—Fed largely to trained canaries. Same price as above. **SICILY CANARY.**—Best re-cleaned. Same price. **MAMMOTH RUSSIAN SUNFLOWER.**—Same price. **MIXED PARROT SEED.**—Best. Same price.

PREPARED MOCKING BIRD FOOD.—Best food on the market for all soft billed birds. Per large can 35c, postpaid 50c.

PAGE'S SONG RESTORER.—Successful in nearly every case of loss of voice from cold or moulting. Small cakes 5c each, dozen 50c, postpaid.

Gold Fish.—The most elegant of all parlor adornments. We can furnish handsome medium size fish at 25c each, 5 for \$1.00. Small size 10c and 15c each. Fancy Japanese and other fish 50c to \$5.00 each. Ask for catalogue of Fancy Fish, Aquariums, Fish Globes, etc.

EGGS FOR HATCHING.

We are prepared this season to supply eggs for hatching from choice farm raised, high grade thoroughbred stock of a few of the leading varieties. They are superior egg laying strains and have won many prizes at the leading poultry shows.

BARRED PLYMOUTH ROCKS.—The farmer's favorite. From large, well marked stock. Price per setting of 13 eggs, \$1.25.

WHITE PLYMOUTH ROCKS.—Great egg producers and very early to mature. Our stock is pure white. Price per setting of 13 eggs, \$1.25.

BUFF PLYMOUTH ROCKS.—Becoming very popular as a general purpose fowl. Per setting of 13 eggs, \$1.50.

WHITE WYANDOTTES.—Rapidly becoming favorites. They are great layers, mature early and are pure white. Price per setting of 13 eggs, \$1.50.

BLACK LANGSHANS.—Very satisfactory for general purposes. Per setting of 13 eggs, \$1.25.

BROWN LEGHORNS.—The greatest of all layers. Our stock is from one of the best laying strains in the country. Price per setting of 13 eggs \$1.25.

ROSE COMB BROWN LEGHORNS.—Per setting of 13 eggs \$1.50.

LIGHT BRAHMAS.—High scoring stock. Price per setting of 13 eggs \$1.25.

EGGS FOR INCUBATORS.—Write us for prices, stating the number of eggs you will want and breed. We will quote you our very lowest prices.

BREEDING STOCK.—A few choice cockerels and pullets at reasonable prices. Order early as our stock is limited. We send out only choice stock which will please our customers. Write for a price list.

BRONZE TURKEYS.—Usually scarce, but we hope to have a good supply this season. Price per setting of nine eggs, \$3.00.

MAMMOTH WHITE PEKIN DUCKS.—Per setting of 10 eggs, \$1.50. Ask for our illustrated Poultry Supply List. You will find that our stock and prices are both right.

WHITE PLYMOUTH ROCK.

1907 Collection of Sterling Vegetable Novelties.

There are so many of our customers who each year desire to test something new, that we are constantly on the outlook for the most desirable novelties from various parts of the world, and the five new sorts illustrated on the back cover of this book will, we are sure, please everyone. Any one of them is really worth the price charged for the entire collection, but we make the low price to induce you to give them a trial. We offer one packet each of all five varieties for only 30 cents,

JUNE PINK TOMATO.

This may briefly be described as a pink Spark's Earliana, as it seems to be identical with that variety except that it is of a handsome bright pink color. The plant is of neat compact growth, branching freely, with fruit hanging in clusters of six to ten fruits. Ripens fully as early as the Earliana, or about ten days earlier than most of the early sorts. The fruits are of medium uniform size, smooth, without cracks or green core. Skin is tough, thus making it a good shipper. The color is a bright pleasing pink, and in markets where the pink varieties are in favor it will bring readily 25 per cent higher price than the red sorts. It is a continuous bearer until cut off in the fall by frost. Per packet of about 100 seeds, 10c; 12 pkts. for \$1.00.

GRAY LARK RADISH.

A most unique variety of radish from Spain which had been grown for several years near New York City by some German market gardeners who found such a heavy demand for this sort that they devoted all their space to it. It is really an all seasons radish, making nice shaped little roots very early in the season, and they keep growing larger and hold their quality until late in the fall. They are crisp, brittle and of excellent flavor. The color is quite peculiar, being of a grayish brown spotted or diversified in appearance, and we are sure that it will soon become a favorite wherever tested. Pkt. 10c, oz. 25c.

LEMON CUCUMBER.

This is an excellent little vegetable which we are now introducing for the first time. It is round and about the size of a base ball or the size shown in the illustration on the cover of this catalogue. The fruits are produced in the greatest profusion and they hold their quality for a long season. They are used for slicing or sweet pickling in the same manner as any ordinary variety of cucumber, but they have a flavor peculiarly their own, superior to any of the other sorts. It is of best quality, however, when the fruit begins turning yellow. It is tender, crisp, and we are sure will be greatly liked by all who try it. Pkt. 10c.

ALL SEASONS POLE BEANS.

We cannot call this a new variety as it has been grown by one family for more than sixty years past, but we will call it a novelty of superior merit. In traveling around among our seed growers our attention was arrested by this superb variety of bean which looks so different from any other sort. We have tested it on the table and find that it is superior in flavor and quality, and for general family use it has proved itself the *non plus ultra*. The plant is a strong vigorous grower, clinging well to the poles, and also does excellently well growing with corn. It is from Kentucky where it was kept in the hands of one family for several generations, and has now been thoroughly tested in various parts of the north and south for the past few years. It begins bearing early in the season—fully as early as the Improved Valentine—and continues until severe frost. Large showy pods 6 to 8 inches long are borne in great clusters. We are sorry that we have only a few bushels of these beans to offer this year, but we want all our customers to test them. Pkt. 10c, ½ pt. 25c, pt. 40c.

ROMAINE.

This is really a variety of lettuce, although very different from the sort usually grown. It is very popular in France, where choice flavor in vegetables is especially appreciated. The leaves are of rather light green color shading to white when blanched. It is more uniform growing and self-folding than any of the other varieties of cos lettuce, so that it is really not necessary to tie the leaves together in order that it may blanch. We hope all our customers will give this grand novelty a trial this season and we are sure that you will be more than pleased with it. Possesses a flavor peculiarly its own crisp and delicious and people who grow it once are sure to continue to use it in the future. Pkt. 10c.

COLLECTION ONE PACKET EACH OF THE ABOVE FIVE NOVELTIES FOR ONLY 30 CTS.

FRUIT NOVELTIES.

NEW HOME STRAWBERRY.

On our own trial grounds we test each year a large number of varieties of strawberries, including almost all the new as well as the best standard sorts, and by careful comparison we found the New Home the best of all for general use. It is a new variety never before offered by us and we have the utmost confidence in it. It is of large size, handsome shape as shown in our illustration, of bright red color, which does not lose its luster or turn dark after being picked a long time. Its uniform large size and keeping qualities are sure to make it the most desirable of all varieties for shipping to distant markets. It has proved to be a vigorous grower on both high and low ground and produces an immense crop. One eastern grower reports a production of 1,000 quarts or more per acre at each picking during the height of the season. No matter if you have only a small place it will pay you to put in a strawberry bed and be sure that you set out at least a few plants of the New Home. Strong, well grown plants 50 cents per doz. \$2.00 per 100, charges prepaid.

STRAWBERRY RASPBERRY.

Or Tree Strawberry. A very beautiful fruit from Japan Bush from 18 inches to 2 feet in height, entirely hardy and impervious to heat and drought. The berries are larger than the largest strawberries, bright shining scarlet with an exquisite bloom. It makes excellent jelly, jams and tarts, having a delicious flavor entirely different from any other fruit. An immense yielder, producing regularly and abundantly. It bears the first season and gets stronger and larger each year. All lovers of fruit should give it a trial. Nice plants grown on our own place here, 25 cents each, \$2.50 per dozen.

THE KING GRAPE.

A grand, new variety which is attracting great attention among fruit growers in all parts of the United States. It originated from the Concord, which it resembles in color and flavor, but the fruits are much larger, the pulp more tender and delicious and the seeds fewer. The clusters are also of very much larger size. It originated in Michigan and has been very highly recommended by the Michigan State Horticultural Society. Not only is the individual grape of mammoth size, sometimes three inches in circumference, but the bunch also is very large, compact and present an exceptionally fine appearance on the market. A splendid shipping sort and one of the best keepers we have ever seen. Strong, well grown vines, 50 cents each; \$3.50 per dozen, prepaid.

NEW HOME STRAWBERRY.

Make Home Pleasant In this age of the world there are so many attractions to call the children away that parents must make home pleasant in order to hold them.

HOMEMAKER'S COLLECTION OF FLOWERS SEEDS.—One packet each of 12 varieties for 25 cents.

HOMEMAKER'S COLLECTION OF FLOWER PLANTS.—Consists of 12 choice flowering and ornamental plants, well suited to make an attractive, showy bed. Sent postpaid for 50 cents.

HOMEMAKER'S WINDOW GARDEN.—Consists of 10 choice flowering plants suitable for growing in the house. A fine assortment and all different. Price 50 cents postpaid.

FOR WEDDINGS Banquets and receptions there is nothing so nice as plenty of choice cut flowers tastefully arranged and for funerals they are indispensable. If you are interested in this subject ask for a copy of our cut flower catalogue. This branch of our business is conducted under the name of Iowa Floral Co., Des Moines, Iowa.

A Last Word: Well, what do you think? Is not this the most complete and practical catalogue that you have ever seen? Don't you believe that it will pay you to purchase your seeds, plants, nursery stock and other goods from us? Our long experience in growing and handling seeds and our unequalled facilities are at your service. Please give us at least a trial order this year. Address,
IOWA SEED CO., DES MOINES, IOWA.
